The racing days, as a rule, are Sundays, Wednesdays and Fridays, the principal meetings being held at St. Petersburg and Moscow, others also being held at Odessa, Kiev and Nezhney Novgorod. Instead of the horses being classified according to their records, they are handicapped by the amount of money they have won, and they are placed into what they call groups. A horse that has won 50,000 rubles advances to the first group, and after he has won 100,000 rubles, \$50,000, he is barred from all groups and can only race in special events, similar to our free for alls.

Special prizes are offered drivers as they progress from group to group—a strong inducement to win every heat. The government gives 1000 rubles, \$500, for every quarter of a second clipped from the ground or ice record.

There are but ten races each year to which American bred horses are eligible, and an American bred horse is permitted to win but two races at any one track during the season. There are a number of handicap events at each meeting in which they can start, but the handicap is generally so stiff that it is almost an impossibility for them to win. With the exception of five or six big events, the half-bred American horse may start in any of the regular events.

Up to a few years ago most of the events were two mile heats from a standing start, but of late the distance has been cut down and all events are to a flying start, with the exception of a few where the horses are handicapped and start from various points along the track and from a standing start, similar to the Austrian method of racing. Drivers weigh in with their sulkies; the combined weight must come up to 216 pounds, or sufficient lead must be carried to make that weight.

The race meetings are well attended, and the betting is heavy, the latter being conducted entirely on the Paris mutual system. When a well played favorite fails to win, the crowd is not at all backward of expressing its disapproval, the driver being heartily hissed and cursed. If the same driver should be successful in winning the next race, however, his former defeat is immediately forgotten and he comes in for much applause and laudation.

Mr. Caton is accompanied on his trip by Mr. A. Davy, an English horseman that has trained runners for several years in Russia.

The famous old broodmare Carrie Blackwood by Blue Bull 75, who is the dam of Atlantic King 2:09½, Major Centlivre 2:10½, Mary Centlivre 2:12 and Carrie Strathmore 2:17½, is a pensioner at the Spy Run Farm, Indiana, and wears her years lightly. Her last foal is the four year old colt Directum Centlivre by Directum 2:05½. He has the family good looks and will now be given a chance to learn to trot.

It is reported in the Eastern papers that Budd Doble denies that John Shepard, of Boston, is the owner of Kinney Lou.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

**WILL NOT SCAR OR BLEMISH.**

**GOMBAULT'S CAUSTIC BALSAM**

Is the safest and most effective lotion or blister for ailments.

**HORSES and CATTLE**

and supersedes all cautery or firing. It is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charge paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address: THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

## ROD, GUN AND KENNEL.

Conducted by J. N. De WITT.

### Fly-Casters' Banquet.

The San Francisco Fly-Casting Club members and their guests met around the banqueting board last Tuesday evening, the function being as usual a most pleasant gathering of congenial sportsmen.

The feature of the evening was an eloquent lecture by the Hon. Charles Wesley Reed on the California Redwood Park; that portion of the Big Basin in Santa Cruz county which is now State property and preserved to the commonwealth. Mr. Reed first explained the origin of the movement for the preservation of a beautiful section of country which contains more arboreal wonders and natural beauties than can be found possibly anywhere else in the world. Followed which the company were entertained with a series of magnificent stereopticon views illustrating the majestic beauties of the forest, the luxuriant and rioting vegetation of the undergrowth and the scenic possibilities of innumerable trout streams and wildwood waterfalls in an almost primeval country. Among the number of prominent gentlemen and ladies mentioned as being identified with the movement, the speaker called the attention of the gentlemen present to the unselfish and ever ready enthusiastic efforts of their fellow member, Mr. W. W. Richards, in helping to bring the purchase of the park to a successful issue.

Contrasting the natural beauties of the Big Basin were shown some pictures demonstrating the devastation and desolation following in the wake of the lumbermen. The lecturer aroused the enthusiasm of his audience, and the cause of forest preservation and kindred movements won many adherents, for anglers are lovers of nature primarily.

Walter D. Mansfield was toastmaster during the evening. Two new club members were elected, Dr. Charles J. Stevens and H. B. Sperry, to fill corresponding vacancies in the roll of membership.

Among those present were: Walter D. Mansfield, T. W. Brotherton, Colonel C. G. Young, A. B. Finch, Charles Wesley Reed, H. E. Skinner, W. W. Richards, H. Battu, W. H. L. Miller, A. Muller, James Watt, Dr. W. E. Brooks, W. F. Bogart, A. M. Blade, A. S. Carman, F. E. Davenport, J. Homer Fritch, Sam Allen, I. R. D. Grubb, F. M. Haight, Chas. Huyck, Sam Heller, C. B. Hollywood, H. E. Horton, Milton Cook, C. R. Keniff, E. Goodman, C. H. Kewell, J. B. Keniff, M. Goodman, J. H. Lowe, J. Peltier, J. B. Halstead, T. H. Reed, James S. Turner, P. J. Torrey, Alex. T. Vogelsang, Charles Vogelsang, M. W. Shadd, F. Mayer, A. P. Dawson, J. Nickless, T. C. Kierrulff, R. H. Smyth and J. X. De Witt.

The bright warm weather has given many San Jose sportsmen a slight attack of the spring fever, and they are seeking remedies with their fishing tackle along the different streams in Santa Clara county. During the last week trout fishing has improved wonderfully on all the streams. The water has become perfectly clear, and it is also becoming much lower. Anglers will have their best sport during the next month, providing there are no more heavy rains to raise the streams.

The warm weather has also been beneficial to fly-fishing. The trout are now rising in many of the streams to flies, this style of fishing gives promise of surpassing that of other seasons. More skill is necessary for the angler to land trout with the fly than with bait or spoon. One must know how to go at it or meet with disappointment. Old anglers, however, much prefer this method of fishing.

Among the streams which are becoming most popular to anglers this spring are the Waddell, Pescadero, San Gregorio and Big Creek. Several parties of San Joseans are being organized to go into the mountains for spring outings. Last Sunday there was a great exodus of sportsmen to the mountains on both sides of the valley, to whip the different streams for trout.

The close season for shrimp is now on and will prevail until September 1st. Fresh shrimp for bait is now out of the question. Anglers who have laid in a stock of salted shrimp are prepared for the season. The red spinner and shrimp have been an effective bait in the tide waters at Point Reyes recently for steelhead fishing.

Last Sunday during the College Gun Club trap shoot a large coyote was observed prowling about some distance away, Mr. Leavell who is known at Sunday shoots as "Edwards" started in pursuit and successfully stalked the animal after crawling laboriously over rough ground for a distance altogether of possibly three quarters of a mile. The feat was quite an unusual one, its termination being different from what generally happens when trying to stalk so wary an animal as a coyote, and reflects much credit upon "Edwards" for patience and skill. The coyote was a big dog and weighed 62 pounds. "Edwards" will be known hereafter by his shooting companions as "Coyote Ed."

### Fishing Tackle.

The H. F. Skinner Co., 801 Market street, have just received a better assortment of goods for anglers. Silk lines for trout fishing, line, these for salt water fishing. A few styles of striped bass lures, these cannot be surpassed anywhere. An assortment of rods and reels for every kind of fishing. New flies, new lures, hand forged striped bass hooks. Gut for leaders and shells, and many other goods and fittings, new styles of fly boxes, and a miscellaneous lot of anglers' necessities that form the most complete and best stock the firm has ever received.

### Striped Bass Fishing at Lake Merritt.

The possibilities of Lake Merritt as a striped bass fishing resort are not to be disputed. The lake is full of fish, some big ones have been caught recently. The repairs to the floodgates and roadway on East 12th street are finished and the lake will soon be in fine shape and inviting the presence of the angler.

A piece of extra good news for fishermen is the fact that new boats and plenty of them can now be procured at reasonable prices. A. J. Fatjo, a well known local sportsman, has purchased the Lake Merritt boat house and proposes to use every endeavor to make his place the headquarters of the bass fishermen. Accommodations in the way of live bait, tackle, etc., will be appreciated. Improvements are contemplated on a scale that will eventually make the boat house a notable and popular resort. Mr. Fatjo's preliminary announcement to sportsmen appears on page 14.

### San Francisco Fly-Casting Club.

SUNDAY CONTEST No. 5—Stow Lake, April 26, 1903.

Events	1	2	3	4
		a	b	c
Young, C. G.	87	88	81	82
Battu, H.	86	88	81	70
Torrey, P. J.	76	93	4-12	70
Haight, F. M.	78	81	64	70
Brooks, Dr. W. E.	96	87	83	72
Keniff, J. B.	104	86	89	85
Keniff, C. R.	111	89	8-12	91
Potter, A. M.	75	70	8-12	83
Blade, A. M.	88	37	66	8-12
Brotherton, T. W.	100	90	85	4-12

Golcher, H. C.	111	77	4-12	84
Lane, F. J.		86	71	71
Foulkes, G. H.	75	80	4-12	71
Carr, A. B.		80	4-12	86

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage, (b) delicacy percentage; (c) net percentage. Event 4—Lure casting, percentage.

The fractions in lure casting are 15ths.

### AT THE TRAPS.

The California Wing Club Shoot last Sunday drew a fair attendance of pigeon shooters. The birds supplied were strong and swift; added to this the wind was pretty strong round about the traps and all the unsheltered portions of the grounds; these conditions were instrumental in spoiling a number of promising scores. Dr. A. T. Derby and C. C. Nauman scored straight, dividing first and second moneys. Six shooters, Otto Feudner, Dr. McConnell, Dr. Knowles, G. H. T. Jackson, P. J. Walsh and W. R. Murdock, divided the balance of the \$75 added money. At the club shoots the purses and pools are distributed in the ratio of one money for every three entries, high guns. The same handicaps prevailed in the minor matches as were the rule in the club shoot. Following the club race pool shoots were in order. The scores made during the day were as follows:

Club match, 12 pigeons, distance handicap, \$75 added, 5 moneys, high guns—

Naumann	32	32	32	22	12
Haight	31	31	31	20	9
Derby	30	30	30	18	9
Barker	30	30	30	18	9
Murdock	30	30	30	18	9
Justus	29	29	29	17	9
Golcher	28	28	28	16	9
Walsh	28	28	28	16	9
Jackson	28	28	28	16	9
Knowles	28	28	28	16	9
Kiereshal	26	26	26	14	9
Donohoe	32	32	32	22	12
McConnell	27	27	27	15	9
Feudner	31	31	31	21	11

Six bird pool, \$2.50 entrance, distance handicap, 3 moneys, high guns—

Haight	023202-4	Donohoe	222202-5
Derby	212120-5	McConnell	212120-5
Feudner	222222-5	Walsh	111120-5
Nauman	222222-5	Jackson	112121-6
Barker	1120-3		

Ten bird pool, \$2.50 entrance, 3 moneys, distance handicap, high guns—

Barker	1122212-9	McConnell	1102222-9
Jackson	1211120-9	Justus	122222-9
Donohoe	2122221-10	Derby	22111120-9
Nauman	2022211-9	Haight	22111221-9
Walsh	1211120-8	Murdock	2011-1
Feudner	2222221-9

Nauman	122221-6		

Six-bird pool, \$2.50 entrance, 3 moneys, distance handicap, high guns.

Haight	122220-4	Nauman	022222-5
McConnell	112121-6	Walsh	122121-6
Donohoe	022200-3	Feudner	222222-6
Derby	120W	Jackson	221222-6
Golcher	212121-6	Barker	2112-2

One of the features of the Golden Gate Gun Club shoot at Ingleside to-morrow will be the re-entry race, \$15 added money, three moneys, \$6, \$5 and \$4, 25 cents

entrance. Number of individual entries unrestricted. The club program consists of four events; \$50 will be added in the regular club race at 25 targets.

The Auburn and Lincoln Gun Clubs held their deciding shoot on the 3d inst. The Lincoln club again won. The following scores show the shooting of each side, Lincoln's total being 183 to Auburn's 174:

Auburn—H. W. Davis 21, C. M. Donnelly 18, L. E. Safford 18, E. H. Gum 15, E. A. Futey 21, D. J. Chamberlain 17, A. L. Robinson 17, W. C. Brown 21, R. W. Sullivan 8.

Lincoln—W. Barrett 19, G. Williamson 19, L. Brown 16, H. J. Vetter 20, F. A. Duryea 21, G. Barrett 15, Shuler 17, D. Barrett 23, Hughes 16, J. Toft 17.

S. S. Juster is now the holder of the Putzker cup, having won it for the third time last Sunday at the shoot of the College City Gun Club. The conditions of this contest were a shoot at 20 targets, the first 10 to be shot from the 16 yard line, shooters breaking 9 and 10 targets shoot the remainder from the 20 yard line, 7 and 8 breaks, 18 yard line; 5 and 6 breaks from 16 yard line and 5 breaks from the 14 yard mark. The cup had to be won three times before permanent ownership. The first win handicapped the shooter 2 yards, the second 2 yards again, thus making the winner shoot his prevailing race from the 20 yard mark. Mr. Juster has shown great improvement during this season and the last and is a consistent and painstaking shooter. The win was a popular one. His winning score was 19 out of 20 targets, 20 yards rise.

"Edwards" was high gun for the club gold medal. Reed made the highest score in the "shell race." This contest is under sealed conditions, the winner will receive a case of Selby factory loaded shells. Searies and Reed were high men in the re-entry race. Two prizes will be awarded to each of the two highest scores for the club season. Newcomb won a keg of powder, this prize was donated by a member. Reed and Edwards were the only bar winners during the day. The scores in the various events were the following:

Putzker cup race, 25 targets, distance handicap—

Juster	20 yds—11111 0111	30 yds—11111 1111-19	
Reed	20 "—11011 1101	20 "—11111 1001-16

Hutton	01010 11111 10110 11011 11011-18

Re-entry race—Reed 7, "Edwards" 2, Juster 2, Searies 5, Baird 2, Reed 2, "Edwards" 0, Juster 2, Searies 9, Baird 1, Hutton 3.

Kege of powder race, 25 targets—Newcomb 21, Reed 19, Baird 15, Edwards 18, Fish 13, Hutton 17.

Practice, 15 targets—Hutton 12, Fish 9, Kerrison 13, Baird 11, Juster 12, Searies 11, Kerrison 8, Edwards 13, Reed 14, Hutton 5, Baird 13, Newcomb 12.

Practice, 25 targets—Reed 23 (silver bar), Edwards 20, Hutton 13, Kerrison 19, De Merritt 18, Reed 22, Edwards 16, Newcomb 15, Hutton 15.

Sacramento shooters have shown much interest in trap shooting since the season opened. Each Sunday the sportsmen meet at one or the other of the local trap grounds. Last Sunday was an ideal one for blue rock shooting, and the scores that were made on the the Kimball & Upson grounds were above the average.

De Merritt was high man in the club shoot, breaking 24 out of 25, giving him a gold bar and placing him in the championship class. Englehart, of Galt, also received a gold bar in the first class; Ludden won a bronze bar in the fourth class, and J. F. Brown a gold bar in the second class, which placed him in the first class.

Thos. L. Lewis, of this city, smashed blue rocks all day. Mr. Skinner, of Red Bluff, made two 24 scores, shooting in good style. Brady, of Oak Park, was also among the high guns, getting a score of 23. Fissel, of Davisville, connected with 23 in one of the events. Fred O. Brown was at himself, making 24 neat breaks, but unfortunately it did not happen in the club shoot. "Doc" Stuart of goose hunting fame also called in a few good scores. J. Gusto made the only 25 straight of the day. J. W. Hughes made one 24 score and two of 23 each.

Following are the club scores and two of the principal other events:

Club race, 25 targets—J. F. Brown 22, Anderson 17, Morgan 19, Callihan 11, De Merritt 24, Trumpler 10, Mathews 12, J. W. Hughes 19, Weldon 21, Smith 20, Adams 15, F. M. Newbert 24, Webber 14, Ludden 18, Fissel 19, Englehart 23, Blair 12, Gusto 17, Just 21, Upson 21.

Match at 25 targets—Brady 23, F. O'Brien 24,

Hughes 24, Skinner 24, Weldon 18, Newbert 23, Kerr Sr., 17, Fessel 21, Brown 21, Anderson 16, Vandeford, Sr., 17, Vandeford, Jr., 15, Eaglehart 25, Remington 19, Morgan 20, Mathews 14, Smith 21, Just 21, Gusto 23, B. F. Smith 18, Dr. Stuart 18, Hazen 17, Callihan 13, Kerr, Jr., 20, De Merritt 21, Adams 18, Trumpler 17, Blair 15.

Team race, 25 targets—O'Brien's team—O'Brien 16, Newbert 24, Weldon 18, Gusto 25, Morgan 18, Just 16—111.

Blair's team—Blair 15, Hughes 20, Upton 20, Fissel 23, Eaglehart 23, Smith 18—119, Blair's team winning in a walk.

A very successful shoot was held last Sunday by the Watsonville Rod and Gun Club at Watsonville. The first class medal was won by W. H. Varien, with a straight score of 25. This makes the third successive time that he has won the medal, which is now his property.

The second class medal was won by George Richardson with a score of 19 out of 25. The two gold medals offered by the Monterey Gun Club were won by W. H. Varien, 24 out of 25, first class; James Redman, 13 out of 25, second class.

The following are the scores: Dan Leady 14, Willoughby 11, Overhulser 16, Hedgeland 17, Winkle 20, Tohman 16, Alford 21, Albright 12, Carr 20, Work 21, Varien 25, Jensen 12, Wentworth 16, Richardson 19, Redman 13, Baxter 17, Malmgren 14, Whelan 17.

"No two of the new, high-power, small calibre rifles carry alike," remarks one of our best amateur shots. "It seems to be impossible to get them exactly uniform, and the consequence is that it is necessary for a man to get thoroughly acquainted with his weapon before he can make anything like a decent score. I was out with a few friends the other day, and we tried three new small calibre sporting rifles—the largest about .31. The difference in the 'drift,' or tendency of the bullet to go to either the right or the left of the target, was something remarkable. Then, again, they seem to act very arbitrarily under different sized charges of powder, and until one finds out by actual experience there is no telling exactly what they are going to do. This is not regarded as a serious objection to the arm, but merely as proving that it is necessary for every man to make a close study of his own particular gun. When you become familiar with its eccentricities and make your calculations accordingly, they cut no special figure in results. This fact renders enough practice absolutely essential with new troops who carry the Krag-Jorgensen. The time has gone by when a soldier can pick up any old gun and shoot as well with it as the next fellow. Under the new order of things two troopers may pull down on exactly the same spot and kill a couple of Filipinos three yards apart. To perform such a feat each fellow must know the direction of the drift of the 'Krag' he happens to be using. By the way, there is a great field just at present for inventors in the line of compensating sights, which will mechanically adjust such differences as above mentioned."

### Eczema In The Dog.

From the numerous inquiries made in reference to the treatment of the disease eczema, it might very well be concluded that it was almost the only skin disease with which the dog is afflicted. The term in itself is somewhat indefinite, at least as it is commonly employed. In its actual meaning it may be used to indicate any kind of eruptive disorder, but it is usually employed in speaking of the skin disease in the human subject to indicate certain forms of an eruptive affection which are attended with a considerable amount of exudation either of a vesicular or pustular character. Dermatologists have, in fact, divided eczema into seven distinct varieties. One form is described as simplex, or simple moist tetter; next Eczema rubrum, the red inflammatory form of eczema, which is also known as the mercurial form, owing to being caused by the injudicious use of mercurial compounds internally. Eczema impetiginodes is another term employed to indicate that form of eruption which is associated with pustules. The disease is also described as infantile Eczema lactea when it takes the form of light-colored crust or scab (Crusta lactea). There is, again, chronic eczema, or psoriasis, and, lastly, it is also described as a local disease by the terms eczema of the head or of the face and other parts of the body where the disease may happen to exist, so that there are seven distinct varieties which are thus distinguished one from the other. Whether or not these different forms are present in the lower animals it is absolutely impossible to determine because some of the forms, Eczema rubrum, for example, and Eczema mercurialis and Eczema lactea, could not be distinguished on account of the color and thickness of the animal's hair, which necessarily obscures many of those slight symptoms which would in themselves, if detected, be quite sufficient to define the class to which the disease belonged.

Certain forms of eczema can, as a rule, be distinguished without much difficulty—as Eczema simplex. The simple form of eczema, for example, would be at once detected by the presence of small pink patches on those parts of the skin which are the least covered with hair, each patch very soon becoming the site of a crop of vesicles with a tendency to run one into the other, and subsequently to burst, giving exit to a thin discharge. In cases of the acute form of the disease it is not uncommonly mistaken for mange, and, indeed, the symptoms are sometimes so closely allied that it is only by the use of the microscope for the purpose of detecting parasites if they exist that a distinction can be drawn satisfactorily. But, generally speaking, this critical inquiry is not absolutely necessary, because the suddenness of the eruption and the association of the disorder with gastric derangement, or with some debilitating cause, such as an

acute disease like distemper or the exhaustion resulting from excessive exertion, will be quite sufficient to distinguish the eczema from parasitic mange. The local symptoms of eczema are generally most obvious on the head, neck and back, but the eruption occasionally is spread over the whole body; the thin skin inside the thighs and under the abdomen and under the arms is found in such cases to be red in color, and the hair comes off in small patches, leaving a moist surface beneath. Sometimes the patches are dark in color and show numerous vesicles, which, as before remarked, have a tendency to coalesce and form blisters of considerable size. The escape of the discharge from the bursting of the vesicles is followed by an increase of the irritation, and it is particularly worthy of notice that a form of disease which is described as squamous eczema, a term which is not at all appropriate to the malady, is due to the drying of this fluid forming a kind of scurf, and where there is much hair causing it to be matted. The exudate also acts as an irritant to the surface and may occasionally lead to a certain amount of putrefaction, which naturally produces an extremely unpleasant odor. In the course of the disease the dog suffers not only from the irritation caused by the malady itself, but also from the effects of the constant scratching and biting the skin, which is thus frequently considerably damaged. This action on the part of the animal to relieve itself from the perpetual itching can hardly be checked, and the consequence is that a number of ulcers may be found which, like the vesicles, have disposition to spread. These sores often exhibit an obstinate resistance to all remedies. They are most difficult of all to deal with when they occur in the bend of joints.

In cases of long continuance of these lesions the disease assumes the form which is described as psoriasis, and in this stage a thick scurf or indurated condition of the surface is commonly noticed. The skin is rough, hard and drawn up into folds between which cracks and ulcerations will be discovered not at all unlike the crack in the heels of the horse under similar conditions. The skin when in this condition is not particularly sensitive but a very unsightly condition of the whole of the surface is present. It may be observed that eczema commencing in the simple form is not at all likely to remain in a stationary condition unless proper means are adopted for the purpose of checking its progress. The disorder unquestionably may be taken as an indication of malnutrition; the dog is probably more than other animals liable to the misfortunes connected with civilization, and certainly more than other animals is the victim of a vicious system of dieting. Most pet dogs, however they may be fed according to theory at regular and proper intervals, invariably come in for extras in the way of delicate scraps from the table; in fact, live very much as their masters and mistresses do, feeding upon food which they often do not require, food of a stimulating nature which is certain to react upon the digestive function. That the skin should suffer in connection with the mucous membrane of the digestive organs is not at all remarkable. It is no question of sympathy, but merely of continuity. The whole of the lining of the digestive organs may be looked upon as an infection of the skin, or, on the other hand, the skin may be looked upon as a continuance of the mucous membrane over the surface. The covering undergoes changes of form to meet the new conditions, the circumstances affecting the surface being essentially different from those which apply to the membrane which lines the interior of the organs through which the food passes.

The skin must inevitably respond to anything which acts as an irritant to the membrane of the digestive organs, and this fact has to be considered very carefully indeed under all circumstance when the treatment of the disease has to be decided upon. In the first place, it must be remembered that applications to the surface for the time being must be looked upon entirely as palliatives; they must be directed to the relief of the itching from which the animal suffers, and in consequence of its suffering is led to damage the surface by its claws and teeth, and in the meanwhile the internal organs must have special attention. In the first place, a laxative dose, castor oil, for example, followed up by small quantities of Epsom salts occasionally, will be desirable as a rule. In cases, however, where the disease has prevailed for some considerable time, and the animal is in an emaciated condition, mild tonics may be given with advantage. Fowler's solution of arsenic is advocated very generally, and this is best given by sprinkling on the food from ten to twenty drops at a time, and continuing for a week, then ceasing for a while and starting again. Mayhew always advocated the method of adding to the dose two or three drops a day until the animal was taking thirty or forty drops with each meal, but the ordinary practice is to give a fixed quantity, such as ten to twenty drops, according to the size of the animal, and discontinuing the remedy after a week or two, repeating the treatment according to the condition of the patient. Dieting is, of course, a matter of great moment, and it is essential that all irritating substances, oatmeal, coarse biscuits, any large quantity of bones, raw meat in any considerable amount should all be withheld; the animal should have a milk diet to a large extent, vegetables and meat being given in very moderate quantities, and necessarily regular exercise according to the strength of the dog should be insisted on. As local applications, there are several preparations which are likely to be employed with advantage. Mercurial ointment can only be used with the very greatest caution, and, in fact, is not a proper agent to be used by the tyro at all.

There are, however, some preparations which have been introduced by several of the leading manufacturers of dog remedies. These preparations are put up for use in small quantities, and any veterinary surgeon, fancier or dog owner can obtain them. The base, generally a form of vaseline, is made the vehicle for tar, sulphur, ichthyol and other active drugs which are certainly worth trying when the ordinary remedies have failed. Conditioning and other remedies are also

to be had that are effective in palliating and eradicating eczema.

A reference to our advertising columns will give the addresses of several firms whose medicines have the merits claimed for them and whose booklet publications on the "Dog and His Diseases" are worthy of perusal and attention. The publications are forwarded gratuitously to any one taking the little trouble of writing for them.

### San Francisco Show Awards.

MASTIFFS—Limit dogs—1 H R Baker's Prince. Open dogs—1 H Barnett's Sharky. Winners—1 Sharkey, res Prince.

ST. BERNARDS (rough coated)—Puppy dogs—1 Mrs Teresa M Maloney's Major Bruce. Novice dogs—1 Miss Clara Moffat's Gothard, 2 S J Ackerman's Greenwood Booze, 3 A F Chamot's Tzar II, res Mrs Lueck's Sacramento Price, v h c Wm W Kaler's Mork, O G Soot's Commodore Schley, h c Mrs Navlet's Bruno, Leo Lippi's Duke, c Wm Schmiu's Prince. Limit dogs—1 Nairoed Kennels' Grand Master II, 2 A F Chamot's Tzar II. Open dogs—1 Mrs Charles Newman's Lester C, 2 Nairoed Kennels' Le King, 3 Tzar II, h c Bruno. Winners, dogs—1 Lester C, res Grand Master II. Puppy bitches—1 G H Kruse's Maid of Athens. Novice bitches—1 A B Faty's Queen Bess B, 2 Mrs D C Driffield's Zaza, 3 Sol J Levy's Phyllis, res S J Grimby's Nairoed Varion, v h c S Barnett's Queen, h c A F Chamot's Bellina. Limit bitches—1 Zaza, 2 Bellina. Open bitches—1 Nairoed Kennels' Gypsy Lee II, 2 A B Faty's Lady Melba, 3 J Ferrant's Schaezohen, res Zaza, h c Bellina. Winners, bitches—1 Gypsy Lee II, res Queen Bess B.

ST BERNARDS (smooth coated)—Limit dogs—1 Mrs C E McStay's Duke Russell. Winners, dogs—1 Duke Russell. Novice bitches—1 F Chamot's Bellina. Limit bitches—1 Bellina. Open bitches—1 Bellina. Winners, bitches—1 Bellina.

GREAT DANES—Puppy dogs—1 Jack Bradshaw's (Woodlawn Kennels) Woodlawn Thunderbolt, 2 O Bergstein's Admiral Kempff, 3 Miss Etta Millar Schrock's Beauty. Novice dogs—1 Mrs L S Adams Jr's Rupert of Hentzau, 2 Peter Ostergard's Tiger. Limit dogs—1 Rupert of Hentzau, 2 John Love Cunningham's Ruy Blas, 3 Dresser & Simpson's Alphonse, v h c Louis P. Meaney's Nero. Open dogs—1 Dresser & Simpson's Blue Beard, 2 Rupert of Hentzau, 3 Cunningham's Ruy Blas. Winners, dogs—1 Blue Beard, res Rupert of Hentzau. Puppy bitches—1 R H Fitzgerald's Queen F, 2 Irving C Ackerman's Humberstone Agnes. Novice bitches—1 Dresser & Simpson's Flora, 2 F Frerich's Queen. Limit bitches—1 John Love Cunningham's Carlotta, 2 John Love Cunningham's Cunningham's Carmelita, 3 Dresser & Simpson's Tempest, h c Dresser & Simpson's Zambra. Open bitches—1 Cunningham's Carlotta, 2 O Bergstein's Maud S. Winners, bitches—1 Cunningham's Carlotta, res Maud S.

NEWFOUNDLANDS—Open dogs and bitches—Withheld.

GREYHOUNDS—Novice dogs—1 J H Rosseter's Rocker, 2 Wm H Richardson's Lundin Links. Limit dogs—1 J H Rosseter's Roman Athlete. Open dogs—1 F McCarthy's John Doe, 2 Roman Athlete. Winners, dogs—1 Rocker, res John Doe. Limit bitches—1 J H Rosseter's May Hemstead. Open bitches—1 J H Rosseter's Fiery Face. Winners, bitches—1 Fiery Face, res May Hemstead.

AMERICAN FOXHOUNDS—Puppy dogs—B W Lorigan's Riven Oak, absent. Limit dogs—1 Fred Schmidt's Beech, 2 W S Kittle's Rainbow. Open dogs—1 Wm Berg's Crowder, 2 N H Hickman's Chippy Billie, 3 Fred Schmidt's Roy. Winners, dogs 1 Crowder, res Beech. Novice bitches—1 W B Tubbs' Lou. Limit bitches—1 F W Tallant's Melody. Open bitches—A L Heney's Ellen H, absent. Winners, bitches—1 Melody, res Lou.

POINTERS—Puppy dogs—1 W J Brown's Frisco B, v h c Frank Greenberg's Bright Jr. Novice dogs—1 David Schoemaker's Rap Rattler, 2 W S Tevis' (Stockdale Kennels, Bakersfield) Cuba Jr. Limit dogs (under 55 pounds)—1 Cuba Jr. Open dogs (under 55 pounds)—1 Rap Rattler, 2 Cuba Jr. Winners, dogs—1 Rap Rattler, res Cuba Jr. Puppy bitches—2 Harry P Gregg's Lady Wellington. Novice bitches—1 F F Wamsley's Oregon's Jessie II, 2 C E O'Neill's Wee Cora, 3 Lyman C Lacey's Jewel, res W S Tevis' Jingo's Bagpipe. Limit bitches (under 50 pounds)—1 Oregon's Jessie II, 2 Jingo's Bagpipe. Limit bitches (over 50 pounds)—Yosemite Kennels' Miss Belle, absent. Open bitches (under 50 pounds)—1 Oregon's Jessie II, 2 Jingo's Bagpipe. Winners, bitches—1 Oregon's Jessie II, res Wee Cora.

ENGLISH SETTERS—Puppy dogs—W E Gump's Chateau, absent. Novice dogs—1 W E Lemmer's Hardy, 2 F B Butler's Judge Hunter, 3 S Barnett's Leon, res Thos Pennington's O'Ron T, v h c Helen F Devine's Orion W, L A Linville's Plumias, h c Geo W Pennington's Lord Kitchener. Limit dogs—1 O'Ron T, 2 Lord Kitchener. Open dogs—1 Jno Golobek's Cato Jr, 2 Judge Hunter, 3 Wm Feige's Ch Buckwa, res C Roos' Rock. Winners, dogs—1 Cato Jr, res Hardy. Puppy bitches—2 N Botto's Hazel T. Novice bitches—1 C C Lee's Laura, 2 S Barnett's Dollie, 3 S Barnett's Queenie, res E L Chase's Lady Gladstone, v h c T C Van Ness Jr's Tess, Thos Pennington's Junie, h c A Temple's Queen T. Limit bitches—1 Junie. Open bitches—1 T P McConnell's (Victoria) Albert's Rosalind, 2 P D Linville's Maggie F. Winners, bitches—1 Laura S, res Albert's Rosalind.

IRISH SETTERS—Novice dogs—1 A A Alcaiyaga's Terry M, 2 L C Williams' Kip, 3 Jno White Jr's Donegal. Limit dogs—Gus Louis' Pilot B, A L Heney's Vernal Boy, absent. Open dogs—1 Dr A J Garesche's Hector. Winners, dogs—1 Hector, res Terry M. Puppy bitches—2 M E Getz' Lady Gem 3 F T Keene's Lightning C's Queen of Diamonds. Novice bitches—1 F T Keene's Lightning Lady, 2 S V Smith Jr's Calve, absent Yosemite Kennels' Merely Mary Ann. Open bitches—1 Dr Val Moore's Queen Bess II. Winners, bitches—1 Queen Bess II, Lightning Lady.

**COCKER SPANIELS**—Puppy dogs and bitches—1 P D Linwood's Dot, res Dresser & Simpson's Juno, v h e Roxane. Open bitches (30 pounds or under)—1 Hawthorne Pleasure, 2 Naughty Nan, 3 Yours Truly. Open bitches (over 30 pounds)—1 American Belle, 2 Dot, 3 Dresser & Simpson's Bloomsbury Queen, res Roxane. Winners, bitches—1 Edgewood Jean II, res American Belle.

**FRENCH BULLDOGS**—Open dogs and bitches—1 Mrs Graham E Babcock's Ch Diavolo.

**BOSTON TERRIERS**—Puppy dogs—1 Lieut O W Smith's Billy. Novice dogs—1 Billy, 2 Geo N Armsby's Lord Quex, W. H. Deming's Lord Rushie absent. Limit dogs—1 Graham E Babcock's Roundsmen, 2 Miss Ethyl Hager's Nifty. Open dogs—1 Selwonk Kennels' Ch Colonel Monte, 2 Roundsmen, 3 Nifty. Winners, dogs—1 Ch Colonel Monte, res Billy. Novice bitches—1 Virginia C Lewis' Lady Babbie, 2 Miss Ella Harris' Little Muggins. Limit bitches—1 Mrs W H Deming's Endcliffe Vernet. Open bitches—1 Selwonk Kennels' Ch Selwonk Beauty, 2 Endcliffe Vernet, 3 Lady Babbie. Winners, bitches—1 Ch Selwonk Beauty, res Endcliffe Vernet.

**DACHSHUNDES**—Puppy dogs—1 Mrs Graham E Babcock's Benny. Novice dogs—1 A F Chamot's Schwartz, 2 Benny, 3 A F Chamot's Boosel, res Mrs G E Babcock's Dutch. Limit dogs—1 Schwartz, 2 Benny, 3 Boosel, res Dutch. Open dogs—1 Schwartz, 2 Benny, 3 Boosel, res Dutch. Winners dogs—1 Schwartz, res Benny. Novice bitches—1 F A Brookbank's Dude. Limit bitches—1 Mrs Graham E Babcock's Pretzel. Open bitches—1 Pretzel. Winners bitches—1 Pretzel, res Dude.

**FOX TERRIERS** (smooth coated)—Puppy dogs—1 Wande Kennels' Wande Blinker, 2 T Howard's Golden Truth. Novice dogs—1 W J Foster's Forest Flash, 2 J P Brown's (Riverside) Garston Prefect, 3 W W Moore's Bragg, absent Wande Kennels' Wande Be Be. Limit dogs—1 Wande Kennels' Wande Blizard, 2 Wande Kennels' Wande Jester. Open dogs—1 Wande Blizard, absent Sabine Kennels' Ch Rowton Besom. Winners dogs—1 Wande Blizard, res Wande Jester. Puppy bitches—1 J B Martin's Golden Soubrette, 2 Wande Kennels' Wande Zephyr, 3 J Bradshaw's Woodlawn Water Lily. Novice dogs—1 Francis Carolan's Becky, 2 Woodlawn Water Lily. Limit bitches—1 Wande Kennels' Wande Mayse, 2 J Bradshaw's Millstream, absent N H Hickman's Imelda. Open bitches—1 Sabine Kennels' Sabine Fearless, 2 Wande Mayse. Winners bitches—1 Sabine Fearless, res Wande Mayse.

**FOX TERRIERS** (wire haired)—Novice dogs—withheld. Limit dogs—1 Walter Magee's Cairnmuir General. Open dogs—1 Irving C Ackerman's Ch Hummerstone Bristles, 2 Cairnmuir General, 3 J G Morgan's Mineral Water. Winners, dogs—1 Ch Hummerstone Bristles, res Cairnmuir General. Novice bitches—1 Irving C Ackerman's Hummerstone Daisy, absent E Winsworth's Morton Fashion. Limit bitches—1 Irving C Ackerman's Hummerstone Actress. Open bitches—1 Irving C Ackerman's Maggie the Maid, 2 J G Morgan's Morenga. Winners, bitches—1 Maggie the Maid, res Morenga.

**IRISH TERRIERS**—Novice dogs—1 J Bradshaw's Irish, h e F J Walker's Rusty Nibs. Open dogs—1 Irish, 2 Miss Rose Hooper's Galtee More. Winners, dogs—1 Irish, res Galtee More. Limit bitches—1 Miss Ina C Martin's Shan Van Vocht, 2 J Allen's Lady Power, absent Wande Kennels' Virginia F. Open bitches—1 Mrs F J Walker's Royal Noreen, 2 Shan Van Vocht. Winners—1 Royal Noreen, res Shan Van Vocht.

**SKYE TERRIERS**—Open dogs and bitches—1 Mrs R D Hume's Bobby Scott, 2 Mrs R D Hume's Bessie Scott.

**POMERANIANS**—Puppy dogs—1 H K de Jarnette's Prince Mark. Open dogs—1 S Barnett's Leon, 2 Miss Emma Schultz' Toy S, 3 Harry H Grigg's Prince Albert. Open bitches—1 Miss Juanita de Jarnette's Peritta.

**YORKSHIRE TERRIERS**—Novice dogs and bitches—2 D E Melliss' Bobs. Open dogs and bitches—1 Mrs Francis Carolan's Merry Module, 2 Mrs Francis Carolan's Rosette. Winners, dogs and bitches—1 Merry Module, res Rosette.

**MALTESE TERRIERS**—Open dogs and bitches—1 Mrs A A Rot's Margie B.

**TOY TERRIERS** (other than Yorkshires)—Open dogs and bitches—1 J M Bodkin's Firechief, 2 Miss Katherine S. Barton's King Lee.

**JAPANESE SPANIELS**—Novice and winners, bitches—1 F A Penchy's Asata.

**ITALIAN GREYHOUNDS**—Open dogs and bitches—2 S A Cumming's Duke.

**CHOWS**—Open dogs and bitches—1 H M Papst's China Lady.

**MISCELLANEOUS CLASS**—Open dogs and bitches—1 Thos L Lewis' Jim Budd (English Retriever), 2 J F Kenealy's Pat (Irish Wolfhound).

**OLD ENGLISH SHEEP DOGS**—Puppy dogs and bitches—2 J C Berret's imp Luath. Open dogs and bitches—1 Charles R Barker's imp Dame Majory.

**BULL DOGS**—Puppy dogs—1 Mrs Walter Magee's Woodlawn Rustic. Novice dogs—1 Woodlawn Rustic, 2 Dresser & Simpson's Bully. Limit dogs—1 I G Treadwell's General Pole Carew, Mrs Chas K Harley's Ivel Damon absent. Open dogs—1 Ivel Damon absent. Winners dogs—1 General Pole Carew, res Woodlawn Rustic. Novice bitches—1 M Wiener's Canford Rush. Limit bitches—1 Canford Rush. Open bitches—1 L S Greenbaum's Endcliffe Pleasure, 2 Canford Rush. Winners bitches—1 Endcliffe Pleasure, res Canford Rush.

**BULL TERRIERS**—Puppy dogs—1 C Osgood Hooker's Edgemoor Duke, 2 Ben L Tarbox's Edgemoor Figaro, Mrs S D Pond's Scrapper absent. Novice dogs—1 Mrs Arthur W Spear's Woodlawn Wonder, 2 J C Bone's Hawthorn Joy, 3 Edgemoor Duke, res Edgemoor Figaro, v h e Phil J Fay's Woodcote Brigadier, h e Miss L M Bolton's Rufus. Limit dogs (35 pounds or under)—1 Mrs W R Whitlitt's Heathcote Wonder. Limit dogs (over 35 pounds)—1 Woodlawn Wonder. Open dogs (35 pounds or under)—1 J D Spruells' Ch Bangs, 2 Heathcote Wonder. Open dogs (over 35 pounds)—1 J Bradshaw's (Woodlawn Kennels) Ch Woodcote Wonder, withheld H Gottung's Julius Caesar. Winners, dogs—1 Ch Woodcote Wonder, res Woodlawn Wonder. Puppy bitches—1 H R Baker's Rowena, 2 J C Bone's Hawthorne Pleasure, 3 Mrs L M Fletcher's Dixie Fletcher, res R E Simpson's Woodcote Ditto, v h e J Bradshaw's Yours Truly, J Bradshaw's Woodlawn Mischief, h e W H Lewin's Woodcote Diane. Novice bitches—1 J I Sparrow's Edgewood Jean II, 2 Phil J Fay's Woodcote Princess, 3 Hawthorne Pleasure, res Yours Truly, v h e Mrs A S Cunningham's Roxane, T J Glynn's Duellin Lass, v h e Woodlawn Mischief. Limit bitches (35 pounds or under)—1 J L Eastland's Naughty Nan, 2 Yours Truly. Limit bitches (over 30 pounds)—1 Edgewood Jean II, 2 J Bradshaw's American Belle,

(J E de Ruyter special trophy). Best bitch—C C Lee's Laura S (Livingston Jenks silver trophy). Best Irish Setter—Dr A J Garesche's Hector (Clabrough, Golcher & Co silver trophy). Best Gordon Setter—John H Miller's Achille (John Butler trophy).

Best in the Field Trial Class—P T Linville's Maggie F (W W Van Arsdale silver trophy). Best Irish Water Spaniel—Dr A T Leonard, Jr's, Denis C (Rosenthal & Co loving cup). Best Field Spaniel—W S Kittle's Matt Grim (S F K C medal).

Best Cocker Spaniel—Delverton Kennels' Hampton Promise (White House trophy). Best of opposite sex—Delverton Kennels' Ch Princess Flavia (Nathan, Dohrman & Co prize). Breeders' Cup for best Pacific Coast breed—Delverton Kennels' Delverton Demi. Best sired by Ch Hampton Goldie, E C Plume, donor, not competing—Delverton Kennels' Floradora. Best stud dog shown, judged by two of his get—Hampton Promise, sire of Delverton Wonder and Delverton Demi.

California Cocker Club special prizes—President's trophy for best, Hampton Promise. Club silver medals: For best black dog, Hampton Promise; for best black bitch, Ch Princess Flavia; for best black puppy dog, Delverton Wonder; for best black puppy bitch, Plumeria Victoria; for best black novice dog, no award; for best black novice bitch, Plumeria Victoria; for best black limit dog, Black Silk II; for best black limit bitch, Miss Frivolity; for best black open dog, Hampton Promise; for best black open bitch, Princess Flavia. Other than black—For best dog, Hampton Goldie; for best bitch, Floradora; for best puppy dog, Delverton Demi; for best puppy bitch, Little Maid; for best novice dog, Victory A; for best novice bitch, no award; for best limit dog, Plumeria Beau II; for best limit bitch, Floradora; for best open dog, Hampton Goldie; for best open bitch, Little Dorrit.

Best Collie dog—O J Albee's Ch Ormskirk Emerald Jr (Palace Hotel silver pitcher and Cal. Collie Club silver medal). Best bitch—Dr W T Burnham's Brandane Dollie (Shreve & Co silver vase). Best tri-color—O J Albee's Ormskirk Verona Bob (Mrs P J Norman loving cup).

Best Bulldog—L S Greenebaum's Endcliffe Pleasure (W W Moore trophy). Best of opposite sex—I G Treadwell's General Pole Carew (E Courtney Ford silver vase). Best Bull Terrier—John I Sparrow's Edgewood Jean II (Portland Kennel Club silver cup, Stock Brokers silver cup). Best of opposite sex—Jack Bradshaw's Ch Woodcote Wonder (W H Deming trophy). Best whelped year previous to the show—Mrs A W Spear, Jr's, Woodlawn Wonder (Dr H L Tevis silver loving cup).

Best Boston Terrier—Selwonk Kennels Ch Colonel Monte (S F K C silver cup). Best dog owned on the Coast—Lieut W D Smith's Billy (Dr E G McConnell trophy). Best bitch owned on the Coast—Mrs W H Deming's Endcliffe Vernet (H C Tilden silver vase).

Best Dachshunde—A F Chamot's Schwartz (Roos Bros' trophy).

Best Fox Terrier owned in California—Wande Kennels' Wande Mayse (W F Beechheimer silver trophy). Best smooth coated brood bitch (judged by two of her get)—J B Martin's Golden Sunshine (E Courtney Ford breeders' cup). Best Fox Terrier in the show—Wande Kennels' Wande Mayse (S & G Gump trophy). Best of opposite sex—Wande Kennels' Wande Blizard (Lick House trophy). Best Coast bred smooth dog—W J Foster's Forest Flash (W W Moore trophy). Best Coast bred smooth bitch—J B Martin's Golden Soubrette (C W Johnson silver cup). President's cup for best, C K Harley donor, not competing, N H Hickman's Norfolk Trueman.

Pacific Fox Terrier Club Produce Stakes 1903, first and second division—J P Brown's Garston Prefect and J B Martin's Golden Sunshine. Best puppy dog—Wande Kennels' Wande Blinker. Best novice dog—Forest Flash. Best limit dog—Wande Blizard. Best open dog—Wande Blizard. Best puppy bitch—J B Martin's Golden Soubrette. Best novice bitch—Wande Kennels' Wande Firefly. Best limit bitch—Wande Mayse. Best open bitch—Wande Mayse.

Best pair of wire haired Fox Terriers—Irrving C Ackerman's Ch Hummerstone Bristles and Maggie the Maid (Mrs Phil C Meyer trophy).

Best Irish Terrier—J Bradshaw's Irish (Walter Magee silver goblet). Best of opposite sex—Mrs F J Walker's Royal Noreen.

## Kennel Registry.

### SALES.

Nairod Kennels sold to Charles P. Schreiner March 2, 1903, the black Cocker Spaniel bitch puppy Nairod Huntress (Oakland Romance-Nairod Maid).

Nairod Kennels sold to L J Rose, Jr., April 3, 1903, the black and white parti-color Cocker Spaniel dog puppy Nairod Chaos (Ch. Havoc-Imp).

Nairod Kennels sold to Mrs. Colton May 2, 1903, the black Cocker Spaniel bitch puppy Nairod's Miss Brimstone (Ch. Havoc-Imp).

### VISITS.

Mr. Leason's Cocker Spaniel bitch to Nairod Kennels' red Cocker Plumeria Beau II. (Ch. Hampton Goldie-Ch. Plumeria Surprise).

Woodlawn Kennels' Bull Terrier bitch American Belle (Clapton Gully-Subatia) to same owner's Ch. Woodcote Wonder (Delverton-Fan), April 26, 1903.

Woodlawn Kennels' Bull Terrier bitch Newmarket Queen (Ch. Newmarket Marvel-Newmarket Siren) to same owner's Ch. Woodcote Wonder (Delverton-Fan), April —, 1903.

## Dog Owners!! Read This!!

We are carrying in the advertising columns of this journal an advertisement of "Sergeant's Dog Remedies," a popular line of preparations for which F. W. Braun & Co. of Los Angeles, California, have been made distributing agents on the Pacific Coast. The goods have few equals and no superiors on the market today, having received the highest endorsements of the leading dog men and kennel owners of this country and Canada.

They are manufactured by Folk Miller Drug Co. of Richmond, Va., who invite all persons having sick dogs to write (enclosing stamp) describing symptoms, and they will cheerfully furnish the best possible advice without any charge whatever. A revised copy of their book on "Dogs" sent free on receipt of 3c in stamps to cover postage.

### SPECIAL AWARDS.

Best Mastiff—H R Baker's Prince.

Best St Bernard—Mrs Charles Newman's Lester C (President's trophy and Nairod Kennels' trophy). Best of opposite sex—Nairod Kennels' Alta Rachel (N H Hickman silver vase). Best brace—Nairod Kennels' Grand Master II and Ch Alta Rachel (L K A of America, Ray cup).

Best Great Dane—Dresser & Simpson's Blue Beard (S F K C silver cup and E Haquette prize). Best of opposite sex—John Love Cunningham's Carlotta (P J Weniger silver flask). Best pair—John Love Cunningham's Carlotta & Ruy Blas (C K Harley prize).

Best Greyhound—J H Rosseter's Fiery Face (The Grain Brokers' silver cup and S F K C medal). Best of opposite sex—J H Rosseter's dog Roman Athlete (S F K C medal).

American Foxhounds—Wm Berg's Crowder (Dr A T Leonard prize). Best of opposite sex—F W Talant's Melody (Dr Washington Dodge trophy).

Best Pointer—F F Wamsley's Oregon's Jessie II (J L Cunningham trophy). Best of opposite sex—David Shoemaker's Rap Rattler (W S Kittle trophy).

Best English Setter dog—John Golobek's Cato Jr

# THE FARM.

## To Study Diseases of Farm Animals.

That the diseases of poultry, swine and cattle may be made the subject of special investigation by the Department of Agriculture of the university, the chief American authority on the subject, Professor Veranus A. Moore of Cornell University, will come to Berkeley next summer for a stay of several months. He will work with the veterinarian of the agricultural experiment station, Professor Archibald R. Ward, on diseases that have caused extensive loss to California stockmen.

Far reaching good should result from Dr. Moore's visit. He enjoyed exceptional opportunities for the investigation of the diseases of domestic animals during ten years of service in the United States Bureau of Animal Industry. His particular work at first was the study of infectious diseases. In 1895 he was appointed chief of the division of animal pathology. In 1897 he became professor of comparative pathology, bacteriology and meat inspection in the New York State Veterinary College, and professor of bacteriology in the medical department of Cornell University.

Professor Moore is a prolific contributor to veterinary science. The reports of the bureau of animal industry furnish evidence of the quality and quantity of his work. He published recently a book on "The Pathology and Differential Diagnosis of Infectious Diseases of Animals," and a volume of "Laboratory Directions for Beginners in Bacteriology," which has been extensively used in university laboratories. He is a constant contributor to the programs and publications of various learned societies. He is a member of the American Microscopical Society, the Society for the Promotion of Agricultural Science, the American Public Health Association, and the Society of American Bacteriologists.

The appropriation made by the last Legislature for the study at Petaluma of poultry problems will furnish an opportunity for Professor Moore to lend much aid. Advice from a man of his broad experience and high scientific attainments will greatly stimulate the university's work in veterinary science.

## Live Stock at St. Louis Exposition.

An allotment of something over thirty acres of ground for the live stock shows at the World's Fair at St. Louis next year has been asked of the management by Chief F. D. Coburn, who has charge of that department.

This site contemplates the erection of forty-seven buildings. Thirty-nine of these are planned for stock barns with 2400 open stalls 5x10 feet and 400 box stalls 10x10 feet. The 2800 stalls will accommodate as a minimum that number of cattle or horses, and later simultaneously a like number of both swine and sheep. Four octagonal dairy barns will provide 140 open stalls and twenty-eight box stalls.

The site desired for the live stock exhibits is a continuation of Agriculture Hill immediately south of the Agriculture and Horticulture buildings, and would make possible the grouping of all the larger exhibits in which farmers and stockmen will be most interested. The live stock area extends south to the grounds limits, where it faces one of the main entrances.

The dates which will probably be fixed for the live stock displays at the World's Fair extends from August 22 to November 5 of next year. The barns will be given over to horses and mules from August 22 to September 3; to cattle from September 12 to September 24; to sheep, goats and swine from October 3 to 15; and to poultry, pigeons, dogs and pet stock from October 24 to November 5.

## The Cause and Cure of Bloat.

Hoven, bloat or tympanitis generally occurs when hungry cattle are turned into the alfalfa fields. There is seldom any trouble after the animals become used to the pasture or if they be turned into the pasture at first when it is dry, or if they are fed well before being turned in, but even then it will occur sometimes. The bloating is caused by the accumulation of gases in the stomach generated by the fermentation of the food. Sometimes this passes off by belching up or through the intestines. The bloating is generally confined to ruminants—those animals that chew the cud—but it will occur in horses sometimes under the same conditions.

One of the first symptoms is that the animal will stop feeding, seems uneasy, lags behind or goes off by itself. Soon it will arch its back, the abdomen becomes enlarged, the belly distended, the enlargement being greatest on the left side, which, if thumped, will give off a hollow, drum like sound. As the rumen becomes distended, it presses forward upon the lungs, interferes with breathing, the breath will come short and labored and the animal will grunt and moan with each breath. The nose will be extended and there is a driveling of saliva from the mouth and frequently the animal will kick its belly, showing that it has colicky pains. If no relief is given the animal dies of suffocation owing to the pressure upon the lungs, or it may topple over and rupture the stomach so as to cause immediate death. The symptoms are so marked that any farmer will know what ails the animal and he should at once take measures to relieve it. The animal usually remains standing until it loses consciousness, staggers, falls and in falling usually ruptures some vital organ and death ensues.

If the animal be discovered in time before the trouble becomes too severe, remedial agencies may be applied with success generally. One of the first things to do is to elevate the head and forequarters of the animal and keep the mouth wide open by placing a round stick crosswise in it. Throw two tablespoonsful of soda or a small handful of salt well back upon the tongue. This causes the animal to work its tongue and the salt or soda that is swallowed helps to stop the fermentation and neutralizes the gas in the stomach. If a drench can be administered one or two ounces of turpentine and twice the same amount of milk will be good. Repeat every half hour until relief is afforded. Another good remedy is aqua ammonia, two ounces for cattle well diluted with water. Drench slowly from a long necked bottle. If none of these afford relief, then the only thing to do is to use the trocar as has so often been described in this journal.

## Picking Out a Cow.

Some men have a knack of doing this that puts everybody else to shame. They will go into a herd, and as they look the stock over say, there is a good cow. Acting on this suggestion, one finds that he has not made a mistake. How the thing was done is as much a mystery to us afterward as now. We only know that this man's judgment never failed us. But few men are able to make such a choice. Most of us, as the old saying is, don't know a good thing when you see it in the line of a cow. But there are certain homely signs which are helpful to the man who sets out to find a cow for his dairy. Some of these are as follows:

The cow ought to be of fairly good size, so that she can eat a good ration. She should have a large udder and good sized teats. Following the milk vein along to the entrance to the body, in a good cow we would expect to find a hole large enough to take the second finger readily. Some hold that the vein itself should be large and crooked. The cow should have a slender neck and slender tail. She should be wide between the hind legs. She should have a good, honest look in the

eyes. She should stand handling well. When milked she should enjoy the process if the milker be a good hand at it. A couple of rudimentary teats behind the fully developed ones are a good indication. If added to this we know the owner of the cow to be an honest man, and he tells us that the cow is a good one, if we can agree on the price, we may be reasonably sure that we have gotten the worth of our money.

## Vitality of Cows.

How to produce dairy cows so that the two essentials and at least some of the secondary desirable characteristics are secured would be an easy matter if the mind could be freed from fads and fallacious theories, writes Prof. T. L. Haecker in *Farm, Stock and Home*. Many of the laws of breeding laid down in books are destitute of sound basis. One of the chief errors is the point claimed to indicate constitution. An animal deep in the brisket, with broad shoulders and fore legs far apart has no more stamina or endurance than one with a narrow, sharp shoulder and ewe neck. In fact, the latter, as a rule, has more nerve force and endures longer. So far as my observation goes, an animal with a good middle and carrying little surplus tissue is fitted for much work and a maximum period. The Channel Island cattle and the Ayrshires are of this type and are noted for longevity and staying qualities. They are also remarkably free from constitutional diseases. On their native soil they are absolutely free from contagious diseases. About 500 animals have now been subjected to the tuberculin test on the Island of Jersey and not a single case of tuberculosis was found.

The tendency of the times in this country is toward sorting wools in the range of values that wool may be properly sorted into and classed without the expense of having great carloads of dirt wool shipped to the mill. Every fleece is sorted into three to five different kinds, and of sorts of wool, each of different value, which when sold in the dirt all go at one price. When graded the fleeces are not opened, the light and heavy ones are thrown into separate piles and this is all that is left. They must yet be sorted before they can be scoured and all wool must be sorted before it can be used. In sorting every fleece is opened and each grade is taken out, separated and kept by itself. It is in this way the commercial grades are established and known as fine, fine medium, medium, etc., each bearing a different value. In this way also each grade finds its appropriate place and reaches its commercial value when sold. Each of these sorts must run true and uniform for different mills use different grades and this sorting must be done before scouring—it cannot be done afterwards. It is just as easy to bring out professional sorters from the east and do the work in this country so that sixty-five per cent of the original bulk need not be shipped 2000 miles or more.

Strike!—if they don't give you Jackson's New Sade when you ask for it

All Foals that are the get of any stallion entered in this Stake to be eligible to be entered on June 1, 1903. Entrance fee, \$50 each, of which \$5 must accompany the entry, with breeding and name, if any, of foal, and a further payment of \$10, March 1, 1904, and a further payment of \$15 each, May 1, 1905, and a final payment of \$20 on the first day of August, 1905, and all costs making this payment shall be eligible to start. Starters to be named in writing, through the entry box, 4 P. M., day before the race.

The nominator of any colts shall, on May 1, 1905, then declare as to the trotting or pacing end he desires to start his colts. All moneys paid in on colts transferred to the pacing division shall be segregated and placed to the credit of the pacing stake, and all other payments shall be placed to the credit of the trotting stake.

All payments not made as they become due declares entry out, and releases subscriber from further liability.

Hopples barred in both classes. Mile heats, three in five. For further conditions see Entry blanks.

REMEMBER DATE OF CLOSING, JUNE 1, 1903.

H. LOWDEN, Acting Secretary,

Office, New Pavilion, Sacramento.

An entry in this stake will enhance the value of your colt. First payment only \$5.

Entry Blanks can be obtained from Acting Secretary or at this office.

Money must accompany all orders. Address

FRANK E. BEST, Secretary, American Trotting Register Association, 355 Dearborn St., Room 1108, CHICAGO, ILL.

Or BREEDER AND SPORTSMAN, SAN FRANCISCO, CAL.

### Weigh the Milk.

If you don't weigh your milk the best investment you can make is to buy a single scale. The kind you can set at zero with the empty pail hanging thereon. Hang it in the barn near where you keep your milk while milking. On a piece of cardboard or heavy paper rule off little squares. At the top write the name or number of each cow, and set down the weight of each cow's milk, morning and

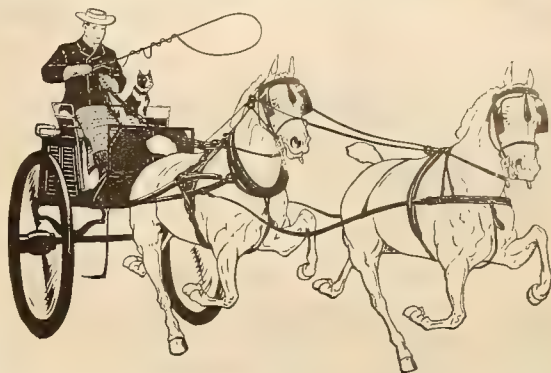

night. You will learn something in less than a week. You will get more and better milk, because you will milk faster and get all of it in order to beat the previous record. You will be surprised to find that some cows give more, some less than you had supposed. The scales don't guess—they tell it as it is, black or white. You will also learn that cows give more when milked by certain milkers. If you are making butter don't depend entirely on the scales; use the Babcock test. This is now sold at a reasonable price and it doesn't require a scientific education to use it.

## STATE AGRICULTURAL SOCIETY SACRAMENTO, CAL. STANFORD STAKE OF 1905 FOR FOALS OF 1902. ENTRIES TO CLOSE JUNE 1, 1903, With H. LOWDEN, Acting Secretary, at the Office in Sacramento.

FIFTY DOLLARS ENTRANCE, of which \$5 must accompany nomination June 1, 1903; \$5 November 1, 1903; \$10 June 1, 1904; \$10 June 1, 1905, and \$20 on the tenth day before the first day of the State Fair of 1905. \$300 added by the Society. Mile heats, three in five, to harness. The stakes and added money to be divided 50, 25, 15 and 10 per cent. Right reserved to declare two starters a waiter. When only two start they may contest for the entrance money paid in, to be divided 66 2/3 per cent to the winner, and 33 1/3 per cent to the second horse. A horse distancing the field shall be entitled to first money only. In no case will a horse be entitled to more than one money. Nominators are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility, and declares entry out. The stake is growing in value each year; every breeder should enter in it; it will enhance the value of his colt in case he desires to sell. A Special Stake will be opened in 1905 for colts entered originally in this stake, and Occident stake of 1905, that develop a pacing gait, to be contested for as three-year-olds in 1905. Your colt entered in the Occident Stake for 1905 is eligible for entry in this stake. Remember the date of closing is June 1, 1903. H. LOWDEN, Acting Secretary. An entry in this stake will enhance the value of your colt. First payment only \$5. Entry Blanks can be obtained from Acting Secretary, or this office.

### THE STANDARD-BRED TROTTER STALLION

**BOODLE Jr.** By BOODLE 2:12 1/4, sire of Ethel Downs 2:10, Thompson 2:14 1/4, and 4 others in 2:30 and better. He by Stranger, sire of 33 in 2:30. Dam NINA B by Electioneer, sire of Arion 2:07 1/4, Sunol 2:08 1/4, Palo 2:08 1/4, and 164 more in 2:30 list. BOODLE JR. is one of the best bred, best looking and best stallions on the Pacific Coast. He will make the Season of 1903 at

J. D. CARR'S GABILAN RANCH, Six Miles East of Salinas

Fee \$25 for the season, payable at end of season, or \$15 for single service, payable at time of service, otherwise will be considered at season rates. Any mare entered for the season and paid for will be granted the usual return privileges if proven to be not in foal provided that next year the owner of mare still owns her and J. D. Carr still owns the horse. Good pasturage at \$2 per month, but no responsibility assumed for accidents. Season open now, and will close August first 1903. BOODLE JR. is a sure foal getter, his colts are all uniform, and of good color, and show fine speed and action. He is 16 hands high and weighs 1300 pounds, is of a rich mahogany bay. Apply to J. D. CARR, or JOHN GARSDIE, at Gabilan Ranch.

### TROTTER AND PACING CONDITIONS.

All trotting and pacing to be in harness and to be governed by the rules of the American Trotting Association, unless otherwise specified. Heats, best three in five, except Nos. 4, 7, 8, 17, 20, 21 and 22, which will be best two in three. In Purses Nos. 3, 13, 16, the entrance will be \$10 to nominate on or before March 16th; \$15 on April 15th, and \$25 on May 15th, when horses must be named. Purses Nos. 7, 8, 21 and 22 are for horses owned and driven by members of any Colorado Driving and Riding Club; are to be road wagons and prize events, and will be governed by the rules of the Gentlemen's Driving and Riding Club of Denver. Payments in above events: \$10 to accompany nominations on or before March 16th; \$15 May 16th, when horse must be named. Purses 4, 17 and 20. Payments in the above events: \$10 to accompany nomination on or before March 15th; \$15 May 15th, when horses must be named. Purses 1, 2, 5, 6, 9, 10, 11, 12, 14, 15, 18, 19, 23, 24, 25 and 26. Payments in these events must accompany entries \$25 on or before May 15th. No liability for entrance beyond the amount paid in, if Secretary is notified in writing on or before the time the next payment falls due, but no entry will be declared out unless amount is paid in full to date. All nominations must be accompanied with cash. A horse distancing the field will receive first money only. Five per cent to accompany entry, and five per cent additional from all money winners. Two horses may be named from the same stable in

the same class and held but for one entrance. Horses to be named the day before the race. Money divided 50, 25, 15 and 10 per cent. Heats in each day's races may be alternated. Right reserved to change order of program or declare off any race not filling satisfactory. Entries in races declared off may be transferred to any class to which they may be eligible. Races will be called at 1:30 o'clock sharp. The management reserves the right to start earlier. The entrance to all trotting and pacing classes close on May 15th. Application for stabling should be made to Secretary, stating the number of horses to arrive. No stabling will be guaranteed except for horses that are entered. In case of bad weather or other unavoidable causes the Association reserves the right to declare all races off that had not been started by 4 P. M. on the last day of meeting. Entry blanks mailed on application. There will be four or more running races each day. Western Jockey Club Rules to govern in as far as practicable. We are members of the American Trotting Association. We have a first-class mile track for harness horses and a seven eighths track for running, kept in perfect condition. We will give two Cow Boy races: one 5 mile relay, and one 2 1/2 mile relay. All horses must have been owned by nominator for at least thirty days before the race. On any actual cow horses to participate. Entry blanks mailed on application. For further information address

E. A. COLBURN, Pres.

G. A. WAHLGREEN, Sec'y, 1748 Stout St., DENVER, COLO.

In addition to the harness events there will be FOUR or MORE Running Races each day. Open betting will prevail at Denver.

**THE COLORADO DERBY FOR THREE-YEAR-OLDS, Purse \$800,** will be run Derby Day, June 20th, distance mile and one-eighth. The Association has also offered a \$400 added money event, known as the Brown Palace Hotel Stake, and increased the Yellowstone and Neef Brothers Handicaps to \$400. Other of the specials are:

Steeple Chase for the DANIELS & FISHER CUP.  
THE DRY MONOPOLE CHAMPAGNE PURSE, \$300, Tuesday, June 23.  
THE DENVER & RIO GRANDE RAILWAY PURSE, \$300.

SOLIS DRY CLIMATE CIGAR PURSE, \$300.  
STUDEBAKER BROS. PURSE, \$300.

Special Polo Pony Races for the BOYD PARK and BOHM-BRISTOL CUPS, Cowboy Relay, Chevy Chase and other Races are also included in the card.

Five Weeks' Racing on the Colorado Racing Association Tracks, from June 1st to July 4th, \$75,000 IN PURSES AND SPECIALS.

G. A. WAHLGREEN, Circuit President.

S. M. BUSH, Circuit Secretary

	Carina.....	(The Ill-Used Camilla)

ST. CARLO won the Great American at Brooklyn, the Foam Stakes at Coney Island, the White Plains Handicap, was second to Chaos for the Futurity, and won about \$29,000 as a two-year-old. He is a wonderful young Sire, among his get being Rulart (winner of the Burns Handicap, Palace Hotel Handicap and \$11,650), Zamar II (winner of 19 races as a two-year-old and \$7665), Joan, February, St. Cuthbert, St. Callatine, Count of Flanders, Lord Marmion May Boy, Our Climate, Glendinning and many others.

ST. CARLO will make the Season of 1903 at the

**MENLO STOCK FARM, SAN MATEO COUNTY, CAL.**

**TERMS FOR THE SEASON, - \$100**

The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. For further particulars in regard to above Stallion apply to

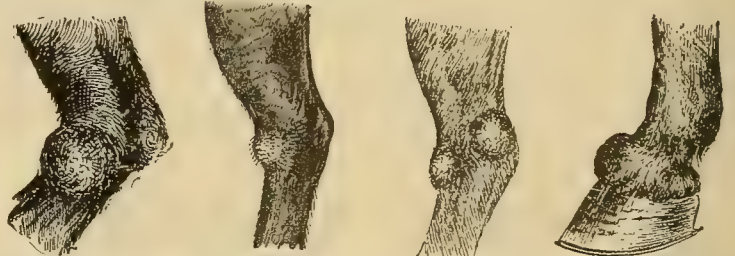

JAMES McDONNELL, Portola, San Mateo Co., Cal.

## "SAVE-THE-HORSE"

TRADE MARK

### SPAVIN CURE

**POSITIVELY AND PERMANENTLY CURES**

**BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE, CURB, SPLINT, CAPPED HOCK, SHOE BOIL, WIND (except Low Ringbone) PUFF, WEAK AND SPRAINED TENDONS, AND ALL LAMENESS.**

FROM A REPUTABLE AND NOTED TRAINER.

Glenville Driving Park, Cleveland, Ohio.  
For the enclosed \$5 please send me one more bottle of "Save-the-Horse" It is doing great work.  
Respectfully,  
MILLARD F. SANDERS.

Hartland, Mich.

Find enclosed money order for \$5, for which send me another bottle of "Save-the-Horse" spavin cure, as it has done all you claim for it for me. With the bottle I bought of you I took off a curb, spavin and a side bone on a three-year-old mare that other spavin cures refused to help in the least. I consider your spavin cure the best on the market.

E. M. PARSHALL.

Howick, Quebec.

I had a mare suffering from a bone spavin and very lame. I concluded to try a bottle of "Save-the-Horse," and at the expiration of six weeks' treatment she was free from all lameness and I consider it one of the greatest compounds made.

DAVID BARRINGTON

Edgewater, N. J.

Enclosed check for \$5, for which you will kindly send me another bottle of "Save-the-Horse" by Wells-Fargo Express soon as possible. The horse that I have been treating with "Save-the-Horse" went sound and I sold him, and the last I heard of this horse he was still going sound and was working

every day, and I think he will stay sound. The bottle I am ordering now I will use on another horse that has a pair of spavins and a curb; he does not go very lame but walks on his toes, but I think "Save-the-Horse" will bring him around so that he will walk all right. Very truly,  
OTTO MEYER.

The fire iron is uncertain and invariably only aggravates the disease or injury; blistering is less effective than the fire iron, and both necessitate laying up the horse from four weeks to two months. Arsenic, mercurial and poisonous compounds produce irreparable injury.

"Save-the-Horse" eliminates all these factors. Horse can be worked continuously. It can be applied at any time, anywhere, any place, and in all conditions and extremes of weather—hot or cold. And no matter what the age, condition or development of the case, or previous failures in treating, the concentrated, penetrating, absorbing power of this remedy is unfailing.

**\$5 PER BOTTLE.**

Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost impossible, except in rarest of cases.

Copy of Guarantee sent upon application. \$5, at all druggists and dealers, or sent express prepaid.

**TROY CHEMICAL CO., Troy, N. Y.** { D. E. NEWELL, Pacific Coast Agent  
519 Mission St., San Francisco.

## The New Simplex Cream Separator.

MR. MUNROE, CARE OF WEATHERLY CREAMERY CO., PORTLAND, OR.

Dear Sir: The No. 2 700-lb Simplex Hand Separator I bought from you is a dandy. It will separate 850 lbs. of milk per hour by opening the milk faucet wide open. I made several tests of the skim milk, running the machine over capacity and skimming 850 lbs. per hour at 50 degrees. Skim milk tested .01, 700 lbs. at 56 degrees .02.

My boy ten years old ran the Separator to skim 391 lbs. of milk. I made four pounds more of butter off of 1300 pounds of milk than I did with the old machine. Any one in doubt of the Simplex Separator's work, refer them to me. It is far easier to clean than the \_\_\_\_\_ Separator.

Yours respectfully,

WM. H. MILLER,  
Fish Hawk, Columbia Co., Or.

Send for New 1903 Creamery Catalogue, just issued, and special Literature on Simplex Separators and Churns.

Positively Cures Colic, Scouring and Indigestion.

C. P. KERTELL, Manager.

## QUINN'S OINTMENT FOR HORSES

stands at the head of all veterinary remedies. Such troubles as Spavins, Curls, Windpuffs, Splints, Bunches have no terrors for a horse if the master keeps and applies Quinn's Ointment. All well known horsemen speak of it in the highest terms:

Miller & Shibley of Franklin, Pa., owners of St. Bel, brother of late Bay Boy, write, "We have used Quinn's Ointment with great success and I believe it fulfills all claims for it. We cheerfully recommend it to our friends." For Curls, Splints, Spavins or Bunches it has no equal.

Price \$1.00 per package. Sold by all druggists, or sent by mail.

W. B. EDDY & CO., WHITEHALL, N. Y.

# NUSHAGAK

Sire of

ARISTO (3) 2:17½ winner of  
and Stanford Stakes, 1902

MAJELLA B. (2) 2:29 Trial (4  
2:13½)

THE BOQUET Trial (3) 2:21  
(in 1902)

Brown Filly Trial 2:20¼ as a  
4-yr-old in 1902

Reg. No. 25939

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15¼, Sabina 2:15¼, Sabledale (at 2 years) 2:18¼, Buffington (at 2 years) 2:20¼ and 36 others in 2:30 list. Dam, Fidelia (trial 2:36 at 2 years), dam of Fidelite 2:38¼, dam of Mary Celeste (at 2 years) 2:17¼ by Director, sire of Directum 2:05¼, Direct 2:05¼, Nathan Straus 2:05¼, Direction 2:08¼, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12¼, etc. Third dam by Lancet, son of McCracken's Blackhawk 787.

NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17½, Majella B. (2) 2:29 (trial at 4 years 2:13½), and The Boquet (trial at 3 years) 2:21. His son Aristo (at 3 years) 2:17½ took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

Limited to 40 outside mares, at \$50 the Season,

with usual return privilege. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed. First-class pasturage for mares, \$3 per month; no barbed wire. Address

WALNUT GROVE STOCK FARM,  
Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morshead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

# Guy McKinney

Season of 1903 at

LINDEN, SAN JOAQUIN CO.

Saturdays at Higginbotham's Stables, Stockton.

FEE \$30 FOR THE SEASON.

GUY MCKINNEY is a beautiful black, 16 hands high, and weighs 1300 pounds, a model of symmetry, handsome head, short back, the best of legs and feet, good disposition and great intelligence. He is a perfect gated trotter, and with very little handling showed a 2:20 gait. In his blood lines are represented the greatest strains of the American trotter, and the greatest producers of early and extreme speed. Good pasturage at \$1.50 per month. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

D. BRYSON, Linden, Cal.

WOODLAND, CALIFORNIA. TERMS FOR THE SEASON, - \$50

Good Pasturage at \$2.50 per month. Best of care taken, but no responsibility assumed for acci-  
dents or escapes. Address

WILLIAM MURRAY, Woodland, Cal.

# SEYMOUR WILKES

REG. No. 0232.  
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

Lakeville, Sonoma Co., Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Eviston (3) 2:22 in 1901.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 787. He weighs 1300 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street, San Francisco.

# ZOMBRO 2:11

The Greatest Son of the Great McKinney and

Sire at 10 years of age of

ZEPHYR (4) 2:11  
ITALIA (3) 2:23¼  
LORD KITCHENER (4) 2:29¼

and a number that have been worked and given trials as follows, all trotters: Zephyr (4) 2:08½; in a race, Julia M. (5) 2:12, Italia (3) 2:15¼, Zombowytte (3) 2:17, Suomi (3) 2:17, Lady Zombro (5) 2:17, Lord Kitchener (5) 2:19¼, Tee Dee Gee (4) 2:21¼, Zerica (5) 2:35¼, Gold Coin (4) 2:26¼, Mabel W. (4) 2:28¼, Edmund S. (5) 2:28¼, Gyr Falcon (5) 2:30, Zombro C. (5) 2:30. Besides six or seven more two and three year olds that are now stepping quarters in 35 seconds at the Los Angeles track.

ZOMBRO will make the season of 1903, from February 1st until June 1st, at my barn near Los Angeles track.

FEE \$75 THE SEASON.

Usual return privilege. Due care taken but no responsibility assumed for accidents or escapes. Address

Send for card containing pedigree and full information.

University, Los Angeles Co., Cal.

BLOOD THAT PRODUCES CHAMPIONS

# STICKLE

Sire, SILVER BOW 2:16 (sire of 8 in 2:30) by Robert  
McGregor 2:17¼ (sire of Crescens 2:02¼).

Dam, G (ACE), dam of Daedalion 2:11. Creole 2:15 (sire of Javelin 2:08¼) and Eagle 2:19¼, and grandam of Sir Albert S. 2:03¼, by Buccaneer.

Will make the Season of 1903 at

Race Track, ANGELS, Calaveras Co.

Terms, \$25 the Season,

WITH USUAL RETURN PRIVILEGES. For further particulars address

GEORGE E. STICKLE, Angels, Cal.

# Iran Alto 2:12½

Sire of Dr. Frasse 2:12½  
Thomas R. 2:15  
Vendome 2:18½  
Dr. Frasse's Sister, 2:25½

By PALO ALTO 2:08¼ (world's stallion record to high-wheel sulky), sire of IRAN ALTO 2:12¼,

Pasante (4) 2:13, Palita 2:16, Rio Alto 2:16¼, Palatine 2:18, and 11 others in 2:30 list.

Dam ELAINE 2:20 (world's 3 and 4 year old records in 1877 and 1878), dam of Norlaine, yearling record 2:31¼, and of 8 in 2:30 list, and the dams of 6 in 2:30 list.

Second dam GREEN MOUNTAIN MAID, dam of Electioneer 125 (one of the world's greatest sires), 9 in 2:30 list; sons produced over 300 standard performers.

IRAN ALTO 2:12¼ is not only royally bred, but has proven himself a racehorse and a sire of speed. He is a splendid individual and has all the most desirable qualifications for a great stallion. Breed to him and you will get the kind of colts you are looking for.

Will Make the Season, 1903, at his home

THE VENDOME STOCK FARM, SAN JOSE.

Fee \$50. Usual return privilege. Good pasturage and mares well cared for. For Tabulated Pedigree address

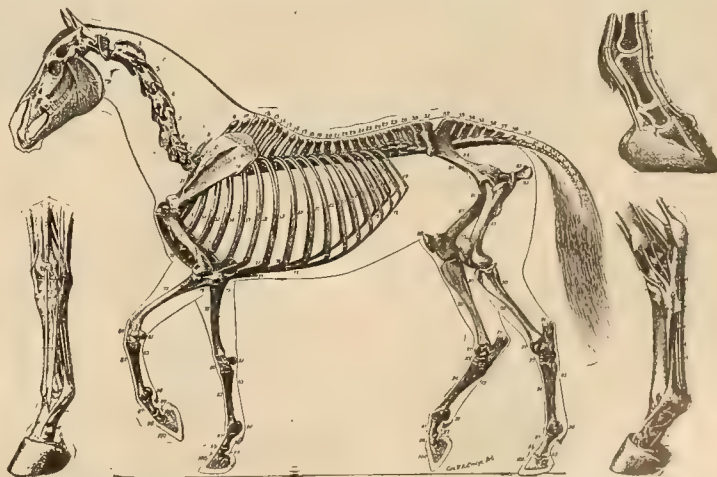

JAMES W. REA, San Jose, Cal.

# MAMMOTH CHART

SHOWING

# Skeleton of the Horse GIVEN AWAY TO OUR SUBSCRIBERS

This Chart is lithographed on tinted paper and is 22x28 inches. It will be found invaluable to every owner of a horse, as the names of all the Bones are given, as well as the names of the Tendons and Ligaments of the legs. By studying this Chart almost any lameness can be located and the proper remedies applied. The accompanying engraving will afford an idea of its appearance. No

similar Chart has ever before been published. The artist, in preparing this Skeleton, visited the American Veterinary College in New York City and made drawings from actual skeletons, thus insuring absolute accuracy. This Chart sells for One Dollar, but any reader can have it who will remit THREE DOLLARS

Between the dates of May 1 and June 1,

1903, for one year's subscription, It will be mailed, carefully packed, in a heavy pasteboard for safety. Address

BREEDER AND SPORTSMAN, 36 Geary St., San Francisco

# BONNIE DIRECT 2:05 1-4

Winnipeg, Canada, at the age of 100. Won the Chamber Stakes at Detroit, and at the other and three other places. Had a record of 1:00 1/4 for 100 yds. and \$500 to his credit the first year out.

Sired by Direct 2:05, sire of Directly 2:03 1/4, Hal Direct 2:01 1/4, Prince Direct 2:07, Directum Kelly 2:08 1/4, etc.

Winnipeg, Canada, at the age of 100. Won the Chamber Stakes at Detroit, and at the other and three other places. Had a record of 1:00 1/4 for 100 yds. and \$500 to his credit the first year out.

Sired by Direct 2:05, sire of Directly 2:03 1/4, Hal Direct 2:01 1/4, Prince Direct 2:07, Directum Kelly 2:08 1/4, etc.

BONNIE DIRECT will serve a limited number of approved mares during season of 1903, at \$100. Mares not proving to be in foal can be returned next season or service fee refunded, at the option of the owner. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no responsibility should any occur. Pasturage for mares at reasonable rates.

## Grease Heel, Scratches,

MUD FEVER, HOOF ROT, SPEED CRACKS—Cases where ulcerations extend, with transverse cracks which open at every step and often bleed, no matter how complex, aggravated, deep seated or chronic, if treated according to directions, as given on circular with every box, positively cured with

## Veterinary Pixine

After Blistering. Veterinary Pixine is the very best application that could be indicated. It absorbs all inflammatory exudate and hastens the reparatory process. Will heal the most severe cases without scar, and will prevent loss of hair.

As a Preventive—If a light application of Veterinary Pixine is used before speeding, driving in wet, muddy or slushy weather, or in the snow, your horse will never have speed cracks, scratches or grease heel.

For Hoofs—It will keep the hoofs healthy, soft and in perfect form.

For Old and Chronic Sores, Etc.—Veterinary Pixine heals collar and saddle galls, hobbles, chafes, abscesses, inflammatory swellings, and all skin disease. In cases of emergency it is invaluable.

This penetrating, stimulating, soothing, absorbing, antiseptic healing ointment heals from beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy granulation, not by drying and scabbing.

2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00.

At all druggists and dealers or sent prepaid.

# Limonero=3=2:15 3=4.

(A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is conceded by all who have seen him to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He has 35 two and three year olds that have never been trained. All of them are handsome, big bays and browns. From their appearance and the predictions of the best judges many of them are sure to be good race horses with every prospect of some star performers. A number of these youngsters are to be seen at the Los Angeles track.

LIMONERO 2:15 1/4 got his record as a three-year-old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating a field of six of the greatest three-year-olds of that year, including the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity.

LIMONERO 2:15 1/4 will make the season of 1903 at the

## AGRICULTURAL PARK, LOS ANGELES.

Fee \$25, for a Limited Number of Good Mares.

## CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES AND DRIES IN quickly and DOES  
NOT GUM AND FILL UP THE PORES like tar and oil  
compounds. It is the GREATEST REMEDY ever used to  
remove SORENESS and FEVER from the foot, and makes it  
possible to get good services out of a horse working on hard  
and hot pavements

It gives natural nourishment to the foot and incites a  
rapid, healthy growth--ALL DRYNESS AND BRITTLE-  
NESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly  
grown out when directions given in our booklet are followed.

It is a SURE CURE FOR CORNS, CONTRACTED FEET  
and NAIL WOUNDS if directions are followed.  
IT PREVENTS SOUND FEET FROM BECOMING UNSOUND  
and GROWS A TOUGH, STRONG, ELASTIC WALL  
and HEALTHY FROG--A FOOT WHICH WILL STAND  
WORK on race col.

Many of the best trainers and trainers state that for track  
work nothing equals it. In many cases horses have reduced  
their records several seconds due to its use.

It is a CURE FOR THRUSH and SCRATCHES  
We Guarantee that it Will Do What We Claim  
and Will Refund Money if it Fails.

PRICES: Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00;  
2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied  
free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next  
issue of this paper. It is the best and because of its merits is rapidly displacing all others.

## RULES.

Races under the National Rules.

No distance flag to be used.

The committee reserves the right to reject any entry, and to bar any horse that has not the right to enter the race, or will be detrimental to the success of any race.

First race will be called promptly at 12 M.

Entries will close May 14th at 4 P. M.

Entries will be received by the Secretary of the Board at the office, 424 or 414 Pine street, on any day up to May 14th, between 8 to 10 A. M. and 1 to 5 P. M., or with any member of the Racetrack Committee—John Nowlan, (chairman), Henry Westphal, A. Clayburg, R. Conanni, F. Merrill. The Entrance Fee payable at time of entry to the Secretary.

# STATE AGRICULTURAL SOCIETY SACRAMENTO, CAL. STANFORD STAKE OF 1905 FOR FOALS OF 1902. TO BE TROTTED AT THE CALIFORNIA STATE FAIR OF 1905. ENTRIES TO CLOSE JUNE 1, 1903, With H. LOWDEN, Acting Secretary, at the Office in Sacramento.

FIFTY DOLLARS ENTRANCE, of which \$5 must accompany nomination June 1, 1903; \$5 November 1, 1903; \$10 June 1, 1904; \$10 June 1, 1905, and \$30 on the tenth day before the first day of the State Fair of 1905. \$300 added by the Society. Mile heats, three in five, to harness. The stakes and added money to be divided 50, 25, 15 and 10 per cent. Right reserved to declare two starters a walkover. When only two start they may contest for the entrance money paid in to be divided 66 2/3 per cent to the winner, and 33 1/3 per cent to the second horse. A horse distancing the field shall be entitled to first money only. In no case will a horse be entitled to more than one money. Nominators are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility, and declares entry out. The stake is growing in value each year; every breeder should enter in it; it will enhance the value of his colt in case he desires to sell.

A special Stake will be opened in 1905 for colts entered originally in this stake, and Occident Stake of 1905, that develop a pacing gait, to be contested for as three-year-olds in 1905.

Your colt entered in the Occident Stake for 1903 is eligible for entry in this stake.

Remember the date of closing is June 1, 1903.

H. LOWDEN, Acting Secretary.

An entry in this stake will enhance the value of your colt. First payment only \$5. Entry Blanks can be obtained from Acting Secretary, or this office.

# California State Agricultural Society. Special Harness Stallion Stake for 1905. FOR THEN THREE-YEAR-OLDS.

For the Get of Stallions that made Private or Public Service, Season of 1901, for their Foals of 1902. The Race is to be contested at the State Fair at Sacramento, 1905, when Foals are Three Years Old.

Total amount of Stake to date.....		\$2140	

All Foals that are the get of any stallion entered in this Stake to be eligible to be entered on June 1, 1903. Entrance fee, \$50 each, of which \$5 must accompany the entry, with breeding and name, if any, of foal, and a further payment of \$10, March 1, 1904, and a further payment of \$15 each, May 1, 1905, and a final payment of \$20 on the first day of August, 1905, and all colts making this payment shall be eligible to start. Starters to be named in writing, through the entry box, 4 P. M., day before the race.

The nominator of any colts shall, on May 1, 1905, then declare as to the trotting or pacing and he desires to start his colts. All moneys paid in on colts transferred to the pacing division shall be segregated and placed to the credit of the pacing stake, and all other payments shall be placed to the credit of the trotting stake.

All payments not made as they become due declares entry out, and releases subscriber from further liability. Hops barred in both classes. Mile heats, three in five. For further conditions see Entry blanks.

REMEMBER DATE OF CLOSING, JUNE 1, 1903.

H. LOWDEN, Acting Secretary,  
Office, New Pavilion, Sacramento.

An entry in this stake will enhance the value of your colt. First payment only \$5. Entry Blanks can be obtained from Acting Secretary or at this office.

# 200 - OF THE FINEST - 200 Closing Out Sale

Of all the STANDARD BRED TROTTING STOCK belonging to  
Estate of HENRY PIERCE, Deceased  
CONSISTING OF  
Stallions, Broodmares, Colts and Fillies

Sired by all the most fashionably bred trotting stallions in California, and out of the best bred mares ever bred here or brought from the Eastern States.

Sale Will Take Place

Tuesday, June 23, 1903, at the  
OCCIDENTAL HORSE EXCHANGE

246 Third St., Near Folsom, SAN FRANCISCO

W. G. LAYNG, Live Stock Auctioneer.

Catalogues will be issued at once

AN AMERICAN HORSEMAN has been the guest of California for the past ten days. Theodore Roosevelt, President of the United States, is the American gentleman to whom we refer. On two occasions since he arrived in this State he has shown his ability as a horseman. At Monterey last Sunday he rode over the beautiful and famous road known as the Seventeen Mile Drive, and on Wednesday this week here in San Francisco mounted a handsome black charger and reviewed the United States troops at the Presidio. He did not ride with a short stirrup and his hands full of leather as the majority of foreigners do, but sat his horse American fashion, guiding his mount with the knee and a slight pressure of the rein on the neck. The President learned his horsemanship with the cow boys and to see him galloping across the hills at the Presidio last Wednesday, riding easily and erect, was an inspiring sight. It is to the horse that President Roosevelt attributes much of the vigor and health which enables him to pursue the strenuous life he lives. The work he has done since coming to California would have put many a strong man to bed. He has been on the go all the time, making from two to a half dozen speeches a day and traveling over much territory with but little rest. When at home in Washington a horseback ride is one of his daily practices as he knows it gives life and health and strength to body and mind. President Roosevelt is an American and a horseman and he is proud of both titles.

THE SPECIAL HARNESS STALLION Stake for 1905, inaugurated by the California State Agricultural Society, should secure a big entry list, as it is the most valuable stake in California. There is already paid in on the sires nominated the sum of \$2140, of which 60 per cent will go to the trotting and 40 per cent to the pacing divisions of the stake. The entrance fee on the foals is \$50, of which but \$5 is to be paid at the time the colts are entered on June 1st, this year. There will be a payment of \$10 on March 1st next year, another of \$15 May 1, 1905, and a final payment of \$20 August 1, 1905, which is the year the races are to be contested by the then three year olds. All foals of 1902 sired by the stallions nominated are eligible to this stake. In all probability the stake will be worth \$10,000. Don't fail to look over the advertisement in this issue and if you own a foal of 1902, sired by any of the stallions mentioned, write to Secretary H. Lowden, Sacramento, for an entry blank and conditions.

California's favorite hot weather drink—Jackson's Napa Soda.

NEGOTIATIONS are now being held with the managers of several tracks in California in regard to holding the Breeders Meeting this year, at which the big stakes for aged horses and the first division of the big \$6000 colt stake are to be decided. In next Saturday's issue of this paper the date and place of this meeting will be announced, and it may be that the association will then be able to announce the dates and places of several other meetings to be given by it this year.

THE DISAPPOINTMENT which has been pretty generally expressed among horsemen in California this week over the prices received at the Blue Ribbon sale last Monday for the best of the consignments from this State, is not justified. While in some instances some of the horses sold for less than their value as race horses (taking their earning capacity into consideration) the average has been good. Reports from but ten of the horses sold have reached us, and of these six were green, untried horses and yet the average received for the ten was \$4185. Breeders and owners should remember that the men who can pay up in the thousands for a horse are limited in number if not in means, and that millionaires whose stables are filled with great record horses and great prospects cannot be expected to continue to buy at big prices. The demand for good horses is greater than ever, and the Cleveland sale has been a big success. There is money in raising horses like Lou Dillon and selling them for \$12,500 even though that price may be less than fifty per cent of their real value. There is no cause for general disappointment over the Cleveland sale on the reports so far received. In some individual cases there have been sacrifices no doubt but taken as a whole the prices obtained show that the demand for fast trotters and pacers has not fallen off, and the condition of the market should be very gratifying to all horse breeders.

RANCHO DEL PASO CATALOGUE of its sale of yearlings, to take place at Sheephead Bay beginning June 15th, has been received at this office. There are 234 yearlings catalogued, sired by thirty-five stallions. Rancho del Paso is beyond question the greatest thoroughbred breeding farm in the world and leads all farms in the number of winners at the end of each year. The sale is to be conducted by the Fasig-Tipton Company.

MUD RUNNERS is the title of a neat little vest pocket book recently compiled and published by Walter R. Heineman of 880 Hancock street, Brooklyn, New York. It tells at a glance performances on heavy tracks in this country and Canada of over 4000 horses. It costs one dollar and may be had by remitting that amount to the publisher.

## A Meeting at Woodland.

Prof. E. P. Heald, president, and F. W. Kelley, secretary of the Trotting Horse Breeders Association, went to Woodland last Saturday to consult with directors of the District Agricultural Association in regard to a meeting at Woodland this year. They met several of the directors at the office of Secretary Thomas and an informal talk was held over the outlook. That a circuit of harness racing may be assured for California this year, the Breeders Association offered to hold a meeting at Woodland, provided the association did not care to undertake a fair without the State appropriation. President Reith, of the Woodland Association, stated that he would call a meeting of the directors on Tuesday of this week and report to Secretary Kelley the result.

The meeting was held on Wednesday and the directors organized for the year by electing Mr. Sam Montgomery president and C. F. Thomas secretary, and then decided not to hold a fair this year.

Secretary Thomas informed this office the same day, however, that a local club would in all probability give a race meeting and fair this year on the same date as the fair is usually held, which has been the week immediately preceding the State Fair at Sacramento.

Woodland always gives a first class fair and the new club, which will be composed of a majority of the district association's directors and quite a number of the leading business men of the town, leaves not a particle of doubt but the race meeting will be a great success. One of the features will be a stock show, and in this Yolo county can alone and unaided furnish as fine a display of cattle and sheep as can be gathered in any district on the Pacific slope.

Patchen Wilkes Farm has lost recently, from pneumonia, the very valuable broodmare Cora F. 2:20½ by Kentucky Prince-Topsy 2:21½ by Walkill Chief. She was the dam of Prince Selma 2:10½, Miss Viola 2:20½ and Roberval 2:22½, and was foaled in 1885.

## Los Angeles Horse Show.

At the matinee and horse show given by the Los Angeles Driving Club last week there was a splendid turnout. The following is a summary of the results:

Division A, ladies' saddle horses. A. F. Billicke's mare Dollie took title to first place, with Mrs. Epes Randolph's brown mare following. Then came the second division, gentlemen's saddle horses, and a right brave showing they made. All eyes centred on Dr. Francis Rowland of Pasadena, who rode his magnificent bay mare Della Fox, as pretty a high school performer as may be found in the length of a many-day's ride. Cake-walking to the music of the band, side-stepping, essaying the minuet with dainty hoof poised in air to the strains of a march, neck arched haughtily, the handsome aristocrat bore her rider past the stands, while round after round of applause rang out. Only one other high school horse appeared in the division, this being H. C. Beville's Pauline, a beautiful chestnut mare.

In this same division Dr. M. L. Moore rode the bay gelding Truckee, I. E. J. Saint the bay gelding Jeffries, Hugh D. Gibson the mare Conifer Barbarina, F. E. Davis Psyche, L. A. Grant Harvey, R. H. Lacy Dooley, Oswald F. Zahn Honduras, R. E. Dow Dick, A. G. Masters Reno, John McCann the brown gelding Atlas, Horace R. Boynton, Jr., the bay gelding Pete, T. B. Russell the sorrel gelding Boy, W. D. Woolwine the bay mare Clipper, G. Hanst the sorrel gelding Barney, and J. A. Graves the bay mare Normadine.

In the four-in-hands, driven to breaks, John S. Cravens of Pasadena took first place with his magnificent four, 8-abright, Old Sport, Seabold and Peacock. William Garland took second place with his wheelers Black Arrow and Jim Wood and his leaders Palo Alto and Brown Bow. Willard H. Stimson took third place with his wheelers Cap and Judge and his leaders Colonel and Major.

In the brougham class Mrs. A. J. Stimson carried off first place with her handsome span of brown geldings. C. Eben Smith carried first in the victoria class with his stylish team of blacks, Fred and Emma; R. H. Howell came second with his high-stepping team of sorrels; Walter Newhall took third place with a black gelding and gray mare, and L. J. Christopher stood fourth with his Dolly and Belle, bay mares.

In class H, E. L. Doheny took first place, John Singleton second, and John H. Norton an even second. Mrs. S. W. Dorsey showed a handsome span to trap, Gypsy and Ben. H. N. Henderson, G. M. Vail, R. E. Muncey, and N. M. Kramer showed stylish spans, pairs to surreys. W. C. Burns drove Billy and Jimmy, stepping shortly to a spider phaeton. John S. Cravens held the ribbons to Minister and Prejudice, the only tandem team in the parade.

Dr. P. D. Carper, in class N, pairs to road wagons, took first place; Dr. Connolly second place, and F. E. Browne third.

Wilbur A. Hendryx showed Sappho, a splendid brown mare, to a trap in class P, and John Chanslor drove Frank, a tasty sorrel gelding. Walter S. Newhall stood first in the spiders-and-stanhope class with his bay mare, Yotham; Mrs. Cosmo Morgan took second with her gray gelding, out of a \$10,000 dam from Australia, and George W. Von Ache took third with his black gelding, Dick Swiveller.

In class R, polo carts, W. Esmond Rabbeth showed best, with the bay mare, Judith, and W. L. Graves second with Barbara Frietchie. There were twenty-five showings in the single runabout class, Miss Winnie Blecker showing first, S. W. Dorsey second and Mrs. F. Humphrey third. In class T, trotters to bike or cart, G. W. Tibbott's Gen. Wiles took first place, C. A. Canfield's Sue took second, Robert Moorhead's Robert I. third, and L. J. Rose, Jr.'s Zambra fourth. Percy Major drove a stylish spotted mare in class V. Miss Gladys Hants showed best in the ponies-under-saddle class, with her Girlie. Edward Vail second with Sineto, and Mahlon Vail third with Malo.

Nine stallions were shown in hand, each of them provoking generous applause, W. G. Durfee's Coronado (McKinney-Johanna, Treat,) must be accorded first place; George H. Becker's Zombro (McKinney-Almont, Lightning,) second, and W. G. Durfee's Petigru (Kingward-Lemonade,) third.

Dr. W. LeMoynes Wills's Bonnie Ela and foal showed first in class Y, mares or geldings. L. J. Christopher's Marisol took first place in the colts-or-fillies class, L. J. Christopher's Zombretta second, and B. Erkenbrecher's California Poppy third.

So complete was the success of Thursday's show, that the Driving Club has decided to hold a full two days' horse show next year.—Los Angeles Times.

R. E. Homer, of Knightstown, Ind., recently sold six head of yearling colts by the showstallion, Jubilee De Jarnett 2:29½, to Joseph C. Brunk, proprietor of Cotton Hill Stock Farm, Springfield, Ill. Mr. Brunk is an extensive breeder of Morgan horses and ranged from \$125 to \$175.

## JOTTINGS.

**LOU DILLON**, daughter of Sidney Dillon and Lou Medium by Milton Medium, brought \$12,500 at the Blue Ribbon sale at Cleveland last Tuesday. In all probability the price was a disappointment to the Santa Rosa Stock Farm people and to Millard Sanders, who told me a few days before he left Pleasanton that in his opinion the beautiful chestnut mare would bring more money than any mare ever sold for; but \$12,500 is a lot of money to pay for a green mare that has never started in a race, even by men who are horse enthusiasts and have millions of money. Mr. C. K. L. Billings was the buyer and he would doubtless have gone higher had it been necessary, as he wanted the mare, but there was no other wealthy person who was willing to bid against him when \$12,500 was reached and she sold for that money. It was a good price, even though the management of the farm that bred her may think Lou Dillon is worth more money. 'Tis true, the mare showed a half in 1:01½ at Cleveland on Monday and is undoubtedly capable of trotting a mile in 2:05 or better, but the fact remains that she has never started in a race and her capacity as a race horse is untested—an unknown quantity, so it were. Every Eastern horseman that visited Pleasanton during the winter and saw Lou Dillon at work, asked if she had learned to score. No less than three prominent road drivers of New York, whose money always helps the big sales along and is bid in big chunks when a horse is offered that just suits their fancy, told me that Lou would not score down with other horses when being worked on the Eastern tracks last year, and that in their opinion she would be a difficult one to manage in a race. I hope Lou Dillon will disprove all these suspicions this year in the hands of Mr. Billings and that she will carry off enough purses, laurels and records to convince everyone that she is as good headed and game as she is fast. There is not a particle of doubt but this talk was the cause of her selling for less than \$20,000 and consequently the price she brought was a good one, all things considered.

**Anzella 2:06½**, the best mare in America last year, brought \$5500. This was another surprise, but there were reasons for it. Messrs. Pierce paid \$4000 in cash and a yearling colt worth at least \$1000 at that time for Anzella in 1902. She was taken East and made a marvelous campaign, winning about twenty thousand dollars in purses and coming back with the reputation of being the greatest race mare that the Grand Circuit had seen for years. The mistake was made of selling her on her record, looks and breeding alone, without showing in the Missouri fashion what her present condition is. She was not worked for speed this year, her owners and trainer concluding that it would be better to sell her on her looks and past performances than to run the chances of injuring her in any way by training and fast work. She had already "shown" and it was not necessary to do it again. But right here the suspicious ones saw a chance, and they began whispering that Anzella would not stand training. I do not believe there is any foundation whatever for these surmises, and Anzella is, in my opinion, as sound as any mare in the country, and I only mention this to show how little things will affect the price of a horse.

**Dolly Dillon** brought \$3700, which was a good figure, considering the fact that after an almost unbeaten season on the Grand Circuit, she returned to the fray the following year and failed to win a heat in five starts. Sir Albert S. was another high class horse that was a disappointment in the salesring. He was led out with a tendon that was slightly bowed and this, of course, kept his price down. Mr. Sanders believes it will not prevent Sir Albert S. pacing below his record this year, and there have been many good race horses that could win week after week with a much worse leg. He sold for \$3200. Marengo King 2:29½, son of McKinney and By By by Nutwood, brought \$3100. This stallion is a grand looker and a large horse. His speed is not phenomenal, but he can trot a mile in 2:20 or better. He is certainly one of the best bred sons of McKinney.

A most peculiar feature of the first day's sale was the paying by the buyers of larger prices for the get of Geo. A. Davis' stallion Rey Direct 2:10 than was paid for the stallion himself. Reybel, the three year old black filly by him out of Mabel, the dam of Dirctly 2:03½, is undoubtedly one of the highest class three year olds ever shipped out of this State. She has paced a mile in 2:15, a half in 1:03½ and a quarter in 2:13 seconds in April, and was one of the best headed and best mannered shown at the sale. She brought \$5000, not a cent more than she is worth. Rey del

Valle, a black colt but two years old out of Sidlette by Sidney, fetched \$2050. He is a pure gaited pacer and had worked a quarter in 33 seconds. Rey Direct brought but \$2000 and was absolutely given away. He is one of the most uniform sires of speed and good looks of all the members of the Director family and being by Direct 2:05½ out of a mare that has produced two with records below 2:12 and three below 2:22, he is worth anybody's ten thousand dollars. He gets over 90 per cent of his mares in foal every year, and nobody ever saw a more uniform or handsomer lot of foals. His oldest foals are three year olds and he will be in the Great Table as soon as the racing season ends.

A disappointment to me was the price at which the Griffith Estate's three year old stallion Stiletto by Steinway was knocked down. James Golden, who is one of the most astute buyers at the big auctions was the purchaser and I am sure he owns a record breaker. Stiletto is undoubtedly one of the fastest pacers this State has produced. He paced a half in 1:01½, a quarter in 29½ seconds and an eighth in 14½. Mr. Griffith says Stiletto should be gelded and not raced until he is five years old, and under those circumstances believes he would then be the fastest green pacer that ever started. He was one of the grandest looking three year olds I ever saw about six weeks ago, but he had lost flesh and looked rather thin the day he was shipped to Cleveland.

There was but one of the get of James Madison 2:17½ in the sale and this was the three year old Happy Madison out of Missie Medium, a half sister to Stam B. 2:11½. He was one of the consignment of Geo. A. Davis and was purchased by James Golden for \$2400, a good price for a green three year old trotter, no matter how richly bred.

## Pleasanton Will Give a Meeting.

The horse centre of California propose to give a fair and race meeting this year, appropriation or no appropriation. Recognizing that the training of trotters and pacers at the famous Pleasanton track is the leading feature of that locality, and that it has done more to advertise the natural wealth and splendid climate of the Livermore valley than any other one thing, the enterprising citizens of Pleasanton have concluded that they will hold a fair and race meeting this year at which the harness horses will have a number of liberal purses to trot and pace for, and that Pleasanton shall not lose its reputation as the greatest training ground on the Pacific slope.

The date selected for the event is the week immediately following the California State Fair in September and the program of races will be announced soon. The citizens have organized by selecting Mr. Lou Crellin as President and Editor Adams of the Pleasanton Times as Secretary. It is expected that not less than \$2000 will be raised among the citizens of Pleasanton to aid this fair and it is proposed to give a week's entertainment that will be the equal of any district fair held in California. Prizes will be offered for all kinds of live stock and it is proposed that the display of cattle of the beef and dairy breeds and of horses of all breeds shall be the best ever held in this section of the State. The race program will have careful attention and liberal purses opened for the horses now in training in California.

The most progressive and energetic citizens of Pleasanton have the matter in charge and the Pleasanton Fair will be one of the big events of the year.

## Items From Oakwood Park.

A letter from Fred Booth, superintendent of the Oakwood Park Stock Farm, contains the following items of interest:

We sold to Mr. Crellin, of Pleasanton, Saturday last the great broodmare Bertha, dam of Don Derby 2:06, Diablo 2:09½, etc., also her filly foal by Owyhee 2:11. Bertha herself is in foal to Searchlight.

Have just received word from Australia that Carlota (sister to Agtatio 2:09) by Steinway-Ione by Ferguson, foaled a nice colt by Stam B. 2:11½. We shipped her there last summer after breeding her.

One of the speediest mares now on the Pleasanton track is Explosion by Steinway, dam Flash dam of Javelin 2:08½, etc. She is owned and trained by Mr. Dunlap of San Francisco and can step a quarter in 30 seconds. He purchased her at Oakwood Park sale, March 26.

J. D. Blamey of Grass Valley, Cal., has purchased the interest of his deceased partner, James Brown, in the horses owned by Brown & Blamey. Mr. Blamey is now the owner of the stallion Lochinvar 2:20, and Wabu, a full brother to that horse, besides all the broodmares and colts formerly owned by the firm.

Jackson's Napa Soda does not tangle the feet.

## Stemwinder, Dam of Directum.

As stated in these columns last week, the old mare Stemwinder died at the Rancho del Valle, Pleasanton, on Tuesday, May 5th. Foaled in 1878 on the farm of her owner, the late John Green, of Dublin, Alameda county, she lived to produce one of the greatest of all the champion trotting stallions of America, and died full of years and honor at the age of 25. It was not old age that carried her off, however, as she was a strong and vigorous mare up to the day prior to her death, a complaint of the bowels causing her demise.

Stemwinder was sired by Venture 2:27½, a strictly thoroughbred horse that was a trotter and took his record in a race in this city, November 2, 1877. He was a son of Williamson's Belmont. The spring of the year he made this record he was bred to Kate, a mare by Roadhouse's St. Lawrence 2:32½, and the following year Kate foaled a filly that was given the name of Stemwinder. This filly when broken, slowed speed at the trot and was trained. She first started at San Jose in 1884, when she was six years old and

STEMWINDER

took a record of 2:31. She was not a very successful race mare and was retired to the breeding ranks after a short campaign. The first of her get to be raced and trot to a record was Electrina, a mare by Richard's Elector, that took a record of 2:30 as a three year old at Stockton in 1891, which she reduced to 2:20 as a four year old.

In 1892, her three year old colt, Directum by Director, obtained the champion race record for three year olds by defeating a field of twelve great three year olds in straight heats in the wonderful time of 2:15, 2:12 and 2:11½. The next year Directum took the world's stallion record of 2:05½, which has since only been beaten by Cresceus and equalled by John A. McKerron.

In 1897, Directina a three year old daughter by Direct trotted to a record of 2:16½ at Lexington, giving the grand matron three in the 2:20 list, all trotters. Stemwinder has had several other foals—two by McKinney 2:11½ and one by Rey Direct 2:10. Mr. H. E. Green son of the man who bred the old mare owns a very handsome black stallion from her by Richard's Elector that has never been trained but has been used during the past two years in the stud and is getting a fine lot of colts. The McKinney fillies are owned by Mr. C. A. Durfee and both have shown better than 2:20 speed. The Rey Direct is a yearling.

Stemwinder was always a object of great interest to horsemen who visited Pleasanton. For the past three years she had been under lease to Mr. Geo. A. Davis, of Pleasanton, who bred her to his horse Rey Direct. The old mare was given fitting burial within sight of the famous Pleasanton track, and a slab will be erected to her memory.

## Empire City Track Gets The Big Event.

The match race for \$10,000, between Major Delmar 2:05½ and Lord Derby 2:05½ will be trotted over the Empire City track, July 4th. The location of the race was left to Alta McDonald, driver of Major Delmar, and George Spear, driver of Lord Derby, and the Empire City track secured the race on the best bid. Lord Derby is two years older than Major Delmar, as he was foaled in 1895, and has had two years' more campaigning experience. Comparing eight winning races of Major Delmar with eight winning races of Lord Derby last season, and the Derby horse shows the fastest average speed and four of Lord Derby's races were to wagon. Major Delmar has the fastest first heat to his credit, 2:05½; but the best second and third heats he has trotted are 2:06½ and 2:09, while Lord Derby has gone a second heat in 2:06, and a third in 2:06. Lord Derby has trotted three heats in 2:05½, 2:06 and 2:06; while Major Delmar's best three are 2:05½, 2:06½ and 2:09. These figures favor Lord Derby, and if he comes for the word fit and in good temper he should win.—American Sportsman.

## Tanforan Driving Association.

On Monday last at the Palace Hotel, in this city, there were taken the preliminary steps toward the organization of a gentlemen's driving club, which will doubtless result in San Francisco taking her place among the large cities of the United States where matinee harness racing has become the leading pastime of those who own trotting and pacing horses.

The leading spirit in this movement as in many other enterprises which have benefitted this city was Mr. A. B. Spreckels, who made the organization of this new club possible by securing from President Thomas H. Williams and the New California Jockey Club, a lease of beautiful Tanforan Park, where one of the best mile tracks in America is situated and which will now be kept in condition for the training and racing of harness horses.

At the meeting held on Monday last, Mr. Spreckels allied the gentlemen whom he had invited to be present to order, and nominated Col. J. C. Kirkpatrick as chairman. The objects of the meeting were stated and by the unanimous vote of those present the new organization was given the name of the Tanforan Driving Association.

A Board of Directors were chosen as follows: President, J. C. Kirkpatrick; Vice-President, A. B. Spreckels, and Messrs. Frank H. Burke, H. W. Goodall and Edw. Aigeltinger. D. L. Hackett was elected Secretary. On motion the President appointed Messrs. Spreckels, Burke and Goodall a committee on Constitution and By-Laws, to report at the next meeting of the Board. The celebrated Cleveland Driving Club's by-laws and rules were taken as a model and will doubtless be adopted with a few changes to suit conditions here in San Francisco.

After fixing the initiation fee to the club at \$20 and the dues at \$5 per month, and attending to a few minor matters that required immediate action, the Board adjourned to the call of the President.

Before adjourning the Directors granted the Golden Gate Driving Club the use of Tanforan track for a matinee to be given on May 30th, Memorial Day.

The Tanforan Driving Club now has control of the Tanforan track. William Fieldwick the well known and very competent Superintendent of the California Jockey Club's tracks will be in charge and gives it as his opinion that Tanforan can be made one of the fastest and best trotting tracks in the country. There are two tracks at Tanforan, an outer track which is just one mile in circumference and an inner track which is narrower and shorter. The inside track will be reserved for runners and will be kept in condition for training the galloping horses. The outside track will be devoted exclusively to the use of the harness horses and will be kept in the best possible condition for the training and racing of trotters and pacers.

There are 671 splendidly appointed box stalls at Tanforan and these will be rented by the club to horsemen at \$2.50 per month per horse—no charge being made for stalls necessarily occupied as feed rooms or sleeping apartments for grooms.

The track and buildings are now open and ready for trainers to occupy with their strings of horses. About fifty trotters and pacers are already being worked there and many more will move there during the coming month.

It is the intention of the Directors to make the Tanforan Driving Association one of the leading amateur clubs of America. Matinee racing is to be a regular feature, in which the club members will drive their own horses in competition for blue ribbons and trophies that may be offered by the club.

Situated but twelve miles from the business centre of this city, Tanforan is accessible to those who desire to look after the training of their horses and as the track can be reached by electric and steam cars in forty-five minutes or less, many owners will doubtless have horses trained who have heretofore denied themselves that pleasure because they could not spare the time required to visit tracks so far distant from the city that an entire day or more would be required to make the round trip.

It is also the intention of members of the club when they are thoroughly organized and the association in working order, to give at least one regular race meeting each year, when liberal purses will be offered for open competition to all owners of harness horses, whether members of the club or not, and Tanforan will then occupy a very important place in the regular circuit of summer harness racing in California.

The Tanforan Driving Association, in the language of its president, "has been formed to foster an important industry of the State and to do so it has secured a place where finely bred animals may be fully tested as to their mettle."

The new organization will start out with the very best wishes of all admirers of the light harness horse for its complete success along the lines chosen for its guidance by the estimable gentlemen who comprise its first board of directors.

## Los Angeles Driving Club's Matinee.

[Los Angeles Express, May 8th]

If anybody in the city had an idea that harness racing is not popular in this city a visit to Agricultural Park yesterday afternoon would have undeceived him. Between 15,000 and 16,000 persons were on hand to witness the horse parade and every seat in the grand stand and the ones at the paddock were filled, the crowd remaining until the last race had been run. Nor was this all of the crowd. The inner field, the fence as far north as the carriage entrance was filled with equipages of all kinds, sandwiched in, until every particle of space had been taken up. It was the most enthusiastic and the largest assemblage ever brought together at a race matinee, or any race meeting for that matter, shows simply that where the sport is given on its merits, Los Angeles citizens always will give support to the game. It is not altogether because the sport was free yesterday, but the work of the Driving Club in bringing to the city the best bred and the highest class of carriage and racing horses, is responsible for the hearty and cordial welcome.

One of the exciting races of the afternoon was the one between A. W. Bruner's El Diablo, a pacer, and William Garland's trotter, Sweet Marie. The former won easily and Mr. Garland acknowledged that he was against it with the pacer.

Races for ponies were the first two events on the card. The first one brought out three ponies and after a lively skurry through the stretch Edward Vail, on Sineto won. The race was for a quarter of a mile, was a dash, and the judges said it was made in 28½ seconds. Howard Braly's Pierpont Morgan captured the second pony race from a field of two others. This, too, was a quarter-mile dash and was made in the same time as the first one—according to the judges.

Henry Berry, driving Briney K., had a walk-over in the 2:25 trot, winning two straight heats from his field of two. The first heat was made in 2:22 and the second in 2:23.

In the fifth event, Glen, driven by P. L. Budinger, dumped the driver at the water tank and it took a lariat to stop the runaway horse. "Pop" Budinger was finally taken from the soil and found to have lost considerable of his cuticle, but no bones were broken. The horse was placed last in the "come in." Then Claude Black was sent in to drive and won the next heat. The third heat went to Venus, driven by Dr. Hagan, but the fourth again fell to Glen, driven by Black. This meant the race for the gelding.

The results of the afternoon's racing are as follows:

First race, boys' ponies, ridden by owners, quarter-mile dash—Sineto, Edward Vail, won; Spot, Mahlon Vail, second. Pierpont Morgan and Philippine also ran.

Second event, match pony race, quarter-mile dash—Pierpont Morgan, Harold Bayley, won; Buster, H. W. Fursman, second; Arch, Joe Horgan, third.

Third event, 2:25 trot.

Briney K, b, W. H. Berry	1	1
Catherine, br m, C. A. Canfield	2	2
Mowitz, br m, R. B. Moorhead	3	dr

Time—2:23, 2:23.

Fourth event, match race, two in three.

El Diablo, ch g, A. W. Bruner	1	1
Sweet Marie, br m (tr) William Garland	2	2

Time—2:11, 2:11½.

Fifth event, 2:25 pace, two in three.

Glen, ch g, P. L. Budinger	6	1	6	1
Coeur de Lion, b g, Dr. Willis	1	2	2	3
Venus, br m, M. J. A. Fairchild	5	5	1	2
Sallie Miles, br m, J. C. Burns	4	3	3	dr
Welcome Mac, br g, L. W. Ross	2	4	4	dr
Irie, br m, C. A. Canfield	3	6	dr	

Time—2:23, 2:25, 2:21, 2:23.

Mile dash, mixed.

Laval, b g, George M. Bixby	1	
Burley F., br g, F. H. Westfelt	2	

Time—2:31½.

## The Two Year Old Futurity.

On June 1st, a payment of \$25 must be made on each eligible entry in the two year old division of the Kentucky Futurity for foals of 1901.

Of the \$21,000 guaranteed by the Kentucky Trotting Horse Breeders Association, \$5000 is set aside for the two year olds, to be raced for at the annual meeting, October 6th to 17th next, and no owner of a youngster that is in the least promising can afford to drop out at this time, as no further payment will be required before September 1st, when there will have been ample time to have thoroughly tried out the entry.

The conditions of the race require that all entries failing to make payment upon the dates specified shall be dropped, therefore, owners desiring to start should communicate with E. W. Shanklin, secretary, on or before June 1st.

## Said to Be Incurable.

Mr. Z. Holden, prominent breeder at Sheboygan Falls, Wis., writes April 14th as follows: "Enclosed find check for half dozen Quin's Ointment. Have never used anything like equal. Have just removed a blemish on my horse that a veterinary said was incurable." This is the universal expression of all who try Quin's Ointment. For curbs, splints, spavins, windpuffs and all blemishes there is nothing better. Price one dollar per bottle, delivered. Satisfaction guaranteed. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain it from your druggist.

## At the Stockton Track.

The track at Stockton is in fine shape at the present time and all horses quartered there are doing well. None of them have been moved any fast miles as yet, the fastest up to last week being one in 2:24, last quarter in 33½ seconds by The Mrs., Charley Whitehead's fast pacing mare by Derby Ash, and Cranky Thorn 2:22½ a pacer by Hawthorne in Charles Helm's string.

Mr. Mohring, the owner of Mose M., worked that trotter a mile in 2:26, last quarter in 33½ seconds.

George Kneier, or "Rio Vista" as all the boys call him, is training two mares for Mr. Akers, both by Derby Ash, one a trotter and the other a pacer. He has worked the latter a mile in 2:22 and the former a quarter in 35½ seconds. George says 2:10 will not stop either of them this fall.

Deputy Sheriff Smith has a green trotter in Charley Whitehead's charge that acts like a good one. He is by Derby Ash and while 2:30 is the fastest Whitehead has driven him for a mile, all he has to do any time is to ask him to step and he thinks the bystanders are all from Missouri and shows them that he has speed of a high order. He is a great prospect.

J. Sangster has Jennie S. 2:20 by Directum looking and going well, and worked a green pacing mare a mile in 2:26 the other day.

Tom Holmes has four in his stalls. The trotter H. D. B. 2:25½ that showed a trial last year in 2:18 looks like one of the money getters this year, and a green trotter by Dexter Prince showed a mile in 2:27 last week. He has two by Alta Genoa 2:14½ that are also showing well.

John Rowan has four McKinnys and a grandson of that horse. Monochrome, his big stallion by McKinney out of the dam of Monterey 2:09½ and Montana 2:16, is looking well and has had a good season here. He trotted a quarter in 35 seconds last week, and Mechanic another son of McKinney did one handily in 33 seconds. A two year old trotter by Monochrome went a quarter in 39 seconds in a very clever manner and will be a trotter.

Charles Whitehead's black stallion Delphi 2:12 is looking well and being liberally patronized by the breeders of this section.

Mr. Rickles' pacer Zulu that took a two year old record of 2:40 and showed a trial in 2:09½ after reaching maturity, is in training again and is doing nicely.

We are all hoping the Breeders meeting can be secured for this track although there is every probability that the Stockton Driving Club will give a meeting on its old date—the week following the State Fair.

SAN JOAQUIN.

## Favors Two in Three.

Starting Judge Frank Walker's opinion of old and new way of racing:

"To my way of thinking one of the greatest features of the two in three heat plan is the fact that the public prefers to see sharp, quick racing, and that will have a tendency to increase the gate receipts, and the associations are waking up to the fact that that is something they must look out for, especially as those who are maintaining campaigning stables will not enter their horses as recklessly as they have been doing heretofore, as is shown by the entry lists for the Grand Circuit meetings this season.

"There has not been such a falling off for years. It shows that those who are racing their horses for the purses and the chance of making something will race for their own money no longer. They are tired of chasing some horse through the circuit that outclasses them, and all they have a chance for is the place money, so the track managers face a question that has been a long time coming, but it has arrived, and that is to raise a revenue to pay purses by some other system than entrance fees. They will have to devise some means of increasing the gate receipts.

"I believe, also, that the time is not far distant when there will have to be some plan evolved to handicap our trotters and pacers in some other way than by record."

## Worth Remembering.

There are many remedies and hoof growers on the market. It's easy to grow a foot, but when it comes to growing the right kind of wall and foot, one that will stand the hard work of pavements and tracks, all trainers know that they are up against the real thing, and that 90% of the so-called "hoof remedies" are worthless when put to the practical test.

The number of horsemen who have been obliged to retire otherwise promising horses in the middle of the racing season, due to sore feet, and general weak feet, because of the use of some new and untried remedy, resulting in the loss of time and money, ought to lead to a careful consideration of this matter.

Claims are easily made; actual tests are better. Campbell's Horse Foot Remedy has been tested by actual use on almost every ailment of the foot for a period of over twenty years, and has never failed to do all that has been claimed for it. It cures soreness and grows the right kind of a wall and foot.

Sprink is the time to use it; money refunded if it does not prove satisfactory.

Jackson's Napa Soda is sold in every city and hamlet in the State.

## An Interesting Filly.

There was a filly dropped at Forbes Farm, Milton, Mass., last week whose career will be watched with interest by all breeders of trotting stock. Her sire is Peter the Great 2:07½. Her dam is Princess of Monaco by imp. Meddler, a thoroughbred son of St. Gallant and Baybody. Her second dam is the noted world's ex-champion trotter Nancy Hanks 2:04.

Mr. Forbes was inclined to test the merits of a thoroughbred cross, and in 1895 mated Starlight (4) 2:15½ by Westmore with imp. Meddler, hoping to get a filly. His hopes were realized. The filly was so satisfactory in all respects that in 1898 he had Nancy Hanks 2:04 mated with Meddler, hoping to get another filly for a broodmare. Fortunately he was also successful in this venture. The filly Princess of Monaco was the result.

Mr. Forbes will now have an opportunity of testing the thoroughbred cross quite thoroughly. He owns Marion by Arion 2:07½, dam Nancy Hanks 2:04. He also owns a filly by Peter the Great 2:07½, dam Nancy Hanks, and one by Bingen out of the famous daughter of Happy Medium. Undoubtedly if no accident befalls them these two fillies by Peter the Great 2:07½, one out of Nancy Hanks 2:04, the other out of Princess of Monaco by imp. Meddler, dam Nancy Hanks 2:04, will both be mated with Bingen 2:06½, and when their produce is developed it will be known whether the produce of Nancy Hanks 2:04 that is got by Bingen 2:06½ make more successful race winners than does the produce by Bingen 2:06½ out of these daughters of Nancy Hanks.

The indications warrant the conclusion that Nancy Hanks 2:04 will gain as great fame through the rapidly increasing family that she has founded at Forbes Farm as she did by her brilliant performances upon the track. Her son Admiral Dewey (3) 2:14½ by Bingen 2:06½ is one of the fastest trotters ever foaled. If he fails to take as fast a record some day as his dam it will not be for faulty action or lack of speed.—*Am. Horse Breeder.*

## Kentucky's Classics.

The Kentucky Trotting Horse Breeders Association announces with this issue the renewal of the early closing events for its ten-day meeting, October 6th to 17th: including The Transylvania, a race which has added more fame to this association and interest to turf history than, possibly, any other. For 1903, The Transylvania is for \$6000, and is arranged for trotters eligible to the 2:12 class on June 1st; however, horses need not be named until September 9th, and entries are transferable on or before that date. Second upon the list is The McDowell, \$5000, for 2:10 trotters; then follow The Walnut Hall Cup for 2:15 trotters; in addition to the \$3000 purse guaranteed by Walnut Hall Farm, Mr. L. V. Harkness will present a magnificent silver trophy to the fortunate owner of the winner; The Blue Grass, \$2000, for 2:19 trotters; The Tennessee, \$3000, for pacers eligible to the 2:08 class on June 1st, but, as in The Transylvania, horses need not be named until September 9th, and entries are transferable on or before that date: The Johnston, \$2000, for 2:24 trotters; The West, \$2000, for 2:29 trotters; The Wilson, \$2000, for 2:20 pacers; The Kentucky, \$2000, for three year old trotters, and The Lexington, \$2000, for two year old trotters.

Horses of any age, gait or speed can find two or more races to suit in this list, and they will be so scored as to give from 3 to 7 days between.

Purses for such large amounts, and so many of them, can only be continued by the most liberal patronage upon the part of the owners, and we are confident the importance of them will be realized to the extent of a record breaking entry list.

Upon another page is given the conditions in full, and owners are also reminded that payments are due on June 1st in the Futurity, \$20,000, for three year olds (foals of 1900), and in the Futurity, \$21,000, for two year olds (foals of 1901).

Entries and payments must be mailed to E. W. Shanklin, secretary, Lexington, Ky., on or before June 1, 1903.

## A Freak Horse.

If a certain Chinese laborer on Roberts island ever finds out just what he has done in relation to a long-haired horse, he will drop dead on the spot. A white man named Masterson will also probably throw a few back flips when he becomes cognizant of the fact that he had a fortune in his hands and let it go for a paltry \$50. The Chinaman sold the animal to Masterson for \$20, and the latter sold it to Manager Nat Reiss of the Southern Carnival Company for \$50. Reiss says it is worth \$5000 as a freak if it is worth its feed. He will exhibit the animal as the only Angora horse in captivity, at 10 cents per. The animal looks to be about thirty years of age, and has long white hair all over, its locks being fully four inches long.—*Stockton Mail.*

And someday, after this long-haired horse feels the hot summer coming on and gets a few bran washes or a cooling feed, he will shed his Angora coat and the freak will drop back to the sum the Chinaman received.

## Curability and Contagion of Glanders.

Anything and everything from competent authority which tends to throw light on the subject of combating the terrible equine disease glanders is welcomed by the veterinary fraternity and in a more indirect way by the breeders and users of horses in every land. Much interest is being displayed in the last official report made in Britain by Prof. McFadyean. From what is related in this document it seems that glanders is more prevalent in Britain than it was two decades ago. There were fewer cases reported in 1902 than in 1901, but in both the figures were larger than they were twenty years ago. Necessarily glanders is a hard disease to fight for the reason that horses are so valuable that destruction is costly to both authorities and owner, and the work of experimentation with it is expensive from every point of view. This certainly accounts for the comparatively slow rate of progress made. The discovery of mallein and its action was a great step in advance, and it is along the line of working with this agent that Principal McFadyean has been doing the most of his work the past year.

He reports trials made with the view of finding out if horses which have reacted to mallein can be cured and if, when cured (or ceasing to react), they are centers of infection contagion for others. Along this line of inquiry six reacting horses and eight non-reacting horses (to all intents and purposes quite healthy) were stabled together for periods varying from fifteen to fifty-five weeks. All the horses were forced to eat and drink from the same troughs and everything was done to make them live as nearly in common as possible. At the end of the longest trial one of the eight non-reactors was found on post mortem to be infected. The other seven were not.

In the second trial it was desired to find out if horses that had at one time reacted, but had been cured or had ceased to react to mallein, would communicate the disease to others non-reacting. Five horses that had been cured as described were confined with six apparently altogether healthy horses and the lot kept in as close contact as possible for fifty-three weeks. No infection is reported. It is therefore presumed that horses which have been cured and have ceased to react will not communicate the malady to others. Inferentially then it seems that glanders is not an incurable disease. In conclusion it is stated in the report that glanders is chiefly spread by horses showing no clinical symptoms of the disease and that it may be stamped out either by compulsory slaughter or by a carefully regulated system of modified isolation. The most valuable portion of the report as a whole is that in which it appears that horses may actually be cured and then not communicate glanders to healthy horses placed in closest quarters with them for a period exceeding one year. It is plain, too, that if it was not for the enormous expense attaching to experimentation along this line, we should soon know much more about this disease, but it must be admitted that trials which involve the slaughter of as many as eight healthy horses at one time after carefully housing and keeping for more than a year can only be made by the wealthiest of nations and then not in great numbers.—*Breeders Gazette.*

## The Cleveland Sale.

Only a very meagre account of the Blue Ribbon sale has been telegraphed this week, the report giving only the prices received for a very few of the California horses, as follows:

Lou Dillon, ch m, to C. K. G. Billings, New York, \$12,500.

Anzella, b m, to O. G. Kent, Cleveland, for \$5500.

Sir Albert S., b g, to C. K. G. Billings, New York, for \$3200.

Dolly Dillon, b m, to John McDonald, New York, for \$3700.

Marengo King, br h, to J. H. Brown, Detroit, for \$3100.

Stiletto, ch c, to James Golden, Medford, Mass., for \$2400.

Rey Direct, blk h, to D. Lee, New York, for \$2000.

Reybel, blk f, to James Golden, Medford, Mass., for \$5000.

Rey Del Valle, blk c, to D. J. McClary, Hartford, for \$2050.

Happy Madison, br g, to James Golden, Medford, for \$2400.

Anzella, Sir Albert S., Dolly Dillon and Marengo King were consigned by Santa Rosa Stock Farm, Stiletto by the Millen Griffith estate and Rey Direct, Reybel, Rey del Vale and Happy Madison by Geo. A. Davis. We hope to be able to give a full report of the sale in our next issue.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

## Death of John H. Wallace.

The following is from the *American Sportsman* of last week: "John H. Wallace, editor, magazinist, author, philanthropist and originator of the American Trotting Register, died in New York City on Saturday last in his eighty-first year. Mr. Wallace was a remarkable man and achieved a remarkable career. He was splendidly endowed, both mentally and physically, with intense energy and with ambition to achieve as intense as his energy. The Trotting Register was his creation and it will prove his most enduring monument. But his book, 'The Horse of America,' issued in 1897, gives him the highest place among that limited number who have written horse histories. Mr. Wallace also demonstrated high business capacity. He sold the Trotting Register for \$130,000 cash and invested this money with such judgment and foresight that he was enabled to give \$100,000 to educational institutions and charities. Quite recently he gave \$120,000 to the Washington and Lee University at Charlottesville, Va., and died leaving an ample fortune. He was married twice. His first wife was Miss Ellen Ewing. His second was Miss Ellen Wallace Veech, whom he married in 1893, when he was 71 years old. During his career as editor of *Wallace's Monthly*, a magazine devoted to the horse, which he established in New York in 1875, Mr. Wallace made himself famous as a controversialist. He had a heated debate with Mr. Hamlin of Village Farm and Governor Stanford of California and others on the comparative merits of developed and undeveloped sires and the value of the thoroughbred in trotting blood, Mr. Wallace maintaining with great vigor and occasional venom that the thoroughbred was undesirable in a trotting pedigree. It can be justly said of him that he had convictions on every phase of the breeding problem and that he always maintained with fidelity, courage and ability his convictions. As a writer on horse topics and historian we have never had his equal."

## Not Moving Fast in Kentucky.

"Hawley," of the *Kentucky Stock Farm*, writes as follows:

"A more striking proof of the backwardness of the season as regards Kentucky need not be given than the statement that John A. McKerron and Kinney Lou were given their first repeat on Tuesday of last week, and each trotted in 2:59½. Here are prospective champions in their classes, and a mile in three minutes in the last of April is given them, yet several of their rivals have been asked to show two-minute speed, and more than one of Kinney Lou's contemporaries have already beaten 2:20. At Memphis the horses are reeling off halves and quarters at a rate of speed ranging from 2:10 to 2:00, and at other points many of the candidates for this season's racing are well advanced in their preparation. The fact that these horses that have just begun their active training will doubtless accomplish fully as much as those that have been prepared at various points in the South, brings up the question of whether or not any advantage is to be gained for fast work in the early spring. Unquestionably any horse that receives a long, slow preparation profits by it and a late beginning followed by this sort of a preparation necessarily means a late entrance into active racing; yet it would seem that, considering the fact that active racing does not begin, as a rule, until the Grand Circuit meeting opens that any horse could be prepared for the Detroit meeting, for instance, by beginning even at this late day. If this is a fact, then the question would naturally arise, is not so much early training unnecessary and does it not put the horse to unnecessary task? The answer might be in the negative, for surely so astute a trainer as Geers would never unnecessarily work his horses, and yet he is one of the earliest to get ready. Many trainers have long contended that it is better for some horses never to be let up, but instead to be kept going moderately all through the winter, and whether or not this applies to all horses, it is unquestionably a fact that the horse that winters well and carries his flesh until well on into the summer is more likely to look well in October than the one that is trained from the very beginning of spring or the last of the winter months."

The *American Sportsman* of Cleveland, says: "Sterling McKinney by McKinney, the young stallion that arrived at the track with James Thompson's California consignment to the Blue Ribbon sale is attracting much favorable comment among the horsemen. He is a handsome young horse, and is said to be fast. He is certainly a good individual. He was shipped out to Indianapolis, Ind., where he will enter the stud at Maywood Stock Farm, along with Rex Americus 2:11½." Sterling McKinney is the three year old formerly called Jim Rea. His dam is the registered mare Twenty-third by Director 2:17, second dam Nettie Nutwood by Nutwood, third dam by Ethan Allen Jr. 2:03, and fourth dam by Williamson's Belmont. Sterling Holt, the proprietor of Maywood Stock Farm paid Mr. Durfee \$3000 for him.

## Notes and News.

Dick Benson will train a string of runners next year.

Pleasanton's date is the week following the State Fair.

Enter in the Harness Stallion Stake. It closes June 1st.

The pacer Pearl Lester 2:13½ has been bred to McKinney 2:11½.

Vallejo's meeting will probably be in August, before the State Fair.

The Los Angeles Driving Club will give a horse show next year.

A four-in-hand team was sold in New York a few days ago for \$8500.

Date and place of the Breeders meeting will be announced definitely next week.

Vallejo's meeting will be held in August and a good lot of purses will soon be announced.

Lucille 2:07, has been shipped to Walnut Hall Farm to be bred to John A. McKerron 2:05½.

At least sixty horses are in training at Fresno for the summer racing season in California.

Concord's fair and race meeting this year will be held on the new mile track at that place.

There will be quite a number of California horses raced in Oregon and Washington this year.

Tanforan track is now open to trainers of harness horses. Stalls are \$2.50 per month in advance.

San Francisco should hold a horse show this coming winter. Properly managed it could be made a great success.

Woodland will hold a fair and race meeting, but not under the auspices of the District Agricultural Society.

Last week thirty trotting bred high steppers were sold at auction in New York for an average of \$1275 per head.

James Sullivan has quite a string in training at Willows, three or four of which are being made ready to go to the races.

Grant Page is jogging Boralma 2:07, over the home track at Dreamworld. The great little horse looks fine and goes sound.

E. E. Smathers says he will back the loser of the Lord Derby-Major Delmar race against Monte Carlo 2:09½ for \$10,000 a side.

Stella, the dam of Twinkle 2:05, will be bred to Direct 2:05½, this year, as will Hallie Dillard, an own sister to Hal Dillard 2:04½.

John B. Sage, the well known secretary of the Buffalo Driving Club, was stricken with paralysis last week, and is now in the hospital.

The Golden Gate Park Driving Association will give matinee racing at Tanforan Park on the 30th of May. As the day falls on Saturday a large crowd is expected.

Sidney 2:19½, the noted California bred sire, has been sold to Judge James H. Cartwright of the Illinois Superior Court. Sidney will head the stud at Judge Cartwright's Oregon, Ill., farm.

J. R. Albertson, of Fresno, has a green trotter by Homeward in his string that is a fast one. He stepped a quarter in 30½ seconds last week and looks like a very high class horse. Mr. Albertson will race him in California.

The managers of the Kentucky Horse Breeders Association offer \$29,000 in purses for their fixed class events, to be contested at their next annual fall meeting, October 6th-17th. Eight of these ten races will be best three in five.

The stallion Coronado 2:17 took first prize at the horse show at Los Angeles during fiesta week. A large number of horses were shown. He is owned by Mr. Wadhams, who drove him a quarter in 31½ seconds one day last week.

Jess A. Holbrook has eight horses in training at the Ukiah track, several of which he is getting ready for the California circuit. The Ukiah track is undoubtedly the best half mile track on the Coast, as all agree who have inspected it.

Butchers' Day, which is observed by the retail and wholesale butchers of San Francisco every year, falls on May 20th, Wednesday next, and the knights of the cleaver will celebrate it with a grand picnic and race meeting across the bay at Emeryville. A big racing program has been arranged, including a half-dozen harness races and as many running contests.

There is an unconfirmed report in circulation that Monroe Salisbury would like to match Monte Carlo 2:09½ against the winner of the Lord Derby-Major Delmar race.

After driving Harold H. 2:04 a mile in 2:11 and a half in 1:01½ recently, Ed Geers stated that he had never driven a pacer that could go a half in one minute as easy as the Canadian pacer can.

Great interest is being taken in William G. Layng's combination sale to take place, June 6th, at Salinas. Some grandly bred trotters and pacers are to be sold. Catalogues will be issued next Tuesday. Send to Mr. Layng for one.

Rush & Haile will hold a sale of trotting bred stock near Suisun on Saturday next. Ten yearling colts will be offered, nine of which are by Demonio out of standard bred mares, many of which were purchased from the Corbitt farm at San Mateo.

The mare Italia by Zombro 2:11 that took a record of 2:23½ and won the Occident Stake in 1901, is owned by Mr. W. P. Murray, of Cleveland, but will be driven by Mr. H. K. Devereux, owner of John A. McKerron 2:05½, in her matinee races this year.

Pat Foley has Lady Granard 2:23 by McKinney at Alameda, together with a string of five or six other McKinneys and a yearling by Montesol, son of McKinney, that is making people who see her inquire about that horse, as she has great beauty and size.

J. W. Shannon of Red Bluff, Cal., has sold his McKinney two year old out of Mary A. 2:30 that he entered in the Oregon stake. Mr. Shannon says the colt will not be raced this year, but will be taken East next year and entered in some of the large stakes there.

At the meeting of the Board of Review of the National Trotting Association held in New York on May 5th, 6th and 7th, Henry Hellman of Portland, Oregon, was fined \$50 for starting horses last year on association tracks while under suspension.

Mr. B. Croner, of this city, informs us that he has sold his fast pacing horse, Flashlight by Illustrious, to Mr. Goddard, a wealthy mining man who has lately become an enthusiastic road driver. Mr. Croner states that Flashlight is one of the most gentle horses he ever owned and that he is very fast at the lateral gait.

At present there are less than 300 horses owned at Village Farm, a reduction of about one-half in the past three or four years. It is understood that the Messrs. Hamlin intended to reduce this number to about 150 head, or to a point to where breeding trotting and pacing horses is a pleasure, rather than a great business proposition.

Venus N. 2:20½, the mare by Contention that Mr. A. W. Nolan of Sebastopol, Sonoma county, sold to Mr. J. A. Fairchild of Los Angeles some time ago, started in a race at the Los Angeles Driving Club matinee Thursday of last week and won the third heat in 2:21, the fastest of the race. Walter Maben drove this mare a full mile in 2:16½ a few weeks ago. Venus N. has never had any training but road driving.

The theory recently advanced by Ben Kenney that mares as a general thing train better than stallions or geldings will bring on more talk. A glance at the summaries of any year will reveal the fact that the difference in numbers as between the males and females that are trained is very slight, but the summaries will also show that more stallions and geldings race the season through than mares.—Ky. Stock Farm.

The old school and the new will clash down the Grand Circuit this year. Budd Doble and Charles Marvin, veterans of the turf, pit their skill and headwork in eyelash finishes against Hudson and Benyon. It will be interesting for the audiences to watch the contest for the supremacy between the extreme end men of the racing minstrels. Messrs. Geers, McHenry, McDonald, and other stars of the profession are the middle men.

The handsome little stallion Erosmont 33052 has been sold by Mrs. L. B. Palmer to B. Croner, of this city, who has sent him to Pleasanton to be put in training for the California Circuit. Mr. Croner expects Erosmont to get a very low trotting record this year. He is also the owner of a gray mare by Wild Boy that he informs us trotted a mile in 2:25, with the last half in 1:05 and the last quarter in 30 seconds one day last week at Pleasanton.

Mr. O. G. Fairchild, of Geyserville, Sonoma county, has arranged with H. L. Smith of this city, owner of the grandly bred young stallion By Mack, son of McKinney 2:11½ and By By by Nutwood, to take the horse to Geyserville, where he will be in the stud hereafter. As By Mack is a grand individual, he will be a valuable acquisition to the section of the country where he is now located and should be liberally patronized by the breeders of Sonoma county.

A Missouri farmer with a horsey turn recently gave some figures showing that there is money at this time in feeding and partially breaking western range horses in the corn-belt. Last summer he bought a band of Colorado rangers at a cost of \$27.50 a head, took them home, fed them until fat, partially broke them and put them on sale in a bunch. An Eastern man came along and took the outfit at \$80 each, the cost at that time aggregating about \$50. This left a margin of \$30 a head or around \$750 a car. The horses gained 200 pounds apiece in the feeding process, the heaviest weighing 1400 pounds when sold.

John Williams, who has been connected for fourteen years with the Oakwood Park Stock Farm as colt handler and trainer, has taken a similar position at the Aptos Stock Farm of Mr. A. B. Spreckels. Mr. Williams has a well earned reputation as a handler of colts.

The mare Leola, owned by Henry Peters, that trotted to a record of 2:25½ over the Dixon half-mile track on May Day this year, is a daughter of Rush & Haile's stallion Bradtmoor 2:26½, son of Fallis and Ethel H. by Sultan. Leola has never had any training to speak of and is certainly a great prospect. Bradtmoor is the sire of L. R. Palmer's pacer Ben F. 2:22½ that Fred Chadbourn worked a mile in 2:12 at Pleasanton two weeks ago.

Walter Maben, who has so far recovered from his recent accident as to be able to ride in the sulky every day, drove two Zombro colts owned by Mr. M. A. Murphy inside the standard mark recently in their workouts. Peter Zombro, three years old and a full brother to Lord Kitchener, stepped his mile in 2:29 on Tuesday, and Briquet, another three year old, stepped a mile in 2:22½, last quarter in 34½ seconds, on Saturday. Both are entered in big futurities to be trotted over East this year.

A grand opportunity for horsemen and farmers to purchase well bred draft mares, stallions, colts and fillies is presented at the sale of Percherons and Clyde horses which will take place in this city at the Occidental Horse Exchange, on the evening of May 28th. They comprise all the heavy horses belonging to the estate of Henry Pierce, deceased. They were bred and raised on the hills of the Yerba Buena Stock Farm near San Jose. This is a sale which should find liberal buyers. About 40 horses are to be sold in all.

At the Henry Pierce sale of trotting stock to be sold at the Occidental Horse Exchange in this city, June 23d, a few of those catalogued are as follows: Elsie (dam of 5), Yedrel (dam of 2), Silver Eye (dam of 2), Floweret (dam of 2), Nordica 2:19, Macola (dam of 1), Nina (dam of 1), Effie (dam of 2), Maud (dam of 2), Ceta (dam of 1), Captive (dam of 1), Athenian (sister to Owyhee 2:11). All these mares, besides 30 others, have been stunted to L. W. Russell. Besides these there are fillies and colts by McKinney 2:11½, Diablo 2:09½, Sidney Dillon, On Stanley 2:17½, Iran Alto 2:12½, Nutwood 2:18½, Dexter Prince, Oro Wilkes 2:11, Advertiser 2:15½, Piedmont 2:17½, etc. There will be at least 100 horses sold on this occasion.

The young Zombros are stepping some at Los Angeles track and that the best racing son of McKinney is destined to be one of the great series is beyond question. He has been bred to 42 mares at Los Angeles so far this season and his list will probably reach fifty before June 1st, when he will be shipped to Salem, Oregon. Sulta B., dam of Santa Anita 2:15 and Santa Anita Maid 2:20, foaled a grand looking black filly by Zombro on the 3d inst. and has been bred back. Sophia R. 2:16 was bred to him this week. Altawood 2:20 foaled a nice black filly by him last week and was bred back on the 12th. George T. Beckers, owner of Zombro, says his Occident candidate for this year stepped a mile in 2:27, last half in 1:12 and last quarter in 34½ seconds.

A telegram from Toledo, Ohio, states that Mr. Geo. H. Ketcham, owner of the great horse Cresceus 2:02½, champion of the world, when informed that Mr. A. B. Spreckels' mare Zarina 2:13½ had foaled a colt by Cresceus, remarked: "I look for the colt foaled by Zarina at the Aptos ranch to become the fastest trotter in the world. The colt is sired by Cresceus 2:02½, and the dam is by Dexter Prince, whose descendants have shown a world of speed. Zarina, had she not sustained an accident to her leg, would have made the fastest trotting mare in the world, and I really believe would have received the mark of 2:00. I consider a colt out of her by Cresceus as having the best speed lines in the world."

If the campaigners owned by Mr. A. H. Miller of Buffalo are not in the winning ranks down the Grand Circuit this season, the best laid plans of mice and men will have gang agley. Council Chimes looks like one of the best pacers in the 2:08 class at present and is booked for a mark round 2:04. Red Princess 2:12½ can run away on the trot right now, and Mr. Snow is very sweet on her. The green trotter Julia M. by Zombro went a mile better than 2:14 in California over a year ago, but was taken sick en route to Cleveland and was not right during 1902. Now that she is thoroughly acclimated, watch her step. She is two inches higher behind than forward, strongly put together, and goes like oiled machinery. Mr. Miller gave about \$3500 for Julia M., and I shall be greatly surprised if she does not prove to be the fastest trotter he ever owned.—Trotter and Pacer.

The ownership of the fast green trotter Kinney Lou seems to be singularly in dispute. The report of his sale by Budd Doble to John Shepard, of Boston, was denied by the former at Lexington last week, and now comes Edward Cogswell with the following, reaffirming the report: "Notwithstanding that Budd Doble publicly denies he has sold the great green trotter Kinney Lou to John Shepard, such is exactly the true state of affairs. After the Horse Show luncheon I had quite a lengthy chat with Mr. Shepard, when he told me that he bought the noted horse last fall, and had intended to keep the matter a secret. Only one man was let into the deal, a particular Boston friend of Mr. Shepard, who unguardedly let the secret out. Naturally he used the information for a news story, and thus the new owner of Kinney Lou became known to the horse world at large."—Trotter and Pacer.

## Man and Mule.

'At the old maids' convention held in Rochester, N. Y., Miss Cynthia Seely read a paper on "More Man." In substance, she said that man is no more of an absolute success than the mule.'

The mule—he is a gentle beast;  
And so is man.  
He's satisfied to be the least;  
And so is man.  
Like man, he may be taught some tricks;  
He does his work from 8 to 6;  
The mule—when he gets mad he kicks;  
And so does man.  
The mule—he has a load to pull;  
And so has man.  
He's happiest when he is full;  
And so is man.  
Like man, he holds a patient poise,  
And when his work's done will rejoice.  
The mule—he likes to hear his voice;  
And so does man.  
The mule—he has his faults, 'tis true;  
And so has man.  
He does some things he should not do;  
And so does man.  
Like man, he doesn't yearn for style,  
But wants contentment all the while.  
The mule—he has a lovely smile;  
And so has man.

The mule is sometimes kind and good;  
And so is man.  
He eats all kinds of breakfast food;  
And so does man.  
Like man, he barks at gaudy dress  
And all outlandish foolishness.  
The mule's accused of mulishness;  
And so is man.

\*Of food.

—W. D. Nesbit.

## Horses in Training.

Some days ago the BREEDER AND SPORTSMAN sent letters to all the tracks in California where harness horses are being trained, asking for a list of those being worked for racing this year. The following lists have been received and while they are incomplete, show that the number of horses being made ready to race is large this year. There are several trainers whose horses do not appear in this list, and they are requested to send in at the earliest possible date, the names and records of all their horses, together with a list of the classes they desire offered by the different associations that will give races in California this year.

## STOCKTON.

C. Whitehead—The Mrs. p.; Delphi, p., 2:12½, and a green trotter by Derby Ash.  
J. Sangster—Jennie S, p., 2:20, and a green pacing mare.

C. Helm—Cranky Thorn, p., 2:22½; Mose M 2:28½ and a two year old pacer by Direct.

T. Holmes—H D B 2:25½; green trotter by Dexter Prince and two green trotters by Alta Genoa.

J. Aker—Green pacer by Derby Ash and a green trotter by Derby Ash.

M. Rickle—Zulu, p., 2:40.

T. Gannon—Green trotter by McKinney.

J. Rowen—Monochrome, Mechanic and a bay mare by McKinney and a bay mare, pacer, by McKinney, and a two year old trotter by Monochrome.

## SANTA ANA.

P. W. Hodges—Portrero 2:21, Geo. W. McKinney 2:14½, El Molino 2:22½, Grace McK 2:22, Lady Zombro, Zomilea, three year old; Owynex, three year old; Lady Zuzelle, two year old, and three green pacers.

G. H. Judd—Cocoanut, p.; Burnut; Goldnut, three year old; Chestnut; Selvester and Andy McKinney.

Mowrs & Wynn—Four green trotters.

R. Thompson—Four green trotters.

I. E. Bular—Two three year old pacers.

Martin Walsh—One yearling and one three year old trotter.

W. A. Wilkinson—May B.

Ed. Barber—Bill B., t.

## FRESNO.

C. E. Clark—Cozad 2:11½; Cora Dell 2:37½; Newport, p., 2:19, and five green trotters and one green pacer; Thomas W, p., 2:27½, and six green trotters, Eddy & Legget—Cuckoo, p., 2:18½; one green trotter and three green pacers.

C. Middleton—Geo. P., p., 2:22½; two green trotters, and two green pacers.

S. Walton—One green pacer and two green trotters.

J. W. Zibbell has about ten trotters and pacers. Altogether there are about sixty horses on the Fresno track being prepared for races this year.

## SACRAMENTO.

H. Hogoboom—Five green trotters and pacers.

L. M. Clark—Oulboul 2:21, and three green trotters and pacers.

Mrs. Callendino—One green trotter.

Walton Tyron—Monroe B. 2:15½; Polka Dot, p., and five other trotters and pacers.

Chris Jorgensen—The trotting stallion Athamax, three two year olds.

## WINTERS.

S. H. Hoy—About twenty head of trotters and pacers all without records, by Bayswater Wilkes, Demonio and other sires.

## SAN JOSE.

W. H. Williams—Motanic and Steve Whipple, pacers, and two green trotters.

Goodall & Nelson—Dr. Hammond 2:14½, Uncle John, Rajah and Blue Goose; all pacers.

J. W. Gordon—Silver Arrow, Pious, Billy Murray, Vallejo Belle, Rose K.; all green trotters.

T. W. Barstow—Alone (p) 2:09½ and Trueheart, a two year old trotter.

Hans Frellson—Alta Vela 2:11½, Verona 2:18½, Joe Eviston (p) 2:23 and three green trotters and two green pacers.

W. B. Humfreville—One green trotter and one green pacer.

C. A. Durfee—Cuato 2:18, one three year old, two two year olds and one four year old; green trotters.

Tom James—One three and one five year old; green trotters.

## PLEASANTON.

Sutherland & Chadbourne—Ben F. (p) 2:22½ and one green trotter.

Wm. Cecil—Bob Ingersoll 2:14½, T. C. 2:29½, a grey gelding with a record of 2:27; Irvington Boy (p) 2:14½, Georgie B. (p) 2:24½ and six others.

Barney Simpson—Belle G (p) 2:15 and three trotters and one pacer.

Senator Clark—A bay trotter with a mark of 2:19½, brown gelding with a mark of 2:17½ and a sorrel pacer with a mark of 2:19½.

S. K. Trefry—One pacer and one trotter.

Jas. Thompson—Clipper (p) 2:06 and several very promising green trotters and pacers.

Ben Chaboya—Several three and four year old green trotters.

J. M. Alviso—Rey del Diablo (p) 2:22½ and a green trotter.

H. H. Dunlap—King Cadenza (p) 2:15 and several other promising green pacers.

Mose Hart—Billy Red, a green pacer, and several green trotters.

Joe Costello—One green trotter and pacer.

Mills & Sanders—Several green trotters and pacers.

## BAKERSFIELD.

R. E. Toll—Richmond Chief 2:11 and three others, trotters and pacers.

Wm. Willis—Several green trotters and pacers.

H. H. Spears—L. W. 2:20 and a colt by Thompson.

George Bender—Uncle James 2:23.

A. L. Conklin—Edna R. (p) 2:12½ and several others.

A. P. Davis—Several green trotters and pacers.

## WILLOWS.

J. Sullivan—Dot (p) 2:26 and several other trotters and pacers.

## LOS ANGELES.

W. G. Durfee—Petigru 2:10½, Col. Smith 2:15, Coronado 2:17, Briney K. 2:20½ and twenty four green trotters and pacers.

In addition to Mr. Durfee's string there are about 200 other horses working at the Los Angeles track.

## WOODLAND.

C. B. Bigelow—Six pacers and two trotters. One pacer with record of 2:22.

L. N. Mativia—Three green pacers and one green trotter.

W. Mastin—John A., p, 2:12½; Penrose, p, 2:19, and three green pacers and four green trotters.

R. H. Nason—One pacer with record of 2:18, three green pacers and three green trotters.

P. Fryat—One three year old pacer.

## SANTA BARBARA.

John Cody—About ten green trotters and pacers.

## UKIAH.

J. A. Holbrook—May Ayers 2:31 and seven others.

## ALAMEDA.

Patrick Foley—Lady Grannard 2:23 and several others.

Grant Lapham—Five horses without records.

Jas. E. Barryman—Maud R., p, by Jim C.; Dot, t, by McK.; s g by Son of Dexter Prince, t; Abbotsford Jr. by Abbotsford; Silver Moon, two year old by Silver Bow Jr., t.

Jack Groom—Dolexa, b m by Alexis, t; Tomahawk by Alexis, t; Paddy Shea by Knight, t.

C. Welby—Yukon 2:14½ by Bell Bird, b g by Steve Whipple, ch m by Tennysonian.

Jas. O'Kane—Al Sandy by Wayland W., s g by Hart Boswell, g g by Jas. Madison.

L. Richardson—Cicero by Brentwood, g g Chas. Newman by McKinney, b m by son of Direct.

Elias Williams—Secretary by Director, Alameda Maid, two year old by Nassau, two year old by Billy Thornhill, Gossiper filly.

## News from the North.

[Portland Rural Spirit.]

W. O. Trine, who has charge of the track, is working a good stable, including Bell Air 2:14½, Oregon Bull 2:17½, Broad Heart, an untried trotter, and quite a number of others. Mr. Trine's horses are all doing well and he expects to be in the front tier when the bell taps.

Sam Casto is as happy as the meadow lark that sings about his stable door. The lark is always happy in anticipation of the beautiful young she intends to bring forth the coming season, and Sam is just as happy and full of faith and anticipation of the fast trotters he intends to produce from the young Zombros he is educating. "Now, don't go and put this in the paper, for people will think I am just trying to boom Zombro, but on the square, they are the only trotters I ever saw." Mr. Casto takes great pride in showing the good looking young stallion Laquy by Looking Forward 2:13½, property of S. F. Williams, Salem. This fellow is very promising on the track and extremely stylish with a peacock finish.

Perry Mauzey has just moved to the track with his stable of trotters and pacers. He has Dewey, a pacer of considerable speed, belonging to C. A. Whale, and a lot of youngsters by Holmdel 2:18½.

Captain N. G. Smith, from Everett, is working Mary L. 2:23½ and a two year old by McKinney. The captain says the track is the best on the Coast, barring accidents.

The president and secretary of the fair will start on a tour of the valley and Southern Oregon soon in the interest of the fair. They will make a special effort to have each county send down a county exhibit, for which a premium of \$1500 is offered, divided up into eight different prizes.

Geo. T. Beckers is expected up from Los Angeles about June 1st with his stallion Zombro 2:11, where he will be put into the stud until September 1st. Mr. Beckers will bring with him some Zombro trotters; one is T. D. C., that he took from here last season. He is bringing him back to race in the Lewis & Clark Stake for 2:20 trotters.

News has reached here that J. C. Mosher, of Los Angeles, who had charge of the track here a number of years, will be up with a stable of horses this fall, and take in the North Pacific Circuit. Pap Mosher is said to be riding some pretty fast quarters and halves this spring and will come prepared to give the boys a chase for the money.

## Calls Him a Second Geers.

In a letter to the *American Horse Breeder*, Sam Gamble pays the following neat tribute to Ed Parker, trainer of the horses owned by George A. Davis of Rancho del Valle, near Pleasanton. Mr. Parker is now at Cleveland, where he went last week with Rey Direct 2:10 and several colts by that horse which were sold at the Blue Ribbon sale this week. After speaking of the fast work done by the Rey Direct youngsters at Pleasanton, Mr. Gamble writes:

"These last four youngsters I watched from their first lessons, which were given them by Ed S. Parker, a promising young colt breaker, developer, driver and trainer, a combination that is seldom found in one man. Parker is, without doubt, judging by his work on these youngsters, in a class by himself in that profession. At all hours of the day and night, aside from his meals, there was one place that he could be found, and that was in and about his stable.

"I have seen many men in his profession, but have yet to see his equal. What I have seen of him and his work the past year is just wonderful, and I could fill your valuable journal with his praises and not do him justice. One could not say enough. His name is Ed, and you have heard of another Ed (Mr. Geers). Remember that Mr. Geers is getting along in years, and the Eds are getting scarce.

"I pray and trust that your readers will not look upon this as 'touting' Mr. Davis, his prospective young sire and youngsters, and his faithful and able young trainer, as both of these gentlemen are in the dark as to this article. I am a firm believer in justice where it is due, whether it be to man or beast, and time alone will convince your readers that it is not a dream, but reality."

John W. Browning invented hoppers all right, but not for the trotter, John B., as generally supposed. Away back in 1865 Mr. Browning had to make a certain mare "trot in harness" inside of twenty minutes in order to win a five dollar wager. To do this he conceived the idea of "tying her legs together"—"cross tying" them—and in putting this idea in operation he invented the hopple. His next application of the idea was on the trotter John B., and hence hoppers were originally intended for trotters, and not pacers. —*Western Horseman*.

Sober up on Jackson's Napa Soda.

### Thinks He's Going to be a Horse.

In testimony of his belief in the ancient theory of reincarnation and the transmigration of souls, James J. Waltern, an aged and wealthy resident of Leeds County, Ontario, has built on his fine estate a costly stable, which he expects to occupy after his present earthly career is ended, re-imbodied in the form of a horse.

Mr. Waltern has made a will setting aside the sum of \$25,000 for his comfortable support in equine form, and naming as executrix Miss Irene Cathwaite, his great-niece, who professes the same mystical religion which has made rich old Mr. Waltern a celebrity throughout all this part of Canada.

The neighborhood is familiar with the significance of these preparations against the day of the old man's death. It does not scoff, being impressed with other outward forms of the Hindu faith which strengthens an attractive illusion as does the mise en scene of a drama.

On a knoll silhouetted against the sky in the midst of a grove on the Waltern estate, is a majestically constructed mausoleum, and near it is an altar upon which occasionally at night strange fires burn. In this mausoleum the bodies of Mr. Waltern's wife and daughter lie, and there is a vacant crypt for his own remains.

This remarkable man is one of the wealthiest residents of Eastern Ontario. Leeds county which juts upon the St. Lawrence river, stretching across toward the State of New York. Brockville is its chief city, numbering 11,000 people, and the county, reaching back, touches the beautiful Rideau lakes. The country is peopled with a sturdy class; with thrifty men and women who own their farms and the stock upon them, and to whom mortgages are almost unknown.

Where Mr. Waltern was born no one knows; of his nationality no one is certain. Nor does any one venture to say with any degree of certainty as to his age, or how long he has been a resident of the county. But that he has been there many years, that he is very rich, and with a powerful personality, all agree.

Few have ever crossed the threshold of this mysterious old man's residence. It is only to his closest friends that he alludes to the destination of his soul after what he is pleased to call, not death, but migration.

"I believe," he affirms, "in the transmigration of the soul, and I believe in reincarnation. I believe, with others of the more ancient school of philosophy, that Shakespeare was a reincarnation of Christ, that Napoleon was a reincarnation of Alexander the Great; and why not?"

Mr. Waltern is a man of extremely religious turn of mind. The years have whitened his locks, time has written its story in the furrowed face, approaching dissolution heralds itself in the faltering footstep, but the deep-set eyes shine with the light of the man of mastery; there is perfect self-control in his bearing.

This present life," he says, "is but a point in the succession of states through which the soul, proceeding from God, has to pass before, finally purified, it will find its way to God and lose itself in infinity, the original source of its existence."

There is a general belief in the community that he possesses occult powers. In earlier days when the virgin forest spread itself over the land he never seemed to toil so hard as those about him, and yet success singularly attended his every effort. Waltern's broad acres have never, so it is said, known a failure in crops. When storms of hail visited the fruit trees of the section some mysterious hand seemed to stay the clouds and protect Waltern's orchard. When the rust touched the neighborhood, by the same strange influence, or coincidence, Waltern's crops were passed by.

Moreover, Waltern, so say those who have long lived near the old ascetic, possessed the faculty of forecasting the market when in business in earlier years. His grain was sold when the highest notch was reached, and when Waltern sold this was the immediate signal for the neighborhood to follow suit.

To-day Waltern is a rich man and has ceased from the care of his estate, having given the management into the hands of others. He spends much of his time with nature, and those who have come into his presence unexpectedly in his rambles in the woods have found the old man with the partridge and the hare about him, and with the blackbird, the solitary thrush and the tiny chickadee feeding from his hand.

Mr. Waltern spent much time in the erection of a stable which he is sure he will occupy in the future. His philosophy seemed to bring into his life a calming influence, and when his wife and child died, they died in his faith, "emigrated," to be buried each in a crypt in the mausoleum amid strange ceremonies conducted by the old man, assisted by three others who came from a distance.

The altar, near by, is built of marble and carved with mystic symbols. When the end came to Waltern's wife and daughter no neighbors were admitted to the home and there was no public funeral. But lack of invitation did not deter some from creeping up through the wood within sight of the altar and within hearing of incantations in an unknown tongue and a mournful chant. Upon their eyes flashed vari-colored fires, while great balls of smoke wound like a funeral shroud about the mausoleum, with its iron door now open to receive its silent tenants. Just as the ceremony was over a shower of meteors fell, and, thoroughly terrified, the neighbors hurried home, wondering at what they had seen and heard.

True to his belief as to the probability of the soul re-entering the world clothed in animal form, Mr. Waltern is extremely kind to horses, cattle and meaner animals about his estate. His employees are instructed never to strike or abuse them, and whips are unknown in this Utopia. The horses are worked only eight hours a day and are fed at stated hours, as a man would be fed.—*Daily America*.

### Care of the Foals.

Capt. A. H. Waddell of the Royal College of Veterinary Surgeons, London, says:

The foal having arrived on terra firma, look him quickly and carefully over; if the foetal envelopes are ruptured and the little creature lively and struggling, let him alone; let him do his first public "stunt" unprompted, unmolested, and he will carry out his little part to the entire satisfaction of all concerned.

The after-birth having been removed and all soiled bedding taken away, the mare's teats inspected and an ample clean bed provided, leave him and his dam alone; the foal being all right and the mare strong, healthy and well over her labor, she will do all else that is needful.

The foal will struggle about in the dry bedding, attempt to get on his feet, roll over and try again; in this way he will dry himself, while the mare also licks him. He will feel his feet, he will fill his young lungs with fresh air, which ought to be pure and which is the very best stimulant he can possibly receive; his circulation will be increased; he will suckle the moment he is able; peristalsis of the bowels will ensue, and this will be followed by the evacuation of the first feces. What else do you want? Nothing?

In the case of a protracted labor, a weakly mare, a foal who during delivery has been half crushed or pulled to death, common sense and judgment must be brought to bear.

If the membranes are not ruptured, the first thing to do is to break them over the mouth and head first to allow the air to get into the lungs; artificial respiration promptly applied has saved the life of many a colt, by working the fore legs backwards and forwards to their utmost extent and pressing them to and pulling them away from the chest, the foal of course being placed on his back.

Holding a bottle of ammonia liniment—there is generally some of this about a horse establishment—to the nose or ordinary smelling salts is a very good thing in some cases when a foal does not get his breath properly, but the rustic method of opening the mouth and trying to blow down the throat is as useless as it is ridiculous and makes the writer sad. You couldn't blow down a colt's throat if you tried, and besides, what would be the good? Only give him colic. You don't want wind in his stomach but air in his lungs, and to get there it must go through the nostrils; apart from this, the hot, fetid breath of an unhealthy man or a careless liver will not revivify your colt; it must be oxygen in the shape of pure, clear, dry air.

In a case like this brisk rubbing with hay wisps or dry cloths is recommended to increase circulation and particularly if the mare is exhausted and cannot see to this herself, for licking is a great aid to this necessity.

While the mare is being attended to a little of her milk may be drawn off and given to the foal with an ordinary feeding bottle.

Young foals often look the most crooked and ungainly of creatures, and these appurtenances should not be mistaken for malformations; it is astonishing how they straighten up and how quickly, particularly if dropped in the early summer, when they can be out all the time, and the grass rich, luxurious and nutritious.

Sometimes mares and foals have to be kept indoors for weeks and weeks from stress of weather. In such cases daily exercise must be had in a large barn, shed, covered track or some such place. Confinement in a box will not do. You have found it so in the past, some of you, and you will find it again. Exercise—exercise—exercise—and while the mare and foal are out throw open the doors and windows of the box, have it thoroughly cleaned and aired, and particularly see that the corners of the manger and hay rack are

clean and free from damp, moldy, decomposing fodder or growing grass and oats. I have seen this scores of times, and there are the very spots where the bacteriologist will go to find the finest specimens of microbes, bacteria, larvæ and all manner of weird things with strange names and uncanny forms, moving, creeping and metamorphosing.

These things are not good for old horses, but particularly are they injurious to the young foal, who after the manner of all young things pokes his nose and pries into everything. Free and properly regulated ventilation is of the utmost consequence in cases of this kind, but protection from draughts and exposure to sudden chills must be as carefully avoided.

In these cases where grass cannot be procured the mare should receive a liberal supply of crushed oats or corn bran, chaff or chopped hay and salt—a most important adjunct of horses' food at all times—besides, of course, a proper allowance of good hay and as much good, wholesome water as she wants.

When it comes to turning them out, choose a fine, sunshiny day and midday, and here again extra care is necessary, for the foal liberated from confinement, will start to gallop about until it is tired and hot and will then go and throw itself down broadside on in some wet or damp corner, lay there and go to sleep; a cool wind springs up, shakes the leaves, wakes the little sleeper, and up he jumps in a terrible fright, but this is not the worst; next morning his small nose is running and he sneezes occasionally; next day a little cough and off feed slightly; then quickened respiration, and then what else but pneumonia, and let me tell you pneumonia kills 'em.

If I were breeding horses I would have a sheltered shed in every field and paddock, particularly would this be of benefit in spring and fall, and I would take precious good care that it was thoroughly cleaned out and attended to every day. I would permit no accumulation of cobwebs and filth here; this place should be kept scrupulously clean, as should the water trough.

### Kentucky's Futurity For Two Year Olds.

Owners of eligible colts and fillies should bear in mind that a payment of \$50 is due on June 1st for each entry kept in the \$20,000 Futurity for foals of 1900.

After June 1st no further payment will be required until September 1st, when the merit of the youngster will have been definitely ascertained, and if found wanting can then be dropped without further liability.

\$10,000 in cash will go to the winner of this, the "Derby" of harness racing, and the fame added to the farm which produced, as well as the immediately increased selling value of the winner, of any part of the \$14,000 reserved for this division, will be incalculable.

Unless payment is made on June 1st, the entry will be cancelled, by the advertised conditions, therefore, owners should communicate with E. W. Shanklin, secretary, on or before June 1st.

### San Francisco Veterinary College.

Next session will begin June 15, 1903. Write for catalogue giving full particulars. M. L. PANCOAST, Secretary, 510 Golden Gate Ave., San Francisco. E. J. CREELEY, D. V. S., President.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

### Horse Owners Should Use GOMBAULT'S CAUSTIC BALSAM

The Great French Veterinary Remedy. A SAFE, SPEEDY & POSITIVE CURE.

Prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

### SUPERSEDES ALL CAUTERY OR FIRING.

Impossible to produce any scar or blemish. The safest best Blister ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blisters from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

WE GUARANTEE that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or ointment of any kind ever made.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address:

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Conducted by J. X. De WITT.

The spring fever has brought out the old time enthusiasts and a large number of the younger set appear nearly anxious. The Skinner Co., at the selection of Golf Goods in the West, is doing a thriving business. The manager of their Golf Department instructs beginners, free of charge.

Tennis, Foot Ball and Base Ball goods, in fact a full and complete line of everything necessary in the conduct and enjoyment of outdoor sports.

## A Contented Man.

Along about this time o' year  
The while I set a-blinkin'  
In the warm sunshine here,  
I always git to thinkin'  
The old farm ain't so bad a place  
But what I feel some pity  
For the dump fools thet's in the race  
For gold down in the city.  
You don't ketch me a-praying God  
To better my position,  
I only want my fishin' rod  
An' time to go a-fishin'.  
I got a shirt, a pair o' pants,  
Coat, hat and appetite.  
I know the trout, an' all their ha'nts  
An' when they like to bite,  
An' all the clo'es I want is what  
Will keep off chill and shiver  
While I'm a-settin' in this spot—  
The best along the river,  
Ketch me a-combin' of my hair  
An' wearin' cuffs an' collars!  
I wouldn't be a millionaire  
For seven hundred dollars!

## Fish Lines.

Fly-fishing is improving daily, streams are getting lower and clearer. Most of the waters within easy reach of this city have had a good drilling since the 1st of April and are pretty well fished out. A month or so later the knowing anglers will go to these streams again and get some good fish from the pools and deep holes.

Away from the city for a several days' trip the Big Sulphur and its tributaries are good for many nice fish, Pieta creek should not be overlooked. A trip to Ukiah or Willetts will repay one for two or three days or more whipping the streams in those sections. The waters near and reached from Willetts are in many cases almost virgin trout waters.

The apathy of the Fish Commission and the Sonoma county officials in not being able to stop the systematic dynamiting and netting in Sonoma creek and its tributaries is astonishing. Whether any efforts to do so or not have been made we do not know; one thing is certain, we have not been able to hear of any attempts made to stop the contemptible work of the damnable foreign human locusts who are responsible for the depletion of the trout streams and the destruction of everything else in those waters, as the innumerable decaying eels, suckers and other small fish, frogs, etc., lying along the banks of Sonoma creek, in the vicinity of Glen Ellen, will testify.

The California Northwestern Railway spends thousands of dollars annually in stocking streams along their line. This means sport for the local or visiting angler and is a means of revenue to a town or country resort. When the people in a locality combine upon, or condone, these acts of vandalism, such as the wholesale destruction of every living creature in the stream, that community is not composed of Americans nor the material to make law abiding citizens. As a rule, this violation is generally the work of foreigners, a people, who owned only but the breath in their miserable bodies until they were by good luck foisted upon a country, the advantages and benefits of which they were too ignorant to understand or rationally enjoy.

The worst feature of the matter is, that many of these people now have votes—a reason why some prosecutions have been smothered by a jury of foreigners.

Fly-fishing in the streams of Santa Clara and Santa Cruz counties is excellent judging from many reports received. The smaller streams are the best fishing waters, wise anglers leaving the larger creeks alone for the time being. Theodore Rothschild recently fished from the junction of the Zayante and Lompico down two miles to the San Lorenzo. This is a pretty portion of the stream and a good fishing water. In a couple of hours 15 nice fish were landed, the brown hackle, plain body; brown hackle, peacock body and the professor were the effective flies.

Stripped bass angling is also picking up under the influence of the steady pleasant weather. The "straits" last week were good, on Sunday and later the take was poor. Petaluma creek and near the railroad bridge is now ready for the clam caster.

Lake Merritt anglers have been doing nicely both day and night. Bank fishing has been satisfactory and now that good boats at reasonable rates can be had at the Lake Merritt Boathouse, the lake has been daily the resort for many anglers who tried trolling and live bait fishing.

## Kennel Registry.

## VISITS.

Naird Kennels' St. Bernard bitch Ch. Alta Rachel (St. Leonard-Princess Rachel) to same owners' Ch. Grand Master II. (Ch. Grand Master-Bonnie Doone), May 10, 1903.

Naird Kennels' black Cocker bitch Naird Beauty (Black Silk II-Plumeria Mignon) to Plumeria Tweedlepuuch (Ch. Hampton Goldie-Omo Girl), May 10, 1903.

Plumeria C. ocker Kennels' black Cocker bitch Plumeria Victoria (Black Douglas-Lady Audrey) to same owners' Ch. Hampton Goldie (Ch. Red Mack-Hampton Queen Readie), April 30, 1903.

## SALES.

Dr. A. T. Leonard, Jr., sold to William Watts'n, April—1903, the Irish Water Spaniel dog Ch. Dennis C. (Ch. Mike C.-Biddy C.)

## Something for Nothing

The Polk Miller Drug Co., of Richmond, Va., are manufacturers of Sergeant's Dog Remedies, the most popular line of preparations, intended for dogs, on the market today, having received the highest endorsements of the leading dog men and kennel owners in this country and Canada. Read their advertisements appearing in the columns of our journal each issue. The firm referred to will mail you absolutely free, a copy of their celebrated book on Dogs if you will forward 3 cents to cover postage. If your dog is sick, write them, enclosing stamp, and describe the symptoms as accurately as you can. They will cheerfully furnish the best information on the subject without charge. F. W. Braun & Co., of Los Angeles, California, have recently been made distributing agents for Sergeant's Dog Remedies on the Pacific Coast.

## DOINGS IN DOGDOM.

We are sorry to note a bit of bad luck which fell to Mr. J. H. Dorian on the 10th inst.; Naird Kennels suffered a severe loss in the death of their celebrated prize winning red Cocker Spaniel, Plumeria Beau II., who was killed in a fight with the St. Bernard Le King, owned by the same kennels. Beau, though only just past his second birthday, was one of the best known Cockers on the Coast, having won over fifteen first and special prizes in strong competition at San Francisco, Sacramento, Los Angeles, Oakland, Seattle and Portland, and having repeatedly annexed the Plumeria Trophy for best Cocker Spaniel sired by a Plumeria Kennels dog. He has been a very successful sire; and two of his progeny were among the prize winning puppies at the recent San Francisco show. His owner will find it hard to replace him.

Naird Kennels' two crack St. Bernards were bred on the 10th inst. Mr. Dorian has the most enthusiastic faith in the coming success of the mating. He states that: "This should make one of the greatest 'nicks' ever secured, not only on the Coast, but in America. Ch. Alta Rachel is admittedly one of the greatest St. Bernard bitches in the country and is from a distinct and very celebrated Eastern strain. There are probably only one or two bitches in America that compare with her; and she has that rare thing in a bitch, an abnormally massive and typical head. On the other hand, Ch. Grand Master II. is conceded, other points aside, to have absolutely the grandest St. Bernard head on the Coast. This advantage over all rivals is frankly conceded to him without reservation by even those owning such rivals. Both Rachel and Grand Master II. are sound, active St. Bernards, exceptionally strong on their legs—a point where the majority of large St. Bernards are weak. The blood lines of both are of the best; and this being a complete and distinct outcross, the mating is an ideal one, and should produce something noteworthy. Grand Master II. is the richest dog in coloring, and the most perfectly marked, that has been bred for some years."

A notable Setter breeding last week was the visit of Hon. Chas. N. Post's bitch Lou (O'Rion-Mary Lou) to Thos. J. Watson's Starlight W. (Dan Gladstone-Miss Alice). Lou is a full sister to Jos. Terry's Kilgariff, the winner of the Coast Derby at Bakersfield last January.

Setter fanciers are waking up to the value of Starlight W. as a producing sire. He is both a field trial and a bench winner. In fact, both dogs are bred in the purple and descended from performers and winners for generations back. The cross here is a good one and a breeding from which something good can reasonably be expected.

Nominations for the Pacific Coast Derby to be run next January will close July 1, 1903.

The last field trials were not only effective in stimulating enthusiasm for the sport but strongly so in arousing a desire to breed more good Setters and Pointers by numerous Coast sportsmen.

The showings made at Coast trials and the performances of different Coast dogs sent East to contend in field trials has proved that our field dogs are worthy of the best attention and encouragement. A number of new devotees of field trials will enter their dogs in the coming Coast Derby.

Entry blanks and further particulars can be obtained from Secretary Albert Betz, 201 Parrott Building, San Francisco.

William Watson has now what we believe is about the best Irish Water Spaniel on the Pacific Coast, Ch. Dennis C. He was bred by T. A. Carson of Toronto, who, when he sold him to Dr. Leonard about three years ago, was sanguine that he could turn down any specimen of the breed in the East or West. Dennis has kept his form and style, and is a handsome, upstanding, sturdy dog, full of go and character. He is a splendid worker to the gun and has been a satisfactory sire. Mr. Watson proposes to place Dennis in the stud, to approved bitches only.

Our esteemed Boston contemporary is somewhat hazy on Coast doggy data—in fact, this is not an unusual feature with several other of our Eastern exchanges.

We will take the liberty of giving the proper "dope" on the big St. Bernards. Mr. Newman, the owner of Lester C., shortly prior to the recent bench show, wagered \$100 with Mr. Dreyfus that the latter could not produce a larger dog than "Dewey," Newman's dog. On the third day of the S. F. show the other big dog was produced; it was not Grand Master II., but another Alto Millo-Queen of the Joaquin dog (Lester C.'s dam and sire). The challenging dog was a big one, a bit short necked and lanky bodied, but a good, sound big dog withal. When the two were measured Lester C. was the larger by less than an inch. The alleged measurements were 38 and 35½ inches respectively. The measures were not taken with a proper measuring standard and were consequently more or less approximated. We have stated that Lester C. will go close to 36 inches; we make the statement again. He certainly is a phenomenally tall dog at the shoulders, in fact, is a much larger dog in general measurements than he looks; he has, for a big fellow a most even conformation. The two dogs that came together in this contest will go over almost any other brace of St. Bernards in the United States; they are pretty tall, more so than St. Bernards usually grow.

Incidentally we will suggest to our Boston friend in connection with some notes anent our show here, that instead of 407 dogs we had but 295 dogs benched. The club nor the management of our show can not in any wise be blamed for the falling off. The show, aside from a large entry, was a most creditable and a very successful show, in fact in comparison with a number of past shows was the best in many respects the club has given.

There was not, with but two or three exceptions, the usual good showing of Irish Water Spaniels.

Mr. Harley does not own the Old English Sheep dog Dame Margery. Chas. R. Harker of San Jose seems to have been badly treated by the compositor.

Old Ch. Woodcote Wonder is not 13 years old (nor yet 10).

Another waste of space was that descriptive of wire haired Fox Terrier bitches.

More space was badly used about Irish Terriers, the best in the bunch was a dog called Irish, a good one brought out here by L. A. Klein and whose pedigree along with many other good things has evidently been lost in the miasmatic atmosphere arising from the "car strike" show. Irish is, we believe the best "Mick" to-day on the Coast and he can go some in Eastern running. Royal Noreen and Shan Van Vocht are both worth attention, the rest of the Irish Terriers were hardly above "muts."

Space is given to mention of a single Field Spaniel and a Clumber, only fair ones, that the correspondent could have devoted to better advantage.

The attention of sportsmen and fanciers has been called in recent years, through the field trials, both in this country and in England, to the remarkable work done in the field by black Pointers. It would almost appear that this somewhat rare color in this breed of sporting dogs is a guarantee for general excellence of working power. Comment upon the fact has not only been made, but has been the subject of correspondence in many sporting journals. Early in the century black Pointers were held in special esteem, both for their natural beauty and on the score, justified or not we cannot pretend to say, of their superiority in the field. Probably such an enthusiast as the remarkable Duke of Kingston, the fame of whose kennels of black Pointers has come down to to-day, worked on the lines that handsome is that handsome does, because we have it on good authority that when his dogs were sold, sportsmen of the day vied with one another in securing stock from the dual kennels. In connection with the apparent superiority of the black Pointer in the field, the question of color in sporting dogs crops up. There is no doubt that the proper color, generally speaking, is liver and white or lemon and white, speaking from the point of view of what is most proper to the dog as a sporting dog. But when regarded from the point of view of the Pointer's utility and services in the field, the question of visibility to the quarry comes in. Now, we all know that a dark or one-colored dog—bar white—is less visible to game, ground or winged, than another, and that may have something to do with the greater success of black dogs in trial than of others, for it may be taken that to a bird or hare on the ground a black dog is less pronouncedly visible than any, bar a dark brown one, thus allowing it a better chance of approaching its game, and fewer flushes out of range. The matter is one of interest, if even the strong arm of coincidence be allowed to enter into the argument, and the fact remains that on many occasions of recent years black Pointers have asserted themselves as superior dogs on game in a most marked manner.

## GOSSIP FOR SPORTSMEN.

Undoubtedly the tendency of modern rod makers is to considerably reduce the length of fly-rods both for salmon fishing and for trout fishing. Our best makers get as much power into a sixteen-foot salmon rod as used to be got in an eighteen-footer or twenty-footer, and only for the purpose of commanding certain awkward catches are the two latter now necessary. In the same way ten feet has come to be considered a convenient length for trout rods, and even the powerful specially built dry-fly rods average about 10ft. 6in. "Comfort in fishing" is borne in mind by manufacturers, and well it may be. To wield an eleven-footer or twelve-footer requires a more than ordinary strong wrist and forearm, and even in the hands of the owner of these the weapon tires the wielder long before the day is over. A good rod is a two-joint nine-footer, quite long enough for ordinary trout fishing. With such a rod casting causes no fatigue. Moreover, one can tighten on a fish far more surely and delicately, and if you have the good fortune to get fast in an extra big specimen, you obtain more sport out of the quarry simply because it is quite impossible to inadvertently "bully" a fish with such a weapon. Of course, every inch of a nine-footer should "fish," and if it does one has all that is necessary. By-the-by, it frequently happens that even less than nine feet of a ten-footer or eleven-footer is the only part which actually "fishes," so where can the advantage of these latter come in, unless, indeed, it be, as was previously pointed out, that the extra length is useful to fish over obstructions.

On the vexed question of "when to strike" the following opinions of prominent angling writers are quoted:

"Thaddeus Norris—In most cases when trout rise freely and are in earnest they will hook themselves, for the yielding of a plant rod, as the fish takes the fly, allows him to bear off his prize; but when he attempts to cast it from his mouth, the spring of the rod fixes the hook in his mouth as he relaxes his hold. So it frequently happens that the rise is seen and the strain on the hook is felt at the same moment. A fish may even miss the fly and makes another effort to seize it, if not drawn too hastily away. When a fish, therefore, takes the fly vigorously, it is only necessary to keep the line taut. A mere turn of the wrist may be given to fix the hook more firmly in its mouth."

"Genio C. Scott—In striking, let it be with sufficient force to fasten the hook in his jaw."

"Charles Hallowell—If the strike be made with vigor or desperately, either the trout will be jerked high in the air, the tackle will be broken, the hook will tear out, or, what is more probable, the hook will miss altogether."

"Wells—The eye must never for an instant stray from the fly, and at the slightest commotion in

Sport on the Australian Parities.

An English Sportsman recently arrived from the antipodes gives the following account of several days' shooting in the "bush."

"I and a friend having resolved to have a few days' shooting, we started out one morning with a covered American buggy, laden with provisions, ammunition, blankets, etc. Our driver and cook were combined in the person of one Flannagan, a bit of a character, and we had also as a retriever a black tracker called Jacky—who had an eye like a hawk and was as agile as a panther. The country was all flat, and as there had been heavy rains we only managed to travel about six miles from our starting point the first day. Having pitched camp, we made ourselves comfortable for the night, and getting out our guns, looked to all preparations for a start in the morning. After supper we sat round the camp fire, smoking and yawning for an hour or two, but turned in early.

We were up betimes in the morning. As the rains had left pools of water on the prairie, the ducks were said to be out on the plains, a report which we soon found to be correct, for before going far we got a couple of brace. Most of the birds, however, were on a creek, and as they would not sit to let us approach, we resolved to drive them. The guns were accordingly stationed on each side of the creek, and our two men went round a mile or two driving the ducks toward us. My knowledge of grouse driving here came in handy. First a lot of five came down to my right, of which I got a couple, and after that every now and then a good flock came over one or the other of us, and the firing became pretty constant until the drivers came up, when we started to pick up the birds. We got seven brace between us, but there were some wounded birds which dived and escaped, although we had a nondescript "smell-dog" with us, who was a useful retriever.

We now spread out in line and walked the prairie for a bit, succeeding in bagging a couple of brace of quail before it was time for lunch, for which we squatted down in a place near some good water and with plenty of wood about for boiling our "billy" to make tea. While we were having lunch Jacky spied a bush turkey on the plains. No one can get near them on foot, so he offered to try and stalk him with his spear if we would let him try. He cut down a tuft of stumpy scrub about his own height, and with that in front of him, crept on his hands and knees in a circular way towards the turkey, a process which took him nearly an hour to get within fifty yards of his prey, as he could only move forward when the turkey was off its guard. When at that distance he let his bush fall, and, standing up, threw his spear with unerring aim; eventually coming back in triumph with the bird, which weighed over seventeen pounds. They are in appearance much like peafowl, only heavier and splendid eating.

The day was pretty well advanced by this time, and as the ducks were scarce by our firing we came home to camp early. A little way from us was a Government surveyor who was doing work in the district. He had two beautiful kangaroo dogs, and he asked us to join in a kangaroo hunt the next day, and as we had our riding horses with us we accepted the invitation.

We started out about ten next morning, and having viewed a lot of kangaroo, a mile or two off, the dogs were slipped and we all set off full tilt. It was a long, hard gallop before we made any impression on the distance between us and the kangaroo, the country being uneven and covered in places with fallen timber, and very trappy, all of which naturally added to the excitement. At last the dogs turned the kangaroo, and singling out one which stood about six feet high, they rapidly gained on him. After a good long chase he stood at bay against a tree, in a water hole; the dogs rushed at him now and then, but evading his attempts to hug them with his fore paws, until at last he got hold of one, and gave it a good squeeze, which made it howl. The fight went on in this way for a little time, when the surveyor, watching his opportunity, knocked the kangaroo on the head. We were a goodish bit from camp at this time, so made the best of our way homewards, the surveyor taking the tail, which he said made excellent soup, the other parts being of no use as food. On our way home we spied an emu, and as he ran our line homewards the dogs gave chase. We followed him for several miles, but he bested us, and we got back to camp rather late, having had a pleasant day.

The same evening we proceeded to make some heavy shot for turkeys, as we found our No. 4 was too light to make any impression on them. The darky brought a horse shoe, and having dropped hot lead through the holes into a bucket of water we succeeded in getting shot about the size of BR.

Next morning we were up early, and shifted the camp several miles to an open prairie, where we had heard there were some turkey. We soon came on a lot, and rode in a circle as if we were going to pass them, but inclining inwards, till we got within about forty yards, at which point the turkeys took wing and we both fired from horseback. I never properly saw the effect, as my horse started bucking furiously, but nothing fell. A little further on we got a better chance, and this time I jumped off and succeeded in winging one turkey, which weighed over seventeen pounds, while my friend got a small one of about ten pounds.

Owing to the recent rains the swampy ground was covered with water, and here for the first time I saw a lot of black swans. We tried to drive them down towards the guns, but it was no use. As we walked over a little creek we suddenly came on a lot of young ducks. I fired at the old bird—along shot—and she

came down, as I thought, hit, as she trailed her wing. I ran after her and fired again, when she rose a bit, and so, running and firing, I got perfectly blown, only to find that the old duck had been fooling me all the time, to get me away from the brood.

The heat was so great by this time that we had to call a halt. We found that in going through this high grass on the prairie the seeds go right through your clothes, and I have seen sheep after being killed with the seeds worked right through their skin. I need hardly say that when they get through your clothes they are extremely irritating. In the afternoon we got a few more ducks in the swamps, and shot some bronze-winged pigeons, which were very pretty, with lovely plumage. On the road home we mixed our bag a bit, with a cockatoo, a few kangaroo rats, which are rather larger than a hare at home, and with an odd quail or two we finished up a fairly good day. The sport out there is uncommonly good at times, but no one takes any interest in it, everyone being so busy trying to make his pile that the romance of sport, except horse racing, seems a dead letter in those parts. We broke up our camp next day, and returned to the head station much pleased with our few days' amusement."

San Francisco Fly-Casting Club.

The regular series of six contests for classification were concluded last Saturday and Sunday. On the 23d and 24th insts, the re-entries will be cast, following which the first class contests at Stow lake will take place June 13th and 14th.

In last Saturday's scores noticeable improvement in long distance is shown by Dr. Brooks and E. A. Mocker. The accuracy percentages are very good all through, particularly so with those who have lately taken to the sport or have been infrequent at the contests. The same may be said of the delicacy work with the addition that the average is somewhat higher. Among the lure casters we have noticed a steady improvement in scores.

The showing in long distance last Sunday is remarkable for the fact that all but two casters in a class of twelve put out the silk over 100 feet, the two exceptions are but lately devotees of long distance work.

During the forenoon Mr. Mansfield, who has not entered into the long distance contests for the past three years, borrowed a rod and made an exhibition cast of 144 feet. This beats the record by four feet.

The other scores for the last Sunday contest are well up on general average and show much improvement on the part of the gentlemen who have been regular and persistent in practice.

SATURDAY CONTEST NO. 6. Classification Series—Stow Lake, May 9, 1903. Wind, west. Weather, fair. Judges—Messrs. Kierulff and Brooks. Referee, Mr. Mocker. Clerk, Mr. Bruning.

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage, (b) delicacy percentage; (c) net percentage. Event 4—Lure casting, percentage.

The fractions in lure casting are 15ths.

The Supervisors of Santa Clara county have passed an ordinance to the effect that every person within the bounds of Santa Clara county who at any time discharges any firearms upon a public highway, unless an officer in discharge of his official duties, or who in any manner defaces or destroys any signs displayed upon said highways, is guilty of a misdemeanor, and every person found guilty of a violation of this act must be fined in a sum not less than five dollars nor more than twenty-five dollars, or be imprisoned in the county jail of Santa Clara county for a period not less than five days nor more than twenty-five days, or by both such fine and imprisonment.

A number of Willows citizens interested in the subject of game and fish met in that city on the 3rd inst and listened to an interesting talk on the subject by H. T. Payne, a deputy of the State Board of Fish and Game Commissioners.

Steps were taken to organize a game and fish association. Frank N. Burgi was chosen temporary chairman and T. D. Orr secretary. Another meeting was to be held on May 12, for the purpose of permanent organization. The object of the association is to restock the trout streams of Glenn county and to give better protection to game.

the fly is, or where it is supposed to be, and strike hard.

If a fish rises, a slight upward turn of the wrist is sufficient to fix the hook; but beware of the lightest is not only sufficient, but also giving any direct rules when the fly is of little avail, as sometimes the fish will take quickly; sometimes with reuspection, and sometimes altogether falsely. The angler will teach the angler what to do and when to do it.

When a trout takes your fly do not strike. If more fish are lost by anglers striking than are secured by such means. The lightest is sufficient in most cases, particularly when the fish is rising.

It is a great disadvantage than he who strikes too quickly. The moment you see and then feel the fish rise. As a general rule, the fish frequently takes your fly, and then, feeling the rise, he sometimes strikes as gently as possible.

First Sports—Many strike too slowly, and a correct few at the critical moment. We have fished with many young hands who have struck the moment they saw a fish rise, and though the bait must have been risen the mouth had never received it. The critical fish stroke is made by a very quick, but very gentle wrist motion, by which the hand is canted upwards, being applied about two inches only. Such a stroke made instantly the fish actually reaches the fly, which is learned by habit, at the moment he has closed his mouth on it, and before he has time to throw it out again, is sure to secure the entrance of the hook without causing alarm to the fish by unnecessary violence.

When a fish has risen, throw into the air, as the rise, or a yard or two above it, allowing the fly to float down to the supposed place of the fish, when probably it will be risen at and he himself hooked, provided the angler had the knack of striking, which knack, like all others, is acquired only by practice. It must be done by a very sudden, but not a long strike; a twitch of the wrist is sufficient."

We noticed in the current number of the *Rider & D.* a half-tone entitled "Sunrise Camping Scene in the Yosemite Valley, California." The picture is typical of almost any camp among the California redwoods. The photo for the subject, however, must have been taken long ago, else the individual posing in the foreground with a repeating rifle in his hands would not have had the ambition to cut so heroic a figure. Firearms are tabooed in the park. Parties desirous of taking along shotguns or rifles on their outings to the park must notify the park authorities, generally a U. S. army officer in command of a patrol. Permission to retain the weapons may be obtained, but they are rendered useless for their original purpose by being sealed. Hunting and shooting in the park is prohibited; a violation of the regulation subjects the offender to arrest and fine upon conviction and the confiscation of any and all firearms used by the offenders or found in their camp. Sealing firearms is only resorted to, we believe, when the party goes in one way and out of the valley by the other route. As a matter of fact, firearms are just so much dead weight to pack and absolutely useless on the trip. Many Eastern people visit the famous resort annually; so that there may not be a mistaken impression in regard to hunting and the use of firearms in that delightful resort, we will call the attention of our contemporary to what may be with some of its readers a misleading conception of conditions for the sportsman in the Yosemite.

There is no restriction on sport with rod and reel in the valley. During the open season, from April 1st to November 1st, there can be had some splendid trout fishing in the many streams and the lakes to be found in the Yosemite.

The immunity from gun and rifle that small animals of the park and the many birds to be found there has enjoyed is apparent in their surprising tameness. In some portions of the valley the deer are fairly plentiful and are also correspondingly tame by reason of feeding safe from hunter and dog in that magnificent sanctuary.

Deer hunting in Bohemia is quite a serious affair. A party made up for a roebuck hunt will meet at a given rendezvous. Here, after the usual speech from the Herr Walbereiter, warning against shooting a doe and urging strict compliance with the directions given as to the line of fire, in order not to endanger the life of a comrade, the hunters receive their stations, surrounding a piece of forest, and at the signal of the forester's horn the beaters start through the thicket, hitting the trees with their sticks, and making a terrible racket. Each hunter is on the qui vive, for any moment a buck may dash out, and not to shoot would subject him to as much ridicule as to shoot and miss. A shot cracks now and then, and he wonders who the fortunate hunter is, and comforts himself with the reflection that he knew in advance he would not get a shot when a rush, a crackling of bushes, and bang! "the roebuck has gone." Crestfallen he stands, not daring to move, until the Jaeger's horn announces that the roebuck is over. Soon the Oberjaeger appears, inquiring who fired, and Nimrod admits that he fired and probably missed. A Dachshund with a Jaeger follows the trail of the animal, and in a few minutes stops and announces that the game has been found, much to the satisfaction of the crestfallen hunter. A moment later the Jaeger emerges from the brush with the roebuck on his shoulders. Nimrod then tries to convince the Oberjaeger that he knew all the time he had bagged the game. The Oberjaeger now breaks the tip from a piece of pine, and with due formality presents it to Nimrod, and this trophy the fortunate hunter proudly in his hat as evidence of his skill, presenting it to his best girl that same evening—if he is not too tired.

### Dairy Notes.

Use only tin vessels in the dairy. With cows long in milk the butter will come slowly.

In making butter it is important to please your customers.

Milk of different temperatures should not be mixed.

Expose butter as little as possible from the time it is made to marketing.

A little feed will often save a good deal of trouble in milking a restless cow.

Never fill the churn more than half full and have the temperature right.

The more uniform the fodder and feed of the cows, the more uniform in character the milk.

If cows leak their milk it is a good plan to milk them three times a day.

To make dairying a success it is absolutely necessary to learn what is required and to practice it.

Cows that are fed a little grain in connection with their portion will give a larger proportion of cream in their milk.

A good dairy cow always bears the marks of her excellence about her, in form, in color, or in the scope and size of her udder.

Butter will become rancid much sooner when exposed to the air than when packed air-tight.

Turning the cows on good pasture is one of the best means of increasing the milk yield and incidentally the butter.

It is important that the pasture of the dairy cows should be free from all weeds and plants that will impart a bitter taste to the milk.

It is very essential during the summer to keep the dairy house well ventilated if good fresh milk and butter is to be enjoyed.

The pasture for the cows during the summer should be well provided with shade and water. They will add to the comfort of the cows.

Decomposition in milk commences soon after it is drawn, if allowed to retain its natural heat. The best plan is to cool down.

It is important to milk clean from the first as retention of milk in the udder injures it and tends to decrease the yield.

The separator takes practically all of the cream out of the milk, much more so than is possible by setting and skimming, while perfectly pure cream and skim milk are produced. In this way the farmer secures all of the cream with which to make butter, and sweet skim milk to feed to his young stock. In this way more butter can be made and yet the skim milk be used to the best advantage. Where butter making is made a part of the farm work, and five or more good cows are kept, it will nearly always pay to own and use the separator.

While under average conditions dairying pays best for the reason that there is more demand for dairy products, and prices usually rule higher. But to make winter dairying a success, some planning and work in advance must be done, particularly as regards feed. Winter dairying requires more feed of a suitable kind, warm quarters, more work, and to some extent at least, cows that come fresh in the fall. If this is done some planning and work must be done in advance.

In feeding for butter production, it should be remembered that the solids in milk do not vary greatly, but the proportions do. The object in feeding is to give suitable foods and in such quantities that the proportion of fats and solids in the milk should not be disturbed, but maintained and in this way secure properly balanced milk with which to make butter.

There is no such thing as getting a first class price steadily for butter of a second or third class grade. There must be no falling below the standard in color,

texture, flavor or neatness with which it is put up if the best prices are realized. Quality is the orbit of prices with all farm products, and especially so of butter.

Butter made of perfectly pure cream is of course, pure in flavor, but there is not full flavor to it. If full flavor is desired, it is necessary to allow the cream to ripen somewhat, become slightly acid is the rule, care being taken not to allow it to become distinctly sour.

### Plowing Under Green Crops.

I have changed a hard, compact soil, incapable of sustaining a crop in seasons of drought, to one of great fertility, on which large and paying crops have been grown, says Walter F. Taber, of New York. This has been accomplished by a gradual deepening of cultivation and the ploughing under of heavy growths of clover and rye, thus adding large amounts of vegetable matter to the soil, which, with proper surface cultivation to prevent evaporation, has so retained and conserved the moisture in the soil as to grow magnificent, healthy crops upon it in seasons of severe drought. As we turn under this mass of matter to the depth of about twelve inches, decomposition takes place, moisture is drawn up from the subsoil and supplied to the growing crop.

A most striking instance of the value of this supply of moisture was shown where a heavy crop of rye was turned under twelve inches deep and the ground set with strawberry plants early in May. Weather conditions were favorable up to June, but from that time until September practically no rain fell. Shallow cultivation was kept up to prevent evaporation. Below where the soil was stirred there was moisture and the strawberry plants had been supplied with that moisture, so that each plant had thrown out runners and grown from fifteen to twenty new plants, all supported by the moisture supplied to the parent plant. The surface soil was so dry that not a single root had been developed upon these young plants, but they soon rooted after the rains came.

In another instance I ploughed under a heavy growth of clover the last of May and planted Evergreen corn. A slight rain fell the day after planting, wetting the ground about one inch deep. No more rain fell to a like amount in two months, yet the corn grew rapidly, maintaining a green, healthy color, when all other fields were growing yellow and drying up. The result was satisfactory, as the crop netted over \$100 per acre. This method of conserving and retaining moisture can be practiced by every cultivator of the soil. Provide plenty of vegetable matter, whether it be in the form of green crops or stable manure. Cultivate deeply and thoroughly before planting in shallow ground and often after planting.

### Fall Calves on Skim Milk.

If you will arrange to have your cows drop their calves in the late fall or winter you will be the gainer by it in several dollars during the year. Prices for milk product is always at least one-third better in fall and winter than spring and summer, besides you can allow your cow a much needed and beneficial rest during the hot summer months when she most needs it, while the fall calf is far enough matured by the middle of May to rustle and enjoy the spring grass, and is a lusty healthy yearling well developed and in prime condition for winter. It is safe to break off feeding whole milk when the calf is five weeks old. Separate the calf from the mother as soon as it is dropped. Do not permit her to lick and fondle her offspring and break off any attachment at once, so as to prevent excitement to the cow. Three quarts of whole milk a day one each at morning, noon and evening is sufficient food and nourishment for the first two or three weeks for the calf. Always have the milk warm and at as near the same temperature as possible. After the first three weeks you can re-

duce the milk to one-half skim milk, and at the end of five or six weeks discontinue the noon feeding, but allow about the same proportion of three quarts a day at morning and evening and feed all skim milk, leaving off the whole milk entirely. At six weeks old an ordinary calf brought up in this way should be in good condition with a stomach strong enough to assimilate and digest other food, such as chopped oats, alfalfa and pulped roots, if you prepare them in the proper manner. The proper way to feed skim milk to the calf is from the separator immediately after milking, while the animal heat is still there. Artificial heat will answer where it is not convenient to run the milking through the separator as soon as drawn from the cow. If you have difficulty with scours coming on your calves you can depend upon it, it arises from some fault of your own—carelessness—either from feeding the milk too cold or too hot when heated artificially, is nine times out of ten the seat of the trouble. If the calf is not doing well and you think it needs a tonic, some experts claim a hen's egg broken and mixed in the milk is a great reviver and strength renewer. Reduce the quantity of milk when scours appear and you may be able to check them before they are serious or chronic.

Study to replace that deficiency in skim milk by removal of the butter fat by supplying something of a cheaper article. Flax seed and wheat flour, made into a porridge by boiling slowly in a gallon kettle for a half-day, two pints of flax seed to a gallon of water. When it comes to a boil set it back where not too much fire and allow it to simmer. To this add sufficient flour to make a thin batter or porridge and a pint of this decoction stirred in the skim milk is relished and of rich contents. This quantity will make enough for six or ten calves. Remember to not over-feed, feed at regular hours, keep the calves in warm, comfortable pens, give them plenty of fresh, clean water and the skim milk calf given this care is better than the "self-made" calf that is permitted to grow up alongside its mother.

### Facts About Hogs.

Pigs dress away only 15 to 20 per cent, while beef dresses away 40 to 50 per cent.

In selecting a brood sire try to select an intelligent one with a good disposition.

A wild sow will trample on her young and spring up at every little noise.

A stupid one, lacking sense, will lie down on them and stay there, and smother and crush them, writes George in *Farm and Journal*.

A gentle and intelligent one will put her pigs in a bunch with her snout before lying down, and will slide down so slowly and carefully that she will never hurt one.

When you get a sow with these characteristics keep her as long as possible, for she is valuable.

A gentle, intelligent mother will make her offspring the same, and such animals are worth four times as much as wild, ungovernable ones.

If fed ground feed she will do well for several years longer than upon whole grain.

If the tusks get long and keep the grinders apart saw them off close.

Thumps may be arrested when the first symptoms appear by compelling the pigs to take more exercise.

Salt and charcoal should always be in the feeding pen, and they should have an opportunity to drink all the pure, clean water they wish independent of other feed.

If a hog has access to a tank of clean water he will never wallow in mud or filth.

Does it pay to drive our children away from home to find pleasure when we might make our homes brighter and the most attractive places to them on earth?

### Keeping Milk.

In a recent press bulletin issued by the Indiana Experiment Station, Prof. H. E. Van Norman states that milk sours because in the process of growth and multiplication of the bacteria the milk sugar is changed to lactic acid. When there is enough acid present to be apparent to the taste the milk is said to be sour. Since the keeping quality of milk bears a direct relation to the bacteria which gain access, it is important to prevent their getting into the milk. The udder and adjacent parts of the body, which are most shaken during milking, is one of the chief sources of infection, while the dust of the stable, the hands and clothes of the milker, together with the pans and cans used, are only slightly less important sources. Experiments show that milking in a stable where the circulation of the air can carry the dust out, wiping the udder with a damp cloth, and scalding utensils with live steam or boiling water, will not only reduce the bacterial content of the milk, but increase the keeping quality of the milk materially. A covered milk pail with only a small opening to milk into reduced the number of germs falling into the pail one-fourth, as compared with a common pail, and the milk kept sweet twenty hours longer.

Immediate cooling after milking is next in importance. Milk allowed to stand two hours without cooling contained twenty-three times as many germs as when milking was finished, while that which was cooled to 54 degrees only had four times as many at the end of two hours. This emphasizes the importance of quick and thorough cooling.

Milk when first drawn has a peculiar flavor, or cowy taste, more or less noticeable, which if not driven off by aeration (exposure to the air) frequently gives the milk an unpleasant taste even before it becomes sour. Aeration may be accomplished by stirring or by pouring from one vessel to another. The can of milk may be set in a tub of water to cool. The cooling and aeration may be better and quicker done by running the milk over a combined cooler or aerator or other similar apparatus having provision for running cold water through it. Finally cleaner cows, cleaner milkers, scalded utensils, quick and thorough cooling, aeration, less exposure to dust of street when delivering, will increase keeping quality of market milk. If properly done, one delivery a day will be all that is necessary.

### Prize Hereford Bulls.

Three prize Hereford bulls, standard and registered, arrived at Salinas last week from Reno, Nev., where they were purchased by David Jacks from the prize herd of Governor Sparks.

The consignment is made up of the imported bull Lemster, No. 111982. Lemster was imported as a calf after taking first prize at all the principal shows in England. He is four years old and weighs 2300 pounds.

The next is Kennington, No. 132233. He is aged seventeen months and weighs 1500 pounds, and the last of the lot is the seven months old calf Admiral Alamo, No. 158686, which will weigh between 800 and 900 pounds.

The three animals cost Mr. Jacks delivered here a trifle over \$3000.—*Salinas Journal*.

Every heifer intended for the dairy, should, until she is a year old, devote herself to growing. She can hardly grow too fast or be in too good a condition, provided, of course, she has plenty of opportunity to exercise. She should be fed between the time she is fifteen and eighteen months old. The heifer calving at about two years old, develops milk-giving tendencies which grow with her growth and strengthen with her strength.

Strike!—if they don't give you Jacks' son's Naps Soda when you ask for it.

## Use of Artificial Butter.

It was freely predicted at the time of the passage of the anti-oleomargarine law that it would not accomplish the results anticipated. The moment it was agreed that oleomargarine might be given such yellow tint as could be secured from the use of butter or cream in the manufacture, it was certain that what was called uncolored oleomargarine would find a ready market. During the eight months ending February 28, a total of 50,000,000 pounds of oleomargarine has been sold, only 30 per cent less than for the corresponding months a year ago, and of this only 16,000 pounds has been artificially colored.

The law provides that uncolored oleomargarine, that is, when no artificial coloring matter is used in imitation of butter, the product shall be taxed a quarter of a cent a pound, but when such coloring matter is used there shall be an internal revenue tax of 10 cents a pound. The theory of the law makers was that the uncolored product would be white, and not be mistaken for butter, nor seriously compete with butter, while the tax of 10 cents a pound on imitations of butter would sufficiently protect the dairy product. By the use of cream, rich yellow butter, and cotton seed oil, which are all legitimate ingredients of oleomargarine, a rich color is secured, not quite so yellow as butter, but yellow enough to take away a tallow color, and evidently yellow enough for the market demand. Even the 30 per cent falling off in this year's product is not due to lack of demand, but the small output immediately following the passage of the law, when the factories were compelled to rearrange their methods of production.

As the original tax on oleomargarine was 2 cents a pound, the reduction under the new law is cutting into the government revenues. For the eight months ending February 28, 1902, the government received \$1,863,461, while for the eight months ending February 28, 1903, the receipts have been only \$525,103, a falling off of over a million dollars, which the oleomargarine makers are able to add to their account as net profits.

## Angora Goats Profitable.

An Illinois farmer, who has been growing Angora goats for the last three years, in speaking of the profits derived from them, says in his neighborhood Angora goats have become an absolute necessity. They do work that cannot be done by hire, says the New York Farmer.

He purchased 100 acres of valuable land

covered with brush and producing but little grass or anything of value. In the spring of 1900 he bought 300 Angora goats and turned in on this land.

In eighteen months they killed all the brush and sprouts, and he had the land well seeded to bluegrass. He assisted the goats by cutting down the larger timber, leaving the goats to take care of the sprouts.

While the goats were doing this work, they paid him for the privilege by giving

him two clips of mohair and raising him two crops of kids.

The first year he received \$280 for his mohair and raised 246 kids.

The second year he received \$450 for his mohair and raised 293 kids.

In the fall he sold his land at \$60 an acre, making \$20 per acre profit on the land.

He also sold 280 head of wethers and wether kids and 175 head of does, receiving on an average \$3 per head for his wethers and \$5 each for his does, many of

which were old does and doe kids. He received altogether from goats sold \$1720.

This added to the amount received from mohair made a total of \$2450, which was \$25 more than the cost of original flock. He still had on his farm 380 head of fine goats, with which he expects to repeat the operation.

Buy milk cans that have the seams smooth. "No others need apply" would be a good motto to use when buying utensils for the dairy.

## No Foot--No Horse

Special Prices to Dealers,  
Horse Shoers and Agents

You don't have to pack horses' feet when you use STRAP VETERINARY and HOOF OINTMENT.

We guarantee a speedy and positive cure for Collar and Saddle Galls, Wire Cuts, Wounds of all kinds, Burns, Scalds, Cracked and Inflamed Heels, Grease Heel Scratches, Speedy Cuts, Thrush, Contracted Heels, Toe, Sand and Quarter Cracks, Nail Prides, Car Bruises, Sore Tendons, Corns and Founder Feet in all forms.

All Orders C O D. Sample can \$1. Write for testimonials. PRICES—1 pound can, \$1.00; 2 pound can, \$1.75; 5 pound can, \$4.00

Address a card to 1711 Genessee Street.

Low Watson & Jones,  
Office  
Cottlingham Bros. Kansas City, Mo.

Every feature connected with the PALACE HOTEL was designed and introduced for a double purpose—surrounding guests with comforts, conveniences and entertainment, and adding to the popularity and reputation of

California's  
Colossal  
Caravansary.

In the center of the hotel is the famous court, and out of this are the equally famous grill rooms. For your convenience telephone and telegraph offices, writing and reading rooms, barber shop, billiard parlor, carriage office, news stand and type writer offices are directly off the court. Outside—the wholesale and shopping district, theaters, clubs, banks and railroad offices are a step from the entrance.

## SAFETY PREGNATOR OUTFIT

A practical, durable, and easily used Impregnating Outfit, with which you can get in foal all mares you breed, and greatly increase the income from your stallion. GUARANTEED to give satisfaction. A necessity in every breeding stable. Write for descriptive circular. Price of Pregnator, \$5.00. Outfit, complete, \$7.50. I. O. CRITTENDEN, ELYRIA, OHIO

## A ROYAL CHANCE FOR FARMERS!

ON THURSDAY, MAY 28, 1903,

I will sell, by order of the Court, all the

HEAVY DRAFT STALLIONS, BROOD MARES (with foals), YEARLINGS, TWO, THREE AND FOUR YEAR OLD MARES AND GELDINGS, belonging to the Estate of Henry Pierce, deceased, among them being the grand Percheron stallion RUBLE and the Clyde and Shire stallion ROS ROY. A finer collection has never been sold at auction in this city. Every one is a choice individual.

Besides these, I will sell, at the same time, by order of the Court, all the Trotting Stock belonging to the Estate of J. Keele, Esq., consisting of Mares, Colts and Fillies by such sires as Direct 2:05½, Director 2:17, Sidney 2:19½, Sidmore, etc.

Sale takes place under electric light in the Pavilion of the

Occidental Horse Exchange, 246 THIRD STREET NEAR FOLSOM  
Commencing at 7:30 P. M.

Catalogues sent on application.

WM. G. LAYNG, Auctioneer.

## ATTEND THIS AUCTION SALE

—OF—

## 50---Standard Bred Trotting Horses---50

CONSISTING OF

Horses with Records, Choice Brood Mares, Geldings, Colts and Fillies.

Sired by DICTATUS 2:17, BRUNO 2:16½, BOODLE 2:12½, ROBIN, BOODLE JR., DICTATUS MEDIUM, EUGENEER 2:29½, ALTOONA 8850, ALTA RIO (brother to Ch-halis 2:04½), etc. Consigned by Messrs. Vanderhurst, Hebert, Iverson, Hebron, Smeltzer, Kelly, Carr, of Salinas. Sale takes place at

SALINAS FEED YARD, cor. Gabilan and Monterey Sts., SALINAS. on

Saturday, June 6, 1903,

COMMENCING AT 1 O'CLOCK P. M.

Catalogues issued at once.

WM. G. LAYNG, Auctioneer.

## BONNIE DIRECT 2:05½

Winner of the Fastest Five-Heat Race Paced in 1900. Biggest Winner of the "New" Pacers of 1900, having \$7575 to His Credit the first year out.

Dam BON BON 2:26 (dam of Bonsilene 2:14½) by Simmons 2:28; second dam BONNIE WILKES 2:29 (dam of 3 in list) by George Wilkes 2:22; third dam BETTY VILEY by Bob Johnson, thoroughbred son of Boston.

BONNIE DIRECT will serve a limited number of approved mares during season of 1903, at \$100 the season. Mares not proving to be in foal can be returned next season or service fee refunded, at the option of the owner of mare. Address

C. L. GRIFFITH, Pleasanton, Cal.

The Mutton Sheep.

As mutton-makers the long wool breeds of sheep are, as far as quality goes, much better than they were a few years ago. There is no denying this fact that, as those who handled them ten years ago must admit that they were then a little more wasty than the Down breeds. They carried a thick covering of fat which was a little too thick for the butcher's taste, and consequently they were not so popular with them as the Downs and did not usually fetch as much per pound dressed weight. Selection and careful breeding, however, has changed all this to a very marked degree, says "Wool Markets and Sheep," as a careful handling of the backs of some of the long wool wethers shown at our late International would demonstrate and this is not all; the various long wool breeds of sheep are not discriminated against by the English meat purveyors to the extent they were but a few years ago—in many cases unjustly—when nothing but a "black footed" leg of mutton could be expected to realize top market prices. Time was when thousands of legs of mutton cut from long wool carcasses were

under a guise of black coloring matter sold as Down legs of mutton, and perhaps such a state of affairs exists to-day. Be that as it may, there is scarcely any excuse for this to-day, as properly fed wethers from the long wool breeds of sheep are worthy of the notice of the most particular chief of any culinary department or the lordly epicure himself. One of the strongest proofs of the admitted improvement in quality of the long wools as producers of a first class quality of mutton was advanced at the late Smithfield fat stockshow, when Mr. Bowen Jones, whose name is familiar to our readers, as an old time Shropshire breeder, showed the courage of his convictions by awarding a pen of Lincoln wethers, the property of Mr. Henry Dudding, the champion prize over all competing breeds. It cannot be said that this is an instance of where a judge was trying to promote the interest of a breed he was interested in. It was simply a case of merit winning, and Lincoln breeders in this and other countries should feel elated at the showing their favorite breed made at such a prominent show, and in company with such a large variety of breeds.

**CONDITIONS.**

Entrance Fee to each 5 per cent, and 5 per cent additional will be deducted from each winner of first four moneys. All payments are FORFEITS, and are due in cash on dates specified as follows: No. 1, \$75 June 1; \$75 July 15; \$75 September 1; \$75 evening before race. No. 2, \$40 June 1; \$40 July 15; \$70 September 1; \$90 evening before race. Nos. 3 and 5, \$30 June 1; \$40 July 15; \$40 September 1; \$40 evening before race. Nos. 4, 6, 7, 8, 9, 10, \$35 June 1; \$35 July 15; \$35 September 1; \$25 evening before race. All Entries (except in Transylvania and Tennessee) must be named June 1.

Division of Purses 50, 25, 15 and 10 per cent, except in No. 3, The Walnut Hall Farm Cup, which will be divided as follows: \$1400 to first horse, \$700 to second, \$400 to third, \$300 to fourth, \$100 to driver of winner and \$100 to winner of fastest heat.

All races will be contested under the Rules of the National Trotting Association (of which this Association is a member), unless otherwise specified. Right reserved to reject any entry this Association does not want. No return of any payment because of death of nominator or entry, nor will the death of nominator make void the entry.

Nominators will be held for full amount unless written notice of withdrawal is received by the Secretary, bearing postmark on or before date when a payment is due.

In all races, excepting The Transylvania and The Tennessee, more than one may be named as one entry, providing they are in the same stable. In case where two or more horses have been named as one entry, and any horses have been separated from the stable from which they were originally entered, and such separation made according to rule, they shall be eligible to start in the race (if forfeits falling due after such separation have been met according to conditions), upon the payment of forfeits which fell due before said separation.

Notice—The Futurity and Kentucky, The Two Year-Old Futurity and Lexington, The Transylvania and McDowell, The Transylvania and Cup, The Cup and Blue Grass, The Blue Grass and Johnston, The Johnston and West, will all be carded with from three to seven days between, but no horse can be entered in more than one race on one payment. Don't ask it.

**Important Payments Due.**

- |  |  |
|--|--|
| No. 11. <b>Kentucky's Futurity</b> (for Three year-olds, foals of 1900).....\$20,000<br>A payment of \$50 June 1 made on each eligible three-year-old that owners desire to keep in will carry entries to within thirty days before the meeting (September 1). |  |
| No. 12. <b>The Futurity</b> (for Two-year olds, foals of 1901).....\$5,000<br>A payment of \$25 June 1 will keep eligible entries good until thirty days before meeting (September 1).   |  |

Purses for All Classes \$1000 or more each, will be opened later, to close September 9. Stables can get two or more races for their horses without shipping. Send entries and payments therefore to the Secretary. Programme on application.

ELECTIONEER NUTWOOD

**NEERNUT** Record 2:12 1-4  
Reg. No. 19810

(SIRE OF NEERETTA 2:09½)

By Albert W. 2:20, son of Electioneer.

Dam Clytie 2d by Nutwood 2:18 3-4

SEASON 1903 AT

**SANTA ANA, CAL.**

NEERNUT was foaled in 1891. He is one of the best representatives of the Electioneer-Nutwood cross which produced the great two-year-old Ariel. He stands 15½ hands, weighs 1100 lbs.; blood bay with black points; trots without boots. He is a great race horse and his record (2:12½) was pronounced by competent observers to be as good as 2:08, as he started in fourth position and was forced to go a wide mile.

Terms: \$20 single service, \$40 for the season ending July 1st, with usual return privileges; \$60 to insure a foal. Apply to or address

GEO. W. FORD, Santa Ana, Cal.

## SIR GIBBIE 2D. No. 370

American Hackney Stud Book

**Hackney Pony Stallion**  
13.3 hands.

The Only Representative Stallion in America of the Two Best British Hackney Pony Strains

BOTH HIS SIRE AND DAM LINES have long been recognized as the surest producers of beauty of conformation, combined with true, high and spirited action.

SIR GIBBIE 2d will stand at  
**MENLO STOCK FARM**

during the season of 1903 at \$30. Mares will be boarded by the season, or during service, at the rate of Ten (\$10) Dollars per month. The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. Apply to

JAMES McDONNELL,  
Supt. Menlo Stock Farm,  
Portola, San Mateo County, Cal.

## SIDNEY DILLON 23157

Sire of DOLLY DILLON 2:07 (the Fastest Mare of 1901),  
B. S. DILLON 2:25 and CAPTIVITY 2:28 1-2.

**Santa Rosa Stock Farm**  
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19½; dam Venus (dam of Adonis 2:11½, Leah 2:24½, Cupid 2:18 (sire of Venus II 2:11½), Psyche 2:16½, and Lottie Parks 2:16½, and she was also dam of Juno, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27½, sire of dam of Directum 2:45½; second dam s. b. by Algerine, son of Whipple's Hambletonian. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny. Best of care given mares, but no responsibility for accidents or escapes. Usual return privileges if horse is still in my possession. For pasturage and other information regarding shipment of mares address

FRANK TURNER,  
Supt. Santa Rosa Stock Farm,  
SANTA ROSA, CAL.

Or Ira Pierce,  
728 Montgomery St., S. F.

TERMS FOR THE SEASON, \$40.

## The Thoroughbred Stallion

## St. Carlo

St. Blaise.	Hermit.	Newminster Seclusion
Carina.	Fusee.	Maryas Vesuvienne
	Kingfisher.	Lexington Eltham Lass
	Carita.	The Ill-Used Camilla

ST. CARLO won the Great American at Brooklyn, the Foam Stakes at Coney Island, the White Plains Handicap, was second to Chaos for the Futurity, and won about \$29,000 as a two-year-old. He is a wonderful young sire, among his get being Rainart (winner of the Burns Handicap, Palace Hotel Handicap and \$11,650), Zamar II (winner of 19 races as a two-year-old and \$7635), Joan, February, St. Cuthbert, St. Callistine, Count of Flanders, Lord Marston May Boy, Our Climate, Glendinning and many others.

ST. CARLO will make the Season of 1903 at the

**MENLO STOCK FARM, SAN MATEO COUNTY, CAL.**

**TERMS FOR THE SEASON, - \$100**

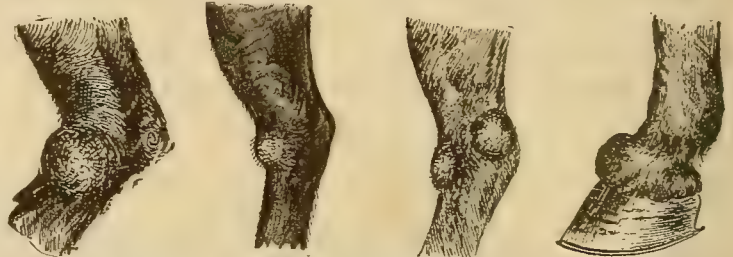

The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. For further particulars in regard to above Stallion apply to

JAMES McDONNELL, Portola, San Mateo Co., Cal.

## "SAVE-THE-HORSE" SPAVIN CURE

TRADE MARK

**POSITIVELY AND PERMANENTLY CURES**

**BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE, CURB, SPLINT, CAPPED HOCK, SHOE BOIL, WIND PUFF, WEAK AND SPRAINED TENDONS, AND ALL LAMENESS.**

FROM A REPUTABLE AND NOTED TRAINER.  
Glenville Driving Park, Cleveland, Ohio.

For the enclosed \$5 please send me one more bottle of "Save-the-Horse." It is doing great work.

Respectfully,  
MILLARD F. SANDERS.

Hartland, Mich.

Find enclosed money order for \$5, for which send me another bottle of "Save-the-Horse" spavin cure, as it has done all you claim for it for me. With the bottle I bought of you I took off a curb, spavin and a side bone on a three-year-old mare that other spavin cures refused to help in the least. I consider your spavin cure the best on the market.

E. M. PARSHALL.

Howick, Quebec.

I had a mare suffering from a bone spavin and very lame. I concluded to try a bottle of "Save-the-Horse," and at the expiration of six weeks' treatment she was free from all lameness and I consider it one of the greatest compounds made.

DAVID BARRINGTON.

Edgewater, N. J.

Enclosed check for \$5, for which you will kindly send me another bottle of "Save-the-Horse" by Wells Fargo Express soon as possible. The horse that I have been treating with "Save-the-Horse" went sound and I sold him, and the last I heard of this horse he was still going sound and was working

every day, and I think he will stay sound. The bottle I am ordering now I will use on another horse that has a pair of spavins and a curb; he does not go very lame but walks on his toes, but I think "Save-the-Horse" will bring him around so that he will walk all right. Very truly,  
OTTO MEYER.

The fire iron is uncertain and invariably only aggravates the disease or injury; blistering is less effective than the fire iron, and both necessitate laying up the horse from four weeks to two months. Arsenic, mercurial and poisonous compounds produce irreparable injury.

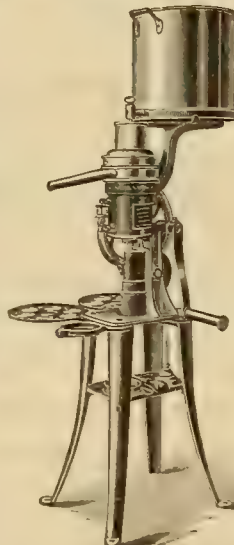

"Save-the-Horse" eliminates all these factors. Horse can be worked continuously. It can be applied at any time, anywhere, any place, and in all conditions and extremes of weather—hot or cold. And no matter what the age, condition or development of the case, or previous failures in treating, the concentrated, penetrating, absorbing power of this remedy is unfailing.

**\$5 PER BOTTLE.**

Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost impossible, except in rarest of cases.

Copy of Guarantee sent upon application. \$5, at all druggists and dealers, or sent express prepaid.

**TROY CHEMICAL CO., Troy, N. Y.** { D. E. NEWELL, Pacific Coast Agent  
519 Mission St., San Francisco.

## The New Simplex Cream Separator.

MR. MUNROE, CARE OF WEATHERLY CREAMERY CO., PORTLAND, OR.

Dear Sir: The No. 2 700-lb. Simplex Hand Separator I bought from you is a dandy. It will separate 850 lbs. of milk per hour by opening the milk faucet wide open. I made several tests of the skim milk, running the machine over capacity and skimming 850 lbs. per hour at 80 degrees. Skim milk tested .01. 700 lbs. at 55 degrees .02. My boy ten years old ran the Separator to skim 391 lbs of milk. I made four pounds more of butter off of 1200 pounds of milk than I did with the old machine. Any one in doubt of the Simplex Separator's work, refer them to me. It is far easier to clean than the Separator.

Yours respectfully,

WM. H. MILLER,  
Fish Hawk, Columbia Co., Or.

Send for New 1903 Creamery Catalogue, just issued, and special Literature on Simplex Separators and Churns.

**BAKER & HAMILTON**  
SAN FRANCISCO, CAL.

## MANHATTAN STOCK FOOD

Awarded Gold Medal At California State Fair 1892. Every horse owner who values his stock should constantly have a supply of it on hand. It improves and keeps stock in the pink of condition.

Manhattan Food Co

**RED BALL BRAND.**

1253 Folsom St., San Francisco

Positively Cures Colic, Scouring and Indigestion.

C. F. KERTELL, Manager.

Your stable is not complete without Quinn's Ointment. An infallible cure for all ordinary horse afflictions. Follow the example set by the leading horsemen of the world and your stable shelf will always hold a bottle of

**Quinn's Ointment**

A. I. Thomas, Supt. Canton Farm, Joliet, Ill., remarks, "I enclose you amount for six bottles of Quinn's Ointment. After one year's trial must confess it does all you claim for it." For Cuts, Splints, Spavins, Windpuffs or Bunches.

Price \$1.00 per package.

Sold by all druggists,

or sent by mail.

W. B. EDDY & CO., Whitehall, N. Y.

**TRY IT.**

# NUSHAGAK

Reg. No. 25939

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15½, Sabina 2:15½, Sabledale (at 2 years) 2:18½, Buffington (at 2 years) 2:30½, and 36 others in 2:30 list. Dam, Fidella (trial 2:36 at 2 years), dam of Fidette 2:38½, dam of Mary Celeste (at 2 years) 2:17½ by Director, sire of Directum 2:05½, Direct 2:05½, Nathan Straus 2:05½, Direction 2:08½, etc. Second dam by Reavis' Blackbird 2:23, sire of Mamie Griffin 2:12, Vic H. 2:12½, etc. Third dam by Lancelot, son of McCracken's Blackhawk 767.

NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17½, Majella B. (3) 2:29 (trial at 4 years 2:13½), and The Boquet (trial at 3 years) 2:21. His son Aristo (at 3 years) 2:17½ took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

Limited to 40 outside mares, at \$50 the Season,

with usual return privilege. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed. First-class pasturage for mares, \$3 per month; no barbed wire. Address

WALNUT GROVE STOCK FARM,  
Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morshead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

# Guy McKinney

Season of 1903 at

LINDEN, SAN JOAQUIN CO.

Saturdays at Higginbotham's Stables, Stockton.

SEE \$30 FOR THE SEASON.

GUY MCKINNEY is a beautiful black, 16 hands high, and weighs 1300 pounds, a model of symmetry, handsome head and neck, short back, the best of legs and feet, good disposition and great intelligence. He is a perfect gaited trotter, and with very little handling showed a 2:40 gait. In his blood lines are represented the greatest strains of the American trotter, and the greatest producers of early and extreme speed. Good pasturage at \$1.50 per month. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

D. BRYSON, Linden, Cal.

THE BARON WILKES WON 25 PER CENT OF ALL THE MONEY ON THE GRAND CIRCUIT OF 1902. Breed to the Futurity Winning Family.

Will make the Season of 1903

WOODLAND, CALIFORNIA.

TERMS FOR THE SEASON, - \$50

Good Pasturage at \$2.50 per month. Best of care taken, but no responsibility assumed for accidents or escapes. Address

WILLIAM MURRAY, Woodland, Cal.

# SEYMOUR WILKES

REG. No. 0232.  
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

Lakeville, Sonoma Co., Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Eviston (3) 2:22 in 1901.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. \$50 TO INSURE. Mares can be shipped direct to ranch via steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables, 408 Bush street, San Francisco.

# ZOMBRO 2:11

The Greatest Son of the Great McKinney and

Sire at 10 years of age of

ZEPHYR (4) 2:11  
ITALIA (3) 2:23½  
LORD KITCHENER 1, 2:29½

and a number that have been worked and given trials as follows, all trotters: Zephyr (4) 2:06½ in a race, Julia M. (5) 2:12, Italia (3) 2:15½, Zombowette (3) 2:17, Suomi (3) 2:17, Lady Zombro 5, 2:17, Lord Kitchener (5) 2:19½, Tee Dee Cee (4) 2:21½, Zerica (5) 2:25½, Gold Coin (4) 2:26½, Mabel W. (4) 2:28½, Edmond S. (5) 2:28½, Gyr Falcon (5) 2:30, Zombro C. (5) 2:29. Besides six or seven more two and a three year olds that are now stepping quarters in 35 seconds at the Los Angeles track.

ZOMBRO will make the season of 1903, from February 1st until June 1st, at my barn near Los Angeles track.

SEE \$75 THE SEASON.

Usual return privilege. Due care taken but no responsibility assumed for accidents or escapes. Send for card containing pedigree and full information. Address

GEO. T. BECKERS,  
University, Los Angeles Co., Cal.

THE STANDARD-BRED TROTTER STALLION

# BOODLE Jr.

By BOODLE 2:12½, sire of Ethel Downs 2:10, Thompson 2:14½, and 4 others in 2:30 and better. He by Stranger, sire of 33 in 2:30. Dam NINA B. by Electioneer, sire of Arion 2:07½, Sunol 2:08½, Palo 2:08½, and 161 more in 2:30 list.

BOODLE JR. is one of the best bred, best looking and best stallions on the Pacific Coast. He will make the Season of 1903 at

J. D. CARR'S GABILAN RANCH, Six Miles East of Salinas

Fee \$25 for the season, payable at end of season, or \$15 for single service, payable at time of service, otherwise will be considered at season rates. Any mare entered for the season and paid for will be granted the usual return privileges if proven to be not in foal, provided that next year the owner of mare still owns her and J. D. Carr still owns the horse. Good pasturage at \$3 per month, but no responsibility assumed for accidents. Season open now, and will close August 1st 1903. BOODLE JR. is a sure foal getter, his colts are all uniform, and of good color, and show fine speed and action. He is 16 hands high and weighs 1200 pounds, is of a rich mahogany bay.

Apply to

J. D. CARR, or JOHN GARSDIE, at Gabilan Ranch.

BREED FOR SIZE, STYLE, SPEED, GAMESNESS.

# HAMBLETONIAN WILKES 1679

The Only Son of the Great Geo. Wilkes in California, . . .

# MAMMOTH CHART

SHOWING

# Skeleton of the Horse GIVEN AWAY To OUR SUBSCRIBERS

This Chart is lithographed on tinted paper and is 22x28 inches. It will be found invaluable to every owner of a horse, as the names of all the Bones are given, as well as the names of the Tendons and Ligaments of the legs. By studying this Chart almost any lameness can be located and the proper remedies applied. The accompanying engraving will afford an idea of its appearance. No

similar Chart has ever before been published. The artist, in preparing this Skeleton, visited the American Veterinary College in New York City and made drawings from actual skeletons, thus insuring absolute accuracy. This Chart sells for One Dollar, but any reader can have it who will remit THREE DOLLARS

Between the dates of May 1 and June 1,

1903, for one year's subscription, it will be mailed, carefully packed, in a heavy pasteboard box for safety. Address

BREEDER AND SPORTSMAN, 36 Geary St., San Francisco

# Limonero=3=2:15 3=4.

(A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15, bred at the Palo Alto Stock Farm, is conceded by all who have seen him, to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and uniformity ranks with any of them. He has 35 two and three year olds that have been trained. All of them are handsome, big bays and browns. From their ancestry and the predictions of the best judges many of them are sure to be good race horses with every prospect of some star performers. A number of these progenies are to be seen at the Los Angeles track.

LIMONERO 2:15, at his record as a three-year old in the fourth heat of a six-horse race for a \$300 purse which he won at Lexington, beating a field of six of the greatest three-year-olds of that year, including the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity.

LIMONERO 2:15 will make the season of 1903 at the

## AGRICULTURAL PARK, LOS ANGELES.

Fee \$25, for a Limited Number of Good Mares.

Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS.

J. H. WILLIAMS,

Owner. University Station, Los Angeles, Cal.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED.

# NUTWOOD WILKES.

He is the only Stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:14, respectively. Who Is It, ex-champion 2-year-old gelding of the world, reduced his record to 2:10 1/4. John A. McKerron 2: 5 1/4 (1 1/4 as a three-year-old) is the fastest trotter of all the famous tribes: George Wilkes.

NUTWOOD WILKES will make the Season of 1903 at the

NUTWOOD STOCK FARM, from Feb. 1st to July 1st.

Fee = \$50 Nutwood Wilkes 22116

## Tales of the Turf

By William B. Fasig.

Trotting horse men the world over knew the late W. B. Fasig and that he was in a class of his own as an instructive, interesting and humorous writer of trotting horse subjects. W. H. Gocher, secretary of the National Trotting Association, has put Mr. Fasig's writings in book form, adding much of interest thereto, and the book is now ready for delivery.

The table of contents includes the following:

TROTTER TRACKS.—How to build and manage them, with plates showing how to lay out a half-mile track, a mile track and a kite-shaped track. This article is one that a race track official needs in his business.

THE SECRETARY.—His trials and tribulations in the merry days of racing. On the other side of Jordan he may find rest; there is nothing for him here but advice.

THE SANDPIPER.—How the Dutchman did not balance his bill for gravel while the little man in brown stood pat, and those who had the real sure thing—well, they lost, as usual.

A STRANGE LAND.—How a shipwrecked Buckeye made a stir in another racing world. Utopian, utopian, and if you do not believe it, you can say it is untrue.

McDOEL.—How the best green horse in Missouri broke into turf history. He won the Transylvania. That is enough. If you were there you know why.

STRANGER.—A lightning-going pacer of North-ert, Ohio, whose history has a pinch of romance hooked on to it.

ANDY AND I.—What the well known pair learned in France and England after the hotel clerk checked the sign language. They could not parley words.

RIDE OF A LIFETIME.—How Flying Jib put a crimp in the boss trotter on the speed drive in Wale Park.

PAT SHANK.—Someone said he was a colt breaker but he broke the wise when the thirteen combination and Eloise won at Detroit.

We will send this valuable book free as a premium to anyone sending two new subscriptions for THE BREEDER AND SPORTSMAN at \$3 each, or will send the book alone, postpaid, on receipt of price \$2. Address

BREEDER AND SPORTSMAN,  
36 Geary Street, San Francisco.

## American Trotting Register PUBLICATIONS.

## Grease Heel, Scratches,

MUD FEVER, HOOF ROT, SPEED

CRACKS—Cases where ulcerations extend, with transverse cracks which open at every step and often bleed, no matter how complex, aggravated, deep seated or chronic, if treated according to directions, as given on circular with every box, positively cured with

## Veterinary Pixine

After Blistering. Veterinary Pixine is the very best application that could be indicated. It absorbs all inflammatory exudate and hastens the reparatory process. Will heal the most severe cases without scar, and will prevent loss of hair. As a Preventive—If a light application of Veterinary Pixine is used before speeding, driving in wet, muddy or slushy weather, or in the snow, your horse will never have speedy cracks, scratches or grease heel.

For Hoofs—It will keep the hoofs healthy, soft and in perfect form.

For Old and Chronic Sores, Etc.—Veterinary Pixine heals collar and saddle galls, hobbles chafes, abscesses, inflammatory swellings, sores and all skin disease. In cases of emergency it is invaluable.

This penetrating, stimulating, soothing absorbing, antiseptic healing ointment heals from beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy granulation, not by drying and scabbing.

2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00.  
At all druggists and dealers or sent prepaid.

## CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER  
SORES and SADDLE GALLS there is none  
superior.

The horse CAN BE WORKED AS USUAL.  
FOR BARBED WIRE CUTS, CALKS, SCRATCHES,  
BLOOD POISONED SORES and ABRASIONS  
OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery  
as well as a dry sore.

Its use will absolutely prevent BLOOD POISON-  
ING. In this respect there is no Gall Cure offered  
which can justly even claim to be a competitor.  
We placed it on the market relying wholly on its  
merit for success, and notwithstanding the fact that  
comparatively little has been done in the way of  
advertising the sales of 1900 were 100 per cent greater  
than the aggregate sales of Gall Cure preceding  
that year. This increase was entirely due to its  
MERITS, and from it we feel justified in saying that  
it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome  
skin cracks under the fetlock which injure and often  
lay up race horses.

All Trainers Should Have it in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

	For Pacers eligible to the 2:30 class June 1, 1903.

## CONDITIONS.

Entrance fee to each 5 per cent, and 5 per cent additional will be deducted from each winner of first four moneys. All payments are FORFEITS, and are due in cash on dates specified as follows: No. 1, \$75 June 1; \$75 July 15; \$75 September 1; \$75 evening before race. No. 2, \$40 June 1; \$40 July 15; \$40 September 1; \$40 evening before race. Nos. 3 and 5, \$30 June 1; \$40 July 15; \$40 September 1; \$40 evening before race. Nos. 4, 6, 7, 8, 9, 10, \$25 June 1; \$35 July 15; \$25 September 1; \$25 evening before race. All Entries (except in Transylvania and Tennessee) must be named June 1.

Division of Purses 50, 25, 15 and 10 per cent, except in No. 3 The Walnut Hall Farm Cup, which will be divided as follows: \$1400 to first horse, \$700 to second, \$400 to third, \$300 to fourth, \$100 to driver of winner and \$100 to winner of fastest heat.

All races will be contested under the Rules of the National Trotting Association (of which this Association is a member), unless otherwise specified.

Right reserved to reject any entry this Association does not want. No return of any payment because of death of nominator or entry, nor will the death of nominator make void the entry. Nominators will be held for full amount unless written notice of withdrawal is received by the Secretary, bearing postmark on or before date when a payment is due.

In all races, excepting The Transylvania and The Tennessee, more than one may be named as one entry, providing they are in the same stable. In case where two or more horses have been named as one entry, and any horses have been separated from the stable from which they were originally entered, and such separation made according to rule, they shall be eligible to start in the race (if forfeits failing due after such separation have been met according to conditions), upon the payment of forfeits which fell due before said separation.

Notice—The Futurity and Kentucky, The Two Year-Old Futurity and Lexington, The Transylvania and McDowell, The Transylvania and Cup, The Cup and Blue Grass, The Blue Grass and Johnston, The Johnston and West, will all be carded with from three to seven days between, but no horse can be entered in more than one race on one payment. Don't ask it.

## Important Payments Due.

No. 11. Kentucky's Futurity (for Three-year-olds, foals of 1900).....\$20,000  
A payment of \$30 June 1 made on each eligible three-year-old that owners desire to keep in will carry entries to within thirty days before the meeting (September 1).

No. 12. The Futurity (for Two-year-olds, foals of 1901).....\$5,000  
A payment of \$25 June 1 will keep eligible entries good until thirty days before meeting (September 1).

Purses for All Classes \$1000 or more each, will be opened later, to close September 9. Stables can get two or more races for their horses without shipping. Send entries and payments therefore to the Secretary. Programme on application.

R. C. ESTILL, Pres.

E. W. SHANKLIN, Sec'y,  
LEXINGTON, KY.

## A ROYAL CHANCE FOR FARMERS!

ON THURSDAY, MAY 28, 1903

## STATE AGRICULTURAL SOCIETY

SACRAMENTO, CAL.

## STANFORD STAKE OF 1905

FOR FOALS OF 1902.

TO BE TROTTED AT THE CALIFORNIA STATE FAIR OF 1905.

ENTRIES TO CLOSE JUNE 1, 1903,

With H. LOWDEN, Acting Secretary, at the Office in Sacramento.

FIFTY DOLLARS ENTRANCE, of which \$5 must accompany nomination June 1, 1903; \$5 November 1, 1903; \$10 June 1, 1904; \$10 June 1, 1905, and \$20 on the tenth day before the first day of the State Fair of 1905. \$300 added by the Society. Mile heats, three in five, to harness.

The stakes and added money to be divided 50, 25, 15 and 10 per cent. Right reserved to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 66½ per cent to the winner, and 33½ per cent to the second horse. A horse distancing the field shall be entitled to first money only. In no case will a horse be entitled to more than one money.

Nominators are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility, and declares entry out.

The stake is growing in value each year; every breeder should enter in it; it will enhance the value of his colt in case he desires to sell.

A Special Stake will be opened in 1905 for colts entered originally in this stake, and Occidental Stake of 1905, that develop a pacing gait, to be contested for as three-year-olds in 1905.

Your colt entered in the Occidental Stake for 1905 is eligible for entry in this stake.

Remember the date of closing is June 1, 1903.

H. LOWDEN, Acting Secretary.

An entry in this stake will enhance the value of your colt. First payment only \$5.

Entry Blanks can be obtained from Acting Secretary, or this office.

## California State Agricultural Society.

## Special Harness Stallion Stake for 1905.

FOR THEN THREE-YEAR-OLDS.

For the Get of Stallions that made Private or Public Service, Season of 1901, for their Foals of 1902. The Race is to be contested at the State Fair at Sacramento, 1905, when Foals are Three Years Old.

Total paid in on stallions.....\$1140

Added by Association.....1000

Total amount of Stake to date.....\$2140

All Foals that are the get of any stallion entered in this Stake to be eligible to be entered on June 1, 1903. Entrance fee, \$50 each, of which \$5 must accompany the entry, with breeding and name, if any, of foal, and a further payment of \$10, March 1, 1904, and a further payment of \$15 each, May 1, 1905, and a final payment of \$20 on the first day of August, 1905, and all colts making this payment shall be eligible to start. Starters to be named in writing, through the entry box, 4 P. M., day before the race.

The nominator of any colts shall, on May 1, 1905, then declare as to the trotting or pacing end he desires to start his colts. All moneys paid in on colts transferred to the pacing division shall be segregated and placed to the credit of the pacing stake, and all other payments shall be placed to the credit of the trotting stake.

All payments not made as they become due declares entry out, and releases subscriber from further liability.

Hop barred in both classes. Mile heats, three in five. For further conditions see Entry blanks.

REMEMBER DATE OF CLOSING, JUNE 1, 1903.

H. LOWDEN, Acting Secretary,  
Office, New Pavilion, Sacramento.

An entry in this stake will enhance the value of your colt. First payment only \$5.

Entry Blanks can be obtained from Acting Secretary or at this office.

**PETALUMA GETS THE BREEDERS' MEET,** and one of the best programs of harness racing ever seen in California will be offered at the first trotting and pacing meeting held in that city since 1896. That was the year Nutwood Wilkes, sire of the great John A. McKerron, made his record of 2:16½ in a race which he won in straight heats, beating Mamie Griffin 2:12½, Clay S. 2:13½, and three others. There were some of the greatest split heat races at that meeting that the California turf has ever seen. The pacer San Luisito was the winner in one of these events after seven heats had been decided. Galetta, the Judd Wilkes mare, won the 2:15 trot, which required five heats to determine, beating George Washington, Jasper Ayers, Homeward and Chico. In the 2:24 class trot, Harry Winchester, the handsome but fiery son of Stamboul, won the race and first money after six heats had been trotted. The same day that game little pacer, Plunkett, defeated Prince Nutwood, Hanford Medium, Javelin and Allie Cresco in a great race, and as Plunkett was on his home track there were shouts of applause from hundreds of throats when he settled the question by winning the sixth heat. The free for all trot that year was won by the beautifully gaited little mare Visalia 2:12½, and she beat the fast trotters Toggles and Native State in straight heats. One of the features of the meeting was a race between the fast pacer W. Wood and a bicyclist named Oscar Olsen. The pacer won in two straight heats, the last one in 2:11. There was a big attendance all through the week, yet the largest purse was but \$600. This year the Breeders' Association will have a \$2000 trot, a \$1,500 pace, two other purses of \$1000 each and several \$500 purses. The three-year-old trotters will have a \$600 purse to contest for, and the two-year-old divisions of the \$6,000 Breeders' Futurity are to be pulled off. In the trotting division there is \$1,450 to be divided and \$950 is to be given the pacing division. During the four days meeting about \$10,000 in stakes and purses will be distributed among the owners of trotters and pacers, which will make the meeting rank among the most important given in the United States this year. The Petaluma track is one of the best regulation mile tracks on the Pacific Slope and it will be in perfect condition for the racing to be held on it. Petaluma was in former years one of the best towns in California for harness meetings, but owing to many different reasons, one of which was the passing of the track from the ownership of the association, meetings were discontinued and since 1896 none have been held there until this year. Last winter Mr. Harry Stover, a well-known running horse owner, purchased the property and two weeks ago a very successful running meeting was held there. Work has already been commenced to place the track

in condition for the harness horses and it is now ready for training trotters and pacers over. The citizens of Petaluma are enthusiastic over getting the Breeders' meeting there and promise that the attendance will be large. Entries for six big stakes will close Monday, June 1st, and soon thereafter a number of additional purses will be advertised. It will be the best opportunity offered in California this year for trotters and pacers to win big purses. Read the big advertisement and get ready to win some of these purses.

**VALLEJO WILL OPEN THE CIRCUIT** this year with a three days' meeting, beginning Thursday, August 13th. That well known horseman and responsible business man, Thos. Smith, has secured a lease of the track and the Vallejo Driving Club has been organized to take charge of the meeting. The Navy Yard town is one of the busiest places in the State at the present time and the merchants have responded liberally to aid the holding of three days harness racing. As will be seen by the advertisement in another part of this paper the Vallejo Club has opened two \$1000 purses, one for trotters of the 2:23 class, the other for 2:18 class pacers. In addition there are a number of \$300 purses, making up a program that should attract nearly every horse in training in California this year. The Vallejo track is in fine condition for training at the present time, and the management offers many inducements to owners to take their string there to train. As the meeting will open the circuit, owners whose horses are trained there will be on the ground and not be compelled to car their horses for a journey before their first starts. The Breeders meeting at Petaluma will follow the Vallejo meet, and the trip by boat or rail is a short and easy one. The Vallejo meeting promises to be one of the best yet held in that thriving village, which always furnishes a good attendance and is considered one of the best betting towns in California. Entries to the Vallejo events will close Monday, June 15th, and there should be a liberal entry list.

**THAT STALLION STAKE** offered by the California State Agricultural Society should get the biggest entry list on record. It will be worth about \$10,000, probably, and if so the entrance fee which is \$50, with only \$5 required as first payment will only be a half of one per cent. There were thirty-eight stallions nominated and their get, foals of 1902, are eligible. These foals are now yearlings and the entries close June 1st, which is one week from next Monday. There is already \$2,140 in the stake of which sixty per cent goes to the trotters together with all the money to be paid in on the entries that trot. Forty per cent of the \$2,140 goes to the pacers to which will be added the sums paid in on the foals that pace. This is one of the fairest divisions ever made in a stake. Remember that it only costs \$5 to name your colt June 1st, and that the entire entrance fee is but fifty dollars made in several payments. Read over the list of stallions that were named in the stake. This list will be found in the advertisement on page 2. If you own foals by any one or more of these horses be sure and make entries.

**DON'T OVERLOOK** the fact that the entries to the Stanford Stake for foals of 1902, to be trotted at the California State Fair in 1905, close June 1st, next. Be sure to enter your trotting-bred yearlings in this stake. It is cheap, and promises to be a rich one to the owner. All foals of 1902 eligible. Enter them. It adds to their value, advertises your farm or stallion, and puts you in the way of winning a large stake. A special stake will be opened in 1905 for colts entered originally in this stake, and Stanford Stake of 1905, that develop a pacing gait, to be contested for as three year olds in 1905. Your colt entered in the Occident Stake for 1905 is eligible for entry in this stake. Remember the date of closing is June 1, 1903.

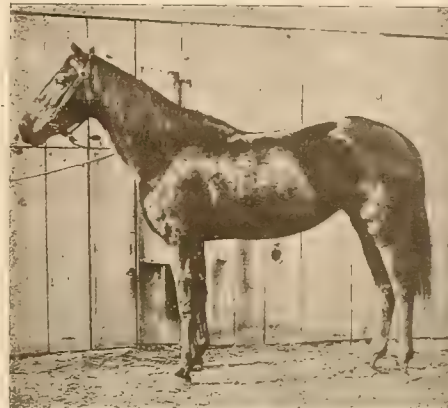

**AN IMPROVED PAPER** is the *Trotter and Pacer*, which has been increased in size since Mr. Will Logan, Jr., became one of the owners and assumed the business management of this already popular journal devoted to the light harness horse. The last issue is an especially interesting number and handsomely illustrated.

Grass Valley will give a race meeting during the week prior to the State Fair. Harry Lowden, the present acting Secretary of the State Agricultural Society, will have charge of the racing program.

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulkeys. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

## Who Knows Her Whereabouts?

A subscriber of ours wishes to locate the brown mare Dinah Bede, a picture of which appears herewith. She was bred in Napa county, foaled in 1891, and was sired by Loebler, a son of Whippleton 1883. She appears in the picture as a five-year-old. It was taken shortly before she came to this city. From here she was taken to San Rafael, where she was owned by Mr. J. R. Pringle, who sold her about two

DINAH BEDE

years ago to Mr. — Potter of this city. Mr. Potter died here in 1902. Since then all traces of her have been lost.

She is described as having been a rangy mare with good action, high-lifted but of kind disposition and about 15 hands high. She had no white, and her mane and tail were fine but thin. She was stylish and toppy, and her legs were hard and clean. She was, however, a little close-hocked. On near side of her neck, under mane and half way between head and shoulder, she was branded **J** which, though faint, may likely still be seen.

Any information concerning her, or any confirmation of her death, our inquirer would greatly appreciate.

## Decoration Day at Tanforan.

The Golden Gate Park Driving Club has arranged for a fine program of races for its meeting at Tanforan Park on Decoration Day, May 30th.

There will be at least four races in which some of the best horses in training will compete, and Superintendent Fieldwick believes that he will have the track in such shape that good time will be made.

The Frank G. O'Kane cup race will be one of the features of the day's program. This is a magnificent silver cup purchased by Mr. O'Kane in New York several years ago, and we believe this is the fourth race for it. The conditions of the race are that the cup shall be won three times before it becomes the permanent property of anyone.

The Golden Gate Driving Club always has a large attendance at its Decoration Day matinees and there seems to be more interest manifested this year than for a long time. There must be at least fifty horses in training at the present time in and about this city for this meeting.

W. F. Young, of Springfield, owner and manufacturer of "Absorbine" is receiving proof of the popularity of his patent medicines through the imitation which, while the sincerest flattery, Mr. Young is quite willing to dispense with. His remedies have a large sale in England and Austria and some time ago he found that firms in both countries were infringing his trade-mark. Mr. Young put his affairs in the hands of well-known attorneys in both countries and succeeded in proving prior right to sale. He secured a permanent injunction and damages against his Austrian competitor and supposed the matter closed, when he was informed by his attorney that the firm had sold out to other parties who were continuing under a slightly changed name. These parties have been brought to time and on their pleading ignorance of their offense were let off with the payment of costs.

## Artificial Conditions.

The value of a good foot cannot be overestimated. Under Nature's conditions the tendency to diseased feet is small. Nature's conditions are, for the most part, entirely displaced by the inventions demanded by the uses to which horses are put. Floors are substituted for earth. Pavements take the place of dirt roads. Shoes raise the frogs from the ground. Dry, hard and brittle feet, withered frogs and contracted feet, followed by corns, quarter cracks and general soreness, are the result. Thrush, scratches, cracked heels, due to filth, mud, exposure in the slush of winter, are common occurrences. Campbell's Horse Foot Remedy is essentially a hoof grower. It supplies nourishment and feeds the foot. It is an antiseptic and germ killer, removing soreness and fever. All the ailments mentioned above as due to these artificial conditions are prevented by its use.

## THE BLUE RIBBON SALE.

Report from the big combination sale of trotters and pacers held by the Fasig-Tipton Company are at hand and show that while no phenomenal prices were received for any of the California horses the average was excellent. The *American Sportsman* of Cleveland gives the following account of the sale:

There was quite a flutter of excitement when the consignment from Santa Rosa Stock Farm was reached. Millard Sanders, who has raced the California farm's horses and had charge of the consignment, was in the stand and made a clever talk about each animal as it was led out for sale. The first to be offered was Anzella 2:06½, winner of eight races and \$21,600 in purses last season. It was taken for granted that this great race mare would create some spirited bidding, but it was some time before the opening bid of \$5000, made by Daniel O'Dell of New York, was received by George Bain, the second bid of \$5500 coming from O. G. Kent, a prominent member of the Gentlemen's Driving Club of Cleveland. Auctioneer Bain tried all of his eloquence and persuasive powers to arouse additional bidding, while Mr. Sanders made a strong talk, but Mr. Kent's bid was the final one, and Anzella will probably be seen at the matinees at Glenville, and should prove a hard one to beat.

Lou Dillon, the sensational green trotting mare, that had worked a half in 1:00½ on Monday, trotting the last quarter in 29½ seconds, looked in the pink of condition. After having told of her remarkable public performances last fall and this spring, also mentioning the fact that she was engaged in \$85,000 of stakes, bids were asked for, Mr. O'Dell, who started Anzella, again bidding \$5000. The New York turf journalist, Will Logan, Jr., representing E. E. Smathers, "Doc" Tanner, acting for C. K. G. Billings, and J. H. Tod, of Youngstown, O., forced the bid, by rapid jumps, to \$11,000, which was Mr. Logan's final bid. At this point John H. Brown, of Detroit, got into the game; and the balance of the bidding was between him and Mr. Billings, Mr. Brown turning away after having run her up to \$12,400, the fast green trotter going to Mr. Billings at \$12,500. It is doubtful if Lou Dillon will be raced on the professional turf, as she may be reserved solely for wagon racing.

Mr. Billings also secured the pacing gelding, Sir Albert S. 2:03½, C. R. Bentley, of Buffalo, being the contending factor, the prominent amateur reinsman paying \$3200 for the pacer that will also be a member of the Billings stable of wagon performers.

W. H. Morehouse, a prominent Toledo matinee driver, was after Dolly Dillon 2:07, but she was finally knocked down to John Maguire, of New York, for \$3700, while the handsome young stallion Marengo King (2) 2:29½ by McKinney 2:11½, was bought by J. H. Brown of Detroit, price \$3100. Marengo King is a valuable addition to the breeding ranks of this section of the country. A. W. Parrish bought Bonsilene 2:14½ for Frank Caton, who will ship the mare to Russia and race her. Mr. Caton also secured the mare Belle Stanley.

D. Lee, of New York, who bought Re-Elected 2:11½, at Lexington recently, was the high bidder for the pacing stallion Rey Direct 2:10, paying \$2000 for him, while Reybel and Rey del Valle, three and two year old pacers, respectively, by Rey Direct, were eagerly sought after, James Golden getting Reybel for \$5000, while Dave McClary paid \$2050 for the latter. The three year old paced a half in 1:00½ on Monday, while the two year old stepped a quarter in 31½ seconds. Mr. Golden was also the highest bidder on Happy Madison, a green trotter by James Madison 2:17½, paying \$2400 for him.

Consignment by Santa Rosa Farm:

Anzella 2:06½, 1895, by Antrim-Hazel Kirk; O. G. Kent, Cleveland, \$5500.

Lou Dillon, ch m, 1898, by Sidney Dillon-Lou Milton; C. K. G. Billings, New York, \$12,500.

Sir Albert S. 2:03½, bg, 1896, by Diablo-Effie Logan; C. K. G. Billings, New York, \$3200.

Dolly Dillon 2:07, 1895, by Sidney Dillon-Dolly; John McGuire, New York City, \$3700.

Marengo King 2:29½, br s, 1898, by McKinney; J. H. Brown, Detroit, Mich., \$3100.

Bonsilene 2:14½, b m, 1893, by Stamboul-Bon Bon; A. W. Parrish, Cleveland, \$350.

Pansy Dillon, ch g, 1899, by Sidney Dillon-Pansy; John McGuire, New York City, \$400.

Andre, bg, 1895, by Sidney Dillon-Athenian; D. J. McClary, Hartford, Conn., \$550.

Andros, bg, 1896, by Sidney Dillon-By By; John F. Glendon, New York City, \$525.

Floren Russell, blk m, 1899, by L. W. Russell-Flora Allen; Joseph P. Staley, Sidney, O., \$400.

Belle Stanley, br m, 1900, by On Stanley-By Guy; A. W. Parrish, Cleveland, \$280.

Broosa, br f, 1900, by Mendocino-Atalanta; C. M. Buck, Faribault, Minn., \$500.

Consignment from Millard Sanders, agt.:

Owyho, ch c, 1900, by Owyhee-Bertha; Wm. McFarland, Pa., \$1010.

Jessie T.; A. Garson, New York City, \$200.

Mildred S., b f, 1901, by Klatawah-Ruth C.; Carl Silver, Cleveland, O., \$1025.

Captain Derby, b g, 1898, by Charles Derby-Economy; Dave G. McDonald, Pittsburg, Pa., \$900.

Diablita 2:15½, b m, by Diablo-Salinas Maid; John MacGuire, New York City, \$375.

Consignment from C. L. Griffith, Pleasanton:

Stiletto, ch c, 1900, by Steinway-Nola; James Golden, Medford, Mass., \$2400.

Stalwart, ch c, 1900, by Steinway-Bon Bon; E. G. Lybrand, Delaware, O., \$325.

Typical, blk c, 1901, by Direct-Vida Wilkes; John Stillwell, Troy, O., \$210.

Diablota, b f, 1900, by Diablo-Sophia; H. W. DeLong, Imperial, Pa., \$400.

Consignment from George A. Davis, Pleasanton:

Short Cut, blk f, 1901, by Direct-Sophia; Thomas W. Murphy, New York City, \$500.

Rey Direct 2:10, blk s, 1895, by Direct-Vera; D. Lee, New York City, \$2000.

Reybel, blk f, 1900, by Rey Direct-Mabel; James Golden, Medford, Mass., \$5000.

Rey Del Valle, blk c, 1901, by Rey Direct-Sidlette; D. J. McClary, Hartford, Conn., \$2050.

Reydelotte, blk f, 1900, by Rey Direct-Sidlette; D. K. Bishop, Cleveland, \$500.

Consignment from H. W. Meek:

Norwella, b m, 1899, by Welcome-Ellenor; H. H. Knobe, Williamsburg, Pa., \$335.

Lady Fair 2:17½, br m, 1897, by Gossiper-Lizzie R.; G. M. Webb, Chestnut Hill, Pa., \$900.

Welula, b m, 1899, by Welcome-Fenella; Dr. John Toole, Bainbridge, Ga., \$375.

Welina, b m, 1899, by Welcome-Edwina; Dr. John Toole, Bainbridge, Ga., \$385.

Cy, b c, 1900, by Welcome-Rosemary; F. D. Moor, Lockport, Me., \$475.

Enoch 2:12½, b g, by Sidmoor-Belle; A. Garson, New York City, \$700.

Consignment from Miscellaneous Owners.

Carrie M., b m, 1896, by Diablo-Hattie W.; John McDermott, New York City, \$800.

Thornway, b s, 1898, by Steinway-Algerdetta; John Dolan, St. Louis, Mo., \$900.

Lady Wellington; Carl Silver, Cleveland, \$400.

Suzanne, b m, 1899, by McKinney-Flewey Flewey; Edmunds & McGregor, Hamilton, Can., \$275.

Tempest, b m, 1897, by Teheran-Perfection; George M. Webb, Chestnut Hill, Pa., \$1000.

Vi Direct 2:18, b g, 1896, by Direct-Vivian; A. Garson, New York City, \$300.

Doctor Book 2:10, bg, 1895 by McKinney-Leonore; H. E. Chapman, Cleveland, O., \$600.

The total received for the twelve horses from Santa Rosa Stock Farm was \$31,505, an average of \$2625.50. The Griffith Estate consignment, four in number, averaged \$783 75; the string of Geo. A. Davis brought an average of \$2390, there being five head that sold for a total of \$11,950. Six horses consigned by H. W. Meek of Haywards sold for \$3170, an average of \$528.33. Col. Kirkpatrick of this city sent three head to the sale, Thornway, Tempest and Suzanne, all green horses. They brought a total of \$2175, an average of \$725. Several of the animals sold would have brought more money had they been put up at auction here in San Francisco, notably Mr. Vanderhurst's mare Diablita 2:15½ that went for \$375, Stalwart, Typical and Diablota in the Griffith string, and two or three others.

## Butchers' Day Races.

The annual holiday of the San Francisco Butchers can be depended upon to draw a larger crowd to the New California Jockey Club's track than any racing association in the State can attract. The occasion is an annual gathering of the retail and wholesale butchers of California, and they come with their friends from points two or three hundred miles away to take part in the sport.

The race program is always a long one, beginning at noon and continuing until sun down, no less than seventeen heats being pulled off at the Emeryville track last Wednesday.

There were two harness races on the program that were free to all pacers or trotters and both had large fields of starters. The track was in a horrible shape for harness horses, being like a newly plowed and harrowed field, and the time made in the two events mentioned was excellent considering this fact and the further one that a very strong wind was blowing.

In the first of these races the old veteran Billy Donathan was up behind E. T. Anderson's handsome little bay mare Twilight 2:18½ by Noonday, and drove a race that was worth going to see. Never did the little trotter act better and after permitting the pacer King Cadenza 2:15 to lead into the stretch Donathan brought Twilight up and won in 2:20, certainly as good as 2:15 on any good track. King Cadenza was second, Jeffe third, and Billy G., Imp, All Sandy, Yukon and several others were strung out behind.

The two-mile race was also won by Twilight in much the same manner, Donathan being entitled to as much credit for the victory as the mare. In this race Billy G. made a good showing. He is now called Teddy and

is being trained by Barney Simpson, who worked him a mile in 2:15, his record, at Pleasanton lately. Billy G. was leading in the stretch on the last lap, but Donathan began his drive here and won out. The time was 4:55, and while far from record time was a splendid effort over such a track. A world's record was made during the day by the driver of Krueger, a pacer by Contention. This was in the butchers' trotting and pacing race. Soon after the word was given Krueger ran into the fence and the driver fell out. The horse was caught, he again took his seat in the sulky, drove like a demon, and won the heat by a length from Cicero in 2:30, amid the cheers of the 12,000 people present. This is certainly a world's record.

The summary of the day's races follow:

First race, Retail Butchers' Cart, (for retail members only), one mile—First heat: Dully F., 3 to 1, first; Headlight, 3 to 2, second; Lord Spankie, 3 to 2, third. Time, 2:45½. Second heat: Headlight, 3 to 2, first; Lord Spankie, 3 to 2, second; Soup Bones, third. Time, 2:42½.

Second race, vaquero running, one-quarter mile—Crickett, 3 to 2, first; Pajamas, 4 to 5, second; Black Diamond, 3 to 2, third. Time, 0:25½.

Third race, butchers' trotting and racing (for retail members of Butchers' Board of Trade), one mile—First heat: Krueger, 3 to 5, first; Patsy Bolivar, second; Mountain Rose, third. Time, 2:37½. Second heat: Patsy Bolivar, 2 to 5, first; Mountain Rose, 3 to 2, second. Time, 2:38½.

Fourth race, running, five-eighths of a mile—Intrepido, 1 to 3, first; Victoria S., 3 to 1, second; Aurifera, 3 to 1, third. Time, 1:05.

Fifth race, butchers' trotting and racing (free for members of Butchers' Board of Trade), one mile—First heat: Krueger, 3 to 2, first; Cicero, 2 to 5, second; Lord Spankie, 3½ to 1, third. Time, 2:30. Second heat: Cicero, 2 to 5, first; Headlight, 4 to 1, second; Lord Spankie, 3 to 1, third. Time, 2:39½.

Sixth race, running, Butchers' Board of Trade handicap, seven-eighths of a mile—Diamante, 3 to 5, first; Esternell, 3 to 1, second; Flamerio, 2 to 1, third. Time, 1:30.

Seventh race, trotting and pacing, free for all, one mile—First heat—Twilight, 2 to 1, first; King Cadenza, 3 to 2, second; Jiffy, 6 to 1, third. Time, 2:20. Second heat: King Cadenza, 1 to 3, first; Teddy, 5 to 1, second; Al Sandy, 6 to 1, third. Time, 2:21½.

Eighth race, mules to cart, one mile—Ananias 3 to 1, first; Dodie Doolittle, 3 to 1, second; St. Julian Bill, 3 to 1, third. Time, 4:41½.

Ninth race, running, five-eighths of a mile—Jack Richelieu, Jr., 7 to 5, first; Mildred Schultz, 8 to 5, second; Victoria S., 4 to 1, third.

Tenth race, trotting and pacing, free for all, two miles—Twilight, 3 to 5, first; Teddy, 5 to 1, second; Cadenza, 3 to 2, third. Time, 4:56.

Eleventh race, running, one mile—El Oriente, 3 to 5, first; Tourtiab, 6 to 1, second; Favorita, 3 to 1, third. Time, 1:46½.

Twelfth race, running, three-quarters of a mile—Esternell, 4 to 1, first; El Chihuahua, 7 to 5, second; Cantivate, 2 to 1, third. Time, 1:16½.

Thirteenth race, running, one-half mile—Ruvia, 2 to 1, first; Easter Lady, 2 to 1, second; Shorty Kate, 6 to 1, third.

The judges at the race meet were J. W. Phillips, James Hall, E. G. Rodolph and Tim Judge. R. D. Ledgett acted as starter in the harness events. H. Fieldwick started in the running races. The timers were I. Blum, B. Combs, A. Decourtieux, T. Horn and S. E. Nutting.

## On the Wrong Track.

Editor BREEDER AND SPORTSMAN—Sir: In the issue of May 9th, on page 4, under the heading of "California Horses Sold in New York," I notice the following horse sold: "Bandmaster, b. g, 1895, by Knight, dam Visalia, by Echo."

I am not positive that there is more than one mare by the name of Visalia, but this I do know, that Visalia 2:12½ was a daughter of Iris, dam Scratch, by Lippy, was bred and raced by H. P. Perkins, of Visalia, Cal.; she made her record at Santa Ana in 1895, as a four-year-old; that she was campaigned in 1896, finishing in races in this position 4, 5, 4, 4, in 2:11½, 2:09½, 2:10½, and 2:09½. In 1897 she was taken east and sold at the November sale of Wm. B. Fasig & Co., in Cleveland, Ohio, and now I will take a line from the catalogue of that sale: "Visalia was bred this season to Hambletonian Wilkes, but is not thought to be in foal."

I believe in giving honor where honor is due, therefore, if this is the Visalia referred to as the dam of Bandmaster (with possibly the age of the horse incorrect), then Iris should have the credit as being the sire of his dam, and Hambletonian Wilkes as the sire of Bandmaster, for I am quite certain Mr. Jno. Perkins informed me that Visalia 2:12½ was never bred until 1897, and then to Hambletonian Wilkes, as stated before.

Respectfully,  
J. H. WAGNER.

[Dr. Wagner can rest assured that there is no mistake about the pedigree of the horse sold. Bandmaster was bred at Rancho del Paso, and is by Knight out of Visalia. This Visalia is by Echo as stated, and is out of Varden by thoroughbred Langford, second dam Mary Blane by Jim Crow.—Ed. BREEDER AND SPORTSMAN.]

As yet there has been no announcement whether Boralma 2:07 will be raced or not the coming season. He is reported as having entirely recovered from the accident during the match race with Lord Derby last year at Charter Oak Park.

Jackson's Napa Soda does not tangle the feet.

## Several Wise Suggestions.

Frederick Watson always has something sensible to say in regard to the manner of conducting harness meetings. In the last issue of the *American Horse Breeder* he writes:

The new plan of sandwiching three races, which the Readville association so kindly introduced to the trotting horse world when they accidentally infringed the rules of the National Trotting Association, and showed that the infringement was better than the rule, proved itself such a vast improvement over the old system that it was very generally adopted last season. It enabled the associations to get their races off without so many postponements as had formerly been the case, and their patrons who stayed to the finishing of a day's racing generally got home in time for a late supper, at any rate. Now, if some one would only invent some way to make associations commence their racing on time, all would certainly be thankful for it.

It makes very little difference whether the advertised time for commencing is one o'clock, half past one, two o'clock or half past two, it is dollars to doughnuts that the actual racing is not commenced until half an hour after the advertised time. There is no earthly reason why this should be so, and the fact that some few associations actually do start on time makes the exceptions that prove the rule. It is perfectly possible to get off four races, two of which are finished in three straight heats, one of which requires four heats, and the other takes no less than six heats, and do the whole thing between half past two o'clock and half past five o'clock, sixteen heats in three hours.

This is, of course, calculating that three races are sandwiched, and another important thing is needed to accomplish this piece of fast work, and that is a marshal, not one of those kind that wants to watch the races himself and then go to call out his horses after the heat is finished, but a good live fellow that will get a move on and take good care that there is another field of horses ready for Mr. Starter just as soon as he has got the ones that have just finished their heat off the track. It takes quite a few minutes to hitch up the average pacer, with his hobbles and shopful of boots, and these horses should be called fully ten minutes before they are due on the track, not five minutes, as provided by the rules.

It would not be infringing the rules to call the horses ten minutes before the time they are due for the heat instead of five minutes, as the rule simply implies that the horses must be called five minutes before time, in order that they may be subject to the penalties for being late after being duly notified. There could be no possible objection to calling them ten minutes before time, and stirring them up again five minutes before time if a lively enough marshal could be got hold of.

Of course, getting off sixteen heats in three hours is pretty lively work and that number of heats is rather above the average of a day's racing. When sandwiching three races it is necessary to have a heat every ten minutes in order to keep up the proper schedule of time between heats. That is, unless a lot of time is wasted in scoring, but even then there can be a heat every fifteen minutes, and this schedule will permit of fourteen heats in three hours. It would make it a little bit lively for the pool sellers, it is true, but they would soon get used to that, and it is an indisputable fact that at no time is there so much money put on as when the selling is very fast.

Another point that all associations ought to take up and carry out is the arrangement of a cooling-out paddock very close to the wire. It is not only a great waste of time to have horses go back to their stables, perhaps away over at the back stretch, but it is unfair to ask them to do so, for the time between heats is short enough as it is, without asking a man to walk his horse a quarter of a mile to his stable and back again. No wonder that men are late under such circumstances.

Still another feature that all associations ought to attend to is to see that there is a blacksmith with his kit of tools all ready to tack on a shoe at a minute's notice, and this blacksmith should be located right at the cooling-out paddock. Oftentimes a delay anywhere from ten minutes to half an hour is caused because the blacksmith shop is a long way from the wire, and although it seems a shame to waste so much time it is impossible in the cause of fairness to refuse a contending horse in a race the chance to get a shoe that he has pulled in the previous heat put on again.

Melrose, the mare by Sweepstakes 298, owned by W. DePons, of Sacramento, dropped a colt by Azmoor 2:20 on May 1st and will be bred back to that horse this year. Melrose was nominated in the Breeders Futurity for mares bred in 1902.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

## Alleged Hay Trust.

E. M. Piercy, a San Jose business man is quoted by the *Herald* of that city as saying that a hay trust exists in San Francisco, composed of twelve leading firms dealing in this necessary article. Mr. Piercy's statement is as follows:

This combine of twelve San Francisco firms I speak of has absorbed all competition against itself in California.

The combination is known as the Wholesale and Retail Hay Dealers' Association of San Francisco. Working together, the members of the pool are able to set prices to suit themselves, and the result is that hay producers must either dispose of their hay at prices made by the trust or not at all.

This trust has entered into a fraudulent conspiracy in restraint of trade and commerce in hay; they have conspired together to hold and store in warehouses hay to the amount of over 200,000 tons; they have also agreed to act together to maintain rates and prices; they meet in secret, and have formed a pool or trust. The combine consists of twelve wholesale dealers. They are governed by a secret Board of Directors; their books, papers and accounts are secret; there are no printed by-laws or printed list of officers.

The farmer is at the mercy of these men, who are getting all the profit that rightly belongs to the farmer; they are enriching themselves through questionable methods from the pockets of the farmers. This combine sends agents to the farmers during the harvest (from May to August) to buy up all the hay that they require until the following May. This hay is stored in warehouses, and by means of this stock the combine is enabled to hold the balance of power in the local hay supply.

I intend to exhaust every effort to smoke this combine out by aggressive legal steps.

Under the law the Commissioner of Corporations is given "power and authority" to make "diligent investigation into the organization, conduct and management of the business of any corporation, joint stock company or corporate combination engaged in commerce among the several States and with foreign nations;" he can compel the officials to produce contracts, books, agreements, prices, etc., and failing to do so they can be fined \$5000, or imprisonment for two years.

The agents of the hay combine are now out, going over this State, buying up all the hay that they can get from the farmers. They are telling the farmers that there will be a large crop this year, and that the prices may go down; but let me tell you, farmers, that the hay crop of this State for this year will be light and far short of last year's crop. If you farmers will only hold on to your hay and not sell to the middleman or this combine, you will surely get from \$12 to \$18 per ton for this year's crop.

## This Year's Occident Stake.

Third payment was made last January on forty two colts and fillies entered in the Occident Stake to be trotted at the State Fair this year at Sacramento. Some of those on which payment was made have been sold to Eastern parties, and a few have probably not been put in training at all. Those on which payment was made January 1st, this year, are as follows:

I. L. Borden's b f Sadie L.; W. G. Durfee's br f by Zombro-Leonora; Mrs. S. V. Barstow's b c Star B.; Alex Brown's b c by Arthur B.-Nosegay, ch f by Nutwood Wilkes-Wildflower; John Baker's b f Frecklebird; C. A. Durfee's blk or br f Ragsie, br c Grecko, br c Jim Rea; B. Davis' blk f Dixie S.; D. J. Desmond's b f Fairy; B. Erkenbrecker's blk f California Poppy; G. W. Ford's ch c by Neernut-Florence; J. Gallegos' b f Sophia McKinney; E. A. Gammon's blk f Urana; A. J. Hudson's b c Stratheona; G. W. Kingsbury's b c by Lynmont-Daisy; W. H. Lumsden's b c Robin Stanley; La Siesta Ranch's b c Search Me; W. Maben's br f Dixie W.; H. E. Meek's b f by Welcome-Leonora, b c by Wm. Harold-Fenella; C. W. Main's b f Zomile; Oakwood Stock Farm's b c by Owyhee-Inex, b f Tuna, r c by James Madison-Steinola, b f by James Madison-Babe Marion, br f by McKinney-Electway; Owen Bros.' ch g Acme; Rosedale Stock Farm's b c Dacus; J. A. Richardson's b c Swift B.; Santa Rosa Stock Farm's ch c by Sidney Dillon-Silver Eye, b f by Sidney Dillon-Pansy, c b by L. W. Russell-Pacita; Jas. A. Smith's blk c by McKinney-Daisy S.; Thos. Smith's b c Fred P.; Tuttle Bros.' b f by Stam B.-Laurel; L. H. Todhunter's br c The Jester; Valencia Stock Farm's blk c Amado; P. J. Williams' blk f Monterey Bells; F. E. Wright's b c Sir Knight.

Prince Alert's first start this year will probably be at Buffalo. This two minute pacer promises to yet pace into the exclusive list now made up of Star Pointer and Dan Patch, although he is eleven years old.

## Wallace and His Register.

The following interesting account of the life work of the late John H. Wallace is from the pen of E. B. Abercrombie, editor of the *New York Sports of the Times*:

When Mr. Wallace began his investigation of the pedigrees of trotting horses, the breed was in its early infancy. There was no stud book, no rules of breeding, and any quantity of fictitious and hearsay pedigrees. With tireless patience, with indomitable perseverance, with a keen eye for the probable truth Mr. Wallace went to work and produced the first volume of the Register. Poverty did not dismay him and the virulent attacks made upon his accuracy and veracity only brought into full play his magnificent aggressive powers, and inspired him with renewed power to continue the great work to which he had dedicated his life. The first volume of the Register appeared in 1871, the second in 1874 and the third in 1879. They represented ten years of the hardest kind of work accomplished in the face of innumerable obstacles.

With these three books as a ground work, it was comparatively easy to formulate a tentative set of rules and lay the foundation of a breed. The National Association of Trotting Horse Breeders at this time became the official guardians of the Register, and from that time until Mr. Wallace turned over his various publications to the Wallace Register Association they nominally occupied that position. As a matter of history, Mr. Wallace was so much larger than the association that he was practically its master.

The acceptance and rejection of many pedigrees naturally made many enemies and the attacks in the press become so bitter and the opposition so powerful that Mr. Wallace started his famous Monthly Magazine and rallied to its columns many of the brightest writers of the times. From the walls of the Monthly he hurled argument, invective, retort and defiance, and was never so brilliantly invincible as when for a short period he appeared to be at the mercy of his foes.

In 1880 the opposition to him had become so formidable that a number of influential breeders commissioned the late J. H. Sanders to compile a new stud book, which appeared in 1881. It proved to be a condensed edition of Wallace's three volumes, with a few minor alterations and additions, but was made valueless by some bogus pedigrees which Mr. Wallace had published in his monthly expressly to trap Mr. Sanders. As soon as the volume appeared the bogus pedigrees were exposed and the new stud book was dead.

Before Vol. 4 appeared, the National Association of Trotting Horse Breeders had formulated the Rules of the Standard, and all standard stallions were given numbers. It need hardly be said that the bogus pedigrees which ruined the Kentucky Stud Book, did not appear in Vol. 4.

In 1885 Mr. Wallace started the Year Book. It was then a modest little volume, but it quickly grew and became more necessary to the vast body of horsemen than the Register was to breeders. No. 9 was the last volume which Mr. Wallace brought out of the Register, under his own editorship in 1891, and a few months later he sold all his interests to the American Trotting Registrar Association for about \$130,000, and retired from public life.

After a brief rest, however, he went to England, dived deeply in the libraries of the British Museum and those of other countries, and published an admirable book on the horse of great historic value, but the intrinsic worth of the book was sadly discounted by detailed accounts of the fights and controversies in which he had been engaged during his compilation of the early volumes of the Register. The last decade of his life has been spent in peaceful and pleasant retirement. He traveled extensively and enjoyed the rest he had so well earned. He fought a hard battle and won a great victory, and he lived to enjoy the honors and glory of conquest as well as its substantial rewards.

Few men indeed have ever lived to lay down the laws for the regulation of a breed and lived to see the magnificent realization. From all viewpoints Mr. Wallace was a great man and his memory will grow greater with the years, when his few mistakes will be forgotten and the grand work which he accomplished will be fully recognized. He was a man of titanic courage, an invincible lover of what he believed to be true and was prepared to fight all comers on that line. His main fault was that he could rarely credit an opponent with the same honesty of purpose which he possessed. Mr. Wallace was a grand embodiment of the dauntless courage, the keen incisiveness and the argumentative ability of his Scotch ancestors, while combined with these qualities he had the shrewd sense, the strategic business instincts and the far reaching foresight of the American. Like all great men, he was a good hater as well as a stalwart friend, but he mellowed with the years and the friends grew and multiplied. Full of years and honors he has come to his rest, but a thousand stock farms are so replete with monuments and as long as the American endures his name will be held in grateful remembrance.

## From Zombro's Court.

M. A. A. Fairchild, of Los Angeles, who owns Veritas 2:10 by contention has bred her to Zombro 2:11. Conception was by Director 2:17 out of the dam of Veritas 2:10.

Mambrino Patchen, sired by Red Wilkes, dam by Mambrino Patchen foaled a grand looking colt by Zombro the other day. It is a rich brown in color, with both hind feet white and a star in forehead, and is a beauty. The mare will be bred back to Zombro. She is owned by Mose Duncan of Los Angeles. The colt is one of the best bred Zombros ever foaled and should make a great horse.

Pet Zombro covered his trial mile from 2:29 to

ZOMBRO 2:11

Will be taken to Salem, Or., June 1st

2:24 in less than five days. That is coming pretty fast.

Tee Dee Cee by Zombro worked an easy mile in 2:20½ last Saturday, last eighth in 16 seconds.

Nelly Bly, dam of the great green trotter Julia M. is being bred to Zombro again this year. She is owned by Mr. M. A. Murphy.

Betsy Herr by Mambrino Patchen is another well bred mare that will be bred to Zombro this year. She is owned by Harry Rose

## Pleasanton to the Front.

As usual Pleasanton has come to the front and decided to give an agricultural fair and race meeting on the week following the State Fair. As the State Fair is usually held during the first two weeks in September the Pleasanton meeting will probably be held from the 14th to the 19th of September.

The entire charge conducting the fair is placed in the hands of the following committee: C. L. Crellin, Frank Lewis, Wallie Olney, A. E. Schweer, W. H. Donahue, N. Hansen, Geo. A. Kelley and Fred E. Adams, secretary. This committee will meet Sunday and name subcommittees to handle the different de-

DIABLO 2:09 1-4

Will be taken to Salem, Or., June 1st

partments and everything will soon be in running order to give the best fair ever held in the county and perhaps in the State.

As at first proposed there will be harness races and running races, a stock exhibition with suitable premiums and the finest pavilion exhibits possible to procure.

This fair is gotten up to benefit the people of Pleasanton and the Valley and to draw people here to see what kind of a town we have. The people of the town have never made a failure of anything of this nature which they have attempted and they are all for it. — Pleasanton Times.

Today drink Jackson's Napa Soda lemonade before bed.

## State Fair Matters.

[Sacramento Record Union.]

The terms of three directors of the State Agricultural Society expired on the 8th inst., and as the resignation of President Spreckels has been accepted this leaves four positions on the board at the immediate disposal of the Governor, who, it is understood, will turn his attention to the societies' affairs immediately upon the close of the President's visit.

The directors whose terms ended May 8th are J. E. Terry, John Mackey and M. D. Chamberlain. It is not known that any changes are contemplated, and all except Mr. Spreckels, it is expected, will be invited to remain. In this community, where so much interest is felt in the success of the State Fair, the hope is expressed that a Sacramento man may be chosen to take the place of Mr. Spreckels, and among those mentioned as a probable appointee is J. W. Wilson of this city. Mr. Wilson served for years as a director of the State Agricultural Society, and always exhibited great enthusiasm in advancing the interests of the State Fair and of the people of Sacramento.

The holdover members of the State Board of Agriculture are: Grove L. Johnson, William Land, Benjamin Rush, C. W. Paine, Thomas Fox, James Whitaker, L. J. Rose, Jr., F. W. Covey.

As soon as the reorganization of the Board of Directors has been accomplished the question of choosing a secretary will be taken up, and this is another matter in which the people of Sacramento are vitally interested, because time for arranging for the

## Get the Two Year Olds Ready.

Your two year old can earn a good fat purse this year and increase his value if he is started in the Pacific Breeders Futurity and is first to the wire on the day the race comes off at Petaluma.

If he is a trotter first money will be \$625 and if you nominated his dam originally in the stake you will be paid \$200 more, making \$825, quite a nice little sum for a two year old to win in one race.

If he is a pacer the first money will be \$375 to which \$200 will be added for the nominator of the dam or \$575 to be earned by the two year old pacer that wins.

This money is worth getting your two year olds ready for and now is the time to begin training them. The race will come off in August and there is plenty of time to teach the colt the speed trick if he is bred right and has inherited the nerve force and action. Don't work him too hard. Keep his legs and feet in good shape and bring him to the track sound in wind and limb, and in condition to go the route. Don't worry, either, if you hear of some other fellow's colt making miles in wonderfully fast time. Many of them get lame and sore from going too fast before the race comes off. But don't forget that there is \$1450 for the two year old trotters and \$950 for the two year old pacers this year.

## Empire City Track Gets It.

The Empire City track, Yonkers, has been awarded the \$10,000 match race between Major Delmar 2:05½ and Lord Derby 2:05½, which is to be trotted on July

ANZELLA 2:06 3-4

Sold to O. G. Kent of Cleveland for \$5500, and will be used in the Matinees this year.

coming State Fair is becoming shorter every day, and a fully authorized incumbent is needed in the secretary's position to press forward the work that has to be done before September.

## The Classics.

Several of the classic events of the trotting turf are annually decided at Lexington. The Transylvania and Futurity are recognized by all horsemen as the two events of all others that they should be represented in. Owners desire this representation because if they win either event, their horse's value is doubled; breeders, because a winner of either brings their establishment before the world as nothing else could possibly do.

Entries to The Transylvania, and other fixed events, close on June 1st, and payments are due on both two and three year old Futurity eligibles upon the same date. Note full conditions in display advertisement, and address all communications to the Secretary, E. W. Shanklin, Lexington, Ky.

M. M. Donnelly, the popular horse shoer, whose place of business is on the corner of Devilsadero and Grove streets, is getting over stocked with horses and wants to sell a couple. He offers the stallion Young Salisbury 2:18½ by Judge Salisbury out of Nora Sprague by Gov. Sprague, also the gray gelding Chas. Newman by McKloney out of Biddy Toole by A. W. Richmond. Young Salisbury has demonstrated the fact that he is a trotter by getting his record in the fourth heat of a race. He is eight years old, a handsome dark bay, and has great speed. His colts all show speed. The gray gelding is a natural trotter and a fast one. He has never been raced but is a good prospect for any one to campaign this year.

4th. Bids for the race closed with David Bonner, the stakeholder, and last week the interested parties decided to accept the offer made by the Empire City Trotting Club. A number of bids were received, including an offer from one track to give all of its gate receipts for the match, but the Empire's offer was considered the best.

Both Alta McDonald, the owner of Major Delmar, and George Spear, who has charge of Lord Derby, owned by E. E. Smathers, have posted \$1000 forfeit with David Bonner, and each is to wager \$5000 on the result of the match. This money, together with the percentage of the gate receipts offered by the Empire track, will all go to the winner. The contest is to be best two in three mile heats. Probably no two trotters were ever more closely matched in speed and endurance than the pair that will have an inning at the fast Yonkers course on July 4th. There is only a quarter of a second difference in their records, and each horse showed extraordinary speed last year. Lord Derby, at the Empire track last fall, trotted the three fastest heats ever credited to a horse, while Major Delmar's great racing in Memphis is a matter of history.

William Hogoboom's son arrived here from Walla Walla this week, with several horses belonging to Mr. Geo. Kingsbury, proprietor of the Lick House. Among them are the trotter Chas. H., by Lynmont, and the three year old D. E. Knight, by Lynmont-Dalay, that is entered in the Occident Stake this year. Hogoboom Jr. will take them to Santa Rosa and train them for the California circuit this year.

## Notes and News.

Vallejo opens the circuit August 13th.

Breeders meeting goes to Petaluma.

Stockton will not give a meeting this year.

Pleasanton's meeting will follow the State Fair.

Bonsilene 2:14½ brought \$800 at the Cleveland sale.

The State Fair will be held during the first two weeks in September this year.

Grass Valley will hold a meeting during the week immediately preceding the State Fair.

A special train will be run to Petaluma from San Francisco each day of the Breeders meeting.

W. J. Andrews has three or four sons and daughters of Stamboul 2:07½ in his string at Empire track.

The Spokane merchants have raised a bonus of \$10,000 for the fair and race meeting there this year.

The Petaluma track will be put in fine shape for the Breeders' meeting, and is one of the best in the State.

While McKinney is owned in Indiana it is said that a majority of the mares booked to him this year are from Ohio.

Vallejo's program is a good one. Pleasanton's program will be out in a short time. The meeting follows the State Fair.

Enter in that \$2000 stake for 2:24 class trotters. It will be held over the celebrated Petaluma track, one of the best in the State.

Don't overlook that entries to the Stanford Stake for foals of 1902, to be trotted at the State Fair of 1905, will close June 1st.

Sir Albert S. 2:03½ will be started to wagon in the matinees this year. If he starts in good shape few pacers will be able to head him.

Pan Michael, a pacer, a full brother to Boralma, is good for a 2:10 record this year. He was second in the 2:19 pace at Readville in 2:07½.

The \$1500 stake for pacers eligible to the 2:20 class, which is offered for the Breeders meeting at Petaluma, should receive a big list of entries.

Winnie Wilkes 2:17½ foaled a nice filly by McKinney a few days since at Pleasanton, where she was sent recently to be bred to Searchlight 2:03½.

It begins to look as if Ed Geers may do the trick with Metallus 2:11 this year. This son of Mambrino King is working nicely for him and has already shown a mile in 2:10.

Captain Derby, the four year old bay gelding by Charles Derby out of Economy by Echo, paced a quarter in 30 seconds flat the day before the Cleveland sale. He brought \$900.

There is a \$1000 purse for 2:23 trotters and one for 2:17 pacers offered for the Vallejo meeting, which will be held from August 13th to 15th inclusive. Entries close Monday, June 15th.

The Santa Rosa track is being resoled, and the work will be finished this week. Always a fast track, it will be one of the best in the country when the new covering is all laid and packed.

Mildred S., the two year old filly by Klatawah 2:05½ that was purchased at the Cleveland sale by Carl Silver, trotted a half in 1:10½ and a quarter in 33½ seconds two days prior to the sale.

At the meeting of the board of appeals of the American Trotting Association in Cleveland last week William H. Knight was elected secretary to fill the vacancy left by the late J. H. Steiner.

Bonsilene 2:14½ was purchased by Frank Caton at the Blue Ribbon sale and will be shipped to Russia. Belle Stanley by On Stanley was another of Mr. Caton's purchases that will be sent to the land of the Czar.

Ed Bither, who drove Jay Eye See 2:10, Phallas 2:13½ and Kremlin 2:07½ to their records, is training about a dozen horses at Readville, including two five year old mares by Kremlin that look to be safe for the 2:15 class.

O. G. Kent, who purchased Anzella 2:06½ at the Cleveland sale, hitched her up with his mare Cyclone the next day and drove the pair out to the Glenville track. The *American Sportsman* says Anzella made an ideal pole mare.

Among the speed trials at Glenville last Monday, the young pacers by Rey Direct 2:10 were especially prominent. Reybel, a three year old, pacing a half in 1:00½, while Rey Del Valle, a two year old, stepped a quarter in 31½ seconds.

Mrs. J. V. Andrews, of Red Bluff, has purchased the broodmare Lizzie R. by Anteeo, with filly at foot the last of the get of the dead stallion Gossiper 2:14½. Lizzie R. has been booked to Searchlight and shipped to Pleasanton.

Mr. C. K. G. Billings, who purchased Lou Dillon for \$12,500, has repeatedly stated that he would not again pay over \$10,000 for a horse, but he had to go back on the proposition when he saw the chestnut daughter of Sidney Dillon led out for sale.

The fastest mile driven at Empire City Park this season was recorded to the credit of a lady last week, Mrs. Clarence Ware driving Sloppy Weather, 2:14½, by Alcyonium, a well rated mile in 2:17, accompanied by a runner as pacemaker.—*Trotter and Pacer*.

Henry Sanders showed a quarter at Cleveland in 33½ seconds with the two year old trotting filly Mildred S. by Klatawah 2:05½, dam Ruth C. by Guide. She sold for \$1025, and a local paper said would have brought a great deal more had she any stake engagements.

At Bonner Farm, where Dexter, Rarus, Maud S. and Sunol once reigned, breeding is carried on in a modest way. The stallion is Woodburn Russell, a brown of 16 hands, by Expedition out of Miona Wilkes, sister of Kentucky Wilkes 2:21½, by George Wilkes.

William Gilligan has at Readville the mare Hallie Rocket, the only trotter in the list begotten by Hal Dillard, although he has twenty-six pacers, like Hal B. 2:04½, Fanny Dillard 2:05½, Hal Clipper 2:07½, Cambria Maid 2:08½, etc. It is intended to race Hallie Rocket this year.

Dan W. 2:17½, the roan horse that J. R. Albertson, of Fresno, raced through the California Circuit in 1901, and was taken east by J. M. Nelson last year, is now being trained by Oscar Ames at Wheaton, Illinois, and is said to be doing much better than when in Nelson's hands. He will be raced this year.

Guy McKinney, the magnificent son of McKinney and Flossie Drais by Guy Wilkes, second dam Blanche Ward by Onward, third dam Blanche Patchen by Mambrino Patchen, fourth dam by Houghton's Privateer, and fifth dam by Abdallah 15, has been registered as standard under rule 1. His number is 37,625.

The plan adopted by the New England Trotting Horse Breeders Association for the stake for two year olds at the Breeders meeting in September, that allows an owner to start as many colts as he pleases by paying the entrance fee upon all of them, is a new thing in trotting, but one that is likely to prove popular.

The Special Harness Stallion Stake offered by the California State Agricultural Society will close for the entry of foals on June 1st. All foals of 1902 by the stallions nominated in the stake are eligible. Look over the advertisement in another part of this paper, where a full list of the stallions will be found. It will be a very valuable stake.

A Cleveland paper says: Lou Dillon's remarkable half in 1:00½, the last quarter in 29½ seconds, was one of the most creditable performances ever witnessed over the Glenville track. This sensational young trotter can brush as fast as any trotter that ever wore iron, and her gait is as smooth and perfect as a piece of frictionless machinery.

W. P. Ijams of Terre Haute, says the *Western Horseman*, has in training eighteen sons and daughters of Axtell, ranging in age from two to five years old, all trotters, and it is not likely that any breeder ever had such a high-class lot of young speed prospects at one time by any one sire. Several of them are 2:20 trotters right now.

One of the good prospects in California at the present time is a brown trotting mare at Santa Rosa owned by Judge Dougherty. She is by Lynwood W. 2:20, dam Maud Fowler 2:21½ by Anteeo, second dam Eveline by Nutwood. She is four years old and was trained a very little last year. She recently stepped the Santa Rosa track in 2:16 and did it handily.

There are still about 75 horses in training at the Pleasanton track, which is being kept in fine shape by Geo. A. Kelly, manager for Mr. Ronan. Many have heretofore claimed that Pleasanton track was not fit for summer use, but it has been because water was not used in sufficient quantity. Since Mr. Kelly took charge of the track there has been no complaint.

If nothing happens Reybel the three year old filly by Rey Direct 2:10 out of Mabel, the dam of Directly 2:03½, she should get a very low record. Her half in one minute and three quarters of a second at Cleveland last week opened the eyes of every horseman present. It was a wonderful performance for a three year old, and that she brought \$5000 was a natural consequence.

Frank Bower, of Philadelphia, believes there will be intercity races between the road drivers of New York and the Quaker city. Bower suggests meetings at the Empire City and Belmont tracks and proposed having classes arranged to suit members of the New York and Philadelphia Road Drivers' Associations. Mr. Bowers and Charles Titman will try conclusions with the New Yorkers in double team racing if the plan materializes. Bower will drive John P. Stewart and Katie Nolan, or King Harry; while Titman will choose a team from Maryland Boy, Old Dutch, Cleo-vice and Johnny Walbridge. William M. Burns, D. P. S. Nichols and W. S. P. Shields may also enter double teams.

Cobwebs 2:12, that for so long a time was champion of the New York speedway, seems to have come to the turn in the road. He has been beaten several times recently. There is limit to horse as well as human endurance, and Cobwebs seems to have reached the limit. He has been a remarkable horse and will long be remembered as one of the greatest that ever trod the speedway.

Dr. Boucher left Pleasanton last Wednesday with Miss Logan 2:06½, Harry Logan 2:12½, and Bert Logan, a green pacer by Colbert 2:07½, out of Miss Logan. He also took with him J. M. Alviso's good pacer Rey del Diablo, that took a record of 2:23 as a two year old. Senator Clark's string of Montana horses that have been worked at Pleasanton this winter also left for Denver in the same car.

Remember that the first divisions of the \$6000 Breeders Futurity will be decided at the Breeders meeting at Petaluma. Get your two year olds ready. There is \$1250 for two year old trotters and \$750 for two year old pacers. These stakes are worth winning. There is also \$200 for the nominator of the dam of each winner, which makes the stake for trotters worth \$1450 and that for pacers \$950—good money for two year olds to earn.

Altacora 2:13 by Altamont-Tecora, by C. M. Clay Jr. (dam of Chehalis 2:04½, Del Norte 2:08, etc.) and Bhima by McKinney-Vevo by Altamont, were taken East by Harry Osman to the court of Joe Patchen 2:01½, sire of Dan Patch 1:59½, etc. This is a very progressive step in getting some new blood in the Northwest, and we hope that the produce will not be disappointing.—*Rural Spirit*.

Strictly speaking, Prince of Orange 2:07½ was the fastest "green" trotter of 1902. This honor has been accorded to Chase, but Chase started a couple of times before 1902, while Prince of Orange had never started till at the Cleveland meeting of 1902. During the season he started thirteen times, winning five firsts and six seconds. Prince of Orange is by Prince of India 2:13½, a son of Baron Wilkes.

Mr. A. B. Gwathmey of New York, who visited this Coast two years ago, has placed three of his horses in the hands of John Howell to train at Empire track. They are Teverson 2:12½, Tudor Chimes 2:13 and Senator Mills 2:29½. The last named is one of the most promising trotters in the country and is booked for the 2:10 list this year. He has been well staked and is expected to make a good showing on the Grand Circuit.

The secretary of the Northern New York Trotting Horse Breeders Association announces that arrangements have been completed with the owners of Major Delmar and Lord Derby for a series of three races to be trotted on the mile tracks at Glens Falls, Albany and Poughkeepsie. The Glens Falls meeting begins July 20th and continues for five days. The Albany and Poughkeepsie races will be held during the two weeks following, in the order named.

James Hanley, owner of Prince Alert, says that this two-minute pacer will make a supreme effort in the fall to break the world's pacing record. Previous to that time he will be started in free-for-alls on several tracks, probably making his first race at Buffalo. The horse is in prime condition, without a blemish or ailment, and in spite of his eleven years is considered, in view of his record and his even temperament, as very likely to establish a new mark this year.

Diablo 2:09½ will be shipped from Woodland, Cal., to Salem, Oregon, June 1st, and will make a season there. His service fee in Oregon will be \$40. Diablo is very highly thought of by Oregon breeders who own some of his colts, and at their earnest solicitation Mr. Murray has consented to make a season with his horse there. He should do well and help greatly in the boom for high class harness horses that is being encouraged in the web foot State by a fine circuit of fairs and race meetings this year.

Twilight 2:18½, the little bay trotter formerly owned by Dennis Gannon, but now the property of E. T. Anderson, of West Berkeley, is in rare good form at the present time, and should be a good mare in her class this year. She won two races at Oakland on Butchers' Day, trotting the winning heat the first race in 2:20, which is as good as 2:15 over a fair track. She also won the two-mile race, beating such horses as the pacers King Cadenza 2:15 and Billy G. 2:15. Twilight is by Noonday and well bred on her dam's side.

Here is an item by the *Trotter and Pacer's* Cleveland correspondent: Fred. Keyes is now training for M. Spellacy, of Columbus, Ohio, but has a few outside horses. The first foal by John A. McKerron, a 15.3 hands two year old out of Henrietta G. 2:19½, by Elyria, is in his string. This youngster is the trotting wonder at the track. Very double-gaited in the spring, he hit a trot one day, and the next morning several horsemen were ready to buy him for \$2500. He closely resembles his sire in looks, and is McKerron all over in action and disposition.

The Stockton Driving Club will not attempt to give a meeting this year. For several years past this enterprising organization has given a fair and race meeting, but the burning of the big pavilion last year has left the club without a building, and the club does not care to hold a race meeting unless it can have a pavilion exhibit in connection therewith. Consequently Stockton will not be on the circuit this year. The Stockton date, which has always been the one following the State Fair, will be taken by Pleasanton, which will give one of the best meetings held in California this year.

### Breeding Draft Geldings.

There is no higher price just now. Relatively speaking, draft geldings are higher than they have ever been before. They are, and the draft gelding is in, fact, the most valuable animal in any other called for in the market. It must be remembered, however, that there are draft geldings of different grades. For this one from \$300 to \$400 will be eagerly paid by a dozen men, perhaps a score, while for that one it is rather hard to realize just half as much money. It may be said that this is well known, which is admitted, but as the condition exists to the extent that its existence is admitted on all hands, there must be some good and sufficient reason for it. What is this reason?

There may be more than one, in fact there are several, but it is agreed that the controlling factor in the great diversity of form, individuality and value of draft geldings is due to the general lack of fixed purpose on the part of the farmer-breeders who supply this trade exclusively. It is well known that in most localities farmers have chopped and changed from one breed to another, not even sticking to light or heavy horses, but intermingling all in such inextricable confusion as to lower prices materially. This proves that there never was a time when continuity of purpose in breeding horses would pay better, and this fact is emphasized by the scarcity of good big mare—from which to breed the heavy horses which bring the best prices in the market. It is admitted that the mares which may safely be counted on to bring forth progeny which at maturity and in safe condition will tip the beam at 1900 pounds are few and far between. Most farmers must go to work to breed themselves a stock of such mares and in order to make success reasonably certain they must first map out a plan of campaign and then hew rigidly to the line.

On all hands the thinking farmer may see for himself the evil results of changing about from one breed to another, of the mixing of bloods and types widely dissimilar, and he should from the lessons he may thus learn be able to lay his plans so that in time he may reap a rich reward. Some farmers have been heard to voice the sentiment that it did not matter what sort of stallion they used at present, as by the time the horses grew to be five years old the price would be away down again, and therefore they intended merely to breed general purpose animals which in their turn would be able to do the work of the farm. It is almost wholly useless to try to reason with such men, because if all thought as they do there would be no such thing as continued progress in the world.

This journal makes no choice of breeds for any one. It advises not that one breed is better than another. It is enough to say that the drafters must be bred from draft stock. The daily receipts at any one of the wholesale centres will demonstrate that all the draft breeds cross well one with another, but it may be accepted that drafters cannot be bred from light legged animals nor carriage horses from drafters without a long and laborious process of grading and every time a radical cross is introduced a gigantic step backward has been taken.

The farmer who makes up his mind to breed drafters for the market should by all means first post himself as to the sorts which bring the fat prices. This he can do by paying a short visit to any of the great centres aforesaid. He may then form his own conclusions as to how he may best reach like results. If he visits such a wholesale market he will discover that the highest priced gelding is almost an exact counterpart of the stallion of the same breed he has seen win at some great show. The two will be very close mates, due allowance being made for the influence of the unsexing knife. That fact carries with it the lesson he is seeking to learn. He must use the very best stallion he can find. He must let no \$5 or \$10 or \$15 stand in the way of obtaining the services of a high class breeding horse. Unless fairly driven to it by necessity, which as it knows no law is a valid excuse for many lapses, he must retain his best fillies to produce the next generation and he must stick everlastingly to it. If he does that success will come just as surely as he makes the effort. He must make up his mind that he must feed his horses heavily enough to promote the most growth possible. In short, he must proceed along the lines already laid down for him to follow. It is safe to say that from this time forward the buyers will always discriminate sharply between the medium and the choicedrafter on the market and there will never be a day when the profits from the sale of the latter will not be far greater than from the former. In fine, the farmer who would succeed as a breeder of drafters must make up his mind that he must go into the business determined to work at it intelligently and in accord with the teachings of the market and the facts around him on every hand.—*St. Gazette.*

### Popularity of Futurities.

One very good reason for the popularity of futurities, says the *Kentucky Stock Farm*, is the low cost of entrance as well as the small percentage of the starting fee compared with the gross value of the stake itself. It has always been the custom for owners to pay five or ten per cent to start in purses and stakes, and as a consequence they have been trotting for their own money and in addition have been forced to lose the use of the money that has been paid on the original nomination. It is this custom that has made campaigning of the trotter a bad business proposition and no relief was felt until the era of futurities was reached. Then it was that owners realized what a tremendous strain it was to pay ten per cent of the gross value of the stake, especially in view of the fact that only four moneys were divided. The futurities, however, brought about a new condition, for here was an opportunity of winning many times as much as in the average purses of the stakes and for a fraction of a per cent. From their inception the futurities, matron stakes, or whatever they may be called, have become immensely popular, and for the best of reasons they are conducted on strictly business principles. The popularity of the American trotter was never more conclusively proved than by the persistence with which owners will engage their horses in events, the cost of starting in which being practically ten per cent, for this item is in itself the largest in connection with racing the light harness horse.

Take for example the largest stakes on the trotting turf, beginning with the Merchants and Manufacturers at Detroit, their gross value being approximately sixty thousand dollars, and the money winners are taxed six thousand dollars apiece. In futurities aggregating a like amount, the money winners would have paid out less than one thousand dollars. It is the heavy payments that keep alive the rich stakes; of this there is no question; in fact, under present conditions it would be impossible for associations to offer them, yet it certainly is a hardship for the owner and one that has made it almost impossible for a man of moderate means to indulge in the luxury of campaigning a trotter. When the time comes and comes it must, when the three year olds race as well as they do at maturity the futurities and colt stakes will have another value, for they will, to a very great extent, force the associations throughout the country to reduce the entrance fees to the purses and stakes. It stands to reason that an owner with a three year old engaged in fifty thousand dollars' worth of stakes, in which the cost of entrance has been less than one per cent, will entirely ignore the class races, even though large sums of money are offered. There are to-day in America many extremely promising green trotters that must be kept out of the large stakes for the simple reason that their owners cannot afford to risk several thousand dollars in entrance fees paid in monthly installments, thereby depriving them of the use of it and always with the possibility of being unable to dispose of the nomination.

We have always believed that a ten thousand dollar early-closing stake would receive enough nominations at a reduced fee to equal the amount received on a ten per cent basis, for at that season of the year many men would undoubtedly be found willing to risk a moderate sum of money, even though their horses should be in a measure an unknown quantity, whereas it would be on the face of it the height of folly to engage in the stake on the present basis of ten per cent. Two hundred entries at two per cent would of course be equal to forty entries on the ten per cent basis, and it is not in the least unlikely that a stake of this kind would receive enough nominations to carry it through; certainly the first payments would justify the step. There are always many men to be found willing to take a flyer with their horses at a moderate expense that would hesitate if the cost were as it now is, and the same spirit that prompts breeders to nominate their foals in futurities, which spirit is backed up by the realization that it is a sound business proposition that would induce men to engage their older horses, if it could be done with as little financial risk.

Something will have to be done, not only to increase the earning capacity of the trotter, but to make this earning capacity available, for as the case now stands, while a horse can win possibly twice as much money as he could ten or fifteen years ago, it will cost his owner twice as much for him to do so, and while it may be said that any man should be willing to spend five thousand dollars in entrance fees in order to win fifty thousand dollars, it must be remembered that only one man can be thus fortunate, and that all the losers must pay a part of what he has won, and many of them fully as much as it has cost the winner. The reduction of the first payment to a nominal sum would unquestionably be of great benefit to the owner, and it seems reasonable to suppose that the entry lists would be so increased that the associations would lose nothing,

as small entrance fees have been in the past the strength of futurities, exorbitant entrance fees, as are now in vogue, must be the ruination of class races, and to keep abreast of the times associations will be forced to adopt a system that has made the richest stake so popular.

### Developing Speed.

Just how to develop the speed of horses is one of the problems that confronts every trainer of harness horses. It is highly probable that each pupil requires a little different handling, and different lessons, from the common run of horses, but there should be some general rules for the development of speed that all trainers can follow with advantage.

All development should be gradual. Most trainers when they see their pupil shows an improved gait are anxious to increase it too rapidly. They keep him up to the top of his speed from day to day, or every other day, until he becomes sore and sour in disposition, and he frequently gets to growing slower instead of faster. Many keep at it till they "kill the goose that would have laid the golden egg," that is, spoil the colt entirely for speed purposes.

It does not answer either to confine the pupil to jogging only. Jogging is necessary, but when the colt feels like stepping fast, give him a short brush, let him rest up a little and let him have another brush if he wants to take it—but don't give him too much fast work, not enough to tire and dishearten. It is true, the only way to develop speed is to develop it, to let the colt step at his best clip several times a week if he is well booted, so as not to strike himself.

With older horses one of the great faults with many trainers is to give their horses too much fast work early in the season. It really takes weeks and months to properly prepare a horse for fast work. He must be fitted by degrees. A short brush at moderate speed occasionally is a good thing, but too much fast work is ruinous. Fast trials should not be indulged until a few weeks before the horse is expected to race, and then not up to the top of his clip. Many a race has been lost by fast trials before the race has begun. Reserve the supreme effort for the race itself. We by no means say that well regulated trials are not essential to prepare the horse for races—but give them in several seconds slower time than the horse is able to show when all out. Like in everything else, the trainer with the most brains and who is most thoroughly devoted to his business will achieve the greatest success.

### Lexington's Fixed Events.

The trotting world's greatest classic, the Transylvania, value \$6000, for 2:12 trotters, heads the list of the fixed events at Lexington for the meeting at that point October 6th to 17th, horses for this event to be named on or before September 9th, and entries transferable until that date. Entries close June 1, 1903, not only for the \$6000 Transylvania, but also for the following fixtures: The McDowell, \$3000 for 2:10 trotters; the Walnut Fall Farm Cup, \$3000 and silver trophy for 2:15 trotters; the Blue Grass, \$2000 for 2:19 trotters; the Tennessee, \$3000 for 2:08 pacers; the Johnston, \$2000 for 2:24 trotters; the West, \$2000 for 2:29 trotters; the Kentucky, \$2000 for three year old trotters (foals of 1900); the Lexington, \$2000 for two year old trotters (foals of 1901); and the Wilson, \$2000 for 2:20 pacers. Full particulars as to payments will be found in display ad. on another page in this issue. Horsemen should also bear in mind that payments are due June 1st on both the two and three year old divisions of the Kentucky Futurity, \$25 for two year olds, and \$50 for three year olds. Address all communications to E. W. Shanklin, Secretary, Lexington, Ky., and keep your entries good.

### Melodramatic Close of Exile's Career.

MOUNT KISCO, N. Y., May 5.—The famous thoroughbred stallion Exile, who during his turf career won the Brooklyn and Twin City handicaps and many other races, owned by Elliot C. Cowdin, became suddenly mad to-day and broke out of his stall, despite efforts of Trainer Joseph Brennan and his assistants. The men fled, with the stallion at their heels, and, seeing they had little chance of reaching the yard fence, took refuge in a tree, where they remained prisoners for an hour until Mr. Cowdin ordered the stallion shot. Exile was brought here from Tennessee last fall. Before being brought here he had killed two men. Exile was 21 years old, was by imp. Mortimer-Second Hand, and was bred by the late Pierre Lorillard at his noted Ranocas Farm in New Jersey.

Budd Doble has arrived at Cleveland with Kinney Lou and the Californians who attended the big Blue Ribbon sale say that this son of McKinney and old Mary Lou is looking in great shape.

Sober up on Jackson's Napa Soda.

**Shultshurst, the Home of Directly, 2:03 1-4.**

John Moorhead, formerly of California, is now engaged at the celebrated farm of John H. Shults, near New York, known as Shultshurst. Since last summer Mr. Moorhead has filled the position of colt breaker on this farm, and last week sent us a copy of the New York *Telegraph*, containing the following account of the horses at this great breeding and training farm:

Shultshurst, the home of Axworthy and Directly, is situated amid the beautiful hills in the most picturesque section of New York State—Port Chester, near the Connecticut line. John H. Shults, the founder of the farm which bears his name, is one of the best known breeders of the light harness horse. Since 1886, when he first broke into the breeding ranks, until the present day, he has been recognized as one of the most liberal breeders.

His first venture as a breeder was when he purchased Pancoast, in 1886, and established the Parkville Farm, on the Brooklyn Boulevard, which establishment he still maintains. Since the existence of Shultshurst little breeding is done at Parkville, this place being used as a training ground. The foals, when they become one year old, are sent from Shultshurst to Parkville, and then begins their first lessons of breaking to harness and the developing of their speed. The training ground is equipped with a first-class mile track, also an indoor track that is used to exercise the horses in bad weather. The track is so situated that the stalls are in the center and the track surrounds them, therefore it is unnecessary to take the animal out in the bad weather at all. The stalls and paddocks of the Parkville Farm have held some of the greatest and most famous stallions and matrons of their time. It was here that Stranger, the son of Gen. Washington, and Goldsmith Maid (the greatest mare of her time) held court for years.

When, a few years ago, Mr. Shults obtained possession of the eight hundred acres of land now known as Shultshurst, he immediately set out to build one of the most picturesque and up-to-date stock farms for the breeding of the light breeding horse. All the broodmares and Axworthy were sent from Parkville to Shultshurst, their new home. At that time Mr. Shults disposed of a number of mares whose breeding he did not believe the best to join with his young stallion. In their place he purchased others that he believed possessed breeding better suited to cross with the son of Axtell.

That this student of pedigrees made wise selections in selecting the mares to mate with Axworthy was demonstrated last season, when eight of his get, mostly two and three year olds, trotted to records that put them in the list. A few years ago Mr. Shults purchased the "iron" two year old of the "Little Black Rascal" Direct, Directly, and placed him in the stud as a companion to Axworthy. This latter horse is believed by those who have seen the quality of his foals to have a future as great as his illustrious sire. It is argued in his favor that he possesses all the quality and substance necessary in a stallion to sire well made, sound, good looking and finished foals, and as the principal factor in a stallion's success lies in his ability to sire speed, those of Axworthy are possessed with an abundance, as the majority of his foals have proved. His opportunity in the stud has been very limited. The first few years that Mr. Shults owned him he was given but a few mares, for the reason that Stranger was the premier stallion. There were but five foals by him on the farm the first year, and nine the second year. The third year he was allowed a few more mares, and there were thirteen foals. The following year he was sick, and served no mares in the spring. Late in the season he did serve six. It was not until 1901 that he was given a chance. The product from this year numbered twenty-two, they being yearlings now. Out of twenty-six foals he has nine in the list. Two of them were two year olds when they took their records, three three year olds, three four year olds and one five year old. There are now on the farm fifteen that will this year take records, if they do not meet with any misfortune.

Axworthy 2:15½, three year old record, was bred by the late A. B. Darling, who had a stock farm at Ramseys, N. J. He is a chestnut in color, and is 15.3½ hands, and is a good gaited trotter. He was sired by Axtell 2:12, dam Marguerite, by Kentucky Prince, foaled in 1892. He was broken as a yearling, and was what is known as a natural trotter. As a two year old he was started in a race at Terre Haute, Ind., which race showed fully the calibre of the horse.

This was the first time he had ever been turned around for the word, and the time for the heat was the race record for colts. Later in the season he was given a record of 2:28½. As a three year old he was given a careful preparation, and started in a race, which he won, the fastest heat being in 2:15½, his present record. A short time after this, while being jogged, he made a misstep and fractured a small bone

in the pastern, which put him out of commission for racing purposes. Mr. Darling, who was his owner at that time, had him shipped to his farm and carefully treated. Some time after this, Mr. Darling died, and Axworthy found his way to the auction ring and became the property of his present owner.

The companion stallion to Axworthy is the world's champion two year old pacer, Directly 2:03½ (two year old record 2:07¾), by Direct 2:05½, dam Mabel by Naubuc. It is doubtful if there ever was another such a two year old as Directly. He is often referred to as "the iron two year old." The campaign that he was subjected to that year was a severe one, and was the cause of his being referred to as above. He was shipped from California in the spring in time to fill his first engagement of the season at Denver, Col. He won this race, as he did every other race in which he was a starter. During the season he was started seventeen times, the last start being at Los Angeles, Cal., in December, where he went a mile in 2:08, and the day before he went a mile in 2:09. The best mile that Robert J. 2:01½, could go at that meeting was 2:07½.

Since becoming the property of Mr. Shults he has not been raced, but trainer Cheney believes that the little black is still good enough to take a try at the world's record, and is preparing him with that end in view. He will not be started in any races, but, instead, will be given a careful preparation to go a fast mile at Memphis, Tenn., next fall. Superintendent W. W. Shuit is not going to waste a full year of his services in the stud.

Since Mr. Shults bought the horse he has been bred to a few mares every year, and the foals he now has promise to be all that their illustrious sire's breeding and wonderful courage and stamina suggested. To date he has not sired a foal that is not possessed with speed, size and conformation that would please the most critical. His foals are a very uniform lot, and it is doubtful if there are two stallions standing on any farm that reproduce themselves more uniformly that do Axworthy and Directly.

In the broodmare barn are housed about fifty mares of the choicest breeding, and a number of them have demonstrated that they are the real thing as matrons. Foremost among the producers is the grand old mare Nell, dam of six, including Vassar 2:07, Belle Vara 2:08½, Susie T. 2:09½, Ambidexter 2:11½. There are three on the farm out of Nell by Axworthy, that will take records better than 2:30 this year, bar accidents. Nell is now twenty-five years old, and is in foal to Axworthy.

Other great mares are Mystic, dam of Fred Kohl 2:07½; Mystery 2:17½, and Bow—Axworthy (3), 2:28½; Dolly Johnson, dam of Domitan 2:14½; Dominant 2:21½. Neva Bell is the dam of Ben Axworthy (2) 2:27½. Kitty Bayard 2:12½ (world's half-mile track record at time made), is the dam of Kitty Thistle 2:19½. Lucy Wilton is the dam of Gayton 2:08½, and Intact 2:19½. The broodmare barn also shelters the world's champion to high wheel sulky, Sunol 2:08½, by Electioneer, dam Waxana by Gen. Benton. Sunol is in foal to Axworthy. Another great mare that is a companion of these mares is Russella, sister to the world's champion to high wheels, on a regulation track, Maud S. 2:08½. Russella is in foal to Axworthy.

Rose Croix 2:11½, winner of the three year old Kentucky Futurity, is another celebrated one in foal to Axworthy. Indale, by Allerton 2:09½, dam Elmore 2:08½, by Axtell 2:12, is in foal to Directly. Others that are famous are Bellewood A. 2:07½, Laurels 2:13, Pasonte 2:13, Octavia 2:18½, Bertha Derby, sister to Don Derby 2:06, and Diablo 2:09½, Nyanza 2:12½, dam of Robert Axworthy (3) 2:09½, and many more only a little the less famous. Not since Mr. Shults entered the breeding ranks has he possessed two stallions as great as Axworthy and Directly promise to be.

Mr. Shults has been identified with the light harness horse since he was 18 years old. Before he became a breeder he had the largest stable of road horses owned in this vicinity, keeping as many as twenty for driving at one time.

Mr. Shults intends to race more extensively this year than he has for a number of years, and Trainer John Cheney has collected together a stable of fast ones that he believes will do to represent the farm.

**Important Payments Due.**

On June 1st a payment of \$25 is due on all two-year-olds (foals of 1901) eligible to the Kentucky Futurity, which payment keeps the entry good until September 1st, about thirty days before the meeting. No breeder or owner with an eligible two-year-old can afford to drop this entry.

Payment is also due at that time upon eligible three-year-olds (foals of 1900), and entries to the grand array of fixed events close upon the same date. Make entries and send all payments to E. W. Shanklin, Secretary, Lexington, Ky.

**\$60,000 for Hermis.**

Hermis, champion three-year-old of 1902, has changed hands and is now the property of the most recent newcomer on the turf, Edward R. Thomas. Hermis was practically sold on Saturday, when Louis V. Bell and Thomas sat watching the races. Mr. and Mrs. Thomas congratulated Bell on owning the best horse in America in Hermis. Bell acknowledged the compliment. Thomas then said, "I suppose he is not for sale?"

"Oh, yes, he's for sale, but the price is high."

"What might be the price you ask for him?" asked Thomas.

"Well," said Bell, "I value him at \$60,000, as he is sound as the day he was foaled, and I love him more than I can tell you. Moreover, he is so quiet, and with such a loving disposition, a grand feeder and always willing and eager to do his best, either in company or by himself."

Thomas grasped Bell by the hand and said, "It's a bargain. Hermis is mine."

Hermis has engagements amounting to more than \$100,000. Thomas is a multimillionaire. Mrs. Thomas, his wife, was Linda Lee, of Kentucky. She is a most enthusiastic lover of racing and is a constant visitor to the paddock at Morris Park, accompanied by her husband.

It is said that the late Marcus Daly paid \$60,000 for Hamburg. Afterward it was declared that the actual price was \$50,000. This would make the price paid by Thomas the largest in the history of the American turf.

L. V. Bell purchased Hermis last August at Saratoga for about \$20,000, and on the same day won the Travis stakes with him. The colt won ten consecutive races for Bell and at the close of the season was regarded as the best horse in training, an opinion afterward confirmed by the official handicapper, who allotted the horse top weight (127 pounds) in the Brooklyn and Suburban handicaps.

**Watch Your Futurity Payments.**

If your colt should win Kentucky's \$20,000 Futurity it at once becomes the central figure in the trotting world, and increases in value 50 per cent. Owners of three year olds (foals of 1900) should, therefore, bear in mind that a payment of \$50 will be due June 1st, which payment will carry the entry to within thirty days of the meeting (September 1st). A payment is also due on two year olds June 1st, and upon the same date entries close to the various fixed events, including The Transylvania, McDowell, Walnut Hall Farm Cup, The Blue Grass, The Tennessee, The Johnston, etc.

All communications should be addressed to E. W. Shanklin, Secretary, Lexington, Ky.

**San Francisco Veterinary College.**

Next session will begin June 15, 1903. Write for catalogue giving full particulars. M. L. PANCOAST, Secretary, 510 Golden Gate Ave., San Francisco. E. J. CREELEY, D. V. S., President.

Direct King, in Ed Geers' stable, is the favorite of the Memphis railbirds. They say he is a coming sensation.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

**EFFECTUAL**

The most effectual remedy in use for the cure of ailments of horses and cattle is

**GOMBAULT'S CAUSTIC BALSAM**

Used as a Blister or Lotion.

This preferred remedy is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### Ocean Park Tournament.

The wind and sky that made sensation at the Ocean Park Country Club, on the 15th inst., inaugurated the first of a series of tournaments in the history of the club, which taxed the increased capacity of the grounds to the utmost, and exceeded the most sanguine expectations of the Executive Committee.

In all the history of Southern California trapshooting, never before was there such a turnout of shooters at an opening day as that which faced the beach traps on the first morning. Not only knights of the trigger from Southern California were there, but a number of the best shots of San Francisco laid aside their business cares and were on hand early, prepared to contest throughout the shoot. Men from Monterey, from Pacific Grove, from Fresno and other San Joaquin Valley points vied with their brothers in arms from Wickenburg and Prescott, Ariz. The entire Southwest was well represented, and the delegations from San Bernardino, Redlands, Riverside, Santa Ana and San Diego came fully up to the record set several years ago, when the North and the South clashed in the historic team shoots, of which all the veterans love so well to tell. So said Brother Hedderly in the Los Angeles Times. San Francisco was represented by C. A. Haight, of the DuPont Powder Company, E. E. Drake, of the U. M. C. Co., Harry Hoyt, of the Winchester Repeating Arms Co., D. Daniels and C. C. Nauman. J. B. McCutcheon, of Windsor, was also present.

Early during Friday morning the high fog and glare from the rising sun made it extremely difficult to scratch straight scores even in the ten and fifteen bird events. As the day grew older a stiff sea breeze came up, and it swept quartering across the field, disturbing both sets of traps and making occasional birds soar or swoop in a totally unexpected and ungaugeable manner. About 10 o'clock, when one squad went to bat, the breeze became so gusty that no man living could have scored a straight except by accident. No two birds were behaving alike. Later on the breeze became steadier and scores improved with regularity.

The opening event was a ten bird shoot and only four out of thirty-four shooters ran out their string. The rest wandered all the way from four to nine, and in the second event, a fifteen bird race, straights were scarce and far between. W. W. Stenwell of Colorado Springs, who shot through the day in magnificent form, scored his fifteen, and Ed Vaughan of Santa Ana followed suit, both in the first squad. C. J. Proud of Whittier long after registered a clean row of breaks, but the rest had to take pot luck. The third event was even worse. By the time it was shot off the wind had reached the summit of its pernicious effort, and C. E. Coultas of Oxnard was the only man to turn in a clean tally sheet. Most of the shooters came up for it in the next inning, which was a twenty bird race, and closed the morning's sport. Hagerman and Stenwell opened auspiciously with the full number of breaks, and W. H. Varlen followed suit. Clarence A. Haight also got into the first money division with twenty, and then a general adjournment, by squads, was taken for lunch.

First in the afternoon's shooting came the fifty-bird argument for the Tufts-Lyon Challenge Medal, for the sake of convenience the contest was split up into two sections, twenty-five birds in each. The race was for a time a very pretty one and any of a dozen different contestants looked like a possible winner, but in the last half Fred B. Mills, of Bolsa, struck his gait and posed out a winner with forty-six breaks in the fifty shot at. Oscar Hibbard, of Manvel, was a hot second with forty-five, and had the decision of the referee on one of Mills' birds been final they would have been tied. Mills, however, broke the bird in question and the spectators sustained his challenge. Quite an argument arose regarding the finality of the decision of the referee, but it developed the fact that in order to be official there should be two referees, and they must be agreed. Several doubtful birds were allowed Friday after they had been called lost, but in each case there was plenty of evidence.

With the Tufts-Lyon medal out of the way, and retained by its former possessor, the rest of the day's sport was shot out, and after it followed a pair of sweepstakes events.

The opening event on Saturday was a ten-target race, in which straight's were scored by Varlen, Allen, Arnold, Walker, Blanchard and Coultas. Fred Mills was the only man to go the second event straight, he scoring 15 birds. Clarence Haight of San Francisco got into the winning with the Santa Ana crack in race No. 3, and both killed their 15 without an error. The fourth event was the team race; it did not count on average, and only about half of the shooters participated. Nobody shot straight, though Mills, in all probability, would have done so and the fates been reversed. Naumann got a 21, and so did Hagerman. Varlen, did down the line straight until bird No. 21 was gone away unscathed. He dropped his last, but 47 was the best shot was too hard a proposition to buck at from the start, and the high score took the rest of the rest. The scores in the two man team were: Naumann 24, Varlen 23, total 47; McCutcheon 20, Daniels 22, total 42; Breer 23, Lovelace 20,

total 43; Fano 20, Julian 21, total 41; Orr 17, Van Valkenburg 20, total 47; Mills 24, McDonald 20, total 44; Hagerman 24, Blanchard 20, total 44; Knight 24, Taber 15, total 42; Arnold 20, Yancey 21, total 41; Shemwell 21, Vaughan 21, total 42; Gibson 17, Coultas 23, total 40; Naumann and Varlen first; Mills and McDonald and Hagerman and Blanchard tied for second; Breer and Lovelace third.

In a dizzy daze of wind-driven sand, which cut like fine shot from an invisible gun, with blue rocks climbing into the clouds like scared teal and then diving for the grass like a missed snipe, the big three days' tournament of the Ocean Park Country Club came to an end late Sunday afternoon with the largest attendance of the meeting and everybody well pleased with the sport. Considering the climatic conditions, scores were excellent. Viewed from the standpoint of a shooter who was not present and did not participate, they were—"fierce" is the only suitable word. However, it is a well-known fact that thirty-mile-an-hour winds and straight breaks of blue rocks do not go together.

Naturally the snap shots were at a decided advantage, and Clarence Nauman slid into the high average place by the narrow margin of one bird. He had plenty of competition, for J. Ed Vaughan gave a magnificent exhibition of saucer-smashing in the morning by wiping out sixty-two straight, notwithstanding the wind. Out of his first 100 birds Vaughan broke 92, which was far and away the best performance of the tournament. He did not get a good start the first and second days, so was unable to catch up with the San Franciscan. Mills, Shemwell and little Arnold of Oxnard did great shooting and was not far away from high average when final miss and outs were shot. Vaughan captured high average for the last day with ease. For the shoot Nauman led for high average, his percentage for the three days' shooting being 88.6. Vaughan and Mills of Santa Ana took second and third prizes and Lovelace and Shemwell of Los Angeles were tied with Arnold of Oxnard for fourth place.

By all odds the feature event of Sunday was the individual championship. For convenience the fifty birds were split into two sections, and a hot contest resulted. On his first set of traps Guy Lovelace broke 24, and on the second 23, giving him a total of 47, which was three birds more than Yancey scored, and the Bakersfield man was Lovelace's nearest competitor. The trophy was a handsome diamond locket, and Lovelace certainly earned it, for any man who could go out and break 47 out of 50 in such a wind and such conditions as prevailed ought to have the best that the game affords. By winning the prize Lovelace is entitled to claim the title of Pacific Coast champion, and it is no empty honor, as he was shooting against the very best men in the blue rock line that the Coast affords, and he vanquished them all, in a signal manner.

The three-man team race was an easy victory for Nauman, Shemwell and Vaughan, who scored, respectively, 24, 21 and 24, for a total of 69 birds. Their reward was the honor of having their names engraved upon a cup, which will be retained by the club. It was not an empty honor, for the usual cash went with the event.

By far the heaviest entry of the shoot took place in the merchandise event at twenty-five birds. Owing to a general belief that there was chance for everybody to get something, the shooters piled into the grab-bag contest with a will and they were all the afternoon shooting it off. When the clouds had finally cleared away, R. M. Arnold, of Oxnard, and J. Gibson, of Nordhoff were tied for first honors, with a score of 24. Fred B. Mills, of Bolsa and William Hicks, of San Bernardino, tied for second, with 23. So on down the line; nearly everybody got something to remember the shoot by.

After the merchandise was out of the way a series of miss-and-outs was sprung and a hilarious session in the wind at number two traps was brought off.

The program of events and scores for each day are given below:

The "Chick system" of money division prevailed. Class shooting, four moneys in all events. Illustration: 15 target event, purse \$99—A breaks 15, B breaks 14, D breaks 13, E and F break 12 each. Total broken in four high classes, 66. Dividing purse by total and multiplying result by number of targets broken by each would entitle A to \$22.50, B to \$21, D to \$19.50, E and F to \$18 each. Under this system a shooter who shot into the money won nearly as much in fourth as in first place.

Here it will be seen the shooters received added money and all the entrance money less the price of targets.

Friday, May 15—Event 1—10 targets, \$1 entrance, \$10 added.

Event 2—15 targets, \$1.50 entrance, \$15 added.

Event 3—15 targets, \$1.50 entrance, \$15 added.

Event 4—20 targets, \$2 entrance, \$20 added.

Event 5—Tufts-Lyon Arms Company Challenge Medal. Open to residents of Southern California only. 50 targets, \$1.50 entrance, high guns. Original conditions to govern.

Event 6—10 targets, \$1 entrance, \$10 added.

Event 7—15 targets, \$1.50 entrance, \$15 added.

Event 8—20 targets, \$2 entrance, \$20 added.

Event 9—15 targets, \$1.50 entrance, \$15 added.

Saturday, May 16—Event 1—10 targets, \$1 entrance, \$20 added.

Event 2—15 targets, \$1.50 entrance, \$15 added.

Event 3—15 targets, \$1.50 entrance, \$15 added.

Event 4—Ocean Park Country Club two men team championship trophy. 25 targets each man, entrance

\$4 team, \$10 added, open to members of gun clubs, or residents of Pacific Coast states, Arizona and Nevada. Trophy to remain in possession of Ocean Park Country Club, to be competed for at its semi-annual tournaments. In this, the initial contest, trophy and the \$10 added money went to the team making highest score. In subsequent competitions, team holding trophy gets 75 per cent of entrance money and winner 25 per cent, less cost of targets. Purse in initial contest was divided (4 moneys), to 2nd, 3rd, 4th and 5th highest teams.

Event 5—20 targets, \$2 entrance, \$20 added.

Event 6—10 targets, \$1 entrance, \$10 added.

Event 7—15 targets, \$1.50 entrance, \$15 added.

Event 8—15 targets, \$1.50 entrance, \$15 added.

Event 9—20 targets, \$2 entrance, \$20 added.

Sunday May 17—Event 1—10 targets, \$1 entrance, \$10 added.

Event 2—15 targets, \$1.50 entrance, \$15 added.

Event 3—Individual championship. Pacific Coast States, Arizona and Nevada. 50 targets, \$2.50 entrance. Individual championship diamond locket, value \$50 to become the property of contestant making highest score. Purse to go to next four high guns.

Event 4—Luckenbach Cup, three men team Pacific Coast championship. 25 targets each man, entrance, \$6 team. Open to members of gun clubs or residents of Pacific Coast States, Arizona and Nevada. To be competed for at semi-annual tournaments of Ocean Park Country Club. Cup and entrance money, less price of targets, to winner.

Event 5—Merchandise, 25 targets, \$1.50 entrance, purse divided same as in regular events, class shooting. Merchandise. High guns first choice.

Event 6—Miss and out, \$1 entrance, \$5 added. For those who shot in all events counting on average and who did not make over 85 per cent.

### SUMMARY OF SCORES.

Blue Rocks, Ocean Park Country Club, Friday, May 15, 1903.

The following notes were made by two shooters who were present at the shoots mentioned and submitted the same for publication—

"Southern California Tournament, Ocean Park, Los Angeles, Cal., May 15th, 16th and 17th. Of the 55 shooters who took part in this tournament, 39 used Winchester 'Leader' shells and 16 shot with Winchester 'pump' guns. The Tufts-Lyon Arms Co.'s Championship Medal, shot for on the first day, was won by Mr. T. B. Mills of Santa Ana, Cal., with a Winchester 'pump' gun and Winchester 'Leader' shells. The Southern California Championship Diamond Medal, emblematic of the champion target shot of Southern California, which was shot for on the closing day of the tournament, was won by Mr. Guy Lovelace of Los Angeles, Cal., with Winchester 'Leader' shells on a score of 47 out of a possible 50. The first prize in the big Merchandise Shoot was tied for by Messrs. Arnold and Gibson, both of whom shot Winchester 'Leader' shells, and of the remaining prizes, about 50 in number, fully two-thirds were captured by shooters who shot Winchester 'Leader' shells."

"Northern California Tournament, Sacramento, Cal., May 15th, 16th and 17th. Of the 87 shooters who participated in this tournament 78 shot Winchester 'Leader' shells and 28 Winchester 'pump' guns. The high average on live birds was won by Mr. Frank M. Newbert of Sacramento, Cal., with a Winchester 'pump' gun and Winchester 'Leader' shells. The high average for the first day on targets was won by Mr. W. H. Seaver, of San Francisco, Cal., with a Winchester 'pump' gun and Winchester 'Leader' shells. The high average for the entire tournament on targets was won by Mr. Frank M. Newbert, of Sacramento, Cal., with a Winchester 'pump' gun and Winchester 'Leader' shells. The Kimball & Upson Trophy, shot for on the second day (at targets) was won by Mr. Newbert with a Winchester 'pump' gun and Winchester 'Leader' shells. Mr. Newbert won the Individual Championship Medal, emblematic of the champion blue rock shoot of Northern California on a score of 40 straight, which included a shoot-off, and also the high average medal, with this same combination. The Six Man Team Trophy was captured by the Chico team, four of whom shot Winchester 'Leader' shells and two Winchester 'pump' guns. The first, second and third high average of the tournament, at targets, were won by shooters who used Winchester 'Leader' shells. Of the 24 prizes in the Merchandise shoot of the second day, 18 were captured by shooters who shot Winchester 'Leader' shells and 14 by shooters who used Winchester 'pump' guns and the 'Leader' shells.

### Outing Notes.

Mountain climbers and lovers of outdoor sport appreciate right footwear. Skinner has the largest and best assortment in San Francisco, and can make you comfortable even if you have tender feet and bunions.

The Skinner Co., 801 Market street, San Francisco, have imported special goods from England for making outing suits for both men and women. These fabrics are dustproof, dressy and durable, are sold by the yard, or made to measure.

### Sacramento Tournament.

The sixth annual tournament for Northern California shooters started with live bird shooting on the morning of the 15th inst. at Agricultural Park, Sacramento. Forty-two shooters lined up in five events. The shooting on Friday and Saturday was carried on whilst a running race meeting was conducted on the track, the shooters being stationed out in the center of the track grounds. During the three days of the meeting a strong north wind prevailed, the influence of which played havoc with a number of ambitious scores. On the first day the wind fortunately fell soon after the shooting began and all was serene. A large gathering was in attendance from all over the northern part of the State. The birds supplied were a good, strong lot.

The first race was a 6 bird pool, entrance \$2.50, class shooting, two moneys, 60% and 40%—G. A. Johnson, H. W. Davis, William Hulse, R. E. Callahan, W. H. Skinner, W. C. Brown, "Tooley," G. W. Gibson, R. Ahlf, F. J. Rubstaller, W. S. Harkey and J. E. Haugh divided first money, \$55. I. N. Gould, D. Barrett, J. A. Bailey, G. B. Hoxie, Matt Phillips, J. C. Burtis, "Doc" Steuart, J. F. Brown, F. N. Buergi, F. O'Brien, J. M. Morrison, J. Guisto, F. M. Newbert, W. G. Chiles, F. P. Smith, A. Johnson and O. Herold divided \$37.

The second event, championship of Northern California, 12 birds, entrance \$2.50. Winner to receive one-third of entrance money and medal, and two-thirds of next entrance. G. W. Gibson, of Colusa, Newbert, J. W. Humble and J. Viehmeier tied on a straight of 12, and in the shoot off, miss and out, Gibson beat out Newbert, who was the last man to stay. Gibson killed 21 straight and Newbert 20, missing the twenty-first bird. W. S. Harkey, of Gridley, won the championship medal last year.

Third event, 12 bird pool, entrance \$5, class shooting, three moneys, 50%, 30% and 20%. D. Barrett, G. W. Gibson, F. M. Newbert, J. W. Humble, J. Viehmeier divided first money, \$125, with twelve straight. J. A. Bailey, Matt Phillips, J. M. Morrison, J. N. Godfrey, O. Herold, J. W. Hotchkiss, W. D. Peterson, "Tooley" divided second money, \$63, with eleven. G. A. Johnson, I. N. Gould, H. W. Davis, William Hulse, J. L. Zuver, G. B. Hoxie, A. Ahlf, "Doc" Steuart, F. Buergi, F. J. Rubstaller, W. G. Chiles, F. P. Smith, Dr. Weldon and E. Holling divided third money, \$42, with ten kills.

Event four, 10 bird pool, entrance \$7.50, class shooting, three moneys, 50%, 30% and 20%. F. N. Buergi, O. L. Stevens, F. M. Newbert, who each killed straight, divided first money, \$90. G. A. Johnson, J. A. Bailey, "Doc" Steuart, J. M. Morrison, J. W. Humble divided second money, \$54. G. W. Gibson, A. Ahlf, Matt Phillips, J. F. Brown, W. S. Harkey, F. J. Rubstaller, R. E. Callahan divided third money, \$36.

The first day's shooting closed with a miss-and-out event, Jones, G. W. Gibson, "Doc" Steuart, F. Buergi, F. M. Newbert divided the purse of \$20.

Gibson and Newbert did the best shooting of the day, each losing only two birds out of forty-three birds shot at. Gibson used an English made gun, Hazard powder and U. M. C. shells.

The second day's shooting brought 79 blue rock shooters. Among the visitors were W. S. Wattles of the Union Metallic Cartridge Company, A. Muller and W. L. Seaver of the Winchester Repeating Arms Company, Otto Feudner of this city and Cecil R. Reed of the Selby L. S. Company. The loads used during the shoot were principally Selby factory loaded shells.

Much comment was indulged in by many of the shooters who found it hard to buy any kind of loaded shells on the grounds but those loaded with one particular brand, which was pushed for all it was worth. The Coast representative for the manufacturers was the referee in the live bird races. Another cause for complaint was the action of the management in taking a particularly large rake-off. For instance, in the first blue rock race \$50 was given, there was sixty entries at \$1 each, the \$10 excess was placed on the profit side of the ledger. Shooters also had to pay extra for birds, 2 cents. One prominent shooter who has shot all over the country expressed his opinion that the shoot "was a skin game." This particular way of conducting a tournament, for revenue only, will not have much effect in keeping up the enthusiasm among shooters. The rake-off was also good in the merchandise events, the prizes were almost all donated, the entrance cost each shooter \$2, this was nearly all clear profit. Milking and forcing will not tend to keep up the interest in future "Northern California" shoots.

The blue rock events started Saturday morning with 60 entries (\$60) in a 20 bird race, entrance \$1, \$37.50 purse, class shooting, three moneys. The winners were: First money, \$17.50—Buergi (19). Second money, \$12.50—Divided by Smith, Carl, Davis, E. Feudner (18). Third money, \$7.50—Gibson, Newbert, Damon, Barrett, Morgan, McElwaine, D. E. Newbert and Steadman (17).

Second event, 55 entries (\$33), 20 targets, entrance \$1.50, \$50 purse, class shooting, three moneys. First money, \$30—Humble, Gibson, Barrett (18). Second money, \$18—Thomason, E. Feudner, Weldon (17). Third money, \$12—G. A. Johnson, Newbert, Hotchkiss, Gould, Damon, Peterson, Durst, O'Brien (16).

Third event, 50 entries (\$100), 20 targets, entrance \$2, \$80 purse, class shooting, three moneys. First money, \$40—Humble, Newbert, O. Stevens, Englehart (18). Second money, \$24, Buergi, Skinner, Jones, Peterson (17). Third money, \$16, G. A. Johnson, Smith, Hotchkiss, E. Feudner, Barrett, Weldon, Fissel, McElwaine (16).

Fourth event, 48 entries (\$48), 20 targets, Kimball and Upson trophy race, entrance \$1. Won by F. M.

Newbert. Winner receives one-third of entrance money and two-thirds of next entrance. Open for northern California shooters only, trophy to be won three times for permanent ownership. Won by F. M. Newbert last year. This was the principal feature of the second day's shoot. The result was a tie between Newbert, Stevens, Englehart and Humble (18). In the shootoff Humble had it won up to the eighteenth round, when he wobbled, and again was tie with all but Englehart, who had fallen by the wayside early in the race. In the second shootoff Newbert was victorious, breaking nineteen out of twenty, with Stevens and Humble finishing a dead heat with seventeen each. Mr. Newbert has now won this trophy twice, and looks to become the actual owner next year.

Fifth event, 49 entries (\$122.50), 20 targets, entrance \$2.50, \$100 purse, class shooting, three moneys. First money, \$50—Bailey, Gibson, Skinner, Durst, Holling (20). Second money, \$30—G. A. Johnson, Davis, Thomason, Englehart (19). Third money, \$20—Newbert, Mellor, A. Johnson, Barrett, Fissel (18).

Sixth event, 54 entries (\$54), 20 targets, entrance \$1, class shooting, purse \$37.50, three moneys. First money, \$17.50—Davis (19). Second money, \$12.50—Thomason, De Merritt (18). Third money, \$7.50—Godfrey, Peyton, Tooley, Peters (17).

Seventh event, 70 entries (\$105), 20 targets, merchandise shoot, entrance \$1.50, 10 classes. First class—G. A. Johnson. Second class—Stevens, Haugh, Maxwell, Durst, Holling. Third class—De Merritt, Peterson, Barrett. Fourth class—A. Johnson, Jones, Englehart. Fifth class—Gallup, Damon, Peyton. Sixth class—Haggerty, Just, Blair. Seventh class—Fissel, Carl, Morgan. Eighth class—Steuart, Hulse, King. Ninth class—Epperson, Brown, Skinner. Tenth class—Vetter, Pedrich, Godfrey.

Eighth event, 48 entries (\$72), 20 targets, entrance \$1.50, purse \$50, class shooting, three moneys. First money, \$30—Gibson (20). Second money, \$18—Thomason, Holling, Davis, F. Garnett, Gould, Durysa, Guisto (19). Third money, \$12—Peyton, Bailey, Newbert, Barrett (18).

Seven events were on the program for the concluding day. The first race started with 70 entries (\$70), 20 targets, entrance \$1, purse \$40, class shooting, three moneys. The winners were: First money, \$20—Divided by G. A. Johnson, Humble, De Merritt, Guisto (19). Second money, \$12—Hotchkiss, Githle, Hoag (18). Third money, \$8—Childs, Blair, Holling, Peterson, Englehart, A. Johnson, O'Brien, Davis, Newbert, Smith, D. E. Newbert, Gould, Barrett, Godfrey (17).

Second event, 65 entries (\$92.50), 20 targets, entrance \$1.50, purse \$50, class shooting, three moneys. First money, \$30—Gibson (20). Second money, \$18—Englehart, Smith, Bailey (18). Third money, \$12—Holling, Humble, McElwaine (17).

Third event, 63 entries (\$126), 20 targets, entrance \$2, purse \$90, class shooting, three moneys. First money, \$45—Peterson (20). Second money, \$27—Tooley, Barrett, Bailey, F. M. Newbert, A. Johnson, E. Feudner, Jones (18). Third money, \$18—McElwaine, Holling, Englehart, Peyton, Carl, Buergi, G. A. Johnson (17).

Fourth event, 57 entries (\$142.50), 20 targets, entrance \$2.50, purse \$110, class shooting, three moneys. First money, \$55—F. M. Newbert, Garnett, Fissel (20). Second money, \$33—G. A. Johnson, Barrett, Rubstaller, "Poor Bill," Grieves (19). Third money, \$22—Hoag, Githle, Rohrer, Peterson, Stevens, Davis, Buergi, Durst (18).

Fifth event, 57 entries (\$57), 20 targets, entrance, \$1. Championship of northern California. One-third of entrance money and two-thirds of next entrance to winner. W. D. Peterson of Dixon was the winner last year and received two-thirds of the entrance money. The race was won by F. M. Newbert. With Garnett and Fissel he tied on 20 straight, and in the shootoff Newbert won with a straight score of 20.

Sixth event, 50 entries (\$100), 20 targets, entrance, \$2, purse \$80, class shooting, three moneys. First money, \$40—Smith, Peyton (19). Second money, \$24—Durst, A. Johnson, Peterson, Holling (18). Third money, \$16—Englehart, Grieves, F. Newbert, Gibson, Humble, Godfrey, G. A. Johnson (17).

Seventh event, 71 entries (\$142), 20 targets, entrance \$2, merchandise prizes, class shooting, ties miss and out. First class, Carl and Haugh. Second class, Gibson, Newbert, Hotchkiss. Third class, De Merritt, Holling, Gould. Fourth class, Guisto, Fissel, A. Johnson, McElwaine. Fifth class, Peters, O'Brien, Humble. Sixth class, Peterson, J. P. O'Brien, Jones. Seventh class, D. Newbert, J. F. Brown, Brock. Eighth class, E. Feudner, Just, Gallop. Ninth class, Callahan, Weldon. Tenth class, Williamson, "Poor Bill." Eleventh class, Cotter, Davis, Blair. Twelfth class, Tooley.

The high average of the tournament was won by F. M. Newbert with 222 breaks out of 260, followed by G. Barrett with 221 and G. W. Gibson with 220. Mr. Newbert also won the medal last year.

Straight scores of 20 in the blue rock events were made by Bailey, Gibson (3), Skinner, Fanning, Holling, Durst, Seaver, Robertson, Peterson, F. M. Newbert (2), Garnett (2) and Fissel (2).

The concluding event of the tournament was the six man team shoot for the championship of Northern California between Dixon, Sacramento, Chico, Davisville and Willows and was won by Chico with 81 out of 90, all the other teams scoring 77 each. The entrance was \$6 per team, 15 targets per man. The winning team received one-third of the entrance money and will get two-thirds of the next entrance.

On the third day the social part of the program was enlivened by the arrival of "Winchester Willie" and Boone Epperson in their '49 stagecoach and four, together with a graphophone and numerous records, which were kept moving all day, greatly to the delight of the numerous visitors, among who were many ladies.

W. S. Wattles was present during the shoot and hospitably represented the U. M. C. Co.

The tournament closed with a smoker at the Hall on Sunday evening during which social time and prizes were distributed to the winners.

In the foregoing list of winners we have not

## THE FARM.

### World's Fair Dairy Test.

The period of the test commences May 1st and continues six months to November 1st, 1904.

The object of the proposed dairy test is to demonstrate in a practical way how economically milk and butter can be produced under certain given conditions with the various breeds of cows.

Each of the cattle breeders' associations has been invited to furnish herds to participate in the test.

The cows will be under the general supervision and direction of a superintendent, who shall have the entire control of their feeding, care and management, under the rules prescribed.

The chief shall be governed by the rules and regulations approved by the Exposition and as formulated by an advisory committee consisting of one representative of each of the associations furnishing cows for the dairy test, a representative of the Dairy Division of the United States Department of Agriculture, and two representatives of the National Association of Agricultural Colleges and Experiment Stations.

Each association participating shall recommend the name of the party selected to superintend the feeding, care and milking of the cows furnished by the respective associations.

Each association intending to furnish cows for the dairy test is to notify the chief of the Live Stock Department of the World's Fair of such intention on or before May 5, 1903.

A statement giving the names and pedigrees of all such cows must be furnished not later than April 1, 1904, also the number of calves each cow has produced, the date of birth of the last calf, and the date of last service of bull since the last calf was dropped.

A statement must be submitted, giving the method and character of feeding that has been followed with each cow one year previous to entry in the dairy test.

The cows shall be divided into three classes, A, B and C, which shall consist of herds of 25, 15 and 10 cows, respectively.

Only cows of the Devon, Brown Swiss, Red Polled and Dutch Belted breeds shall be eligible in class C.

Each cow shall be weighed on May 1, and on the first day of each month following.

All feed used in the dairy test shall be furnished by the associations providing the cows and at their own expense.

The commercial valuations of all food used in the test shall be fixed by the chief of the Live Stock Department.

The associations participating in the dairy test shall designate and direct the character, kind and quantity of food to be used, the care and general management of the cows furnished by the respective associations.

The weight of water consumed daily by each animal shall be recorded.

The milk from each cow will be weighed immediately after each milking, and a correct sample taken, and amount of fat determined by the Babcock method.

On Monday and Thursday of each week a test shall be made by the lactometer of the milk from each cow.

From these and other tests the amount of fat, total solids and solids not fat, etc., shall be computed, and their value determined for each individual cow and herd as specified below.

The milk produced each day from each herd of cows shall be weighed and taken in charge by the chief of the Department of Agriculture, to be churned, tested and otherwise manipulated for determining the various products of each cow.

Once each week the quality of the butter made shall be determined by chemical

analysis from a composite sample on the basis of 85 per cent fat. Sample prints of such butter, free from artificial coloring matter and broken to show grain, together with samples of whole milk, shall be on exhibition.

The entire product of the milk will be turned over to the respective superintendents having charge of the cows of the several breeds for such disposal as the association interested may direct.

No cow shall be withdrawn from the test except upon the presentation of a certificate of unhealthfulness signed by the veterinarian, and no such cow shall be replaced by another.

If, however, a cow so withdrawn is certified by the veterinarian as able within seven days to again take her place in the test, she shall be credited for such withdrawal period with a daily amount equal to her daily average product for the five days preceding such withdrawal and the first five days following her return to the test.

The products of the milk will be valued as follows: The value of butter made shall be the average of the highest quotations at St. Louis on April 1, 1904.

The value of solids not fat shall be based on the highest quotations for New York state factory cheddar cheese in New York City on April 1, 1904.

The superintendent of the dairy test shall keep a careful record with each cow, covering the amount, kind and cost of feed consumed daily, and also of the weight of milk produced by each cow each day and such other data as may be called for by the chief of the Live Stock Department.

The chief of the Department of Agriculture shall keep a careful record of the total solids and solids not fat found in such milk, and other desirable information obtainable from such dairy test.

Prizes shall be awarded as follows in Classes A, B and C, respectively:

- (1) For the herd showing the greatest net profit, butter fat alone considered.
- (2) For the greatest net profit, butter alone considered.
- (3) For the greatest net profit in solids not fat.
- (4) For the greatest net profit in total solids.

Uniform packages will be provided for all butter produced by each breed, and the score on such butter shall be kept daily and submitted each week to a jury to determine the quality.

This jury will judge butter upon the following scale of points at the values indicated: Flavor, 55; grain, 25; solidity, 10; color, 10.

From the report of the jury there will be credited to each breed the value of the butter produced by such breed in the following manner: Butter scaling from 75 to 80 points shall be credited at 25 cents per pound; 80 to 85 points, 30 cents; 85 to 90 points, 35 cents; 90 to 95 points, 40 cents, 95 to 100 points, 45 cents.

The sum to be credited for buttermilk and skim milk will be ascertained from the determination of the solids other than fat in such buttermilk or skim milk, and will be two cents per pound.

The increase or decrease in live weight will be credited or debited at four cents per pound.

The Exposition will not assume or pay any expenses of this test or pay any compensation to any person or committee connected therewith, except for superintendence of the dairy test.

The cattle associations interested are to provide for all expenditures of any nature pertaining thereto, and receive and have the disposition of the products from the milk from their respective cows.

A good dairy farm is pretty apt to be good for general farming, and, while good farms in general are not always good dairy farms, many of the disadvantages, so far as the farm is concerned, may be successfully overcome by the skillful dairyman.

A loss of temper in the dairy barn means a loss of money.

### Experiments in Duck Feeding.

Some very instructive results were obtained from a New York experiment, noted by the Department of Agriculture, in feeding young ducks on grain and meat rations contrasted.

Thirty-two ducklings were fed a ration of mixed grain and skim milk or curds containing no animal matter.

Thirty-two other ducklings of similar size were fed mixed grains with animal meat and fresh bones, or dried blood.

Both were well balanced rations.

In the first ration all the protein came from vegetable sources and in the latter about one-half of it was from animal sources.

It was soon noticed that the animal-meal birds were developing rapidly and evenly, but that the grain-fed ones were becoming thin.

It was a contrast to see the long-necked, scrawny grain-fed birds, with trough full of good, apparently wholesome food before them, standing on the alert and scrambling in haste after the unlucky bug or hopper that ventured into their pen; while the meat-fed ducks lay lazily in the sun and paid little attention to insect life.

The thirty-two meat-fed birds lived and thrived, but at the end of the fifteenth week thirteen of the grain birds had died, and the others were in poor condition.

The remainder were then fed four weeks on the meat ration and made rapid gains.

Rations are recommended in which 40 to 50 per cent of the protein is supplied from animal sources.

### Good Sheep Profitable.

One of the strongest papers read before the Iowa Sheep Breeders' Association was that by A. J. Blakely, of Grinnell, on "Is it Profitable to Keep Sheep on Farms?" Mr. Blakely's discussion of this question was thorough and complete.

It is his opinion that there is profit in raising sheep on farms if the problems connected with proper food supply and the proper breeding of sheep are studied and understood by the farmer.

While good sheep with good management are profitable on our best lands, sheep with light fleeces or with poor mutton qualities will not pay anywhere anywhere more than the breeding, keeping and fattening of inferior scrub cattle, or keeping a dairy of twenty cows that produce no more butter and cheese than ten good cows well fed and well managed. He continued:

"Nothing short of the use of better sires, and better care and management will ever save the stockmen from poverty. If they don't reform they must sell out or be sold out and go hunting for cheap lands, where they think it will pay to keep stock."

### For Diseases of Sheep.

Dr. Waterman, of the Michigan Agricultural College, gives the following remedies as the most effective in the case of the parasitic diseases:

For Tape Worm—Oil of male fern, one teaspoonful; arca nut powder, two teaspoonfuls; turpentine, one teaspoonful; new milk, four ounces. Give after fasting and follow with a laxative. If sheep are run down give a tonic afterward.

For Stomach Worms—Give in grain equal parts of sulphate of iron and sulphate of copperas. Dose, ten ounces of mixture for thirty-five lambs. Give daily two weeks, then stop one week, and give again. Mix in water and then pour the water over the grain.

Another Remedy—Gasoline, one tablespoonful; new milk, four ounces. Or of one per cent coal tar creosote solution give two to four ounces.

For Nodular Diseases—Give the copper and iron solution as advised for stomach worms.

Never send a boy and a dog to bring the cows from the pasture unless you know your dog.

### Cheap and Efficient Calf Quarters.

One of the reasons for failure in rearing calves on skim-milk is the lack of proper quarters for the calves. The old way of feeding a calf from a pail in an open lot may do if there is but one calf. Where there are two calves in the lot together the trouble begins; if there are more than two the trouble multiplies with each additional calf. We may tie them with ropes, but in this, as in many other things, time is money, the ropes are gone half the time, writes E. H. Webster, in *The Industrialist*, and the calves will not always want to come without persuasion.

When a neat, strong and efficient stanchion can be made there is no excuse for the old "happy-go-lucky" way of doing things. For successful work in rearing calves, one must have a shed for them in stormy weather and in hot weather.

We grant that the dairyman has this shed, and that it is at least sixteen feet wide and closed tight on the north side and the ends. It may be built out of any kind of material, even to the straw roof, if nothing better can be afforded. It may be any length, so that it offers sufficient room for our calves. Under this shed, three and one-half or four feet from the back wall, can be built our stanchions. The lumber for a section of ten stanchions is as follows: Thirteen pieces one by six by fourteen feet, three pieces one by four by fourteen feet, two pieces one by twelve by fourteen feet, and two pieces one by twelve by sixteen feet. Other materials would be twenty bolts, three and one-half by three-eighths, four six-inch strap hinges, four hooks, and the necessary nails to put all together. Common fencing boards can be used for the four and six inch stuff, and hard-pine sheeting, free from knots, for the feed boxes and partition between them.

The stalls and stanchions are two feet wide between the partitions and three and one-half feet high. The board along the front of the feed boxes is hinged so it may be turned down and the boxes thoroughly cleaned out. The three and one-half foot alley between the front of the stall and the wall gives plenty of room for the feeder to work in feeding milk and grain.

The calves quickly learn their places. They can get no feed until they are in place, when a simple turn of the wrist fastens them. When they are through eating their grain, the loose side of the stanchion is thrown back and the calf is free. At the end of these stanchions should be made a rack for hay. This is the cheapest labor saver and money maker on the dairy farm, except the hand separator.

The makers of bull-butter have been looking far and near for some ingredient that will color oleomargarine and yet form a very considerable proportion of the villainous stuff. The internal revenue officers have decided against every coloring ingredient on the ground that so small a percentage was used that it could not be called a substantial part of the compound but was added for coloring effect only. Had the coloring matter composed ten per cent of the bulk of the oleomargarine and possessed food value the internal revenue officers might possibly have ruled that it was a legitimate part of the compound although the law gives them no authority to do so. These government officers have a penchant for splitting hairs. Now, however, a Chicago savant thinks he has found a solution of the coloring problem in eggs by which his butterine is to consist of thirty per cent fresh eggs, twenty per cent tallow and fifty per cent lard. The tallow and lard are to be melted and mixed. The eggs are to be beaten for fifteen minutes and then mixed with the other ingredients, after which the mixture is to be boiled from fifteen minutes to half an hour when it will be cooled off and worked. How the eggs will suit the consumers of oleo is yet to be determined.

Strike!—if they don't give you Johnson's Napa Soda when you ask for it.

Whitewash.

Whitewash is so useful in the summer season that it is used to combat the same time too. It is used to keep the lice from the hen-houses or coops. When the whitewash is being applied and while in its application it is best to keep the lice from the hen-houses or coops. When the whitewash is being applied and while in its application it is best to keep the lice from the hen-houses or coops. When the whitewash is being applied and while in its application it is best to keep the lice from the hen-houses or coops.

The value of the lime wash is its cleansing influence. It has a sweetening influence; it is a good disinfectant; it helps to remove or destroy bad odors; it lends its aid to creating clean, bright, healthful quarters. For this it has great value, but after it is set or dry its influence is very slight. It is good for the health of the place to use whitewash, but do not depend upon it to kill or keep away the lice, for if you do it will disappoint you. You must make use of other methods to be free from hen-lice.

Of all things, nothing excels crude petroleum for destroying and keeping away the lice. Some make use of this once a year to paint the entire inside of their hen-houses and coops for the young chicks, and continue its use throughout the whole season for coating the roosts and nest-boxes. It is very greasy and must be used knowingly and in a way that will keep it from the clothes of those who go into the houses. All these products may be used to advantage, if properly applied; at the same time it is best to know the real value of each. Many who use the lime wash do so with full assurance that it is proof against hen-lice of all kinds, and in this assurance they rest the case till some day they find the hen-house full of the insect pest, and wonder how it can be. Whitewash is very useful as above stated, but it cannot be depended upon to keep away hen-lice.

Like Darius Green, the inventor of the latest milking machine fell victim to his own contrivance. This man is Adam Sechel, of Blackwell, Oklahoma, and his machine is supposed to work by means of a gasoline engine for the suction required to draw the milk from the teats through rubber tubes. The other day he invited a friend to witness the test and together they shut themselves in a barn. The machine was started, but it was new business to the cow. She first kicked over the engine, setting fire to herself and the barn and ran backward and forward through the stalls with the burning engine attached. Sechel was badly burned. The neighbor escaped through a small opening in the building. Sechel insists his machine will revolutionize the milking business and declares that only the ignorance of cow-stands in the way of its ultimate success.

The heavy work season of the farm nearly always occasions galled or sore shoulders of work horses. Here is a simple and cheap way to prevent this: "Take an ordinary sweat pad and cover the surface next to the shoulder with white soft oilcloth. Be very careful to have it put on very smooth, without any wrinkles or lumps on its surface. The cover is put on by neatly sewing it with strong thread, so that it will not become displaced. The trouble with the horses' shoulders in this respect is caused by sweating, and as the oilcloth presents a cool, dry surface and does not hold the dampness as leather or cloth does, it prevents the shoulders from becoming sore in almost every instance.

Sheep Perish by Thousands.

GREAT FALLS, Mont., May 19.—The heaviest sheep and cattle loss in the history of Montana the damage of which will reach \$5,000,000, has been caused by the terrible storm which has been raging for the last three days. In some sections fully 90 per cent of the sheep on the ranges have perished. Three herders at least have wandered away in the blinding storm and have been frozen to death. It is difficult to get names. An aged herder employed by H. H. Wilson at Portage was lost Tuesday. Two more in the Shelby Junction country employed by the Flowers Cattle Company are missing and there is no hope that they can be found alive.

Herders have abandoned their flocks on every hand and fled for safety to the settlements and ranches. Nothing like the fury of the storm has ever been witnessed in Northern Montana.

Of a consignment of 600 cattle bound from Havre all but five were found frozen stiff. Losses are reported on every hand and this district will feel the effects of the losses for years.

BUTTE, Mont., May 19.—Further advice to-night tell of an appalling condition on the ranges of the north as a result of the storm which swept Montana Sunday. The worst reports come from Teton county, where dead sheep and cattle can be found in the snowdrifts in piles of hundreds. In Cascade county the snow averages two feet deep. At Shelby Junction, farther north, the drifts are so deep that the main street of the town is impassable to empty wagons.

All the herders have been driven in and 230,000 sheep are running wild near here. No word has been received of the three missing herders, and it is believed they have perished.

California's favorite hot weather drink is Jackson's Napa Soda.

**Tuttle's Elixir**

has drawn the following expressions of endorsement from its grateful users in every state and territory in the Union.

Invaluable for man or beast. Gives immediate relief. Unequaled for Colic. Very satisfactory results. Best for Spavin. Shoe Boli removed. Wouldn't be without it. Never lost a hair. Saved a heap of money. Speedily relieves pain.

**\$5000 REWARD**

for every one of the above endorsements that can be proven spurious.

Tuttle's Elixir for use in the stable. Tuttle's Family Elixir for use in the home. Both are unequalled remedies. Fifty cents a bottle either at any drug store. Sample free for 6c in stamps to pay postage. Used and endorsed by Adams Express Co. Tuttle's Elixir Co., 437 O'Farrell St., San Francisco, Cal.

Beware of all cheap imitations, none genuine but Tuttle's.

**POSITION WANTED**

BY A THOROUGHLY COMPETENT MAN, and a graduated veterinary surgeon, with a large stable or breeding farm, in his professional capacity or in connection with the management. Not afraid of work. Address A. J. BREEDER AND SPORTSMAN, 36 Geary street.

**MARK LEVY & Co.**

MARK LEVY Expert Cutter and Fitter. Tailor. -4450-4452-4454-4456-4458-4460-4462-4464-4466-4468-4470-4472-4474-4476-4478-4480-4482-4484-4486-4488-4490-4492-4494-4496-4498-4500-4502-4504-4506-4508-4510-4512-4514-4516-4518-4520-4522-4524-4526-452

Improve Your Dairy.

The farmer who keeps cows to produce milk or butter needs a dairy cow. If beef is the object in view he wants an entirely different cow. It is impossible for him to produce both successfully and with profit from the same animal.

Often I have this question asked me by our patrons: "Where can I get cows giving a large quantity of rich milk?" There are two ways of getting such animals—one by purchasing, the other by growing them yourself. A man who starts out to buy high class dairy cattle will soon learn that the man who understands his business is not selling his best cows until their days of usefulness are past.

When a man offers to sell a cow that promises to be a good milker for any reasonable price, the buyer is apt to discover after he purchases her that she deceives her looks, and that she has some secret fault which will show itself later on.

Dairymen who are excellent judges of cows will sometimes get hold of first-class animals, but as a rule they will buy them from men who are not acquainted with their business, and with whom the possession of a cow of this kind is an accident. Even then, only a few of these cows will come up to his requirements, or give anything like the satisfaction of those that he might raise himself, and I think that when he counts the time and money that he spends in experimenting in this way, he will come to the conclusion that the best way for the dairy farmer to improve the quality of the herd is by raising his own stock. It does not take so many years to grow up a herd in this way as one might suppose.

In raising up a herd himself there are several advantages to be derived, the principal one of which is that he be able to control the breeding. Milking qualities are hereditary and the heifer whose sire's dam and grandam is a good milker will be a good milkmaid also.

In raising calves for the dairy always feed for milk instead of beef, and the heifer intended for the dairy should not have the same treatment in feeding as the heifer intended for calf production only.

The dairy cow is better as a lean animal than as a fat one, and she should be kept during her youth in such a way that she will not lay the product of her food on her ribs, but put it in the pail.

The subject of clean milking is of importance to the dairymen and cow owners not only on account of the increased yields of milk and butter fat which thereby are obtained, but since the strippings are always the richest portion of the milking the average fat-content of the whole is increased by adding these to the mess of milk. This is of especial importance where the mixed herd milk is apt to come below the standard—three or three and one-half per cent. By thorough milking—which means not only clean milking in the ordinary sense, but this followed up by manipulation of the udder—the average fat-content of the milk from a cow or herd may be increased from one to six-tenths of one per cent according to the thoroughness with which the work of milking was previously done.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

No Foot--No Horse

Special Prices to Dealers, Horse Shoers and Agents

You don't have to pack horses' feet when you use STRAP VETERINARY and HOOF OINTMENT

Office Cottingham Bros. Kansas City, Mo.

Every feature connected with the PALACE HOTEL was designed and introduced for a double purpose—surrounding guests with comforts, conveniences and entertainment and adding to the popularity and reputation of

California's Colossal Caravansary.

In the center of the hotel is the famous court, and off of this are the equally famous grill rooms. For your convenience telephone and telegraph offices, writing and reading rooms, barber shop, billiard parlor, carriage office, news stand and type writer offices are directly off the court. Outside—the wholesale and shopping district, theaters, clubs, banks and railroad offices are a step from the entrance.

### OAKWOOD PARK STOCK FARM,

Danville, Contra Costa Co., Cal.

ELECTIONEER

NUTWOOD

**NEERNUT** Record 2:12 1-4  
Reg. No. 19810

(SIRE OF NEERETTA 2:09½)

By Albert W. 2:20, son of Electioneer.

Dam Clytie 2d by Nutwood 2:18 3-4

SEASON 1903 AT

**SANTA ANA, CAL.**

NEERNUT was foaled in 1891. He is one of the best representatives of the Electioneer-Nutwood cross which produced the great two-year-old Ariel. He stands 15½ hands, weighs 1100 lbs; blood bay with black points; trots without boots. He is a great race horse and his record (2:12¼) was pronounced by competent observers to be as good a 2:08, as he started in fourth position and was forced to go a wide mile.

Terms: \$20 single service, \$40 for the season ending July 1st, with usual return privileges; \$60 to insure a foal. Apply to or address

GEO. W. FORD, Santa Ana, Cal.

## SIR GIBBIE 2D.

No. 370

American Hackney  
Stud Book

**Hackney Pony Stallion**  
13.3 hands.

The Only Representative Stallion in  
America of the Two Best British  
Hackney Pony Strains.

BOTH HIS SIRE AND DAM LINES  
have long been recognized as the surest  
producers of beauty of conformation, com-  
bined with true, high and spirited action.

SIR GIBBIE 2d will stand at

**MENLO STOCK FARM**

during the season of 1903 at \$30. Mares  
will be boarded by the season, or during  
service, at the rate of Ten (\$10) Dollars per  
month. The Menlo Stock Farm will not be  
responsible for any accidents to any mares  
(or the foals of said mares) while on the  
Menlo Stock Farm. All mares and foals  
must be removed from the ranch before July  
1, 1903. Apply to

JAMES McDONNELL,  
Supt. Menlo Stock Farm,  
Portola, San Mateo County, Cal.

## SIDNEY DILLON 23157

Sire of DOLLY DILLON 2:07 (the Fastest Mare of 1901),  
B. S. DILLON 2:25 and CAPTIVITY 2:28 1-2.

**Santa Rosa Stock Farm**  
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney  
2:19½; dam Venus (dam of Adonis 2:11½,  
Leah 2:24½, Cupid 2:18 (sire of Venus II  
2:1½), Psyche 2:19½ and Lottie Park 2:16½,  
and she was also dam of Juno, the dam of  
Mercury 2:21 and Ida 2:30) by Venture 2:27½,  
sire of dam of Directum 2:05½; second dam  
s. b. by Algerine, son of Whipple's Ham-  
bletonian. SIDNEY DILLON is a model of  
symmetry and imparts his grand individual-  
ity, inherent speed and excellent disposition  
to all his progeny. Best of care given mares,  
but no responsibility for accidents or es-  
capes. Usual return privileges if horse is  
still in my possession. For pasturage and  
other information regarding shipment of  
mares address

FRANK TURNER,  
Supt. Santa Rosa Stock Farm,

## The Thoroughbred Stallion

# St. Carlo

Hermit,.....	Newminster
St. Blaise.....	St. Clusion
Fusee.....	Murrayas
	Vesuvienne
Kingfisher.....	Lexington
	Elhan Lass
Carla.....	The Ill-Used
Carla.....	Camilla

ST. CARLO won the Great American at Brooklyn, the Foam Stakes at Coney Island, the White Plains Handicap, was second to Chaos for the Futurity, and won about \$29,000 as a two year old. He is a wonderful young sire, among his get being Ruinart (winner of the Burns Handicap Palace Hotel Handicap and \$11,650), Zamar II (winner of 19 races as a two-year-old and \$7695), Joan, February, St. Outhbert, St. Callatine, Count of Flanders, Lord Marmion May Boy, Our Climate, Glendinning and many others.

ST. CARLO will make the Season of 1903 at the

**MENLO STOCK FARM, SAN MATEO COUNTY, CAL.**

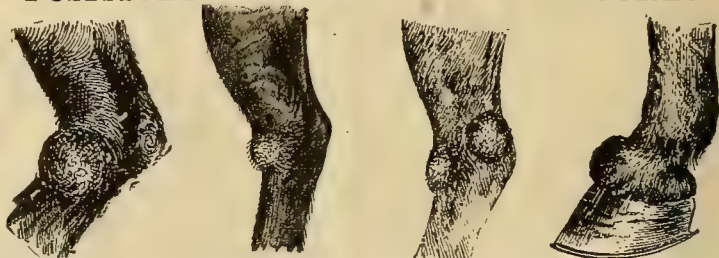

**TERMS FOR THE SEASON, - \$100**

The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. For further particulars in regard to above Stallion apply to

JAMES McDONNELL, Portola, San Mateo Co., Cal.

## "SAVE-THE-HORSE" SPAVIN CURE

POSITIVELY AND PERMANENTLY CURES

BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE, CURB, SPLINT, CAPED HOCK, SHOE BOIL, WIND, PUFF, WEAK AND SPRAINED TENDONS, AND ALL LAMENESS.

FROM A REPUTABLE AND NOTED TRAINER.  
Glenville Driving Park, Cleveland, Ohio.  
For the enclosed \$5 please send me one more bottle of "Save-the-Horse". It is doing great work.  
Respectfully,  
MILLARD F. SANDERS.

Hartland, Mich.  
Find enclosed money order for \$5, for which send me another bottle of "Save-the-Horse" spavin cure, as it has done all you claim for it for me. With the bottle I bought of you I took off a curb, spavin and a side bone on a three-year-old mare. That other spavin cures refused to help in the least. I consider your spavin cure the best on the market.  
E M PARSHALL.

Howick, Quebec.  
I had a mare suffering from a bone spavin and very lame. I concluded to try a bottle of "Save-the-Horse," and at the expiration of six weeks' treatment she was free from all lameness and I consider it one of the greatest compounds made.  
DAVID BARRINGTON.

Edgewater, N. J.  
Enclosed check for \$5, for which you will kindly send me another bottle of "Save-the-Horse" by Wells Fargo Express soon as possible. The horse that I have been treating with "Save-the-Horse" went sound and I sold him, and the last I heard of this horse he was still going sound and was working

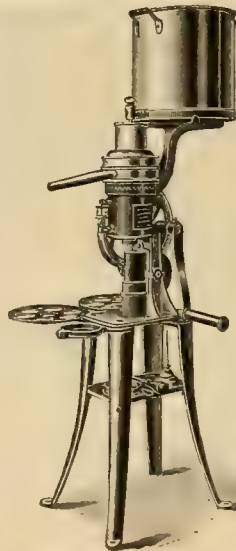

every day, and I think he will stay sound. The bottle I am ordering now I will use on another horse that has a pair of spavins and a curb; he does not go very lame but walks on his toes, but I think "Save-the-Horse" will bring him around so that he will walk all right. Very truly,  
OTTO MEYER.

The fire iron is uncertain and invariably only aggravates the disease or injury; blistering is less effective than the fire iron, and both necessitate laying up the horse from four weeks to two months. Arsenic, mercurial and poisonous compounds produce irreparable injury.

"Save-the-Horse" eliminates all these factors. Horse can be worked continuously. It can be applied at any time, anywhere, any place, and in all conditions and extremes of weather—hot or cold. And no matter what the age, condition or development of the case, or previous ailments in treating, the concentrated, penetrating, absorbing power of this remedy is un-failing.

**\$5 PER BOTTLE.**  
Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest of cases.  
Copy of Guarantee sent upon application.  
\$5 at all druggists and dealers, or sent express prepaid.

TROY CHEMICAL CO., Troy, N. Y. D. E. NEWELL, Pacific Coast Agent  
519 Mission St., San Francisco.

## The New Simplex Cream Separator.

MR. MUNROE, CARE OF WEATHERLY CREAMERY CO., PORTLAND, OR.

Dear Sir: The No 2 700-lb Simplex Hand Separator I bought from you is a dandy. It will separate 850 lbs. of milk per hour by opening the milk faucet wide open. I made several tests of the skim milk, running the machine over capacity and skimming 850 lbs per hour at 50 degrees. Skim milk tested .01, 700 lbs. at 56 degrees .02.  
My boy ten years old ran the Separator to skim 291 lbs of milk. I made four pounds more of butter off of 1200 pounds of milk than I did with the old machine. Any one in doubt of the Simplex Separator's work, refer them to me. It is far easier to clean than the Separator.

Yours respectfully,  
WM. H. MILLER,  
Fish Hawk, Columbia Co., Or.

Send for New 1903 Creamery Catalogue, just issued, and special Literature on Simplex Separators and Churns.

# NUSHAGAK

Reg. No. 25939

Black Horse 15-3/4 hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15 1/4, Sabina 2:15 1/4, Sabledale (at 2 years) 2:18 1/4, Buffington (at 2 years) 2:20 1/4 and 36 others in 2:30 list. Dam, Fidella (trial 2:35 at 2 years), dam of Fidette 2:28 1/4, dam of Mary Celeste (at 2 years) 2:17 1/4 by Director, sire of Directum 2:15 1/4, Direct 2:05 1/4, Nathan Straus 2:05 1/4, Direction 2:08 1/4, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H 2:13 1/4, etc. Third dam by Lancet, son of McCracken's Blackhawk 767.

NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17 1/4, Majella B (2) 2:29 (trial at 4 years 2:13 1/4), and The Boquet (trial at 3 years) 2:21. His son Aristo (at 3 years) 2:17 1/4 took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best of colts that ever started in the Occident Stake.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

Limited to 40 outside mares, at \$50 the Season,

with usual return privilege. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed. First-class pasturage for mares, \$3 per month; no barbed wire. Address

WALNUT GROVE STOCK FARM,  
Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morshede's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

# Guy McKinney

REGISTERED No. 37625

Season of 1903 at

LINDEN, SAN JOAQUIN CO.

Saturdays at Higginbotham's Stables, Stockton.

FEE \$30 FOR THE SEASON.

GUY MCKINNEY is a beautiful black, 16 hands high, and weighs 1300 pounds, a model of symmetry, handsome head and neck, short back, the best of legs and feet, good disposition and great intelligence. He is a perfect gaited trotter, and with very little handling showed a 2:30 gait. In his blood lines are represented the greatest strains of the American trotter, and the greatest producers of early and extreme speed. Good pasturage at \$1.50 per month. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

D. BRYSON, Linden, Cal.

THE BARON WILKESES WON 25 PER CENT OF ALL THE MONEY ON THE GRAND CIRCUIT OF 1902. Breed to the Futurity Winning Family.

# BARONDALE 2:11 1/4

TOM JAMES,

1120 Alameda Ave., San Jose, Cal

# SEYMOUR WILKES

REG. No. 0232.  
Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

Lakeville, Sonoma Co., Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large hand-ome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Eviston (3) 2:22 in 1901.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$100. 0 TO INSURE. Mares can be shipped direct to ranch particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables 408 Bush street, San Francisco

# BONNIE DIRECT 2:05 1/4

Winner of the Fastest Five-Heat Race Paced in 1900. Biggest Winner of the "New" Pacers of 1900, having \$7575 to His Credit the first year out.

Dam BON BON 2:26 (dam of Bonsilene 2:14 1/4) by Simmons 2:28; second dam BONNIE WILKES 2:29 (dam of 3 in list) by George Wilkes 2:22; third dam BETTY VILEY by Bob Johnson, thoroughbred son of Boston.

BONNIE DIRECT will serve a limited number of approved mares during season of 1903, at \$100 the season. Mares not proving to be in foal can be returned next season or service fee refunded, at the option of the owner of mare. Address

C. L. GRIFFITH, Pleasanton, Cal.

Pedigrees Tabulated

Write for prices. BREEDER AND

# ZOMBRO 2:11

The Greatest Son of the Great McKinney and

Sire at 10 years of age of

ZEPHYR (4) 2:11

ITALIA (3) 2:23 1/4

LORD KITCHENER (4) 2:29 1/4

and a number that have been worked and given trials as follows, all trotters: Zephyr (4) 2:06 1/4 in a race, Julia M (5) 2:12, Italia (3) 2:15 1/4, Zombowette (3) 2:17, Suomi (3) 2:17, Lady Zombro (5) 2:17, Lord Kitchener (5) 2:19 1/4, Tee Dee Cee (4) 2:21 1/4, Zorica (5) 2:25 1/4, Gold Coin (4) 2:36 1/4, Mabel W. (4) 2:38 1/4, Edmond S (5) 2:38 1/4, Gyr Falcon (5) 2:30, Zombro C (5) 2:29. Besides six or seven more two and three year olds that are now stepping quarters in 35 seconds at the Los Angeles track.

ZOMBRO will make the season of 1903, from February 1st until June 1st, at my barn near Los Angeles track.

FEE \$75 THE SEASON.

Usual return privilege. Due care taken but no responsibility assumed for accidents or escapes. Address

GEO. T. BECKERS,  
University, Los Angeles Co., Cal.

THE STANDARD-BRED TROTTER STALLION

# BOODLE Jr.

By BOODLE 2:12 1/4, sire of Ethel Downs 2:10, Thompson 2:14 1/4, and 4 others in 2:30 and better. He by Stranger, sire of 33 in 2:30. Dam NINA B by Electioneer, sire of Arion 2:07 1/4, Sunol 2:08 1/4, Palo 2:08 1/4, and 161 more in 2:30 list.

BOODLE Jr. is one of the best bred, best looking and best stallions on the Pacific Coast. He will make the Season of 1903 at

J. D. CARR'S GABILAN RANCH, Six Miles East of Salinas

Fee \$25 for the season, payable at end of season, or \$15 for single service, payable at time of service, otherwise will be considered at season rates. Any mare entered for the season and paid for will be granted the usual return privileges if proven to be not in foal provided that next year the owner of mare still owns her and J D Carr still owns the horse. Good pasturage at \$2 per month, but no responsibility assumed for accidents. Season open now and will close August first 1903. BOODLE Jr. is a sure foot getter, his colts are all uniform, and of good color, and show fine speed and action. He is 16 hands high and weighs 1200 pounds, is of a rich mahogany bay.

Apply to

J. D. CARR, or JOHN GAESIDE, at Gabilan Ranch.

43-BREED FOR SIZE, STYLE, SPEED, GAMENESS.

SANTA CLARA, CAL.

TELEPHONE: Suburban 15.

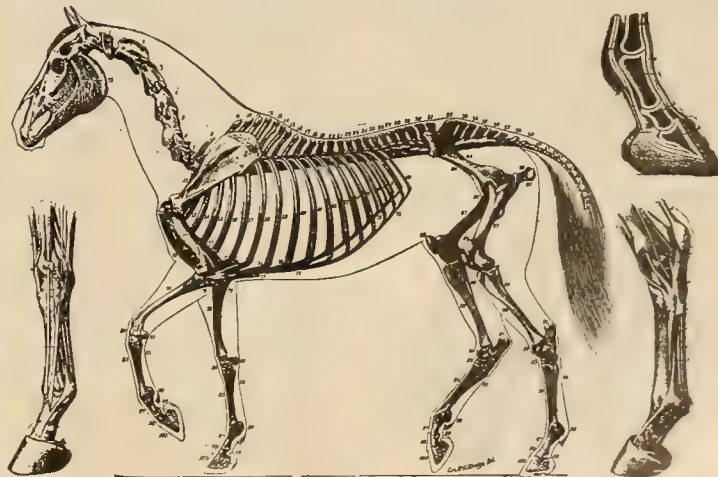

# MAMMOTH CHART

SHOWING

## Skeleton of the Horse

## GIVEN AWAY TO OUR SUBSCRIBERS

This Chart is lithographed on tinted paper and is 22x28 inches. It will be found invaluable to every owner of a horse as the names of all the Bones are given, as well as the names of the Tendons and Ligaments of the legs. By studying this Chart almost any lameness can be located and the proper remedies applied. The accompanying engraving will afford an idea of its appearance. No

similar Chart has ever before been published. The artist, in preparing this Skeleton, visited the American Veterinary College in New York City and made drawings from actual skeletons, thus insuring absolute accuracy. This Chart sells for One Dollar, but any reader can have it who will remit THREE DOLLARS

## Between the dates of May 1 and June 1,

1903, for one year's subscription, It will be mailed, carefully packed, in a heavy pasteboard for safety. Address

BREEDER AND SPORTSMAN, 36 Geary St., San Francisco

MARTIN CARTER. Nutwood Stock Farm, Irvington, Alameda Co., Cal.

## Limonero=3=2:15 3=4.

Reg. No. 33389

(A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15 1/4, bred at the Palo Alto Stock Farm, is conceded by all who have seen him to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He has 35 two and three year olds that have never been trained. All of them are handsome, big bays and browns. From their appearance and the predictions of the best judges many of them are sure to be good race horses with every prospect of some star performers. A number of these youngsters are to be seen at the Los Angeles track.

LIMONERO 2:15 1/4 got his record as a three-year old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating a field of six of the greatest three-year-olds of that year, including the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity.

LIMONERO 2:15 1/4 will make the season of 1903 at the

AGRICULTURAL PARK, LOS ANGELES.

Fee \$25, for a Limited Number of Good Mares.

Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in care of

HARRISON G. ARMS.

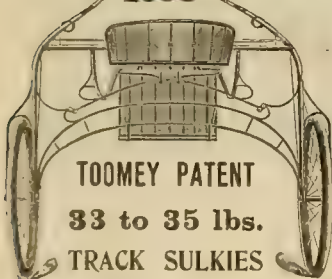

J. H. WILLIAMS,

Owner.

## Tales of the Turf

By William B. Fasig.

Trotting horsemen the world over knew the late W. B. Fasig and that he was in a class of his own as an instructive, interesting and humorous writer of trotting horse subjects. W. H. Gocher, secretary of the National Trotting Association, has put Mr. Fasig's writings in book form, adding much of interest thereto, and the book is now ready for delivery.

The table of contents includes the following:

TROTTER TRACKS.—How to build and manage them, with plates showing how to lay out a half-mile track, a mile track and a kite-shaped track. This article is one that a race track official needs in his business.

THE SECRETARY.—His trials and tribulations in the merry days of racing. On the other side of Jordan he may find rest; there is nothing for him here but advice.

THE SANDPIPER.—How the Dutchman did not balance his bill for gravel, while the little man in brown stood pat, and those who had the real sure thing—well, they lost, as usual.

A STRANGE LAND.—How a shipwrecked Bukey made a stir in another racing world. Utopian, unique and if you do not believe it, you can say it is untrue.

MCDONALD.—How the best green horse in Missouri broke into turf history. He won the Transylvania. That is enough. If you were there you know why.

STRANGER.—A lightning-going pacer of Northern Ohio, whose history has a pinch of romance hooked on to it.

ANDY AND I.—What the well known pair learned in France and England after the hotel clerk checked the sign language. They could not parlez vous.

RISE OF A LIFETIME.—How Flying Jib put a crimp in the boss trotter on the speed drive in Wade Park.

PAT SHANK.—Someone said he was a colt breaker, but he broke the wise when the thirteen combination and Eloise won at Detroit.

We will send this valuable book free as a premium to anyone sending two new subscriptions for THE BREEDER AND SPORTSMAN at \$3 each, or will send the book alone, postpaid, on receipt of price, \$2. Address

BREEDER AND SPORTSMAN,

36 Geary Street, San Francisco.

## Grease Heel, Scratches,

## MUD FEVER, HOOF ROT, SPEED

CRACKS—Cases where ulcerations extend, with transverse cracks which open at every step and often bleed, no matter how complex, aggravated, deep seated or chronic, if treated according to directions, as given on circular with every box, positively cured with

## Veterinary Pixine

After Blistering. Veterinary Pixine is the very best application that could be indicated. It absorbs all inflammatory exudate and hastens the reparatory process. Will heal the most severe cases without scar, and will prevent loss of hair. As a Preventive—If a light application of Veterinary Pixine is used before speeding, driving in wet muddy or slushy weather, or in the snow, your horse will never have speed cracks, scratches or grease heel.

For Hoofs—It will keep the hoofs healthy, soft and in perfect form.  
For Old and Chronic Sores, Etc.—Veterinary Pixine heals collar and saddle galls, hobbles, chafes, abscesses, inflammatory swellings, sores and all skin disease. In cases of emergency it is invaluable.

This penetrating, stimulating, soothing, absorbing, antiseptic healing ointment heals from beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy granulation, not by drying and scabbing.  
2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00.

A postal brings "Shooting Facts." (Third Edition.)

## CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES AND DRIES IN quickly and DOES NOT GUM AND FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth—ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE FOR CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FLESH—A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CERTAIN CURE FOR THRUSH and SCRATCHES

We Guarantee That It Will Do What We Claim

and Will Refund Money if It Fails.

PRICES:—Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2½-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gall Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

No. 1. The Transylvania.....\$6,000 For Trotters eligible to the 2:12 class June 1, 1903. Horses to be named September 9th. Entries transferable on or before that date.	No. 5. The Tennessee.....\$3,000 For Pacers eligible to the 2:08 class June 1, 1903. Horses to be named September 9th. Entries transferable on or before that date.
No. 2. The McDowell.....\$5,000 For Trotters eligible to the 2:10 class June 1, 1903.	No. 6. The Johnston.....\$2,000 For Trotters eligible to the 2:24 class June 1, 1903.
No. 3. The Walnut Hall Farm Cup.....\$3,000 For Trotters eligible to the 2:15 class June 1, 1903. A silver trophy valued at \$500 will be presented to the owner of the winner by Mr. L. V. Harkness.	No. 7. The West.....\$2,000 For Trotters eligible to the 2:29 class June 1, 1903.
No. 4. The Blue Grass.....\$2,000 For Trotters eligible to the 2:19 class June 1, 1903.	No. 8. The Kentucky.....\$2,000 For Three-Year-Olds, Trotting Foals of 1900.
	No. 9. The Lexington.....\$2,000 For Two-Year-Olds, Trotting Foals of 1901.
	No. 10. The Wilson.....\$2,000 For Pacers eligible to the 2:20 class June 1, 1903.

#### CONDITIONS.

Entrance Fee to each 5 per cent, and 5 per cent additional will be deducted from each winner of first four moneys. All payments are FORFEITS, and are due in cash on dates specified as follows: No. 1, \$35 June 1; \$75 July 15; \$75 September 1; \$75 evening before race. Nos. 2, \$40 June 1; \$70 July 15; \$70 September 1; \$90 evening before race. Nos. 3 and 5, \$30 June 1; \$40 July 15; \$40 September 1; \$40 evening before race. Nos. 4, 6, 7, 8, 9, 10, \$25 June 1; \$25 July 15; \$25 September 1; \$25 evening before race. All Entries (except in Transylvania and Tennessee) must be named June 1.

**Division of Purses** 50, 25, 15 and 10 per cent, except in No. 3 The Walnut Hall Farm Cup, which will be divided as follows: \$1400 to first horse, \$700 to second, \$400 to third, \$300 to fourth, \$100 to driver of winner and \$100 to winner of fastest heat.

All races will be contested under the Rules of the National Trotting Association (of which this Association is a member), unless otherwise specified.

Right reserved to reject any entry this Association does not want. No return of any payment because of death of nominator or entry, nor will the death of nominator make void the entry.

Nominators will be held for full amount unless written notice of withdrawal is received by the Secretary, bearing postmark on or before date when a payment is due.

In all races, excepting The Transylvania and The Tennessee, more than one may be named as one entry, providing they are in the same stable. In case where two or more horses have been named as one entry, and any horses have been separated from the stable from which they were originally entered, and such separation made according to rule, they shall be eligible to start in the race (if forfeits falling due after such separation have been met according to conditions), upon the payment of forfeits which fell due before said separation.

**Notice.** The Kentucky and Kentucky, The Two-Year-Old Futurity and Lexington, The Transylvania and McDowell, The Transylvania and Cup, The Cup and Blue Grass, The Blue Grass and Johnston, The Johnston and West, will all be carried with from three to seven days between, but no horse can be entered in more than one race on one payment. Don't ask it.

#### Important Payments Due.

No. 11 Kentucky's Futurity (for Three-year-olds, foals of 1900).....\$20,000  
A payment of \$50 June 1 made on each eligible three-year-old that owners desire to keep in will carry entries to within thirty days before the meeting (September 1).

No. 12 The Futurity (for Two-year-olds, foals of 1901).....\$5,000  
A payment of \$25 June 1 will keep eligible entries good until thirty days before meeting (September 1).

**Purses for All Classes** \$1000 or more each, will be opened later, to close September 9. Stables can get two or more races for their horses without shipping. Send entries and payments therefore to the Secretary. Programme on application.

R. C. ESTILL, Pres.

E. W. SHANKLIN, Sec'y,  
LEXINGTON, KY.

## STATE AGRICULTURAL SOCIETY SACRAMENTO, CAL. STANFORD STAKE OF 1905 FOR FOALS OF 1902. TO BE TROTTED AT THE CALIFORNIA STATE FAIR OF 1905. ENTRIES TO CLOSE JUNE 1, 1903, With H. LOWDEN, Acting Secretary, at the Office in Sacramento.

FIFTY DOLLARS ENTRANCE, of which \$5 must accompany nomination June 1, 1903; \$5 November 1, 1903; \$10 June 1, 1904; \$10 June 1, 1905, and \$20 on the tenth day before the first day of the State Fair of 1905. \$300 added by the Society. Mile heats, three in five, to harness.

The stakes and added money to be divided 50, 25, 15 and 10 per cent. Right reserved to declare two starters a walkover. When only two start they may contest for the entrance money paid in, to be divided 66 2/3 per cent to the winner, and 33 1/3 per cent to the second horse. A horse distancing the field shall be entitled to first money only. In no case will a horse be entitled to more than one money.

Nominators are not held for full amount of entrance in case colt goes wrong; only forfeit the payments made, which relieves you from further responsibility, and declares entry out.

The stake is growing in value each year; every breeder should enter in it; it will enhance the value of his colt in case he desires to sell.

A special Stake will be opened in 1905 for colts entered originally in this stake, and Occident Stake of 1905, that develop a pacing gait, to be contested for as three-year-olds in 1905.

Your colt entered in the Occident Stake for 1905 is eligible for entry in this stake.

Remember the date of closing is June 1, 1903.

H. LOWDEN, Acting Secretary.

An entry in this stake will enhance the value of your colt. First payment only \$5. Entry Blanks can be obtained from Acting Secretary, or this office.

## California State Agricultural Society. Special Harness Stallion Stake for 1905. FOR THEN THREE-YEAR-OLDS.

For the Get of Stallions that made Private or Public Service, Season of 1901, for their Foals of 1902. The Race is to be contested at the State Fair at Sacramento, 1905, when Foals are Three Years Old.

Total paid in on stallions.....\$1140

Added by Association.....1000

Total amount of Stake to date.....\$2140

All Foals that are the get of any stallion entered in this Stake to be eligible to be entered on June 1, 1903. Entrance fee, \$50 each, of which \$5 must accompany the entry, with breeding and name, if any, of foal, and a further payment of \$10, March 1, 1904, and a further payment of \$15 each, May 1, 1905, and a final payment of \$30 on the first day of August, 1905, and all colts making this payment shall be eligible to start. Starters to be named in writing, through the entry box, 4 P. M. day before the race.

The nominator of any colts shall, on May 1, 1905, then declare as to the trotting or pacing and he desires to start his colts. All moneys paid in on colts transferred to the pacing division shall be segregated and placed to the credit of the pacing stake, and all other payments shall be placed to the credit of the trotting stake.

All payments not made as they become due declares entry out, and releases subscriber from further liability.

Hopps barred in both classes. Mile heats, three in five. For further conditions see Entry blanks.

REMEMBER DATE OF CLOSING, JUNE 1, 1903.

H. LOWDEN, Acting Secretary,

Office, New Pavilion, Sacramento.

An entry in this stake will enhance the value of your colt. First payment only \$5. Entry Blanks can be obtained from Acting Secretary or at this office.

SEYMOUR WILKES.....Thos. Roobe, Lakeville, Sonoma Co  
SIDNEY DILLON 3:157.....Frank Turner, Santa Rosa

## HACKNEYS.

GREEN'S RUFUS.....The Baywood Stud, San Mateo  
SIR GIBBIE 2d.....James McDonnell, Portola, San Mateo Co

THE PETALUMA MEETING, which will be given by the Pacific Coast Trotting Horse Breeders Association in August, is the talk of the harness horsemen from Siskiyou to San Diego. There seems to be a general desire to get back on the old track there for another meeting, and the Breeders Association is commended on all sides for its action in selecting Petaluma for its principal meeting of 1903. The program of stakes that close Monday next is one of the best offered in years. Two thousand dollars is the amount offered for trotters of the 2:24 class. This should result in one of the greatest races of the year between the green trotters of California, of which there are a large number in training. Fifteen hundred dollars are hung up for the 2:20 class pacers, and this should also be a great race, as the number of eligible side-wheelers now in training here is not only large but very evenly matched in speed. The 2:15 class trotters and the 2:13 class pacers are given purses of \$1000 each. Both these events should fill well; the horses that win them will probably have new records when the races are over. Six hundred dollars is the amount hung up for the three-year-old trotters, and this race will give owners who have entries in the Occident and Stanford Stakes an opportunity to educate their colts a little in an actual race before those big events are decided at Sacramento. In addition to these early closing events a number of additional races will be advertised in June to close August 1st. A special endeavor will be made to arrange the classes so that all horses now in training in California will be provided for and a chance given every owner to name his trotter or pacer in one or more races where he will have an opportunity to win. Then there are the two-year-old divisions of the Breeders \$6000 Futurity to be decided at this meeting. They alone will furnish contests of absorbing interest that will draw large crowds to see them. Petaluma is one of the most thriving towns in California, its citizens are all enthusiastic over the coming of the Breeders Association to their local track, and the track itself is one of the very best on this Coast. In all probability a meeting will be given the following week at Santa Rosa, and as the distance is but sixteen miles over one of the best of roads, horses can be taken across at no expense whatever if owners are so disposed. The Petaluma meeting will be one of the best ever held in California. Every owner who has an eligible horse in training should see that he is entered in one or more of the events to close next Monday. Send your entries to F. W. Kelley, secretary, 36 Geary street, San Francisco.

A FEW STAKE ENGAGEMENTS for the filly Mildred S. by Klatawah would have quadrupled the price received for her at the Blue Ribbon sale at Cleveland three weeks ago, and every owner and breeder should make note of this fact. Mildred S. is but two years old, yet she showed a half mile at the

sale in 1:10½, a quarter in 33¾ seconds and an eighth in 16 seconds. She brought \$1025, a profitable price of course on the amount paid out to breed, rear and train her up to the time of the sale, but the price would have been four times that amount had she been entered and paid up on in some of the big stakes. Unfortunately Mildred S. has no stake engagements, and there is no chance for her to earn any money until she is a matured mare unless her new owner starts her in open events against aged horses, a course that no sensible man pursues with a promising colt or filly these days. Were she eligible to the Kentucky Futurity or any of the big stakes there would have been a contest for her possession that would have run her price up to many times the amount at which she was secured. Here is a lesson that owners and breeders should heed at the present time. On Monday next, June 1st, the Harness Stallion Stake offered by the California State Agricultural Society will close for the foals of 1902 sired by the stallions already nominated, and on the same date the popular Stanford Stake will also close for foals of 1902. Here are two stakes that are not only well worth winning, but will add much to the sale value of any likely colt eligible to them. The lesson of the sale of Mildred S. should not be lost. A fast colt that has no stake engagements will not bring more than half as much as can be secured for him if he is well staked. Remember this and see that your colt is named in these two stakes. It costs but very little to enter, and next year when he begins to show speed of a high order you will have the satisfaction of knowing that you at least have a chance to win a goodly sum with him or that you can sell for a good price to someone who desires to possess that chance. If he has no engagements your interest and pride and confidence in him will not be shared by the public.

KENTUCKY'S GREAT ANNUAL MEETING, held at Lexington in October, offers the last opportunity each year to win large purses with a trotter or pacer. The fixed events open to the world, such as The Transylvania, The McDowell and the Walnut Farm Cup, have become classics of the trotting turf and the desire to win the first named is as much a passion among the trotting horse owners of America as the desire to win the Derby is among Englishmen who own thoroughbreds from the King on his throne to the poorest owner on the isle. On Monday next entries for ten of these rich fixed events will close, five of the races being for trotters and five for pacers. On the same date payments are due in the big Kentucky \$20,000 futurity for three year olds. The entrance fee to the fixed events is five per cent divided into four easy payments. In our advertising columns will be found a full list of these purses and the special conditions governing them. Every owner who races in the East this year should not fail to have entries at the Lexington meeting.

THE BROOKLYN HANDICAP, one of the great running events of the year, was decided at Gravesend on Thursday of this week and won by Irish Lad, owned by Harry Payne Whitney and H. B. Duryea, in 2:05½ the fastest time ever made in the race. The favorite, Gunfire, owned by Whitney *per se* was second, beaten by not more than three inches, and eight lengths behind the pair Heno finished third. Irish Lad is a three year old by imported Candlemas, dam Arrow Grass by Enquirer or Bramble, second dam by Jack Malone, third dam by imported Albion. The race was worth \$15,150 to the winner. Irish Lad carried 103 pounds, Gunfire (4) 111, and Heno (3) 113. It was a great race for a three year old colt and stamps him as a great horse as he withstood a tremendous drive at the finish from Gunfire.

## Kentucky's \$20,000 Futurity for 3-Year-Olds.

Owners are again reminded that a payment of \$50 must be made on June 1, 1903, upon each eligible entry in the futurity for foals of 1900 (three year old now) to be trotted during the annual meeting of the Kentucky Trotting Horse Breeders Association October 6th to 17th next.

This payment of \$50 (June 1st) will carry entry till September 1st, within 30 days of race, when owners will know exactly how good their colt or filly is, and can then determine whether to stay in or drop out; but to drop out at this early date (June 1st) might prove very unwise, for many a winner has not developed thoroughly until later in the summer.

The total amount of payments from this date is less than two and one-half per cent of the amount to be trotted for, and nothing additional deducted from winners. No other purse offers such liberal conditions.

Upon another page of this issue will be found conditions governing the fixed events (including The Transylvania, The McDowell, etc.) Entries to fixed events, and payments in the futurities must be sent to E. W. Shanklin, Secretary, at Lexington, Ky., on or before June 1st.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

## Items From Santa Ana Track.

Mowers & Wynn have fourteen head in training here. A black gelding by McKinney, dam by Wilkes Boy, second dam by Almont 33, has trotted a quarter in 36 seconds. They have several good Neernut colts preparing for stake engagements.

P. W. Hodges has Portrero 2:16½ by Redondo. This horse is good gaited and doing well and will be raced in California. Owynex, his recent purchase at Oakwood Park sale, looks and acts like his breeding, which is first class. Mr. Hodges is preparing him for the Occident Stake.

Geo. W. McKinney 2:14½, is in fine fix and has been a half mile in 1:09; Hodges will enter him in the 2:15 classes in California. A gray gelding owned by a Riverside party is a smooth acting green horse and is being prepared for the slow classes. The way he stepped a mile in 2:34 in just a jog with Portrero shows him to be a good green prospect.

Lady Zombro, bay mare by Zombro, that worked an easy mile last year in 2:17, has been a mile this year in 2:25, last half in 1:09½ and last quarter in 34 seconds. She is the sweetest gaited mare in California.

Grace McK. 2:22½, full sister to Coney 2:02, has been a mile in 2:31. She is a handsome mare and is going good gaited. Hodges is preparing her carefully for the California circuit, and she is his pride.

Soma by McKinney is a trotter and a good one; has been slow miles and is good gaited all the time. She also will be seen on our California circuit this year.

A Stam B. filly out of Atherine is a nice filly that Hodges calls the best he ever hitched up.

Charles Main's three-year-old Zombro filly is a good one, and so good that Hodges wants to hold her over a year. Mr. Main's two-year-old Zombro filly is another fast one that Hodges is stuck on, and thinks will be a wonder.

Mr. Hodges is loyal to California, wants to race in this State, and hopes that good purses will be hung up this year.

Bob Thompson is training a bay gelding by Neernut that is a trotter and has been a mile in 2:29½. He is a fast fellow and is being prepared for California meetings. Oscar Morgan of Los Angeles owns him.

Don M., a bay three year old gelding by Neernut, dam by Mambrino Wilkes, is a fast trotter and has been a mile in 2:18, last half in 1:08½, and last quarter in 33 seconds. He will start in the green classes and Bob thinks well of his chances. Bob also has a bay full sister to Don M. that is in the Occident and Stanford Stakes. She is a good gaited trotter and very promising.

A five year old bay gelding by Neernut that Thompson is training is a beautiful horse and a real trotter. Mr. T. wants to race him and others of his string in California and says he hopes the purses will be large enough to warrant a person going away from home to compete for them.

G. W. Ford is training Cocomat by Neernut. This is a fast pacer and one that will do to keep an eye on.

The track is in perfect condition and Santa Ana citizens are ready to contribute for a good meeting. Mr. Ford owns the track and is very enthusiastic over the idea of having a meeting here.

Neernut has been bred to 47 mares to date and "more a coming." Yours truly, C. A. H.

## Cresceus Will Again Visit California.

Every admirer of the champion trotting horse of the world, Cresceus 2:02½, will remember with much regret the protracted rainy spell that prevented that great horse giving exhibitions in this part of the State when his popular owner, Geo. H. Ketcham of Toledo, Ohio, brought him here during November in 1901. The only place he was shown on the track was at Los Angeles, the performances at Sacramento and San Jose being cancelled on account of a downpour that lasted nearly two weeks and made the tracks seas of mud.

It is with pleasure that we are enabled to announce that Cresceus and the Ketcham family may pay California another visit this fall, and we will all hope that suitable weather will prevail on dates that may be chosen for his speed trials.

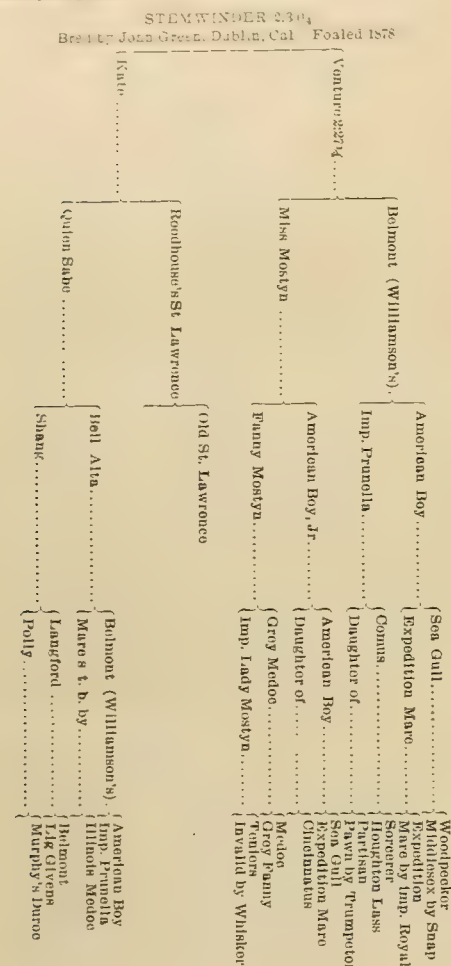

Sandy Smith, the trainer of Mr. A. B. Spreckels' horses at Aptos Stock Farm, recently received a letter from Mr. John McCartney, secretary for Mr. Ketcham, from which we are permitted to make the following extract:

"Mr. Ketcham has about completed arrangements to take Cresceus on an exhibition tour through the Northwest, and expects to be in California with him about the middle of September and will remain there until about the middle of December, and hopes to arrange to give an exhibition with him at Sacramento early in December. He will then ship the horses home and expects to make a trip with his wife and daughter to the Sandwich Islands, where they will spend a month before returning home to Toledo. Cresceus is looking fine and is making a splendid stud season. Some splendid mares have been sent to him and we believe the next few years will show him to be the greatest sire that ever lived."

## Stemwinder.

In the issue of May 16th of your valuable paper, I saw a pedigree of Stemwinder, and so far as it went was strictly correct. Much has been written about Stemwinder and her famous son Directum 2:05½, but never have I seen a correct and complete pedigree of either, and I thought an article on the subject from one who knew all the facts would be interesting, if not instructive, to your many readers. The most essential part of this article will be her breeding, so without further comment at present I append her tabulated pedigree:

I am sorry there is not more to be learned in regard to the breeding of St. Lawrence. The history of this horse was traced, and it was learned that he was raised in Lower Canada, was imported into Illinois and made a season at the stable of Benjamin Roodhouse, near Whitehall, Green county, of that State. He then came to California and was owned by Mr. Bennett of Martinez; thence passed to Mr. Anway, who lived in Alameda county between Haywards and Dublin. In 1853 he trotted a mile in 2:33. He afterwards trotted an exhibition mile in 2:32½. He was a horse of fine looks and good action, and was known as Roodhouse's St. Lawrence. He was naturally a fast horse, for all the education he ever received was in the common schools of his day.

Stemwinder's second, third and fourth dams were bred or owned by my uncle, the late Martin Mendenhall of Livermore, who also owned Bell Alta. No doubt the way Quen Sabe was known as by Langford was for the reason my uncle always called Shang (the dam of Quen Sabe) "the Langford mare," and spoke of her offspring as the "Langford filly" or "Langford colt," as it happened to be. Polly, her fourth dam, was by a horse called Duroc, owned by the Murphy family of Santa Clara county, and was supposed to be a son of Duroc by imp. Diomed, the former the sire of the famous American Eclipse.

Quen Sabe, the second dam of Stemwinder, was sold by my uncle to a Mr. Joe Wilson, who sold her to Mr. Geo. Johnston, now of Pleasanton (then of Dublin) who afterwards sold her to Mr. John Green, the breeder of Stemwinder. Quen Sabe was broken to saddle when she was about nine years old, and ran and won some unimportant half-mile races. She ran Mr. Dougherty's half-mile track at Dublin in 50 seconds. Lurline, the dam of the pacer Monroe S. 2:20, was a sister to Quen Sabe. Stemwinder made her first race at San Jose about 1884; she previously won a heat in the same race in 2:29, but was disqualified for

fouling. Andy McDowell drove her a trial over the Bay District track in 2:27, and always claimed she could trot close to 2:20. All this was done to high wheel sulky. She, like many great broodmares, was very high-strung, and at the slightest provocation would make matters interesting. One day A. A. Miller, who broke her, had driven her twenty-five miles on the road as a steadier, and just as he turned into the gate to go home something disturbed her and for good measure she demolished the cart with her heels.

One proof of a great broodmare is that she throws something of good quality to different sires. Stemwinder did this to three different horses, viz., to Director 2:17, Directum 2:05½, to Direct Directina (3) 2:16½, to Richard's Elector Electrina 2:20. Mr. Thos. Green, of Dublin, son of the late John Green, owns a full brother to the latter that has shown fast, with little or no work. Mr. Chas. A. Durfee owns two fillies from Stemwinder by McKinney 2:11½. I would await with interest the result of a union from the best of these to Bonnie Direct 2:05½, or it would not prove a bad experiment to mate them with Cupid 2:18, sire of Venus II 2:11½, or Sidney Dillon, sire of Dolly Dillon 2:07, as their dam Venus, who founded a great family, was by Venture 2:27½.

A daughter of Stemwinder by Diablo 2:09½, is owned in Alameda by Mr. Owens, a brother-in-law of Thomas Green. Geo. Davis was fortunate in getting a colt by Rey Direct 2:10, from Stemwinder 2:30½.

All Californians admit that for a foundation to a trotting pedigree there is no better blood than that of Williamson's Belmont, and I believe there never was a horse more intensely bred in this line than Stemwinder, the only outcross in her first four generations being St. Lawrence. Hence there is little wonder that Directum 2:05½ should have proven such a champion trotter, coming as he did from Hambletonian 10 through a line of champions, and being backed up by so much of the rich red blood in his dam. The Dictator blood since the days of Dexter 2:17½ has furnished champions, namely Director 2:17, Jay Eye See 2:10, Direct 2:05½, Directly 2:03½, Directum 2:05½, Bonnie Direct 2:05½, Direct Hal 2:04½. The maternal side as well has furnished its proportion as is evidenced by Nancy Hanks 2:04, whose dam is by Dictator, and John A. McKerron 2:05½, whose dam is by Director 2:17, yet I believe the dash of Williamson's Belmont blood that came through his grand young sire Nutwood Wilkes 2:16½ helped John A. McKerron 2:05½ to achieve his present greatness. Nothing will attract the attention of Mr. Salisbury quicker than to let him know that a horse has a cross of Williamson's Belmont especially when coming through Venture 2:27½.

I look for Directum 2:05½ to sire, or some of his daughters to produce some of the wonders of the trotting world.

Stemwinder is gone, but enough of her progeny remain to keep her memory green, and produce champions down through the coming years.

## A Hoosier's Opinion of Rey Direct.

Dr. Neal, editor of the *Western Horseman*, and one of the most entertaining of the writers on harness horse affairs, attended the Blue Ribbon sale and this is his opinion of Rey Direct, as printed in his journal:

The Rey Direct family was a decided feature of the sale offering, and while I do not pretend that my personal reputation as a breeder and prophet is the "biggest thing on earth," I freely risk it all on the prediction that ere the return of many "May days" Rey Direct's reputation and fame as an extreme speed sire will be world-wide. He is not the "tallest big horse" I ever saw, but he is just about the "biggest little horse" that anyone ever saw, with an individuality absolutely above honest criticism, and having about him that character and quality expression which gives him the mark of destiny. That destiny has really marked him for her own is fully demonstrated by the size, physical hardness and strength, superb individuality, natural and extreme speed and clock-headedness of his get. Like "niggers" to a Chinaman, they all "look alike" to horsemen, and such turns of speed they show! Never have I seen a stallion which I so much wanted to see come to Indiana, for he will, I am sure, prove a phenomenally successful top cross for many Indiana-bred mares. But Mansfield is not far away, and the best, be it far or near, is none too good for Indiana broodmare owners. Not but what Indiana has whole regiments of high-class sires, but that the Rey Direct cross is one we need—it is needed everywhere. The Directs not only have characteristics of their own, but such characteristics as all speed breeders seek—money-winning characteristics—and as an early and extreme speed sire Rey Direct clearly is well-nigh the greatest of "his father's house."

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

## Harness Racing To-day at Tanforan.

There will be a good program of harness racing at Tanforan track this afternoon under the auspices of the Golden Gate Park Driving Association, and as no admission will be charged there should be a large attendance. Arrangements have been made by which the electric cars from this city will be run at intervals of five minutes. The first race will be called at 1:30 prompt.

A double team race is one of the most interesting features of the afternoon's sport, and is in the nature of a match between Capt. N. P. Batchelder and Capt. John Barneson. Capt. Batchelder will drive Major and Frank, and Capt. Barneson will pilot his horses Morgan and Alfred H.

There will also be a race for members of the San Francisco Driving Club, which organization has been having quite a lot of sport on the speedway during the past year or two. A handsome cup will be the trophy for this event.

In the regular races for members of the Golden Gate Park Driving Club the purses will be \$150 each.

The following officers will officiate:

Starter, R. Ledgett; judges, S. F. Bannon, G. L. Swett and J. Martin; marshal, J. B. Dalziel; assistant marshal, J. Holland; timers, H. Vetter and L. E. Clawson. E. Aigeltinger is president and F. W. Thompson secretary of the association.

The official program is as follows:

First race, 2:30 class—L. Richardson's Lady R. D., J. G. Cuicello's George, Dr. A. McLaughlin's A. B. P., M. M. Donnelly's Charles Newman; H. Schottler's King V.

Second race, 2:25 class—E. Aigeltinger's Dolador, D. Mizner's Myrtle Thorn, A. P. Clayburgh's Cicero, M. M. Donnelly's Young Salisbury, J. Doran's Della Mc. Carthy, Dr. A. McLaughlin's Alameda Maid.

Third race, free for all—W. J. Simpson's Teddy, E. D. Sachs' Sandow, H. Miller's Lady Falrose, S. Watson's Al. Sandy.

Fourth race, San Francisco Driving Club—J. McTigue's Mike, L. Coffey's Mission Queen, J. Tadt's Direct Fils, W. O'Kane's Bonney Boy, T. H. Corcoran's Mission Boy, H. Schottler's King V., F. Lauterwasser's Iran, A. Taylor's Bill Ellsworth, B. Smith's Coolie Black.

Fifth race, double-team race—N. P. Batchelder's Major and Frank, J. Barneson's Morgan and Alfred H.

## Saddle Horses in Demand.

A contemporary notes the fact that a feature of the local demand for horses in Chicago at the present time is the call for gaited saddlers from men of very moderate means. Inquiry develops the information that never before in the history of the city have so many men been desirous of owning saddle horses on which to enjoy the open air. Naturally in times as prosperous as these the wealthy fanciers who like to take exercise on horseback are buying the best that can be found of both kinds of riding horses, and some rather scrubby sorts are being sold among the so-called three-gaited or plain-gaited lot. The majority of men, however, who wish to own a horse to cost not more than \$150 to \$250 have an idea that they want one that "can saddle a little," and the result is that the demand and supply of such animals are quite far apart. Even good-sized ponies of western origin, which have an easy canter or "lope" are bringing famine prices in the city. The call of course is for horses thoroughly accustomed to city life, for the reason that very many of the men who now find themselves in a position to keep horses have very little or no previous acquaintance with the saddle. Some years ago most of these very men rode bicycles when on pleasure bent, but now it would be a hard matter to coax some of them to admit that they know how to steer a wheel let alone mount one in public and set off down the boulevard. As an indication of the manner in which the horse is holding his own against the mechanical locomotive device, this demand for low priced saddle horses is well worth recording.—*Kentucky Stock Farm.*

J. H. Brown of Detroit, Michigan, who purchased Marengo King 2:29½, son of McKinney and By By by Nutwood, at the Blue Ribbon sale, has placed him in charge of Frank Colby of Detroit. Marengo King will be in the stud this year, his service fee being \$50, and a number of mares have been booked to him already. He is the only son of McKinney in that section of the country.

Mr. Ed. Dinklespiel, editor of the *Suisun Republican*, is the owner of a five year old full sister to Ben F. 2:22½, that is a very promising pacer. She wears no hobbles, is nicely gaited and shows considerable speed. Mamie Reams is giving her a little work at the Dixon track, but Mr. Dinklespiel does not intend racing her this year.

### Many Entries in Oregon State Fair Stakes.

Secretary Wisdom of the Oregon State Agricultural Society sends us the list of entries for four harness stakes which closed May 15th and the showing is such that the State Fair at Salem this year is certain to be a tremendous success. California horse owners have made more entries in both the \$2000 stakes than either Washington or Oregon horsemen. The entry lists are a tribute to the energy and enterprise of the Oregon State Fair association, which got into the field early, offered liberal stakes and advertised extensively. In all probability the two big stakes will not cost the association a cent, as there will be sufficient entrance money paid in to make up the entire sum.

The greater Salem Stake of \$2000 for 2:17 pacers has the largest number of entries, there being 30 this year, against 21 last year, while the Lewis and Clark Stake has 27 entries this year, against 16 last year, which shows a healthy improvement in both events.

The three year old events have each 12 entries this year, against 10 last year.

The horses entered are from five States as follows: In the 2:17 pace California sends 10 entries, Washington 10, Oregon 6, Montana 3, Idaho 1. In the Lewis and Clark stake, California 9, Oregon 7, Washington 6, Montana 4, Idaho 1. The Salem meeting will be held during the week beginning September 14th.

Following is a list of entries:

THE GREATER SALEM STAKE, \$2000—FOR 2:17 PACERS.

Thomas H. Brents, Walla Walla, Wash., b m Miladi B., by Chehalis-Antelope.

E. F. Rodgers, Roseburg, Ore., b g Boedecker by Pathmark-Klamath.

W. O. Trine, Fair Grounds, Ore., br g Oregon Bull by Roy Wilkes-Volunteer.

J. Morgan, Seattle, Wash., b m Chehalis Maid by Chehalis-Silas Wright.

James McCulloch, Machias, Wash., b g Adimont by Altamont-Andirondack.

Frank Clancy, Seattle, Wash., br g Direct C. by Direct-Duroc Prince.

H. H. Helman, Portland, Ore., b m Portia Knight by Vinmont-Duroc Prince.

James Ervin, Pendleton, Ore., b m Ollie M. by Westfield-Cauton.

N. K. West, La Grande, Ore., ch m Taffeta Silk by Lemont Deadshot.

D. Fraser, Spokane, Wash., b m Rosie Glen by Rosebud-Lemont.

A. C. Lohmire, Portland, Ore., gr g School Boy by Bill Frazier-Rockwood.

L. B. Lindsey, Spokane, Wash., ch g Dr. Luhn by King Altamont-Prompter.

E. J. Dyer, Spokane, Wash., b g Jack Wilmot by Dr. Bunnell-Ambassador.

Van de Venter Stock Farm, Seattle, Wash., ch g Harry Hurst by Delwin-Unknown.

C. H. Merkley, Sacramento, Cal., br s Hops by Don Marvin-Tilton Altamont.

J. F. Silva, Sacramento, Cal., br g Charles S. by Alex Button-Venture.

J. H. McKowen, Spokane, Wash., b g Alcouster by Encounter-Almont Medium.

H. W. Goodall, San Francisco, Cal., b g Rajah, by Charles Derby-General Benton, and b g Uncle John by Charles Derby-Balkan.

C. W. Helm, Stockton, Cal., b g Cranky Thorn by Hawthorne-General McClellan.

C. W. Welby, Alameda, Cal., rn m Alice Lee by Tennysonian-Bob Lee.

C. Whitehead, Stockton, Cal., b m. The Mrs. by Derby Ash-Hawthorne.

J. A. Richardson, Boise, Ida., ch g Monroe S. by Dictator Wilkes-Hawthorne.

Howell W. Peel, Spokane, Wash., blk s Merry Monarch by McKinney-Deta.

A. M. Carr, Butte, Mont., ch m Christabel by Charles Derby-Algerdatta.

Joe Huber, Bozeman, Mont., b m Haydee, by Bozeman-Maxim, and br m Rita Huber by Bozeman-Kentucky Volunteer.

I. C. Mosher, Los Angeles, Cal., b m Oma A. by Director-Dictatus.

D. A. Warner, Los Angeles, Cal., ch g High Ball by Silk Wood-Harvester.

P. B. Michel, Pasadena, Cal., rn g San Gabriel Prince, by Richwood-Echo.

THE LEWIS AND CLARK STAKE, \$2000—FOR 2:20 TROTTERS.

L. Zimmerman, Portland, Ore., br g Louis Z. by Upstart-Maud Patchen.

Fred Brooker, North Yakima, Wash., b s Mark Hannabus, (formerly Mark Hanna) by Planter-Kitty Ham.

A. C. Froom, Portland, Ore., blk m Lady Jones by Capt. Jones-Director.

Thomas H. Brents, Walla Walla, Wash., b m Belladi by Chehalis-Cauton.

Lars Peterson, Seattle, Wash., ch g Duke of Waldstein by Waldstein-Clay Duke.

E. C. Payne, Davenport, Wash., rn m Lizzie T. by Hambletonian Mambrino-Altmont.

E. F. Rodgers, Roseburg, Ore., b s Major Weitzel by Joe Weitzel-Brookmont.

Aug Erickson, Portland, Ore., br g Harry Marvin by Don Marvin-Alexander.

Elroy Smith, Butte, Mont., b g Idol by Copper King-Tempest.

C. M. O'Brien, Seattle, Wash., blk s Monicart by Woodmon-Autocrat.

J. A. Jones, Springbrook, Ore., Capt. Jones by McKinney-Gossiper.

W. O. Trine, Fair Grounds, Ore., blk s Broad Heart by McClanahan-Pero.

H. H. Helman, Portland, Ore., b g Roy Benton by Benton Boy-Anteo.

L. H. Todhunter, Sacramento, Cal., b m Zombow-zettie by Zombro-Silver Bow.

Harry Cowell, Perkins, Cal., ch g Perkins by Henry Nutwood-Whips.

Tuttle Bros., Rocklin, Cal., b s Don Z. by Stam B-Lottery.

Walter Tryon, Sacramento, Cal., b g Bensurba by Tom Benton-James Madison.

J. H. McKowen, Spokane, Wash., b m Etta D. by Encounter-Big Bird.

H. W. Goodall, San Francisco, Cal., ch g Dr. Hammond by Charles Derby-Nutwood.

Bowel & Albertson, Fresno, Cal., b g Chinwa by Athadon-Waterford.

C. Whitehead, Stockton, Cal., ch g Deputy by Derby Ash-Priam.

Orlando J. Ralph, Moscow, Ida., b s Captain Clapperton by Latab-Monte Cristo.

George T. Beckers, Los Angeles, Cal., br g Tee Dee Cee by Zombro-Antinous.

A. M. Carr, Butte, Mont., br g Marboy by Delmar-Ben Franklin.

Joe Huber, Bozeman, Mont., b m Zoo Zoo by Bozeman-Zephyr; b m Lady Spokane by Bozeman-Bishop.

I. C. Mosher, Los Angeles, Cal., ch g Red Skin by Red Cloak-thoroughbred.

INLAND EMPIRE STAKE, \$500—FOR THREE YEAR OLD PACERS.

W. L. Whitmore, Portland, Ore., b m Hallie Hinges by Pricemont-Antrim.

C. M. O'Brien, Seattle, Wash., blk m Bessie L. by Montana Director.

E. B. Tongue, Hillsboro, Ore., ch m Lottie B. by Lovelace-Fred Hambleton.

Charles Naylor, Walla Walla, Wash., b s King Alexis by Alexis-Meredith.

H. B. Rutherford, Walla Walla, Wash., b g Nona Norte by Del Norte-Unknown.

Austin Laferty, Corvallis, Ore., b m Ruth Elenore by Sunrise-Unknown.

J. F. Silva, Sacramento, Cal., b f Economizer by Chas. Derby-Echo.

J. A. Richardson, Boise, Ind., b f Della Norte by Del Norte-Slyetta.

Joe Huber, Bozeman, Mont., br f Rita Huber by Bozeman-Kentucky Volunteer.

I. C. Mosher, Los Angeles, Cal., ch s Tidal Wave by Nutwood Wilkes-McKinney.

T. L. Davidson, Jr., Salem, Jessie M. by Del Norte-Rockwood.

Dr. D. H. Yount, Wilbur, Wash., Annex by Alexis-Antrim.

WEBFOOT STAKE, \$500—FOR THREE YEAR OLD TROTTERS.

Thomas H. Brents, Walla Walla, Wash., b m Helen Norte by Del Norte-Cauton.

H. H. Helman, Portland, Ore., b m Bessie Lovelace by Lovelace-Rockwood.

Samuel Purdy, Athena, Ore., b s David Harum by Cauton-Almont Medium.

L. H. Todhunter, Sacramento, Cal., br s The Jester by Stam B.-Silver Bow.

John Pender, Portland, Ore., blk m Bessie Jones by Cap'n Jones-Rockwood.

C. R. Reynolds, Vancouver, Wash., b m Zipsey by McKinnon-Altamont.

G. A. Westgate, Albany, Ore., b m Maud Salisbury by Young Salisbury-St. Cloud.

G. W. Gill, Salem, Ore., br f Home Box by Holmdel-Boxwood.

J. A. Richardson, Boise, Idaho, b g Swift B. by Stam B.-Waldstein.

Joe Huber, Bozeman, Mont., b f Lady Spokane by Bozeman-Bishop.

J. A. Jones, Springbrook, Ore., blk g Col Jones by Capt. Jones-Tempest.

G. W. Maxwell, Woodland, Wash., blk g Gee Whiz by Capt. Jones-Altamont.

### Yearlings Sold at Suisun.

On Saturday last, May 23d, Rush & Haile of Suisun held their annual sale of trotting bred yearlings. Ten colts were catalogued, but three were injured while on the way to the sale, one of them so severely that it was not put up for bids. The nine remaining brought \$1035 an average of \$126.37 which is good value for unbroken yearlings by untried sires. Eight of the nine sold were by Demonio, own brother to Diablo 2:09½, Don Derby, etc. The record of the sale is as follows:

Sorrel filly by Demonio-Mamie Comet 2:23½, to James Marshall for \$120.

Brown filly by Demonio-Rosebud by Fallis to James Marshall for \$120.

Bay filly by Demonio-Sable Dew by Sable Wilkes to Mannie Reams for \$150.

Brown filly by Demonio-Mamie Airlee by Prince Airlee to H. B. Muzzy for \$177.

Brown filly by Demonio-Elorila by Alban 2:24 to H. B. Muzzy for \$150.

Sorrel colt by Demonio-Nellie T. by Dawn (injured) to James Keyes for \$95.

Bay colt by Demonio-Yarrow by Como 2:26½ (injured) to W. H. Bryan for \$72.50.

Bay colt by Demonio-Minerva by Guy Wilkes to James A. Keyes for \$150.

Bay filly by Father McKinnon (son of Demonio)-Jessie S. by Coligny to T. V. Corcoran for \$67.50.

An offer of \$3500 was lately refused for the trotting mare Consuela S. 2:12½, by Directum 2:05½.

Jackson's Napa Soda does not tangle the feet.

### Good Advice From Los Angeles.

Mr. C. A. Harrison, mine host of the Hotel Rosslyn, Los Angeles, is one of the enthusiastic trotting horse owners and road drivers of that section of California. On receipt of a package of entry blanks for the Breeders Petaluma meeting he sat down and wrote as follows to this paper.

EDITOR BREEDER AND SPORTSMAN—Yours to hand, also entry blanks for Breeders meeting. The purses certainly are good and every trainer at the Los Angeles tracks seems satisfied with them and the conditions.

Now it is to be hoped that the purses will fill, and that the required number of starters will be on hand on day of race. In order that no man will be called upon to start a harness horse for a miserly special of \$20, it is also to be hoped that the various associations and owners of tracks in California will get busy and announce their programs early, so that men who have trained harness horses in California this spring will not have to make entries in Oregon, Washington, Colorado and on Eastern tracks. Of course trainers can't wait until the last minute, and it does seem that even though Governor Pardee has seen fit to veto the State appropriation for agricultural fairs at this time, that the various racing associations could stand alone and do business without State aid. They can at least try it one season, and with all the horse interest in this great old State and with the race loving population harness horse meetings, if properly conducted, will pay and pay just as well as any other sort of summer amusement. It behooves race promoters to put their shoulder to the wheel at this time and do it earnestly and do it early.

Every association should have liberal purses, and every town and city in California should aid them in a business-like manner in order that the purses may be liberal; and also that grafting and snide gambling may be unknown quantities; so that when the public pays at the gate to see a good performance that they will get a first class entertainment. If this is done it will be easy to make meetings pay. Californians talk a lot about fine horses, fine climate, good tracks, etc. Now while we have temporarily lost State aid, we have not lost energy, good horses, good climate, or prosperity. All the above items we have in abundance, and it is the time to get busy.

Yours very truly,

C. A. HARRISON.

### Sam Hoy's String at Winters.

[Winters, Cal., Express.]

Whether district fairs are held or not, horsemen are not idle and training goes steadily on. S. H. Hoy's track here is just as busy as can be and Sam has quite a fancy string, including a lot of promising youngsters.

The Express saw some of the racing stock work out the other morning and the way they put the dirt behind them looked like they were out for the stuff and were sure to get some of it. One of them was a dark bay mare—a green pacer—by Demonio, dam by Nutwood Wilkes. She set a sure enough swift pace and is a stayer for as many heats as her driver wants. Another one is Oro Belmont, a black gelding trotter, by Oro Wilkes, dam Muscovio by Belmont 64. Another green trotter is a bay gelding by Bay Bird, dam by Cornelius; then there is Donwater, a pacing gelding by Bayswater Wilkes, dam by Don Marvin; and Allendale, another pacing gelding by Falrose, dam by Stirling.

If there is any part of the horse family Hoy likes better than a thorough racer it is the youngster with the stuff in him that makes a trotter. He has a pretty string of two-year-olds, all entered in the Breeders' Futurity Stake, that he takes a lot of pride in. They are a brown gelding by Diawood, dam by Upstart; a bay filly by Bayswater Wilkes, dam by Stirling; and a bay gelding by Bayswater Wilkes, dam Clara Belle by Privateer.

Another lot of promising horses are a bay four year old trotter by Bayswater Wilkes, dam Lizzie E. by Illustrious; a bay gelding trotter by Woodside, dam by Tilton Almont; a bay three year old gelding by Knight, dam Regina F. 2:18; a four-year-old filly by Bayswater Wilkes, dam Smut by Prompter; a two year old stallion trotter by Bayswater Wilkes, dam by Dexter Prince; a three year old filly by Bayswater Wilkes, dam by Stirling; and two fillies, full sisters, by Falrose, dam Belle Button by Button.

These make pretty full stables at Hoy's training quarters, and there are some quick steppers among them.

Frank Work's favorite trotter Edward 2:19, team record 2:16½ with Dick Swiveler, 19 years ago, is still living at 31 and well preserved.

Jackson's Napa Soda is sold in every city and hamlet in the State.

## JOTTINGS.

THE ROMAN 2:09½ sold for \$10,000 on the last day of the Cleveland sale and Budd Doble was the successful bidder for the unsexed son of McKinney and Wanda. Mr. Doble was bidding for Mr. Geo. H. Smith of Chillicothe, and opposed to him was Doc Tanner who was bidding for Frank G. Jones, the Memphis amateur reinsman. After the gelding was knocked down to Doble's ten thousand dollar bid he found that it was Mr. Jones' intention to turn the horse over to him had he been the successful bidder, so he would have had The Roman this year no matter which of the two won him. When Dick Benson came over to California the winter of 1900 and purchased The Roman for \$5000 from Mr. F. H. Burke, proprietor of La Siesta Stock Farm, he turned him over to Doble to handle until he was sent east in the spring. Mr. Doble drove him twice a week and when the horse landed in Kansas City he was about as well mannered a trotter as was ever seen on a track. Benson did not start him in 1901, but last year drove him in nine races, seven of which he won, getting third money in another and behind the money once. It is said that he has improved so much in appearance since last year that many look upon him as a coming 2:05 trotter before this year is over. With the stallion Kinney Lou which Doble has entered heavily in the slow classes the great reinsman will have two sons of McKinney that are considered about as high class trotters as that horse has yet sired.

A writer in the *Cleveland Plaindealer* of a recent date says of Kinney Lou:

"Doble is very reticent over the ability of the much talked of horse. He merely says he is a good green horse, but those well acquainted with the skilled reinsman say the horse must be a wonder or at least the famous driver thinks as much, or he would have him in other hands, instead of employing his own matchless skill in training him at this stage of life. Kinney Lou wintered under the care of Ed Benyon at Walnut Hall Farm. He is now in the pink of health and condition. In looks and way of going, gait and all, he has the appearance of a champion, and it may be that he will add the finishing touch to this great driver's career by being the fourth champion trained and driven by him.

The reported sale of this horse to John Shepherd of Boston was premature. Doble has had several fancy offers for him, but he has no desire to sell. Says he: 'In the days when horses were cheap, over thirty years ago, I gave \$15,000 for Goldsmith Maid. I campaigned her for years and then when she was about old enough to vote I sold her for \$30,000. I may not do that with Kinney Lou, but if he is worth \$20,000 to any man he is worth that much to me. You can just say I will be behind this horse this summer, and he is not for sale at the present time.'

With Marvin and Doble both in the sulky this year patrons of trotting turf will have a chance to compare the difference between the old school and the new, with such stars to represent the latter as Hudson, Kenney, McHenry and Benyon. There are many that believe that the two old veterans will more than hold their own on the Grand Circuit tracks in 1903, even when it comes down to a brushing finish, where head work and skill tells the tale."

In looking over the catalogue of the Blue Ribbon sale, I notice that the pedigree of Diablita 2:15½ as tabulated therein is entirely wrong on the dam's side. She is given as out of Salinas Belle (the dam of Dictatress 2:09½, etc.) by Vermont. The dam of Diablita is Salinas Maid and not Salinas Belle. Salinas Maid has a record of 2:30 and is by Junio 2:22, son of Electioneer, out of a mare by Carr's Mambrino. She is the property of Judge Vanderhurst of Salinas, who bred Diablita and consigned the latter to the Blue Ribbon sale in charge of Millard Sanders. The mistake made in tabulating the pedigree by the compilers of the catalogue doubtless came from the last Year Book, where Diablita is credited to Salinas Belle, which is not correct.

After considerable backing and filling the California circuit is gradually beginning to assume shape, and although official announcements are greatly delayed the rounds will be made about as follows: The circuit will open at Vallejo August 13th, where a couple of \$1000 stakes and a number of smaller purses are to be decided; thence the horses will be moved to Petaluma for the Trotting Horse Breeders' Association meeting at which the \$2000 stake for 2:24 class trotters and \$1000 stake for 2:20 class pacers are the main events. Aged horses, but in addition the two year old sons of the Breeders' \$6000 futurity are also down for decision that week, together with many other races

for which from \$500 to \$1000 have been offered. In all probability the next move will be to Santa Rosa, as the citizens of that thriving and beautiful town have invited the Breeders' association to hold a meeting at the Santa Rosa track, which has recently been put in fine shape by having six inches of new soil placed upon it. It is more than likely that the invitation will be accepted and a good program of races with \$1000 purses advertised for a four days' program at the City of Roses.

From Santa Rosa the route will probably be to Woodland, where a Driving Club is being organized to give a week's racing combined with a live stock show. Woodland always gives a first class meeting and the one this year will be second to none ever held at the shire town of Yolo county.

The State Fair will doubtless hold two weeks as usual, and the racing program will contain a number of good events. The Occident and Stanford Stakes should both be most interesting contests this year as the number of eligibles is very large. It might be well to state right here that a payment is due on the entries in the Stanford on June 1st, which falls on Monday next.

The Stockton Driving Club at first concluded it would take the date following the State Fair, as has been its usual custom, but on further consideration concluded that as the loss of the big pavilion by fire last year would prevent any display of products being made, and thus one of its principal sources of revenue cut off, it would be best not to attempt to hold a fair. Pleasanton thereupon claimed that week and the meeting there should be as good as any held in the State this year. This makes seven weeks of harness racing where the purses will range from \$300 to \$2000, and in addition meetings will be given at Salinas, Concord, Hanford, Eureka, Bakersfield and other places and it may be that the Los Angeles people will see their way clear to holding a good meeting at which large purses can be hung up for trotters and pacers.

Raymond, of the *Buffalo Horse World*, writes as follows:

Horsemen of this country have for years been told about the magnificent limbs of the Orloff trotters of Russia, but the American trainer, Frank Caton, who is now home from the land of the Czar on a brief visit says that the Russian trotters have not as good legs as the American trotters and, not knowing this, is the reason why so many American trainers fail to succeed with the Russian horses when they first begin training in that country. They start in to work the horses just as they would work American horses, but, not being able to stand such hard work, the horses soon go wrong. This view of the case destroys another delusion of long standing.

There are many delusions which have been huggd by horsemen in the past which are quickly dispelled when they come to handle 2:10 speed. A friend of mine owned a trotting bred mare that he repeatedly drove on long trips, and on more than one trip she drew him and a buggy a hundred miles in a day. He often asserted that she was the gamest piece of horseflesh in the country, but when he had her trained for the races she would always "back up" at the end of a fast mile and never won a race because she could not go the route. The Russian horses got a reputation of having the very best of legs because they had not been called upon for the supreme test until the American trainers went over there. When they were called upon to show as much speed as the American horses must display it was found that their legs were not quite up to the reputation given them.

The Memphis shoe is the talk of the trainers as well as the turf writers from Maine to California. "Marque" has quite an interesting story about it in the last *Horse Review*, and says that Murray Howe is soon to write a technical description of the new invention for the same journal before long. While there is no doubt but the new shoe has greatly benefited many horses on which it has been tried and has improved their speed and gait, that it is a panacea for all faults of the gait or all ills of the legs and feet is not claimed for it by its inventor. It is said that while Monroe Salisbury was stopping over at Cleveland attending the sale and resting up his horses while on the way to New York, he saw Doc Tanner drive the mare Louise Jefferson 2:10 a trial mile with the new shoes. Her fault has always been in getting away, as she could not get into her stride until after she had passed the wire. "Marque" says: "It was her first trial with them and, after warming her up, Tanner took her up to the score and turned. She got away like a runner and Doble and Salisbury both remarked that the clip she trotted to the first turn was the fastest they had ever seen by either trotter or pacer. Tanner was very much excited when he dismounted and said, 'That's the fastest ride I ever took behind a horse.'" Salisbury immediately asked Murray to shoe his M. and M. candidate, Monroe, who is a very large horse and far

from a good-gaited one. Ben Walker came out with the gelding later and the improvement in his gait was so remarked that the "king-maker" requested Murray to shoe two other members of his string, including the four year old Directum gelding, Judge Green. Doble will try them on Kinney Lou and about every trainer at the track will try them on some of their charges."

## One Hundred Thousand Dollars.

Will be distributed to horsemen at the annual meeting of the Kentucky Trotting Horse Breeders' Association, October 6 to 17, 1903. Of this amount \$54,000 is offered for the twelve fixed events closing Monday, June 1st, and classes are arranged from the fastest to the slowest for both trotters and pacers, as follows:

The Transylvania, \$6000 for 2:12 trotters; The McDowell, \$5000 for 2:10 trotters; The Walnut Hall Farm Cup for 2:15 trotters, offers \$3000 in money and in addition a magnificent silver trophy will be presented the winner by Mr. L. V. Harkness; The Blue Grass, \$2000 is for 2:19 trotters; The Johnston, \$2000 for 2:24 trotters; The West, \$2000 for 2:29 trotters; The Tennessee, \$3000 for 2:08 pacers; The Wilson, \$2000 for 2:20 pacers; The Kentucky, \$2000 for three year old trotters; and The Lexington, \$2000 for two year old trotters. These, in addition to the futurities, \$20,000 for three year old trotters and \$5000 for two year old trotters.

No association can guarantee such an amount of money unless it receives the most liberal support of all horsemen.

Conditions in full are given upon another page of this issue, and entries must be sent to E. W. Shanklin, Secretary, at Lexington, Ky., on or before June 1st.

Races will be so carded so that one horse can start in two or more with from three to seven days' rest between.

## A Good Man for the Place.

Now that the season for harness racing is near at hand, associations that expect popular support should realize the importance of securing the services of a thoroughly competent presiding judge. Dr. G. W. Stimpson, the well-known veterinarian, who now resides in Fresno, made quite a reputation as an official judge at meetings held within the last two years. He is spoken of in the highest terms by the associations he served in this capacity, being recommended for his ability, conscientiousness, quickness at detecting any attempt at jobbery and the fairness of his decisions. Being thoroughly versed in both trotting and running rules, he is able to handle running and trotting races. He is also said to be one of the best starters of harness horses on the Coast. Associations wishing to secure his services should make their engagements with him in advance.

## A Big Brewery Co. Says

Messrs. Lee, Watson & Jones, Kansas City: Gentlemen—I have been using your Strap, Veterinary and Hoof Ointment and take pleasure in saying it is absolutely the finest thing I have ever found for cuts, sores, bruises, cracked hoofs, etc. I shall continue to use it and recommend it.

PABST BREWERY CO.  
H. H. Blatt, Supt. of Stables,

Jackson's Napa Soda untangles the feet.

## VETERINARY DEPARTMENT.

CONDUCTED BY

WM. F. EGAN, M. R. C. V. C., F. E. V. M. S.

Subscribers to this paper can have advice through these columns in all cases of sick or injured horses, cattle or dogs by sending a plain description of the case. Applicants will send their name and address that they may be identified.

On April 11, 1903, I bought two mare mules seven years old and use them on a light job wagon in town of Fortuna. On April 26th I noticed the bag of one of them getting large and on May 1st milk began running from both teats. Each day since it fills up and runs out as she travels. Mr. Crispin from whom I purchased her owned her four years and says she has never been covered by a horse or jack. She is in good health.

1. Do you believe she will breed? 2. Has there ever been a case where a mare mule has foaled a colt? 3. Can you give any cause for milk in case of this kind? 4. If the mule is bred to a horse what is the colt called? 5. Should the milk continue to flow will it run her down? 6. If harmful what course would you suggest to dry her up?

Yours truly,  
S. F. SWANGER.

1. There is no certainty of her breeding, any more than if her mammary gland had not secreted milk.

2. In a back number of this paper we have had an interesting article on that subject, showing some successful experiments in mule breeding.

3. An irritant of the bag, or mammary gland may produce it. A tumor or other affection of the uterus has been known to produce secretion of milk, and I can point out at least one mare, that I saw a few days ago, and several others that I have seen in the last two or three years, in this city that produce milk although they have never been bred.

4. A "Hybrid."

5. As a rule it does not injure, but it is best not to encourage its secretion.

6. Milk the bag, if it be full and warm. Do not remove all the milk. Repeat this, daily if necessary, later every second day, again every third or fourth day, until the heat and soreness disappear. Full milking encourages the secretion. Half milking discourages it. Application of camphorated oil after milking is good.

## Notes and News.

Entries close Monday next

For the Breeders' Meeting at Petaluma.

Don't fail to enter in those big stakes for trotters and pacers.

California horses are well entered in Oregon this year and should bring home their share of the money.

The San Mateo electric cars will run to Tanforan at five minute intervals to-day. Admission to the track will be free.

The Bow Bells pacer, Beauseant 2:12, will be tried again this year, in the hope of his getting a record as fast as his trial of 2:08.

A sister to the Mambrino King pacer, King Charles 2:08½, was sold in Boston recently for \$57. She was sold for a saddle mare.

Monroe Salisbury stopped over at Cleveland with his horses during the sale and then shipped them to Empire track, New York.

Morning Star by Star Pointer, that has been entered in all the slow pacing stakes by Dave McCleary, paced a mile better than 2:10 this year.

If you own a foal of this year by any of the stallions nominated in the Harness Stallion Stakes don't fail to enter in it. It will be worth about \$10,000.

Ribbonwood, the New Zealand pacer that beat the trotter Fritz last month, wears the hoppers. He paced a public trial of 2:09 three days after the race.

The Oregon State Fair has the biggest entry list for its purses this year ever seen in the north. This is a tribute to enterprise and early announcements.

Daghestan 2:23½, by Stamboul out of Alta Belle by Electioneer, went through the Blue Ribbon sale at Cleveland. Max Sackman of New York purchased him for \$750.

Leonor, the dam of Dr. Book 2:10, Jenny Mac 2:09, Miss Jessie 2:13½ and Judd 2:24, has been sent to Indiana to be bred again to McKinney, sire of her two fastest foals.

There is talk of a mile track being built on the Reams place, two miles from Suisun. It would make an ideal training place as the soil and climate there are both hard to beat.

Mercedes, the daughter of Chimes, that is noted as the dam of the \$50,000 stallion Dare Devil 2:09, foaled a bay filly by The Corker, son of Rex Americus, at Village Farm a few days ago.

William Gilligan of Boston will have his mare Hallie Rocket 2:11 raced this season after giving her a let up for the past two years. She is a strictly pacing bred mare but is herself a natural trotter.

The Vallejo program is well received by all harness horse owners. The entry list should be a large one. Entries close Monday, June 15th, and the Vallejo meeting will open the circuit August 13th.

A. B. Gwathmey, president of the Cotton Exchange and owner of one of the best stables of matinee horses in New York, is getting together a stable of steeplechasers, having purchased two in England lately.

Every horse owner in California seems pleased with the selection of Petaluma as the place for the Breeders' Meeting, and the butter and eggs town will be crowded with horsemen when the meeting comes off in August.

A Cleveland report says that on Saturday Mr. Billings drove his new purchase Lou Dillon an easy mile to wagon in 2:12½, last half in 1:04½. She behaved perfectly and Mr. Billings expressed himself as well pleased with her.

Sable Kid a black gelding by Sable Czar, dam Mascot by Arthurton was sold at the Blue Ribbon sale for \$375. He was bred in California and consigned to the sale by Dick Benson of Kansas City who expected him to bring more money.

Orrin Hickok is reported greatly improved physically, and his mind is also clearer than for some time past. Budd Doble and others called on him at the Cleveland hospital, where he has been confined for some months, and he recognized them readily.

Peter Belles, proprietor of Puyallup Hotel, Puyallup, Wash., still drives the famous old pacer Sleepy Tom, now 36 years old. Mr. Belles drove Tom last year at the opening of the King County Fair Association a quarter in 34½ seconds.—Portland Rural Spirit.

The pacing stallion Willie Osborne 2:12½, bred at Oakwood Park Stock Farm and now owned by Dr. Jackson of Beaver Falls, Pa., will shortly be sent to A. C. Pennock of Cleveland, who raced him to his record last year. Willie Osborne is by Charles Derby, dam Directress by Director, second dam Whisp by Whippleton.

E. Newlands of 1767 Webster street, Oakland, writes us that he desires to claim the name "Hyde Park" for a colt foaled May 9th, sired by Charles Marvin, dam Volo by Antevolo, second dam by Whipple's Hambletonian, third dam by Corncracker, a thoroughbred horse.

Andrews & Abbot of Oakland have shipped their fine bred young mare Melba to the court of Searchlight 2:03½. Melba is by Gossiper 2:14½, first dam by Correction, second dam by Nutwood and third dam a thoroughbred mare. The result of this union should be a good one.

Local colt stakes should be generously supported. Owners of two and three year old trotters and pacers should not fail to enter in the colt stakes of the Monterey County Colt Stakes Association. Send your entry on or before June 1st to the secretary, J. D. Kalar, Salinas.

One of the best colts Cresceus ever sired is owned by S. F. Shelly, of Defiance, Ohio. His dam is Morea 2:24½ by Electioneer, a mare bred at Palo Alto, and capable of a much faster record. Mr. Shelly will give this colt a short season in the stud, and then train him for a fast record.

Mattie B. 2:15½, the fast mare by Alexander Button owned by W. Van Keuren of this city, was bred to Searchlight on the 18th inst. She was bred to McKinney last year but failed to prove with foal and Mr. Van Keuren has a nomination in the Pacific Breeders \$6000 futurity that is for sale.

Golden Slope 12437, a fourteen year old son of Electioneer and Addie (dam of Woodnut 2:16½ and Manon 2:21) by Hambletonian Chief, sold at auction at Wichita, Kansas, two weeks ago for \$400. Golden Slope is the sire of the pacing mare Lady Slope 2:15½ and of three trotters with records from 2:23 to 2:29½.

Hiram Tozier is very much pleased with the way two of his two-year-olds by Idolita 2:09½, are working at the Readville track. One of them is named Pierpont Morgan and the other is named The Victor. Both are well entered in the colt stakes and Hiram thinks he has a chance at some of the first moneys.

Edward Mills, who brought Searchlight 2:03½ and Lecco 2:09½ to California last winter, locating the two stallions at Pleasanton, is highly pleased with his venture. Searchlight's book is full, and no stallion that ever stood in this State has had a grander lot of mares booked to him. Lecco has also done well, and the

LECCO 2:09 3-4

mares bred to him have been high class in nearly every instance. Mr. Mills owes his success to liberal advertising, honorable business methods and the fact that both of his horses are everything that he claims for them. It is a combination that will succeed in any country.

Entries to the Stanford Stake of 1905 close Monday next, June 1st. It only requires \$5 to nominate. The stake is increasing in value every year. Don't let the date go by without sending the name and breeding of your last year's foal together with \$5 to H. Lowden, Acting Secretary of the California State Agricultural Society.

The matinee members of the Cleveland Driving Club certainly secured the cream of the California consignments. C. K. Billings bought Lou Dillon and Sir Albert S. 2:03½, and Carl Silver bought Mildred S. It looks as though Cleveland will have several starters in the Cleveland Cup in the Inter City matinee, and it will take a mighty good horse to take the cup away from the Forest City this year.

An Eastern turf writer says that El Milagro 2:11½ by McKinney out of Adelina Patti (dam of Margaret Worth 2:15) by Effingham, that was bred by Rudolf Jordan, Jr., of this city, is surely good for a record of 2:07 or better this year. He has filled out and looks better than ever and is one of the best trotting prospects in New York State. El Milagro is in the stable of Will Dickerson at the Goshen track.

Judge Vanderhurst of Salinas is the proud possessor of a Dictatus Medium colt, just foaled, that for looks and pedigree is hard to beat. The sire, Dictatus Medium, is by Dictatus out of the dam of Stam B. 2:11½, and the dam is Salinas Maid 2:30 (dam of Diabla 2:15½) by Junio 2:22, second dam by Mambrino 1789 (Carr's). Both dam and foal will be sold at the combination auction sale at Salinas on Saturday, June 6th.

Blanchard by Onward, owned by T. J. Drais of Farmington, Cal., was bred to her grandson Guy McKinney last year and a few days ago foaled a fine lusty bay colt that is highly prized by his owner. Guy McKinney is by McKinney out of Flossie Drais by Guy Wilkes, second dam Blanchard by Onward. Blanchard's colt has about as much of the blood of Geo. Wilkes in its veins as any colt we have heard of for some time.

Millard Sanders said Lou Dillon would bring more money than any mare ever sold for at auction and an eastern exchange says that the figure paid for her—\$12,500—proves that Millard was correct in his prophesy.

At the recent Tranter-Kenney Sale a ten months' old colt by Larabe the Great 2:12½ set the crowd wild with enthusiasm by his great flight of speed. He sold for \$850, a good price for a ten months' old colt. Larabe was a sensational colt trotter, and has already demonstrated his ability to sire early and extreme speed. He comes from a futurity winning family and will make the family even more distinguished. He is a stallion of size and finish.

J. H. Snowden, of the firm of Snowden Bros. of Kansas City, Missouri, is at Marysville, this State, for the purpose of buying horses and mules for the eastern markets. Mr. Snowden states that during the two years last past he has bought in California more than ten thousand mules and horses and shipped them to eastern markets through the agency of his firm in Kansas City. These horses and mules cost the firm an average of \$80 each, and the total paid for them is in excess of \$800,000.

The sale of draft horses owned by the Estate of Henry Pierce took place at the Occidental Horse Exchange on Thursday evening of this week and was most successful. The Clyde stallion Rob Roy brought \$430. About forty head were sold, there being nine yearlings and six two year olds among them. The average was \$117 per head, which shows there is a good demand for draft stock. Ten head of trotting bred horses belonging to Daniel Keefe were sold for an average of \$100 per head the same evening.

Valencia Stock Farm's Direct Heir by Direct out of Bet Madison 2:12½ may be the first producing son of Direct unless something happens to his Occident Stake candidate Amado, that Walter Maben is training. This three year old colt was not broken until last November, but has already stepped a quarter in 32½ seconds, and a half in 1:10. Another colt by Direct Heir, trained two months, went a mile in 2:31, last quarter in 35 seconds. Direct Heir is only even years old and these are his first colts that have been trained.

H. B. Gentry, owner of McKinney, purchased several well bred mares at the Cleveland sale and will breed them to his great horse. Among his purchases was Adette, a bay filly by Advertiser out of Manette (dam of Arion 2:07½ and Oro Fino 2:18) by Nutwood, also May Jackson a fine black filly by Birchwood out of a mare by Baron Wilkes. Another of his purchases was Advarion, brown mare by Advertiser out of Clarion by Ansel. Mr. Gentry is gathering some royally bred mares for his breeding farm at Bloomington, Indiana.

California owners who have made entries in the two big stakes offered by the Oregon State Agricultural Society should take note of the fact that they can also enter their horses if eligible in the \$1500 pace for the 2:20 class and \$2000 trot for the 2:24 class besides other races offered by the Pacific Coast Trotting Horse Breeders Association for its August meeting at Petaluma. The Oregon meeting does not begin until September 14th, giving plenty of time for the California horses to race at Petaluma and then have several weeks time before the Salem meeting opens.

A despatch from Woodland dated May 23d says: County Veterinarian Alexander is authority for the statement that glanders is prevalent in the western part of Yolo County, and has been for several days past. Alexander, however, says that the danger period is passed, as he has the situation well in hand. Up to this time eighteen head of horses, all the property of Bell & Snider, contractors, who were engaged in the construction of the Yolo County Consolidated Water Company's irrigation system in Western Yolo, have been killed and burned. There are a few cases of horses mildly afflicted, and these have been isolated and are carefully guarded to prevent any further spread of the disease.

Andy McDowell is now training a stable of trotters for Baron Boni von Schlichtegroll at Vienna. He has Wig Wag 2:16½, that got the record as a three year old last fall. Wig Wag is by Wiggins 2:19½, and out of Edgelight by Edemark. Andy also has several other good ones; among them is the Axtell trotter, Axmere 2:13½, Henrietta 2:12½, and some good green colts by Axmere and Prince Warwick, the latter the first trotting stallion that was ever shipped to Vienna, and is owned by the Vienna Trotting Club. Prince Warwick was taken east by Orrin Hickok from California, and is by Alcona and out of Warwick Maid by Almont Mambrino. He was purchased by Splan and sold to the late Dan McPhee. He was never raced in this country or in Europe, but he was considered at the time to be a fast green trotter by Hickok, who sold him for a long price. Prince Warwick is the sire of Princess Nefta, who holds the record of European bred horses.

A payment of \$25 will be due on June 1, 1903, upon each eligible colt or filly desiring to start in the two year old division of Kentucky's Futurity, \$21,000, for foals of 1901 (two year olds now).

Of the above amount, \$5000 is set aside for the two year old trotters, to be raced for during the annual ten-day meeting of the Kentucky Trotting Horse Breeders Association, October 6 to 7, 1903.

The payment of \$25 on June 1st carries entry till September 1st (30 days of race), when owners will have ample time to have thoroughly tried out their youngsters and know definitely whether they have a reasonable chance to win a portion of the \$5000.

Future payments are light, and the glory of winning is incalculable, to say nothing of direct pecuniary gain.

## Development of the Trotter.

If a trotter from the interior of Asia had been at Lexington Park on August 14, 1901, and seen the champion trotting horse Cresceus win his great race against the American champion, and later in the week had watched the American champion Prince Alert in 2:01, and was then told that the trotting was even faster, being 2:00, and that for the pacers it was 1:59, his natural question would be, how are these horses bred? says an exchange.

Four nations have produced great breeds of horses, and the two greatest, the thoroughbred and the trotter, stand to the credit, respectively, of England and America. It took breeders of the former nearly two centuries to perfect the thoroughbred, while the more rapid thinking and enterprising breeder on this side of the Atlantic in about one fourth of the time has produced the perfect trotting race horse.

It must, however, be admitted that the American breeder has the advantage of excellent foundation stock and the benefit of these primal breeding laws born of the ripe experience of the leading breeders of England.

A great nation stamps its individuality on all its produces, and the utilitarianism of the American character is thoroughly illustrated in the trotting horse. He is the champion race horse of the world and his gait, and, with the exception of the metropolitan district and a few other large cities devoted to the thoroughbred, he supplies the leading sport to the continent. In the Northern States and the Dominion of Canada every town of average size has its trotting track, and at least one meeting in the season. There are 1500 associations in membership with either the National or the American Trotting Associations, and about \$5,000,000 in stakes and purses were competed for last year.

The two imported horses which played the most important part in the foundation stage of the trotting breed were imp. Messenger and imp. Bellfounder. The former was a thoroughbred, though his blood took so kindly to the trot and so poorly to the running gait that while thousands of trotters trace back to him, and there is not one known thoroughbred on the American turf to-day that has him in his pedigree.

Imp. Bellfounder was a Norfolk trotter, or the hackney of that time, and his name occasionally met in the top crosses of the hackneys of to-day. Imp. Messenger was the sire of Mambrino, he the sire of Abdallah, and he the sire of Hambletonian, the greatest of all the sires of trotting speed, while imp. Bellfounder was the sire of the Charles Kent mare, Hambletonian's dam.

Hambletonian was foaled in 1849 in Orange county, was bought when a yearling and owned all his life by the late William Rysdyk, of Chester, and died his property in 1876. His owner realized from his services and the sale of his colts a fortune of \$500,000, yet would have sold him when a two year old for \$125, but could not get a purchaser.

Mambrino Chief, whose great-grand sire was also imp. Messenger, has proved as great a progenitor in the female line as Hambletonian did in producing such famous sons as George Wilkes, Electioneer, Dictator, Abdallah 15, Harold and Happy Medium. His marvelous speed prepotency is shown by the following wonderful figures: He had 150 sons, who produced 1485 trotters and 213 pacers with records of 2:30 or better; his daughters produced 109 trotters and 7 pacers while his name appears either in the male or female line of nearly every good trotter and pacer of to-day.

As speed is the direct test of the breed, it is interesting to note its progress from the time when Lady Suffolk first trotted in 2:30 to the present day, when the championship record is 2:02½, held by the stallion Cresceus. On October 13, 1845, at the Beacon track, Hoboken, N. J., the little gray mare Lady Suffolk trotted in 2:29½.

The first champion to get below 2:20 was the famous Flora Temple, who, on October 15, 1859, at Kalamazoo, Mich., trotted in 2:19½. On August 14, 1867, the mighty Dexter, by Hambletonian, at Buffalo, trotted in 2:17½, and may be said to have inaugurated the Hambletonian era. Four years later the empress of the trotting turf, Goldsmith Maid, went a mile in 2:17. She was on the turf till 1874, and in that year, on September 2, at Boston, Mass., cut the record to 2:14.

From this time on the record moved down rapidly. St. Julien, a bay gelding by Volunteer, son of Hambletonian, dam by Harry Clay, on Oct. 25, 1879, at Oakland, Cal., cut the mark to 2:12½, and later on reduced it to 2:11½, but in the meantime the marvelous mare Maud S. had appeared upon the scene, and she soon proved that she was the queen of the turf. On Aug. 12, 1880, at Rochester, she trotted in 2:11½, and reduced the time at various places to 2:10½, 2:10 and 2:10.

At Providence, R. I., on Aug. 1, 1884, the black gelding Jay Eye See, by Dictator (brother to Dexter),

by Hambletonian, cut the record to 2:10, and became the champion for a day, for at Cleveland the following afternoon Maud S. went in 2:09½. Her crowning victory against old Father Time was at Cleveland, Ohio, on July 30, 1885, when she reduced the champion record to 2:08½. The queen of the turf was bought by Robert Bonner, and at his Tarrytown Farm she lived to a ripe old age, dying shortly after her famous owner had also passed away. She was by Harold, a son of Hambletonian, and it was a subject of universal regret to the trotting world that she never had a foal.

In 1891 the bay mare Sunol, by Electioneer, cut the record to 2:08½. Sept. 28, 1892, at Terre Haute, Ind., the brown mare Nancy Hanks, by Happy Medium, dam Nancy Lee, by Dictator, made a wholesale reduction in the record by placing it at 2:04.

Only for two years did she wear the crown, as on Sept. 19, at Galesburg, Ill., that most symmetrical of all trotters, the bay mare Alix, by Patronage, reduced the record to 2:03½. It looked now as if the speed limit of the breed had been reached, and no change occurred till Sept. 25, 1900, when The Abbot, by Chimes, a son of Electioneer, at Terre Haute, assumed the trotting throne with a mark of 2:03½. He only held the honor a few months, as on Aug. 2, 1901, the stallion Cresceus, at Columbus, Ohio, trotted in 2:02½. It is a curious fact that in the history of the trotting championship Cresceus is the first stallion to wear the crown.

## Cleveland Track Notes.

[American Sportsman.]

"Doc" Tanner worked Fred S. Wedgewood 2:05½ and Sir Albert S. 2:03½ easy miles around 2:30. He also gave Dr. Monical 2:09½ several slow miles.

C. K. G. Billings sampled Lou Dillon, driving her a mile to wagon in 2:12½, last half in 1:04½. He also stepped Louise Jefferson an eighth in 1:43 seconds.

S. E. Kent, of Los Angeles, Cal., has arrived at the track with Bonnie Russell, bay stallion by Conifer and the pacing mare Sweetheart. Bonnie Russell is entered in the M. & M. and several other large stakes.

Bert Webster, who came over from California with the Griffith consignment to the Blue Ribbon sale, will not return at once, having closed his engagement with Mr. Griffith he will remain here. Mr. Webster gave Bonnie Direct 2:05½ his record.

Dave McClary, Hartford, Conn., who drove the green pacer Star Pointer 1:59½ to championship honors, and who paid \$2050 for the two year old filly Rey Del Valle by Rey Direct 2:10 is undecided whether he will start her this year. She is eligible to \$37,000 of futurities.

Budd Doble let the green trotter Kinney Lou step a mile in 2:40. This horse is much improved in form over last year, and Mr. Doble says that he likes every move of the little trotter. He also sent The Roman 2:09½ a mile in 2:13½, last half in 1:04. This horse is also improved and should be a good horse in his class.

During the sale H. B. Gentry, of Bloomington, Ind., owner of McKinney 2:11½, purchased several well bred mares for breeding purposes.

The consignment of R. C. Benson & Co., who have decided to forsake the harness racing game for the runners, was the sensational offering of the last day of the Blue Ribbon sale, and the sale mart was crowded when the first animal of the lot, The Roman 2:09½, was led out. This trotter won seven races in Grand Circuit company last season and looked to be in the pink of condition. He worked a mile in 2:15, last half in 1:05, over the Glenville track during the week. The first bid was \$5000, made by Charles Tanner, acting for F. G. Jones of Memphis. Budd Doble promptly raised this to \$6000, the bids alternating between these two until \$9500 was bid, which was "Doc" Tanner's last bid, Mr. Doble getting the gelding at \$10,000. He was purchased for Geo. H. Smith, of Chillicothe, O., and he will be trained and raced by Mr. Doble.

## Packing Feet.

Packing horses' feet is a treatment which, at most, affords only a temporary relief, and while it may occasionally be advisable, it always weakens the foot unless other remedies are used to counteract its bad effects and aid in perpetuating the temporary benefits derived from its use. Used alone its results are a relief, not a cure, and if continued frequently will cause serious injury. Campbell's Horse Foot Remedy will bring about all the good results ever obtained by such treatment, with none of the bad conditions. It removes soreness and fever, softens the dry frogs and gives life to brittle soles and walls by giving to the foot the nourishment which Nature always supplies when not prevented by artificial conditions.

Splan is said to have signed with a lyceum bureau to give a series of 30 lectures on the trotter next winter.

The dam of Onward Silver 2:08, Sylvan Maid, recently dropped a black filly by Adbell (1) 2:23.

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulkies. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

## Good Manners Add to Horse Values.

A lesson in manners could easily be drawn from the sale of Lou Dillon last week. True, she brought \$12,500, but there were those who maintained that even fifteen or twenty thousand would not have been an unreasonable price for the fleet Californian. To all who advanced the idea that the mare was worth more money there was but one argument, and that a most convincing one, that there was a general impression among horsemen that her manners were not of the best; that she was liable to act bad in scoring and if she did all this speed she was known to possess would not make good this one defect. Lou Dillon was carried through the circuit last season and given the preparation that only such a clever, careful and patient man as Millard Sanders can administer. Possessed of sensational speed, this was developed until she was able to show a mile last fall better than 2:09, and the day before the sale she electrified the crowd at Cleveland by trotting a half mile in one minute and three-quarters of a second, with the last quarter better than a two minute gait, C. K. G. Billings, who purchased her the next day, catching the two furlongs in 29½ seconds. But with all this phenomenal speed, and no such showing had ever been made by a mare which had never been started in a race, the rank and file were not satisfied that she had the manners necessary for a perfect race mare. With her demonstrated speed Lou Dillon could act bad, get away behind her field and then win a whole lot of events. But on the Grand Circuit, where she would have to be raced to make good her purchase at a big figure, every foot of the mile counts. The driver who can figure the shortest route from wire to wire—everybody in the grand stand can tell that it's next the pole—is the one most in demand on the day of a big race. And so the race horse that for any peculiarities cannot be driven along that route is looked upon with suspicion. Manners were lacking or rather there was a doubt as to whether the mare's manners were perfect and because of that the men who use horses exclusively for racing were in doubt as to whether it were advisable to pay the price her speed would warrant. It is a lesson breeders would do well to heed! Manners are worth par in horses all the time, whether these animals are to be used on the track, the road, the show ring or under saddle. Hundreds of men make a good living by educating horses purchased from the breeders and then reselling them to people who demand that manners shall be the leading feature of the horses they buy. In many instances the breeder could as well have this sum if the colt's education began with his physical development. As is now too often the case, the breeders spend several years in growing the colt and receives no more nor so much as the man who devotes as many months to the horse's education. Were both to go hand in hand the value would be doubled. And it would not be a difficult task for the breeder to accomplish this work, educating the youngsters by degrees and thoroughly. Manners are at a premium, and the wise ones in the horse business are fully alive to this fact.—Chicago Horseman.

## Fast Work at Memphis.

They have matinee workouts every Saturday at Memphis and Murray Howe thus describes one that took place week before last, showing that there is lots of speed over there.

The fourth race furnished the nearest thing to sensational speed of any race of the day. For starters we had Hal Chaffin, br g, by Brown Hal, driven by Walker; Harold H. 2:04, b g, by Roadmaster, driven by Geers; Fred S. McEwen, rn h, by F. S. Wilkes driven by G. Garth, Jr.; Winnie King, ch m, by Brandon, driven by Garth, Sr.; Speedy Girl, b m, by Keeler, driven by Madison; all green ones except Harold H. Of course Harold had to win, with his heats in 2:10 and 2:07½, but Mr. Geers made a very pretty contest of it by trailing his field in both heats, until near the wire where he shot out and won by a fraction of a length. In the second heat Garth's mare gave a wonderful exhibition, stepping to the front and setting the pace throughout the entire mile. The half was passed in 1:04½, where she let out a link and came home in 1:02½. Geers was obliged to let his gelding come home in 1:01½ in order to head her; but both horses were so close together at the finish that there was practically no difference in the time. Harold H. was actually pacing within himself, and was never extended at any time during the race. In this 2:07½ heat every horse in the race paced in 2:10 or better. Hal Chaffin and Speedy Girl were both separately timed in that notch. The latter showed better than two-minute speed in spots, but could not carry her clip as well as some of the others. Fred McEwen was suffering from a very severe cough and was not himself.

Sober up on Jackson's Napa Soda.

## Rysdyk's Hambletonian.

[American Horse Breeder]

As a general rule it is not profitable to use crippled or disabled mares for brood purposes. There are, however, exceptions to this, as to most other rules. Some of the most noted trotting bred animals of their day were produced by mares that had been pretty well used up by hard service before they were put to breeding.

In 1865, as stated by H. T. Helm, in "American Trotting Horses and Roadsters," the proprietor of Woodburn Farm, Kentucky, had some undesirable horse stock which he wanted to sell. Some of the animals were halt and some were blind.

"He took the lot to Lexington, Ky., on one of the so-called county court days and offered them at auction. He succeeded in selling part of them, but one blind mare, by Mambrino Chief, failed to draw a single bid. She was with foal by Alexander's Norman. He offered her for \$100, but no takers. Finally he induced his auctioneer to give that sum for her, and she went at that figure. During the following winter the auctioneer found her heavy on his hands. He wanted to move elsewhere, and one of his difficulties was the disposal of this blind mare. He finally succeeded in getting her off on Mr. Andrew Steel for \$125." The following spring this blind mare produced a black colt that was a born trotter. This colt took a record of 2:31 under the name of Blackwood as a three year old, which was the world's record for three year olds at that time, and he was soon afterwards sold for \$30,000.

A daughter of Seely's American Star got injured and crippled for life. She was then mated several times with Rysdyk's Hambletonian, and among the foals that she produced by him was the renowned world's champion trotter Dexter 2:17½ and his full brother Dictator, that got Dictator 2:17, sire of the ex-champion trotting stallion Directum 2:05½, etc.

In 1851 there was a bay mare at Warwick, N. Y., about 15.1 hands high, that had received so severe an injury to an ankle as to make her a confirmed cripple. She was known as Katy Darling. It was claimed that her sire was Bay Roman, a son of imported Roman, and the claim has never been disproved.

The injury rendered her useless for ordinary purposes, and she was mated with Rysdyk's Hambletonian when the latter was two years old. The next year she produced Alexander's Abdallah, that, opportunities considered, proved one of the best sons of Rysdyk's Hambletonian as a perpetuator of the trotting instinct.

John B. Decker, of Deckertown, N. J., once owned an old bay mare that would have been a good animal in her prime had she not suffered so from quarter cracks that she could not stand road work longer than about two months at a time. She then had to be sent to the country and stand in wet clay until her feet became free from soreness. She was then used for road work again for a few weeks, and so alternated between the road and the box of clay.

After she got somewhat along in years she was used for a time as a common hack, and when unfit for that she was finally used for brood purposes. Her sire, it is said, was old Abdallah, and her dam was a thoroughbred that had been a four-mile-heat race winner.

After raising four foals by other horses, Mr. Decker had her mated, in 1856, with a young horse then known as Edsall's Hambletonian, but now generally known as Alexander's Abdallah. The following year this old, crippled mare produced a filly, which was a born trotter, but was so high strung and willful that she was not fairly broken to harness until she was eight years old, but when she was seventeen years old, under the name of Goldsmith Maid, she lowered the world's trotting record to 2:14. She was the most remarkable trotter that the world ever has seen or ever will produce. Her dam was a cripple, and so was the dam of her sire. So, too, was the dam of her sire's sire.

In 1844 the late Jonas Seely bought an old crippled mare with a foal at foot from a Mr. Charles Kent, paying \$135 for the mare and her foal. This mare was by the Norfolk trotter, imported Bellfounder. Her dam was known as One Eye. She had two eyes when foaled, but like many other good horses, she had a very strong will. One day a groom attempted to subdue her by harsh means. When he got through with her she had lost an eye, but had just as much will left as when the fracas began.

Her sire was Bishop's Hambletonian, and he was by imported Messenger, out of Pheasant, a thoroughbred daughter of imported Shark, a son of Marske, sire of the invincible English Eclipse. The dam of One Eye was a brown mare with white hairs in her tail, known as Silvertail. She was used under the saddle and was frequently ridden by her owner one hundred miles in a day.

The dam of Silvertail was called Jin Black. She was brown in color with a bald face and two white feet.

She was a powerful animal, very spirited, and at one time so balky that her owner, a Mr. Deaumont, could not make her work. Deaumont sold or traded her to a Mr. Seely. Under Mr. Seely's treatment she became kind in every way, but was so powerful that her owner had to get an extra strong set of iron traces made for her. It has been vaguely intimated that Jin Black was a pacer. We would like to know what grounds there were for such an intimation. She and her descendants were noted for large limbs and joints that were as clean as the best of thoroughbreds.

Such were the ancestors of this old crippled mare now known as the Charles Kent mare, that with a foal at foot cost Mr. Jonas Seely \$135 in 1844. She was a valuable animal, however, before she was crippled by hard usage. She was sold as a three year old for \$300, and that was then almost a fabulous price for a filly of that age. The purchaser was a Mr. Peter Seely, and he sold her to a Mr. Ebenezer Pray for \$400. Mr. Pray sold her to a Mr. Chivers for \$500, and a New York banker paid Mr. Chivers \$6000 for her.

It was while owned by this banker that she became lame and unfit for road use. Before she met with this misfortune she could trot a mile close to 2:40. Mr. Jonas Seely, who bought her with her foal, raised two fillies from her, and then in 1848 mated her with old Abdallah. The next spring she had a bay colt, and Mr. Seely sold her, also the colt at foot, to a young man named William Rysdyk, for \$125. Mr. Rysdyk was then a common laborer, but that colt, now known as Rysdyk's Hambletonian, earned him a moderate fortune, in fact, made him rich for those days.

Rysdyk's Hambletonian was a bay in color with black points, a star in the forehead and two white socks behind. He stood about 15.1½ hands high at the withers, and two inches higher at the hips. His head was large and bony, his muzzle a trifle coarse, the profile of his face somewhat on the Roman order, and his ears quite large. He had a full intelligent eye, and a forehead that indicated large brain capacity. His neck was only of medium length, fairly clean at the jowls, and well set upon oblique and strongly muscled shoulders. His nostrils and windpipe were large, indicating good lung capacity.

His withers were low and heavily muscled, making them somewhat thick and round instead of sharp. His barrel was long and as round as a log. He had a good back and coupling, long, smoothly rounded hips, a straight croup, tail set high, powerfully muscled quarters, strong gaskins and clean, sound joints and limbs. Though his hind legs did not drop straight from the hock to the ground, they were not of the sickle conformation. He had a beautiful glossy coat, and his muscle was of the compact, fine-grained quality.

Rysdyk's Hambletonian was a natural, square-gaited trotter. He was handled some as a three year old, and it is stated upon good authority that he trotted a mile that fall in 2:48½. A horseman of large experience and good judgment, who knew the horse well and had ridden after him, has stated that he could, and, in his judgment, did, show a 2:40 gait hitched to road wagon. It matters little whether he was a fast trotter himself or not. He certainly surpassed all the other stallions of his day as a progenitor of trotting proclivities. It is doubtful if any other stallion ever lived that did so large a stud service and left so numerous a progeny as Rysdyk's Hambletonian.

The following table shows the amount of patronage that he received each year of his life, the percentage of foals, the total number of foals and price of service fee each year of his life, beginning in his two year old form:

Years.	Mares covered.	Per cent of foals.	Foals dropped.	Service fee.
1851.....	4	75	3	Free
1852.....	17	76	13	\$ 25
1853.....	101	78	78	25
1854.....	88	70	62	35
1855.....	89	72	64	35
1856.....	87	73	64	35
1857.....	87	72	63	35
1858.....	72	75	54	35
1859.....	95	70	66	35
1860.....	106	68	72	35
1861.....	98	69	68	35
1862.....	158	70	111	35
1863.....	150	61	92	75
1864.....	217	67	148	100
1865.....	193	67	123	300
1866.....	105	71	75	500
1867.....	72	58	42	500
1868.....	0	..	..	..
1869.....	2	81	18	500
1870.....	22	75	16	500

1874.....	32	75	24	500
1875.....	24	8	2	500

The total number of foals that he got was 1333, and forty of them took race records in standard time. Not less than 151 of his sons have sired 2:30 speed. His

daughters have produced 110 trotters, with records from 2:07½ to 2:30, and seven pacers with records of 2:25 or better. His daughters have also produced 122 stallions that have sired 2:30 speed.

Several of his sons have proved far more successful than himself as perpetuators of trotting instinct or the inclination to stick to the trotting gait.

Following is a list of his sons that have sired 25 or more with standard records, also the breeding of their dams:

Electioneer, b h, foaled 1868, dam, Green Mountain Maid, by Harry Clay 2:29; second dam, Shaohai Mary, supposed to be by Iron's Cadmus.....	166
Happy Medium, b h, foaled 1862, dam, Princess 2:30; by Andrus' Hambletonian; second dam, Wilcox Mare, by Burdick's Engleer.....	96
Strathmore, b h, foaled 1866, dam, Lady Waltemire, by North American; second dam, by Harris' Hambletonian.....	89
Egbert, b h, foaled 1875, dam, Campdown, by Messenger Duroci; second dam, Miss McLeod, by Holbert Colt, son of Hambletonian.....	85
George Wilkes, b h, foaled 1856, dam, Dolly Spanker, by Henry Clay; second dam, Telegraph, by Baker's Highlander.....	83
Dictator, b h, foaled 1863, dam, Clara, by Seely's American Star; second dam, McKinstry Mare.....	56
Aberdeen, b h, foaled 1866, dam, Widow Machree 2:29, by Seely's American Star; second dam, Duryea Mare, by Pintler's Bolivar.....	55
Sweepstakes, b h, foaled 1867, dam, Emma Mills, by Seely's American Star; second dam, by Rediker's Alexander W.....	42
Dauntless, b h, foaled 1867, dam, Sally Eagles, by Smith's Clay, son of Neave's Cassius M. Clay, Jr.....	36
Volunteer, b h, foaled 1864, dam, Lady Patriot, by Young Patriot; second dam, Hulse Mare.....	34
Victor Bismarck, b h, foaled 1867, dam, Estelle Wood, by Harry Clay 2:29; second dam, Grandmother, by Terror.....	31
General Stanton, b h, foaled 1866, dam, by One Eyed Kentucky Hunter; second dam, by Long Island Black Hawk.....	30
Jay Gould, b h, foaled 1864, dam, Lady Sanford, by Seely's American Star; second dam, Old Sorrel, by Exton Eclipse.....	29
Masterode, b h, foaled 1868, dam, Lady Irwin, by Seely's American Star; second dam, by Abdallah.....	28
Hambletonian Prince, b h, foaled 1865, dam, Nelly Cammeyer, by Cassius M. Clay; second dam, by Chancellor.....	26

## The Colorado Circuit.

A very alluring bid for the harness horses is made by the Colorado Circuit of 1903. The offerings at Trinidad, Colorado Springs and Pueblo are in \$500 each event, with the single exception of a \$300 purse at Colorado Springs for a trotting race to wagon. Denver's open purses are also \$500, with sixteen of them carded, exclusive of the ten closed events.

The circuit opens June 2 at Trinidad, under the auspices of the Elks Racing association, who will distribute \$7,000 in premiums. Pueblo has the next week, the State Fair association being the hosts, with \$7,000 to give out. Then comes Colorado Springs with \$10,000 in the locker for the various events, followed by Denver with her banner program, covering twelve days' racing of the usual pleasing variety.

## San Francisco Veterinary College.

Next session will begin June 15, 1903. Write for catalogue giving full particulars. M. L. PANCOAST, Secretary, 510 Golden Gate Ave., San Francisco. E. J. CREELEY, D. V. S., President.

Dr. Johnson, the green pacer by Online 2:04, that is in the stable of George Saunders, is touted as better than Greenline 2:07½.

Baron Grattan and Black Grattan, two green pacing colts by Grattan 2:13, each worked a mile in 2:15 at Memphis recently.

Brash 2:14½, a ten year old full sister of Chain Shot 2:06½, should be a hard one to beat in the 2:15 trotting class this season.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

**Combault's**  
**Caustic**  
**Balsam**

The Great French  
 Veterinary Remedy.

A Safe, Speedy and Positive cure  
 for ailments of  
**HORSES and CATTLE.**

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address  
**THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.**

# ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

## The Ingleside Tournament.

The big three days' blue rock tournament of the San Francisco Trap Shooting Association came to a successful conclusion last Sunday afternoon. This affair was of more magnitude in many ways than would first appear. The money distribution during the shoot was something like \$6000. The general average of shooting was not as high as could reasonably have been expected. The weather conditions and the 20-yard handicap at the Sergeant traps were in a great measure accountable for this. Not that our shooters are not proficient at the three traps, however; the north wind and that 20 yards would beat the best gun ever shot. As a rule our local shooters held their own with the visitors from the south and north, most of these latter shooters, by the way, showed that they were well able to take care of themselves at the traps. High average, went as was generally anticipated to Clarence C. Nauman, who has proven at many tournaments on the Coast and under varied conditions, to be one of the best trap shooters in the country and the Coast champion, and this statement is made without detriment to a number of other good Coast shooters. Second high average was won by Otto Feudner, who made a remarkably good showing.

We anticipated giving this week a report of general interest to our readers and shooters, including various data and technical information, such as has been our custom in the past. Unavoidable circumstances, however, compels us to defer a more extended notice until our next issue.

The total of scores for the three days appears tabulated below. In the first line of each individual score the results of the forenoon shoot and the first handicap distance will be seen. The second line gives the afternoon handicaps distance and scores. A comparison of some of the morning 16 yard scores and the afternoon 20 yard scores will explain the supposedly low average of some of the participants.

Blue rocks, Ingleside, Friday, May 23, 1903.

Following the big blue rock tournament, on Monday last, a number of the sportsmen who had attended the blue rock shoot were present at the live bird section of the Ingleside grounds.

The weather was anything but favorable to the shooters. The pigeons supplied were an averaging lot of strong and swift-flying birds. Three pool events were shot up, all of the participants standing at the 30 yard mark. In the first race, the three high guns, Phil B. Bekeart, M. O. Feudner and C. C. Nauman, divided the purse—\$30—on straight scores. Mr. Tolles also killed clean; he was shooting, however, for birds only.

In the second six bird pool, Feudner, Bekeart, Nauman and C. H. Julian of San Diego divided the \$30 purse, each having a clean score.

A twenty bird race followed, with fourteen men up. The entrance for those in the pool was \$15 apiece. The purse was divided by Gus Knight of San Bernardino, C. C. Nauman and Phil Bekeart, who each scored 19 birds. The scores made in these events follow:

Six bird pool, \$2.50 entrance, 30 yards rise, 3 moneys high guns—

Feudner, M. O.....	222222-6	Nauman, C.....	222222-6

\* Dead out.

The Empire Gun Club's two days' open-to-all holiday shoot draw a big attendance to-day and to-morrow if a large and valuable list of merchandise prizes are an inducement. Two Maugatrap will be in use for those entering the many events.

### Build Up.

If you are "all tired out" from hard work indoors a trip to any trout stream will do you good. The gentle exercise, change of air and the country "grub" all bring you to realize you are still fit and healthy. Skinner at 801 Market St., S. F., can furnish you the proper tackle and camp outfit, and will tell you where to go and how to get there. Make the catches as reasonable as you can. Skinner goes fishing himself.

The new Umbrella Tent of Skinner's has the endorsement of every sportsman who has seen it. Can be put up in five minutes, weighs only 15 lbs., and has ample room to sleep two people.

Nearly all of the Southern California shooters who attended the San Francisco Trap Shooting Tournament stopped over at Fresno to-day to participate in a trap shoot at that city to-morrow.

The regular monthly shoot of the Millwood Gun Club will take place at the Millwood grounds to-morrow.

"Billy" Crosby, under dates of May 11th and 12th, broke the world's record for long continued shooting at Crawfordville, Ind. In a two days' program event he shot 200 birds each day, missing but one bird each day, or a continuous shoot of 398. Crosby uses an L. C. Smith.

The following communication was received this week from Messrs. Kimball and Upson:

SACRAMENTO, Cal., May 26, 1903.

EDITOR BREEDER AND SPORTSMAN:—We desire to thank you for the very complete account of our recent tournament given in your last issue.

In explanation of certain features, we would like to say that we are carrying out the same plan of distribution of moneys and merchandise as has been established in all the Northern California tournaments that have been held here in Chico, Red Bluff, Redding and Cottonwood, where guaranteed purses have been given. It is difficult to estimate the exact number of shooters that will attend a tournament and if there had been but thirty entries, the money would have been contested for, just the same.

In figuring the entries for each event, you have made a slight error, as there were seven shooters who did not compete for the moneys—Otto Feudner, C. R. Reed, C. I. Wood, J. Fanning, W. A. Robertson, W. S. Wattle and W. A. Seaver.

We assume all financial responsibility, do all the work and conduct these tournaments to suit our patrons of Northern California, whom we desire to please in every way. Should our efforts not meet with their approbation, then will we gladly make any change desired.

Very truly,

KIMBALL & UPSON.

### DOINGS IN DOGDOM.

Irish, Woodlawn Kennels good little Irish Terrier, was purchased this week by Mr. W. R. Whittier.

Frank Dole has Edgewood Crystal in his kennels again. He bought him back for a good figure. Dole knows a good Bull Terrier and was so well satisfied with a litter by Crystal that he determined to have him back again.

We regret to learn recently that Ch. Ivel Rustic was smothered in the express car in transit between San Francisco and Orange, Texas, where Mr. Thomas dropped off to leave Sabine Fearless with the Sabine Kennels. It seems Mr. Thomas had old "Billy" in his box with the door open in the baggage car, but one of the baggage masters was one of those "individuals" and insisted on the dog going in the express car with the result that poor old "Billy" was smothered. We are not ashamed of the tear that rises when we think of this good old dog's horrible end. Mr. Thomas found him almost gone and he died a few minutes later. Everyone knew Ivel Rustic and his record. He was a brother of Ivel Doctor and one of the famous litter that, it is said, brought more than \$5000 to the breeder, Mrs. Evans, who paid \$7.50 stud fee for General Roberts, their sire.—Am Stock-Keeper.

Mr. Thos. S. Griffiths, of Spokane, Wash., writes us.

"My new Collie bitch Imported Moreton Vesta in whelp to Rippowam Archer arrived O. K. from Stanford, Conn. She is a beauty and none better bred. Her sire is Edgibaston Royal (Ch. Portington Bar None-Wilton Dolly) she by Southport Perfection Her dam is the renowned winner Wellesbourne Flirt, litter sister to W. Cornfrey, and full sister to Ch. M. Coroner and Ch. W. Pride. So you see if breeding counts, her pups ought to be prize winners (in fact one out this year, Lord Stanford, has won 10 firsts at 7 months old.) We are trying hard to give a bench show here in October."

Police Judge Cabaniss holds that the killing of hares by the method in vogue at the coursing parks is not cruelty to animals. In an oral opinion from the bench in his department last week he directed the dismissal of the accusation against Dominick Shannon of the Ingleside Coursing Park and the bond of the defendant exonerated.

Shannon was arrested by Secretary Holbrook of the Society for the Prevention of Cruelty to Animals on the 12th of April last. The arrest was made at the park while coursing was in progress and at that time it was stipulated that the defendant be allowed to continue the sport for the day, surrender himself into custody on the following morning, and to be guided in future coursing by the decision of the court.

In his opinion Judge Cabaniss stated that there was no question in his mind but what the suffering of a hare would equal that of a human being, if it were tortured in killing, but in the present case it was shown that the death of the animals was almost instantaneous; that those escaping from the bounds were immediately followed and killed, if injured in the chase, and under the circumstances he could see no legal reason why the sport should be tabooed.

It is reported that Mr. Gooderham intends presenting King Edward with the famous Fox Terrier, Norfolk True Blue. This grand bitch would allow His Majesty to take precedence of all the Fox Terrier fancy, we fancy. And then the program is to be extended to a trip abroad with a Norfolk team.

Wandee Kennels have now the best lot of Fox Terriers in the West and can possibly give some of the noted Eastern kennels a good rub. Mr. Harley has recently purchased some rare good ones, picked up for him by Mr. George Raper. One dog, the noted Ch. True, is said to be the best son of Norfolk's Ch. Veracity. True has already made his mark as a sire and his placement in the Wandee stud should be productive of some good results. Lady Confidence, another one bought, will be bred to Ch. Blizzard before she leaves England. Rowton Cherry is another good one destined to take an important position as a brood bitch in Wandee Kennels. Richmond Sea Breeze (Ch. Blizzard-Judy) will make her appearance on this side as Wandee Sea Breeze at the Ladies Kennel Association two days' open air show at Hempstead, L. I., concluding to-day.

Concerning two of these Fox Terriers, *Our Dogs* in mentioning their appearance at an English show, says:

"Fox Terriers were not a large collection, several classes being cancelled. The dogs, with one or two exceptions, were poor, whilst the bitches were extra good. In the open bitch class Mr. Hamer quickly spotted the winner in that beautiful bitch Ch. Lovaine, who was looking very well, another grand bitch in Lady Confidence being placed second; she has improved greatly in body, and barring her rather big ears is hard to find fault with. Dayne Sunbeam, a new face, was third; this is a pretty bitch, with good body, front, bone, legs and feet; a neat head, correct in type, which would, however, be improved if a little longer in foreface. Reserve, Seedhill Judy, all a Terrier; looks like making up into a warm one, for she improves each time we see her. Ingatstone Rustle has a nice class of head, is good in expression, but was not in the best of condition. In limit, dog or bitch, Lady Confidence was at the head of affairs, followed uncomfortably close by a good bitch in Ridge-wood Renown, nice in head and ears, with good body, bone, legs and feet. Third, West Point Snowstorm, who, to my mind, is rather Bull Terrier like; full in eye and a shade overdone in ear, but is excellent in body properties, with good bone, legs and feet. Chaseley Patch has made up nicely in body, plenty of bone, good legs and feet; his skull, however, must not go any stronger. Bobby behind the head is very good; his ears are too large, and he could do with more length in front of the eyes. The novice class introduced us to a really high class Terrier in Richmond Sea Breeze, who is a credit to her sire, Ch. Blizzard; she possesses a beautiful head, with the correct Terrier expression, good neck, sound shoulders, excellent in bone, legs and feet; when made up fully in body she will trouble the best; she won with something in hand in this and following classes, the remainder being repeats."

### Kennel Registry.

#### WHELPS.

Delverton Cocker Kennels' red Cocker bitch Baby Ora (Ch. Viscount-Black Sea) whelped five puppies (4 dogs) to same owners' Ch. Hampton Promise (Black Duke II-Ch. Gaiety Girl), May 18, 1903.

Delverton Cocker Kennels' red Cocker bitch Little Dorrit (Ch. Woodland Duke-Myrtille) whelped six puppies (3 dogs) to same owners' Ch. Hampton Promise (Black Duke II-Ch. Gaiety Girl) May 24, 1903.

#### SALES.

Delverton Cocker Kennels has sold the black dog puppy Delverton Wonder, A. K. C. S. B. 72806 (Ch. Hampton Promise-Flora-dora) to Mrs. A. Roncoverie, San Francisco, May 21, 1903.

### GOSSIP FOR SPORTSMEN.

Who wouldn't take a day off,  
When the fleecy clouds in view  
Are trailing, sailing 'way off,  
Down a breezy sea of blue?

Who wouldn't fly and stay off,  
Who wouldn't lie and lay off,  
And get away—away off,  
In the daisies and the dew?

Who wouldn't fall to wishing  
When they hear the trees a-swishing,  
And the whole world's gone a-fishing,  
And is beckoning to you?

Somebody sends this and wants to know where he can find it. Better see the agents of the railroad lines which go up into Mendocino, Lake, Sonoma and Marin counties, or down through the Santa Clara valley and into the Santa Cruz mountains, we will suggest.

Recent advices from Sacramento indicate a favorable season this fall for the sportsmen of that section, according to Game Warden George Neal, who states: "Quail were never more plentiful in Sacramento county and vicinity. Everywhere I go I find lots and lots of quail, and in several instances I have noticed large coveys of little ones, who are strong and healthy, while I have run across nests in every section of the county."

"On one of my trips the other day I ran across an old mother mallard duck with eight little ones. She had taken her flock out into a grain field over a mile from the nearest water to feed. When I came on to her and her little family she went through the usual performance of fluttering and struggling to lead me away from her family, and I quickly put an end to her anxiety by walking away."

"There are a great many young ducks hatching out in the tule basins around this locality at the present time, but the majority of the birds are nesting, and it will be several weeks before the young birds get out into open water enough to form any opinion as to their number."

"Lately I have been putting in the majority of my time, outside of my regular trips afield, in preserving the fish interests. During the high water season, as is well known, the water spreads all over the low country, and as it recedes leaves numerous fish."

young bass are alive with young bass and the fry of other food fishes.

As the water dries up in these ponds every year the young bass and fry are destroyed. In consequence of this the young bass are taken to the river or to the ponds and the young bass are taken to the river or to the ponds and the young bass are taken to the river or to the ponds.

The young bass is the only food fish in this locality and it is the only food fish in this locality and it is the only food fish in this locality and it is the only food fish in this locality.

The striped bass are multiplying very rapidly in the river, and the fishing this season should be excellent. The carp are rapidly disappearing, however, as the bass feed on their young, and it will be but a matter of a few years before the old fish will die out and the young will be exterminated. I netted a large quantity of young steelhead trout out of one of the ponds the other day and placed them in the American river. I believe that they will afford good sport in the future, as they should take a fly in the clear water as well as they do in other localities.

I am raising a quantity of young pheasants with excellent success, and I shall endeavor to stock the county with the birds. In doing so I shall adopt the same methods pursued in England, where pheasant raising is carried on so successfully. I shall take the hen and her flock to some locality where I can leave her in care of a trustworthy man, keep her in a coop and allow the young ones their liberty. They will forage around the locality of the coop, learn the places of shelter and food, and as they attain their growth will be thoroughly at home. Heretofore we have taken the grown birds and turned them out in strange localities, where they did not know the food and water conditions, and they have starved to death. I think my new plan should be a success.

Owing to the lateness of the season but few doves have as yet made their appearance in the surrounding country, and none of them have as yet begun nesting. This does not, however, necessarily entail a scarcity of the birds when the shooting season begins, as these migrating birds may put in an appearance at any time and begin housekeeping. Unless they start operations almost immediately it will be a disastrous season for them, as they will only have a month's time to raise their squabs before the season opens.

Chief Deputy Fish Commissioner Chas. Vogelsang has recently compiled and published a most convenient chart, giving at a glance an abstract of the present fish and game laws. Copies can be procured by addressing the State Board of Fish Commissioners, Mills Building, this city.

W. W. Stocker of this city, recently, near Madera, killed a mountain lion which measured seven feet from tip to tip.

A report from Santa Rosa a few days ago states that a mountain lion over eight feet in length has its haunts in the vicinity of the Sonoma County Farm and Hospital, about two miles from that city. For several weeks it has been preying on live stock in the neighborhood, even coming from the shelter of the hills in broad daylight. One night it entered the barn on the hospital premises and was vainly endeavoring to break through the stall to get a horse, when seen. A shotgun was the only weapon available and this was brought into use, but the charge which struck the animal as it made off into the brush did not seem to do any damage. A lion hunt is to be arranged, and it is hoped to kill the beast, which causes much terror in the neighborhood. How the lion got so far into civilization is a mystery.

Some interesting observations relating to the surgical treatment of wounds by birds were recently brought by M. Fabia before the Physical Society of Genova. The author quotes the case of the snipe, which he had often observed engaged in repairing damages. With its beak and feathers it makes a very creditable dressing, applying plasters to the bleeding wounds, and even securing a broken limb by means of a stout ligature. On one occasion he killed a snipe which had on its chest a large dressing composed of down, taken from other parts of the body, and securely fixed to the wound by the coagulated blood. Twice he had brought home snipe with interwoven feathers strapped on to the side of fractures of one or other limb. The most interesting example was that of a snipe, both of whose legs he had unfortunately broken by a misdirected shot. He recovered the animal only on the following day, and he then found that the poor bird had contrived to apply dressings and a sort of splint to both limbs. In carrying out this operation some feathers had become entangled around its beak, and not being able to use its claws to get rid of them, it was almost dead from hunger when discovered. In a case recorded by M. Magnor, a snipe which was observed to fly away with a broken leg was subsequently found to have forced the fragments into a parallel position, the upper fragments reaching to the knee, and secured them there by means of a strong band of feathers and moss intermingled. The observers were particularly struck by the application of a ligature of a kind of flat-leaved grass wound round the limb, of a spiral form, and fixed by means of a sort of glue.—*Indian Field.*

### Manitoba Field Trials.

The Manitoba Field Trials Club trials will commence on Tuesday September 8th. The running will be conducted under the revised rules of the club.

Three stakes will be run:

1. Dog Stake—For Setters and Pointers whelped on

or after January 1st, 1902. Entries close 1st July, 1903. Purse—\$325; 1st, \$150; 2nd, \$100; 3rd, \$50; 4th, \$25. \$5 forfeit. \$10 for starters.

All Aged Stake—For Setters and Pointers who have not won first place at any of the following trials: Eastern, Continental, United States and Manitoba, in any previous year. Entries close 1st August, 1903. Purse—\$325; 1st, \$150; 2nd, \$100; 3rd, \$50; 4th, \$25. \$5 forfeit. \$10 for starters.

Championship Stake—For Setters and Pointers. Open only to dogs that have won a place in competition in field trials. Nominations to be made on or before August 1, 1903. \$5 forfeit; \$10 starters. Purse to consist of total running fees and gold medal. First heat one hour, afterwards at discretion of judges.

The following arrangements have been made in order to prevent expense, trouble or delay at any of the Canadian customs ports of entry—viz., Greta or Emerson.

All dogs that have been duly entered in any of the Manitoba Field Trials Club events are allowed to enter Manitoba and remain for ninety days, free of all duty.

In order to benefit by this arrangement, an accurate description of each dog is absolutely necessary, giving name, breed, sex, color, event entered in, owner's name, name of person having charge, and line of railway traveling by, must be mailed to the honorable secretary one week previous to date of arrival at port of entry. Dogs, unless entered in the trials, will be detained by the custom house authorities.

The only change made in this year's statutes being that the first heat in the Championship Stake must be of one hour's duration, thus bringing the factor of endurance amongst other qualities in picking the winner.

The winter has been most favorable for the birds, and large numbers are seen all over the Province.

A large, new, solid brick hotel has been built since last season at Carman, thereby giving improved and increased accommodation.

Handlers can be located on good training grounds in various parts of the Province, where they can easily reach Carman for the trials.

Mr. W. W. Titus, of West Point, Miss., and Mr. T. T. Ashford, of Birmingham, Ala., will act as judges at the coming trials.

Any further information, rules, entry blanks, etc., can be obtained by addressing Eric Hamber, Secretary-Treasurer, Winnipeg, Man.

### More Game Protection.

The Game Protective Association of the San Joaquin valley counties organized at a convention held three weeks ago in Fresno, with J. Sub Johnson of Visalia President and Joe Barcroft of Madera Secretary. Kern county had no representative present; this will possibly be easily rectified later on.

If the Supervisors of the several counties represented in the association should accept its suggestions, that part of California will be organized into a district without waiting for the Legislature to act.

At the convention there were present J. Sub Johnson, Frank Osborn, F. D. Smith and R. A. Whitney of Visalia; C. J. Eubanks and Joe Barcroft of Madera; E. C. Berry, J. J. Vanderburg and W. E. Shiflett of Selma; F. J. Stone, Emmett Riggins, S. C. St. John, Andy Ferguson, Deputy Fish Commissioner, and W. C. Kennedy of Fresno city and H. T. Payne at large. Before the committee was named, however, Colonel (where did he get it?) Payne had spoken on the subject of wild duck shipments and had suggested that, in discussing the open season, it be remembered that it was a good thing to cut the season down from the front end.

The committee held quite a protracted session and at its close presented a report favoring the establishment of open season on the kinds of game named as follows in the San Joaquin valley counties:

Doves, August 15th to February 1st; quail, November 1st to February 1st; deer, September 1st to November 1st. As to wild duck a bag limit of 25 was recommended, and it was urged that the different counties adopt laws against the sale of wild ducks. It was suggested, too, that no trout less than six inches long be taken and that a day's catch be limited to ten pounds and one trout over for each person. A recommendation was made that no black bass be allowed to be caught for two years.

The formation of the Central California Game Protective Association was also urged, to consist of ten delegates from each Game Protective Association in Merced, Madera, Fresno and Tulare counties.

The report of the committee was approved and all the ideas adopted.

Judge St. John was appointed a committee of one to draft an ordinance in accordance with the suggestions of the committee and to report the same at the next meeting, which is to be held in Visalia and is to be called by the Visalia Association, under whose auspices it will be convened.

### The Tuna Season Is On At Catalina.

Commencing at the beginning of May, the fifth annual angling tournament of the Santa Catalina Island Tuna Club is now in full swing and new records in landing big fish will count for the championship. This interesting event was started in the summer of 1899, and each year since the honors have been striven for.

Restrictions are placed upon those who wish to compete for the honors. The rules of the club provide that the rods must not be less than six feet nine inches long and the tip must not weigh more than sixteen

ounces. By the "tip" is meant all that portion of the rod from the reel seat to the end of the rod. The line must not exceed twenty-four threads or strands, and must not be able to support a dead weight of more than forty-eight pounds. All those trying to beat the record must bring the fish to gaff themselves. The fish must be reeled in and if the rod is broken either before or after the fish is gaffed that disqualifies the competitor.

No professional anglers are allowed in the tournament. Only amateur fishermen can enter, except as specified in the special class "I." The present holders of cups for the various seasons are:

Largest tuna—C. F. Holder, Pasadena, season 1899, 183 pounds; Col. C. P. Morehouse, Pasadena, season 1900, 251 pounds; F. S. Schenck, Brooklyn, N. Y., season 1901, 158 pounds; F. V. Rider, Avalon, season 1901, 158 pounds; John E. Stearns, Los Angeles, season 1902, 197 pounds.

Black sea bass—F. V. Rider, Avalon, season 1898, 327 pounds; T. S. Manning, Avalon, season 1899, 370 pounds; F. S. Schenck, Brooklyn, N. Y., season 1900, 384 pounds; A. C. Thompson, Pomona, season 1901, 384 pounds; H. T. Kendall, Pasadena, season 1902, 419 pounds.

Largest yellowtail—F. V. Rider, Avalon, season 1898, 41 pounds; F. S. Gerrish, Jacksonville, Fla., season 1899, 37 pounds; R. F. Stocking, Los Angeles, season 1900, 48 pounds; T. S. Manning, season 1901, 33 pounds; Dr. Trowbridge, Fresno, season 1902, 47½ pounds.

Winners of first and second places will be presented beautiful cups and prizes for their trouble. The competition this year promises to be close, as many good anglers have signified their intention of visiting the waters and trying their luck.

### Coming Events.

#### Rod.

April 1-Aug. 15—Close season for lobsters and crawfish.  
April 1-Nov. 1—Trout season open.  
April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.  
May 1-Sept. 1—Close season for shrimp.  
June 13—Saturday Contest No. 1. Class series. Stow lake, 2:30 p. m.  
June 14—Sunday Contest No. 1. Class series. Stow lake, 10 a. m.  
July 1-Jan. 1—Open season for black bass.  
Sept. 1-Nov. 1—Close season for crabs.  
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

#### Gun.

May 30—Millwood Gun Club. Blue rocks. Mill Station.  
May 30, 31—Empire Gun Club. Open-to-all holiday shoot. Blue rocks. Alameda Point.  
June 7—California Wing Club. Live birds. Ingleside.  
June 7—College City Gun Club. Blue rocks. Berkeley.  
June 14—Golden Gate Gun Club. Blue rocks. Ingleside.  
June 21—Union Gun Club. Blue rocks. Ingleside.  
June 21—College City Gun Club. Special blue rock events. Berkeley.  
June 21—Empire Gun Club. Blue rocks. Alameda Point.  
July 1-Feb. 15—Dove season open.  
July 15-Nov. 1—Deer season open.  
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.  
Oct. 15-Feb. 15—Open season for quail, ducks, etc.  
Oct. 15-Jan. 15—Open season on quail in Marin county.

#### Bench Shows.

May 29, 30—Ladies Kennel Association of America. Open-air show. Hempstead, L. I., on grounds of Mrs. J. L. Kernochan. Mrs. A. G. Evans, Secretary, Westbury, L. I.  
Oct. 6, 7, 8, 9—Danbury Agricultural Society. Danbury, Conn. John W. Bacon, Treasurer.  
Nov. 3, 4, 5, 6—Ladies Kennel Association of America. Madison Square Garden, New York. Mrs. A. G. Evans, Hon. Secretary, Westbury, L. I.

#### Field Trials.

Aug. 18—Iowa Field Trial Association. 6th annual trials.  
Aug. 18—Nebraska Field Trial Association. O'Neill, Neb. H. H. McCarthy, Secretary.  
Sept. 1, 4—Minnesota-North Dakota Field Trial Association. 2d annual trials. Ironsides, S. D. Dr. W. A. Moore, Secretary-Treasurer, St. Paul, Minn.  
Sept. 8—Manitoba Field Trial Club. 17th annual trials. Carman, Man.  
Oct. 26—Monongahela Field Trial Association. 9th annual trials.  
Nov. 2—Michigan Field Trial Association. Annual trials.  
Nov. 2—Ohio Field Trial Association. 6th annual trials.  
Nov. 9—Missouri Field Trial Association. Annual trials.  
Nov. 9—International Field Trial Association. 15th annual trials.  
Nov. 9—Independent Field Trial Club. 5th annual trials.  
Nov. 10—Western Irish Setter Club. 2d annual trials.  
Nov. 16—North American Field Trial Club. 5th annual trials.  
Nov. 16—Kentucky Field Trial Association. 4th annual trials.  
Nov. 16—Illinois Field Trial Association. 5th annual trials. Robinson Ill.  
Nov. 23—American Championship Field Trial Association. Annual trials. Robinson, Ill.  
—Indiana Field Trial Club. Annual trials. Clay City, Ind., first week in December. C. F. Yung, Secretary, Clay City, Ind.

#### 1904.

Jan.—Georgiana Field Trial Association. 2d annual trials. Waynesboro, Ga.  
Jan. 6, 13—Mississippi Field Trial and Gun Club. Inaugural trials. Holly Springs, Miss. Membership Stake, January 6; Derby and All-Age Stake, January 13. W. De Arnold, Tupelo, Miss.  
Jan. 13—Pacific Coast Field Trials Club. 21st annual trial. Cal. Albert Betz, Secretary, 201 Parrott Bldg., S. F.

### Dog Owners!! Read This!!

We are carrying in the advertising columns of this journal an advertisement of "Sergeant's Dog Remedies," a popular line of preparations for which F. W. Braun & Co. of Los Angeles, California, have been made distributing agents on the Pacific Coast. The goods have few equals and no superiors on the market today, having received the highest endorsements of the leading dog men and kennel owners of this country and Canada.

They are manufactured by Polk Miller Drug Co. of Richmond, Va., who invite all persons having sick dogs to write (enclosing stamp) describing symptoms, and they will cheerfully furnish the best possible advice without any charge whatever. A revised copy of their book on "Dogs" sent free on receipt of 3c in stamps to cover postage.

## THE FARM.

### America's Splendid Cattle.

George M. Rommel, expert in animal husbandry of the Bureau of Animal Industry, says in an Agricultural Department bulletin that American breeders of cattle have equaled if not excelled the results reached on the other side of the water. "But," he adds, "no supremacy of excellence, no victory in show ring or market, can efface the memory of the debt America owes to those sturdy yeomen whose names adorn the herd records of England and Scotland."

Mr. Rommel's pamphlet is devoted to a study of American breeds of beef cattle. He begins at the very beginning, going back to that voyage of Columbus on which the first cattle known in the western hemisphere are supposed to have been brought over. Other Spanish explorers and armed invaders followed Columbus's example, bringing not only cattle but horses as well.

There was an abundance of grass and water, and as the Spaniards penetrated further into the interior of the country, their herds in growing numbers followed them. From these sprang the native cattle of the West Indies and Mexico, the long horned steers of Texas and the wild horses of the plains.

The next cattle immigration came with the Portuguese to Newfoundland and Nova Scotia. The French, too, introduced cattle into Acadia and New France.

These were carried into the far interior, and as far back as 1750 the French missionaries in Illinois possessed considerable herds of cattle, horses and swine.

Virginia got her cattle from England soon after the settlement of Jamestown. They multiplied in the Old Dominion very rapidly, one contributing cause being the fact that the law in those early days made the killing of cattle a crime punishable with death.

The Pilgrim Fathers began the cattle business with three heifers and a bull, brought over from England in the ship Charity in 1624. New Hampshire got her first cattle from Denmark, New York from Holland, and Delaware from Sweden, at about the time the Charity landed the three heifers and the bull.

The first shipment to the Carolinas was from England in 1670, while Georgia was the last of all the colonies to figure as a market for the English export trade in breeding cattle.

Thus it was that the United States got its first start in that cattle business which in the year of grace 1903 has made it possible to have all the present rumpus about the Meat Trust. The stock gathered from various parts of Europe were all so hopelessly inter-crossed in course of time that their identity was lost, with the result that our forefathers had what were known as the native cattle of the United States. Of this stock Mr. Rommel says:

"What the native stock was like we can best imagine from the stories of men now old, and from the scrub stock that is even yet the eyesore of many American pastures. Blood of Spanish, Swedish, French, Dutch and English, with, maybe, a dash of buffalo as they wandered westward, gave this stock a cosmopolitan character that was representative, perhaps, but hardly profitable.

"Lack of care by farmers, with no Bakewell to point the way to improvement, brought about a type of animal that a century has not been able to absorb."

In the years from 1760 to 1837 there was an awakening. That was the era of the fermentive stage of Anglo-Saxon cattle breeding.

It was in 1760 that Robert Bakewell began the operations which left so lasting an impress upon the cattle-breeding business. He was the first man to practice systematic inbreeding. Around his name those of all

great improvers of live stock group themselves, and from the lessons he taught by example every breeder to this day learns the fundamentals of his craft.

He was a Leicestershire man, given little to talking, and not at all to writing about his methods. A great deal that he learned by careful experiment he kept to himself.

His aim was to secure cattle that would fatten on the smallest amount of food, and the great success of his art was revealed only by what he did and not by what he told anybody to do. This secret Mr. Rommel describes as inbreeding in the hands of a master, the surest way known to secure an improvement of stock.

"Out of the dark ages of ignorance and the scrub," says Mr. Rommel, "by leaps and by bounds, using what material he had at hand and moulding it to his will, the English farmer developed the modern breeds of cattle; producing tender meat where tough and leathery fibre had been before, paying the rent with his cattle and his sheep, and in time contributing very largely to the growth of agriculture in the New World."

The improvement in America began almost simultaneously with that in England. No sooner had the Revolutionary War closed than importations of improved stock began. This was kept up until the War of 1812 temporarily checked it.

Mr. Rommel says that the year 1817 will always be memorable in American cattle history. In that year, following the shorthorn importations of 1812, came the beginning of the Devon and Hereford importations, together with still another arrival of shorthorns.

Growth was slow up to 1827, when there came renewed activity, especially in shorthorns. Companies were formed and the improvement of cattle was marked. In point of numbers the shorthorn breed rapidly assumed the foremost position, and until about the year 1880 was the only beef of prominence.

The expansion of the cattle business was rapid. Up to the opening of the Union Pacific Railroad it was mainly carried on in the part of the country east of the Missouri River.

Then came the discovery of the great opportunities offered by the far western plains for grazing. The growth in the cattle raising industry was then abnormal.

"In the early eighties," says Mr. Rommel, "pure-bred cattle by the thousands were brought from England to supplement the American herds in breeding bulls for the range, and the nearest that the Hereford and Angus breeds ever came to having a boom in this country was at this time."

"After the collapse, which was bound to follow, the cattle business is now on what is thought to be a substantial and healthy foundation. Quality is being bred into the range herds by the extending use of pure-bred sires, and this, with the better methods, is bringing the range steer to a high plane of excellence. Both on the range and on the small farm improvement has gone hand in hand with increase of numbers."

The idea has been pretty well set up that the color of eggs determines their nutritive qualities. Many people believe that brown shelled eggs are richer than white eggs. A number of government experiments, however, have determined conclusively that the color of the shell is no key to nutriment, flavor or other qualities of the meat of the egg. There is a decided difference in nutritive ration and flavor, however, and this is the result of feeding and the condition under which fowls are kept. The farmer who has fresh eggs for his breakfast probably does not realize the advantage he has over his city cousin.

Every farmer ought to raise clover to maintain the fertility of the soil. Clover is just about a balanced ration of itself.

It is the neglected cow that never fills the milk pail.

## Beef Has Risen---Why?

The real surprise of the age is the amazing ignorance which is reflected by the biggest of metropolitan newspapers from the amount of intelligence which makes up the average daily's staff. The meat question is a popular one with the press. The average writer upon the subject and the average editor who passes his copy knows nothing about the abattoir business, and less about the breeds of stock and live stock conditions says the *National Provisioner*.

"Lambs drop in price in the spring. The newspapers expect the meat to drop in price also. It does a bit. Lambs and sheep drop because the wool, a 30c per pound product, is taken from their backs and the animal is worth less per pound on the hoof. It is the beef question, however, which excites the ire of the paper man and even sets the retail butcher to talking when he should know better.

Step back ten years. In its issue of April 29, 1893, the *National Provisioner* quoted good native steers at New York at 5@6 3/4c per pound. The prices in the west were the same, minus freight and feeding charges. Dressed beef then sold in New York City at 8 to 9 1/2c per pound. The files of the daily newspapers do not disclose the fact that either the press or the people took any interest in the beef question at that time, even though carcass beef then sold for 1c per pound more than the same grade of beef now fetches. In its issue of April 25, 1903 the *National Provisioner* quoted good native steers at 5 1/4 to 5 3/5c per pound, and the beef from these steers at 8@8 1/2c, western dressed at 7 1/2@8c per pound. It will, therefore, be seen that although cattle sold at the same time and same price 1893 as they did last week, dressed meats are, even after the much vaunted rise of 1/2 to 1c per pound, now selling for about 1c per pound less than they were ten years ago.

Now step into the middle of the period and examine the prices of live and dead beef there. In 1897, five years later than the first date noted, and just before the period when the Spanish-American War began, shot prices up a bit and created a meat shortage, live native steers fetched 5 to 5 1/2c per pound, and the native beef of their carcasses fetched 7 1/2 to 8c per pound, exactly the price for which such western dressed beef is now sold and within 1/2c per pound of what city dressed beef brings. The year last quoted is one of those about which so much cheap beef talk has been indulged.

A careful examination of accurate and properly classified market figures back of 1893 will show a relatively wider difference between the prices of live and dead beef than the market now shows. The reason for this is the fact that the by-products have been so developed as to enable the factory to even sell the carcass at or below cost and still come out ahead on the general proposition.

The prices herein quoted are for the same grades of cattle and beef, and at the same time of the year. The fact which the figures disclose is that there is an apparent ratio between live and dead meat, whatever the price of each. There is nothing else in it. Meat is low; too low in fact. —Texas Stockman.

## Cheap Irrigation.

"How to Build Small Irrigation Ditches" is the title of a bulletin issued by the department of agriculture. It is a document calculated to be of interest to the practical farmer who wants to do the work on a small scale himself. It deals with methods of running grade lines for small ditches, selection of sites for headgates, laying out of field laterals, methods of applying water and the cost of small irrigating works. Two hundred dollars is the cost of the works described. The annual cost of maintenance is put at \$68 more. The bulletin is No. 158, of farmers' bulletins, and may be had from the department in the usual manner of application.

## Cutting Alfalfa for Hay.

In regard to the difference of opinion as to what is the best time to cut the first crop of alfalfa and fxtail for cow feed, says a correspondent of the *Tulare Register*, I concluded that if green heads were better than ripe ones none at all would be still better, and when I saw the first heads appear, which was in the latter part of March, 1901, I cut it down, expecting to get about a ton of hay to the acre, but I got a ton and a half, and better hay I never fed.

The next winter I allowed the cattle to get at the stack for a while. There was a stack of alfalfa hay alongside of it, but while feeding it the cattle never touched the alfalfa hay at all. I hauled some of it to the barn and fed it to the horses with the same good results, the only drawback being that there was absolutely no waste to this kind of hay and I was always short on bedding. I also sold some of it to parties in town who keep a cow. These people, who would not take the bearded article as a gift, would buy this hay in preference to alfalfa.

To secure this kind of hay it should be borne in mind that all the stock must be removed from the land very early in the season, because if pastured too long in the spring the obnoxious heads will appear before there is anything to cut. A little extra care must also be taken in curing this hay. I turned mine all over before I stacked it. If this is done there is not the least danger that it will take fire through spontaneous combustion.

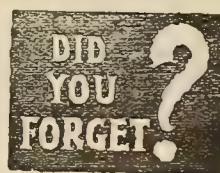

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

## ANNUAL MEETING PACIFIC COAST TROTTER HORSE BREEDERS ASSOCIATION.

SAN FRANCISCO, May 25, 1903.  
The Annual Meeting of the members of the Pacific Coast Trotting Horse Breeders Association will be held at the office of the Association, 36 Geary Street, San Francisco, on

Monday, June 8, 1903,  
at 8 o'clock P. M., for the purpose of electing a Board of Directors for the ensuing year, and the transaction of such other business as may come before the meeting.

F. W. KELLEY, Secretary.

In time of need—for Deep seated Sores, Collar and Saddle Galls or Hopper Chafes, just developing or in the chronic state—turn to

## VETERINARY PIXINE

It absorbs inflammation, penetrates to the bottom of sores, stimulates and builds up new cellular tissues, counteracts effects of impure blood, producing a quick, clean, healthy cure without scab or scar. It is the most natural, scientific and vital healing ointment made. Money back if it fails to cure any sore case of speed cracks or scratches, no matter how aggravated, what the cause or how long standing restoring the hair to natural color.

It is an antiseptic, soothing ointment of marvelous penetrating healing power.

2 oz., 25c; 8 oz., 50c, 5-lb pkg., \$4.00.

At all druggists and dealers, or sent prepaid.

TROY CHEMICAL CO., TROY, N. Y.

D. E. NEWELL  
Pacific Coast Agent, 519 Mission St., S. F.

## POSITION WANTED

BY A THOROUGHLY COMPETENT MAN, and a graduated veterinary surgeon, with a large stable or breeding farm, in his professional capacity or in connection with the management. Not afraid of work. Address A. J., BREEDER AND SPORTSMAN, 36 Geary Street.

## SAFETY PREGURATOR OUTFIT

A practical, durable, and easily used Impregnating Outfit, with which you can get in full mares you breed, and greatly increase the income from your stallion. GUARANTEED to give satisfaction. A necessity in every breeding stable. Write for descriptive circular. Price of Pregurator, \$5.00. Outfit, complete, \$10.00. L. O. BITTENDEN, ELYRIA, OHIO.

### Submarine Farms.

(Continued from Page 13.)

Over half a million dollars is now the value of the annual harvest of sponges from the Gulf side of the Florida coast.

This extensive sponge cutting is so dependent on the supply, especially of what is known as the sheepswool variety, that the government is conducting experiments in planting sponges.

The natural sponge ground extends from St. Marks to Tampa Bay, 150 miles, and from 15 to 20 miles from the shore. By means of powerful water glasses the operators survey the sponge fields and with sharp grappling forks cut and draw up the sponges. They can by this method harvest sponges growing at a depth of sixty feet.

The threatened exhaustion of the Florida coast sponge fields, therefore, has awakened the United States government to the desirability of renewing them; and now thousands of sponge cuttings are being planted, some at Sugar Loaf Key, east of Key West, and others at various places in Biscayne Bay.

In planting sponges the cuttings are secured to a support sufficiently durable to withstand salt water corrosion and devastation wrought by the teredo and other aggressive mollusks.

While experiments in growing sponges have been made previously in other countries, Dr. H. F. Moore, who has charge of the Florida work, says that the experiments undertaken by the United States have demonstrated for the first time the practical utility of the project they fore-

Ninety-five per cent of the cuttings planted along the Florida coast have healed and are thriving sturdily.

The cuttings that perished are mostly from yellow sponges. The sheepswool variety, which has a higher commercial value than the other kind, seems also to be the hardier.

In every flock there are some ewes which desert their lambs and refuse to own any lamb, thus making a surplus of foundlings on the hands of the shepherds. At best a lot of foster lambs have to be killed or fed on the bottle, a business which hardly pays. In small farm flocks with only 100 or 200 ewes, this work can be handled without much loss, but where the ewe flock reaches up into the thousands the work must be done by wholesale and the division of the ewes with their new-born lambs must necessarily occur. This separation is best carried on by numbering the ewe and lamb as they are found, starting with 1 and running up to 200 at least; then change the color of paint and commence again with 1 and so continue until a flock of ewes and lambs is as large as desired. Then start another flock. The main thing is to get the ewe and the lamb to know and own each other, and when this is done labor with that pair is usually over. It is a good idea to have a woven wire corral for the lambs and ewes as this does away with the possibilities of lambs getting out and wandering off or being taken by wolves or coyotes. A wire fence of this kind 2½ feet high makes a good fence for sheep corrals.

The University of Arizona Agricultural Experiment Station, in "Timely Hints to Farmers, No. 47," report upon the use of branding fluid. The station reports for quick work the fluid has not proven a success. To get average results from the fluid, it takes about ten times as long to apply it as it does to use the ordinary branding iron. The fluid in most instances left only indistinct brands. The experiment, however, is being continued, and it is hoped that a suitable branding fluid can be found. The fluid experimented with consisted of equal parts of barium sulphide and coal tar, thinned by a mixture of water and American potash, in equal parts by measure and of spirits of turpentine, each equal in measure to the

original composition. The branding fluid injured the hides for tanning purposes about the same as the branding iron.

The feed consumed by cows no doubt has an effect on the flavor as well as on the color and hardness of butter, but in general this influence is much less than the fermentations which take place in the milk and cream. In cases where feeds such as turnips and wild parsnips or weeds are consumed by cows the flavor will undoubtedly be imparted to the milk, butter or cheese, unless the milk or cream has been pasteurized, when these volatile products will pass off. The effect of different kinds of ferments is not as easily removed, not even by pasteurization. This is the principal reason why we get such different flavor in the winter to that in the summer months, as the cows are usually milked in the stable and the germs that get into the milk are mostly putrefactive groups—those which cause ordinary decay.

William Shirley of Milo, Kansas, recently marketed two loads of shorthorns from three to five years old, averaging 1964 pounds. The lightest steer weighed 1830 and the heaviest 2360 pounds. He received five cents a pound for the stuff. Nowadays, when baby beef is the rule rather than the exception, few steers go to market weighing over 1500 pounds and the majority average from 1200 to 1400 pounds. Years ago when farmers believed it necessary to feed their cattle four or five years before marketing them, a good many loads of 1600 to 1800 pound cattle went on. The reports are very careful not to tell how much the old man lost on the shipment.

The appearance of the legs is often the readiest guide. A rough, scaly condition is a sign of age. The whole body of an old

fowl appears more heavy and mature, and there is an older look about the face and head readily detected by the expert. In males the length of the spur shows the age quite closely. Some poultrymen judge by the plumage. Lift up the wing and push aside the feathers of the sides, when in the case of a young hen you will find a long down, light, close and arranged regularly between the other feathers which cover these parts of the body. Through the skin, which is of a delicate rosy tissue, the small blue veins will be apparent. In a hen over a year old the down and the veins will have disappeared, and the skin be dull white and dry, less smooth, and slightly rough and mealy in appearance.

California's favorite hot weather drink is Jackson's Napa Soda.

## Tales of the Turf

By William B. Fasig.

Trotting horsemen the world over knew the late W. B. Fasig and that he was in a class of his own as an instructive, interesting and humorous writer of trotting horse subjects. W. H. Gocher, secretary of the National Trotting Association, has put Mr. Fasig's writings in book form, adding much of interest thereto, and the book is now ready for delivery.

The table of contents includes the following:

**TROTTING TRACKS**—How to build and manage them, with plates showing how to lay out a half-mile track, a mile track and a kite-shaped track. This article is one that a race track official needs in his business.

**THE SECRETARY**—His trials and tribulations in the merry days of racing. On the other side of Jordan he may find rest; there is nothing for him here but advice.

**THE SANDPIPER**—How the Dutchman did not balance his bill for gravel, while the little man in brown stood pat, and those who had the real sure thing—well, they lost, as usual.

**A STRANGE LAND**—How a shipwrecked Buckeye made a stir in another racing world. Utopian, unique, and if you do not believe it, you can say it is untrue.

**MCDOEL**—How the best green horse in Missouri broke into turf history. He won the Transylvania. That is enough. If you were there you know why.

**STRANGER**—A lightning-going pacer of Northern Ohio, whose history has a pinch of romance hooked on to it.

**ANDY AND I**—What the well known pair learned in France and England after the hotel clerk checked the sign language. They could not parlez vous.

**RIDE OF A LIFETIME**—How Flying Jib put a crimp in the boss trotter on the speed drive in Wade Park.

**PAT SHANK**—Someone said he was a colt breaker, but he broke the wise when the thirteen combination and Eloise won at Detroit.

Chronic Bronchitis and Catarrh of the Bladder  
Cured in 48 Hours.

Superior to Copalba, Cubebs or Injections

Alfalfa vs. Wild Hay.

Twelve cows were divided into two equal lots and fed experimentally for two periods of six weeks each. Alfalfa hay was fed ad libitum to one lot during the first period and lot two during the second period, while wild hay was fed in the same manner during the alternate periods. Both lots were fed a uniform ration of grain and beets. On alfalfa hay the twelve cows produced 9,862.74 pounds of milk and 511.47 pounds of butter and on wild hay 9,722.49 pounds of milk and 502.07 pounds of butter, showing a difference of 140.25 pounds of milk and 9.40 pounds of butter in favor of alfalfa. A comparative test was also made of corn silage and sugar beets fed in equal amounts in connection with a uniform ration of alfalfa hay and grain. The test was made with two lots of five cows each and lasted five weeks.

The difference in production of the two lots for the five week previous to the test when both were fed silage was 129.2 pounds of milk and 57 pounds of butter and the difference during the five weeks of the test, when one lot was fed silage and the other lot sugar beets, was 221.4 pounds of milk and 10 pounds of butter, the result being in favor of the silage. While corn silage gave slightly better results than the sugar beets the difference is so small that it is safe to say they are quite equal in feeding value.

Much has been written about the great cattle industry of the west as if all cattle handled on the ranches are in large herds and owned by capitalists who have a seeming monopoly on the business. As a matter of fact most of the cattle are now owned in small bunches where once the large herds held full sway. The smaller cattlemen are carefully grading up their herds by using pure-bred sires and well-bred cows giving an abundance of milk which insures large healthy calves. The calves are allowed to suckle from six to eight months, when they are weaned. They are not stunted as many calves are at that time because they are allowed to graze in pastures separate from the cows and are fed a small amount of ground grain for

three or four weeks. Many of these calves are grain-fed all winter so that when new grass starts in the spring they retain the strength and vigor so essential to rapid growth the following summer. When these calves are steers they are kept until the following fall and are then shipped to market ranging in age from eighteen months to two years. After the calves are weaned the cows may be milked for several months and sufficient butter made to pay for all the feed the steers require until sold. Most of the cattlemen who have small herds employ their spare time in farming. They raise all the rough necessary and frequently enough grain to feed and some to sell. It is in this way that we have seen the passing of the cattle baron and the coming of the man with the hoe.

Clover hay contains about 7 per cent of digestible protein, but hay made from oats and peas contains over 9 per cent, so we ought to raise some of that kind of hay by sowing two bushels of peas to one of oats to an acre, and cut for hay when the peas are just fit for table use and before the oats have commenced to turn.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

(SIRE OF NEERETTA 2:09 1/4)

By Albert W. 2:30, son of Electioneer.  
Dam Clytie 2d by Nutwood 2:18 3/4

SEASON 1903 AT

**SANTA ANA, CAL.**

NEERNUT was foaled in 1891. He is one of the best representatives of the Electioneer-Nutwood cross which produced the great two year-old Ariel. He stands 15 1/2 hands, weighs 1100 lbs.; blood bay with black points; trots without boots. He is a great race horse and his record (2:12 1/4) was pronounced by competent observers to be as good as 2:08, as he started in fourth position and was forced to go a wide mile.

Terms: \$20 single service, \$40 for the season ending July 1st, with usual return privileges; \$60 to insure a foal. Apply to or address

**GEO. W. FORD, Santa Ana, Cal.**

**"SAVE-THE-HORSE"**  
TRADE MARK  
**SPAVIN CURE**

**POSITIVELY AND PERMANENTLY CURES**

**BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE, CURB, SPLINT, CAPPED HOCK, SHOE BOIL, WIND (except Low Ringbone), PUFF, WEAK AND SPRAINED TENDONS, AND ALL LAMENESS.**

**WILLIAM BOARDMAN,**  
Funeral Director,  
98 Pineapple St., Brooklyn, N. Y.  
April 10 1903

Gentlemen:—I am pleased to acknowledge the benefits derived from the use of "Save-the-Horse" and Veterinary Fixine. I had not been able to drive my mare for several weeks on account of a splint, which the veterinarians said could only be removed by firing and blistering. After applying 1/4 of a bottle of "Save the-Horse" the splint has entirely disappeared and she has never been lame from it since, although she has been in constant use during the three months which have elapsed since treatment.

**WILLIAM BOARDMAN.**  
PUTNAM, Conn., 4-23-03.

Gentlemen:—I have used two bottles of "Save-the-Horse" on a bowed tendon. When we began using the remedy the horse was sore, but went

sound before first bottle was used up. I got the second bottle and the enlargement continued to decrease in size. We finished the second bottle about Dec 1st. The ankle is normal at the present writing. Have commenced light jogging and he is going perfectly sound.

**G ALLEN HAWKINS.**

**MATTEAWAN, N. Y. 2-19-03**  
Gentlemen:—I have used one bottle of your "Save-the-Horse" on a colt of mine that bit himself last summer while in training, and being a man who wants to give credit where it is due, will say that it has cured him of lameness; but the ankle is large and I thought you might suggest something to take this swelling away. I have used your Veterinary Fixine in my stable for a long time and find it O. K.

**A. R. BRYANT, Prop. Hotel Albert.**

The fire iron is uncertain and invariably only aggravates the disease or injury; blistering is less effective than the fire iron, and both necessitate laying up the horse from four weeks to two months. Arsenic, mercurial and poisonous compounds produce irreparable injury.

"Save-the-Horse" eliminates all these factors. Horse can be worked continuously. It can be applied at any time, anywhere, any place, and in all conditions and extremes of weather—hot or cold. And no matter what the age, condition or development of the case, or previous failures in treating, the concentrated, penetrating, absorbing power of this remedy is unfailing.

**\$5 PER BOTTLE.**

Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost impossible, except in rarest of cases.

Copy of Guarantee sent upon application. \$5. at all druggists and dealers, or sent express prepaid.

# NUSHAGAK

Reg. No. 25939

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15½, Sabina 2:15½, Sabledale (at 2 years) 2:18½, Buffington (at 2 years) 2:30½, and 36 others in 2:30 list. Dam, Fidelia (trial 2:35 at 2 years), dam of Fidelite 2:28½, dam of Mary Celeste (at 2 years) 2:17½ by Director, sire of Directum 2:05½, Direct 2:05½, Nathan Straus 2:05½, Direction 2:08½, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12½, etc. Third dam by Lancet, son of McCracken's Blackhawk 767.

NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17½, Majella B. (2) 2:39 (trial at 4 years 2:13½), and The Boquet (trial at 3 years) 2:21. His son Aristo (at 3 years) 2:17½ took sick with distemper the latter part of July and from the seventh of August until the twenty-ninth had practically no work; yet he easily beat the best field of colts that ever started in the Occident Stake.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

Limited to 40 outside mares, at \$50 the Season,

with usual return privilege. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed. First-class pasturage for mares, \$3 per month; no barbed wire. Address

WALNUT GROVE STOCK FARM,  
Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morshead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

# Guy McKinney

REGISTERED No. 37625

Season of 1903 at

LINDEN, SAN JOAQUIN CO.

Saturdays at Higginbotham's Stables, Stockton.

FEE \$30 FOR THE SEASON.

GUY MCKINNEY is a beautiful black, 16 hands high, and weighs 1300 pounds, a model of symmetry, handsome head and neck, short back, the best of legs and feet, good disposition and great intelligence. He is a perfect gaited trotter, and with very little handling showed a 2:30 gait. In his blood lines are represented the greatest strains of the American trotter, and the greatest producers of early and extreme speed. Good pasturage at \$1.50 per month. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

D. BRYSON, Linden, Cal.

THE BARON WILKESES WON 25 PER CENT OF ALL THE MONEY ON THE GRAND CIRCUIT OF 1902. Breed to the Fatality Winning Family.

Janie M. (p) close up in race in 2:13  
Caprus (3) arately in 2:25½  
Banco Trial on ¼ mile track. 2:20½

Son of the Great BARON WILKES 2:18, greatest living Sire of 2:10 performers (sire 9 in 2:10 list).

1st dam NATHALIE (by Nutwood 600), dam of Grand Baron 2:13½ and BARONDALE 2:11½.  
2d dam BEATRICE (by Cuyler 100), dam of Patron 2:14½, Prodigal 2:16, Pangloss and Patronage, all great sires.  
3d dam MARY MAMBRINO (by Mambrino Patchen 58), dam of Elvira 2:18½, Dunravin (sire) and dams of Ponce de Leon 2:13 and four others.

Where Can You Beat This Breeding?

Season 1903 San Jose Track.

TERMS \$50 SEASON, with usual return privileges.

TOM JAMES,

1120 Alameda Ave., San Jose, Cal

# SEYMOUR WILKES REG. No. 0232. Race Record 2:08 1-2

The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

Lakeville, Sonoma Co., Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Eviston (3) 2:22 in 1901.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

Terms for the Season \$30. SO TO INSURE. Mares can be shipped direct to ranch by steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables 408 Bush street, San Francisco.

St. Blaise.....	Hermit.....	Newminster
	Fusee.....	Seclusion
Carina.....	Kingfisher.....	Marsyas
		Vesuvienne
	Carla.....	Lexington
		Elhan Lass
		The Ill-Used Camilla

ST. CARLO won the Great American at Brooklyn, the Foam Stakes at Coney Island, the White Plains Handicap, was second to Chaos for the Futurity, and won about \$23,000 as a two-year-old. He is a wonderful young sire, among his get being Euluar's (winner of the Burns Handicap, Palace Hotel Handicap and \$11,650), Zamar II (winner of 19 races as a two-year-old and \$7695), Joan, February, St. Juthbert, St. Callatine, Count of Flanders, Lord Marmon, May Boy, Our Climate, Glendinning and many others.

ST. CARLO will make the Season of 1903 at the

MENLO STOCK FARM, SAN MATEO COUNTY, CAL.

TERMS FOR THE SEASON, - \$100

The Menlo Stock Farm will not be responsible for any accidents to any mares (or the foals of said mares) while on the Menlo Stock Farm. All mares and foals must be removed from the ranch before July 1, 1903. For further particulars in regard to above Stallion apply to

JAMES McDONNELL, Portola, San Mateo Co., Cal.

# BONNIE DIRECT 2:05½

Winner of the Fastest Five-Heat Race Paced in 1900. Biggest Winner of the "New" Pacers of 1900, having \$7575 to His Credit the first year out.

Dam BON BON 2:26 (dam of Bonsilene 2:14½) by Simmons 2:28; second dam BONNIE WILKES 2:29 (dam of 3 in list) by George Wilkes 2:22; third dam BETTY VILEY by Bob Johnson, thoroughbred son of Boston.

BONNIE DIRECT will serve a limited number of approved mares during season of 1903, at \$100 the season. Mares not proving to be in foal can be returned next season or service fee refunded, at the option of the owner of mare. Address

C. L. GRIFFITH, Pleasanton, Cal.

# THE STANDARD-BRED TROTTING STALLION

# BOODLE Jr.

By BOODLE 2:12½, sire of Ethel Downs 2:10, Thompson 2:14½, and 4 others in 2:30 and better. He by Stranger, sire of 33 in 2:30.  
Dam NINA B. by Electioneer, sire of Arion 2:07½, Sunol 2:08½, Palo 2:08½, and 164 more in 2:30 list.

BOODLE JR. is one of the best bred, best looking and best stallions on the Pacific Coast. He will make the Season of 1903 at

J. D. CARR'S GABILAN RANCH, Six Miles East of Salinas

Fee \$25 for the season, payable at end of season, or \$15 for single service, payable at time of service, otherwise will be considered at season rates. Any mare entered for the season and paid for will be granted the usual return privileges if proven to be not in foal, provided that next year the owner of mare still owns her and J. D. Carr still owns the horse. Good pasturage at \$3 per month, but no responsibility assumed for accidents. Season open now, and will close August first 1903. BOODLE JR. is a sure foal getter, his colts are all uniform, and of good color, and show fine speed and action. He is 16 hands high and weighs 1200 pounds, is of a rich mahogany bay.

Apply to

J. D. CARR, or JOHN GARSDIE, at Gabilan Ranch.

BRED FOR SIZE, STYLE, SPEED, GAMENESS.

# MAMMOTH CHART

SHOWING

# Skeleton of the Horse GIVEN AWAY To OUR SUBSCRIBERS

This Chart is lithographed on tinted paper and is 22x28 inches. It will be found invaluable to every owner of a horse as the names of all the Bones are given, as well as the names of the Tendons and Ligaments of the legs. By studying this Chart almost any lameness can be located and the proper remedies applied. The accompanying engraving will afford an idea of its appearance. No

similar Chart has ever before been published. The artist, in preparing this Skeleton, visited the American Veterinary College in New York City and made drawings from actual skeletons, thus insuring absolute accuracy. This Chart sells for One Dollar, but any reader can have it will remit THREE DOLLARS

Between the dates of May 1 and June 1,

1903, for one year's subscription, It will be mailed, carefully packed, in a heavy paste for safety. Address

BREEDER AND SPORTSMAN, 36 Geary St., San Francisco

## CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER  
SORES and SADDLE GALLS there is none  
superior.

The HORSE CAN BE WORKED AS USUAL.  
For BARBED WIRE CUTS, CALKS, SCRATCHES,  
ES, BLOOD POISONED SORES and ABRASIONS  
OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery  
as well as a dry sore.

Its use will absolutely prevent BLOOD POISON-  
ING. In this respect there is no Gall Cure offered  
which can justly even claim to be a competitor.  
We placed it on the market relying wholly on its  
merit for success, and notwithstanding the fact that  
comparatively little has been done in the way of  
advertising the sales of 1902 were 100 per cent greater  
than the aggregate sales of Gall Cure preceding  
that year. This increase was entirely due to its  
MERITS, and from it we feel justified in saying that  
it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome  
skin cracks under the feet which injure and often  
lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

## QUINN'S OINTMENT FOR HORSES

stands at the head of all veterinary remedies. Such troubles as Spavins, Curbs, Windpuffs, Splints, Bunches have no terrors for a horse if the master keeps and applies Quinn's Ointment. All well known horsemen speak of it in the highest terms:

Miller & Subler of Franklin, Pa., owners of St. Bel, brother of late Bel Boy, write, "We have used Quinn's Ointment with great success and believe it fulfills all claimed for it. We cheerfully recommend it to our friends." For Curbs, Splints, Spavins or Bunches it has no equal.

Price \$1.00 per package. Sold by all druggists, or sent by mail.

W. B. EDDY & CO., WHITEHALL, N. Y.

## SPAVIN CURE

### POSITIVELY AND PERMANENTLY CURES

BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE, CURB, SPLINT, CAPPED HOCK, SHOE BOIL, WIND PUFF, WEAK AND SPRAINED TENDONS, AND ALL LAMENESS.

### FROM OWNER OF SABLE GREAT (2) 2:22 1/4

RIEGELSVILLE, PA., May 18, 1903

I used "Save-the-Horse" on a very valuable filly that was turned out last spring and while running slipped and sprung a spavin. At the suggestion of my veterinarian, I blistered her twice without any improvement. I then procured "Save-the-Horse" and am able to report an entire cure. The filly goes without the slightest lameness, not even a hitch or drag being apparent. I believe your great remedy is so valuable that no stable should be without it.

LEE S. CLYMER,

Prop. Durham Knitting Mills, also Sunnyside Dairy and Monroe Stock Farms.

MEMPHIS, TENN.

Please send us at once six bottles of "Save-the-Horse" for Mr. Ben White, of the Village Stock Farm, who recommends it highly.

W. S. BRUCE & CO.,

Horse Goods Supply House.

WATERBURY, CONN., May 17, 1903.

I have used your "Save-the-Horse" and recommend it, and you may send me six bottles C. O. D. I can refer you to Mr. Joslin, of Joslin & Allen, and to A. F. Hinchey, both of Waterbury and friends of mine who have used it and who will give you testimonials. I would like to take the agency for this section. Please let me hear from you.

H. B. LOUCKS,

Boarding, Sale and Livery Stable.

CUBA, N. Y.

I had a big four-year-old horse that was very lame from a bad bone spavin. I tried several remedies without success. I used one bottle of "Save-the-Horse" and worked the horse right along, and he is perfectly sound and has been so for some time.

E. BROWN.

### "SAVE-THE-HORSE" CURES WITHOUT SCAR, BLEMISH OR LOSS OF HAIR.

"Save-the-Horse" can be applied at any time, anywhere, any place, and in all conditions and extremes of weather. And no matter what the age, condition or development of the case or previous failures in treating, its concentrated, penetrating, absorbing power is unfailing.

\$5 PER BOTTLE.

Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest of cases.

If you have a case different than described in our booklet or advertising we will advise you frankly as to the possibility of the remedy effecting a cure. Give explicit particulars. Give the veterinarian's diagnosis, if he is competent. Inform us fully as to the age, development, location or swellings, lameness, action and previous treatment. Copy of booklet and guarantee sent upon application. \$5 a bottle at all druggists and dealers, or sent express prepaid.

## TROY CHEMICAL CO., Manufacturers, TROY, N. Y.

D. E. NEWELL, Pacific Coast Agent, 519 Mission St., S. F.

# About Veterinary Pixine!!

EMERY, KY., April 9, 1903.

Gentlemen: I feel it my duty to tell you what Veterinary Pixine did for a horse of mine. He was cut between the forelegs with a knife three inches deep and two inches long, which every moment would gap open. I used several different kinds of remedies without success, even to having some stitches taken. Nothing did any good and it kept swelling and became feverish. I almost gave up hopes of his getting well. In the columns of the Ohio Farmer I observed your ad., and, as it was the last chance, I purchased a box at the druggist's and commenced using it as directed, and before the box was used up the cut was entirely well. I intend to keep a supply on hand for emergency cases, if I have to pay a dollar a box for it. Please accept my thanks for the good I have received from its use, and, if you choose, you can use my name and testimony.

W. S. CAMPBELL, Emery, Ky.  
Rural Route No. 2.

## VETERINARY PIXINE

This penetrating, stimulating, soothing, absorbing, antiseptic healing ointment heals from beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy granulations, not by drying and scabbing, and stimulates growth of hair, natural color.

Makes quick, clean, healthy cure, heals stinging, burning, chronic collar and saddle galls, hopple chafes, abscesses, inflammatory sores and all skin disease. In cases of emergency it is invaluable. It penetrates, stimulates, soothes and heals while horse works. Money refunded if it fails.

PRICE—2-oz. Box, 25c.; 8-oz. Box, 50c.; 5-lb. Package, \$6.

At all druggists and dealers or sent prepaid.

GREEN'S RUFUS.....The Baywood Stud, San Mateo  
SIR GIBBIE 2d.....James McDonnell, Portola, San Mateo Co

THE ENTRY LIST received by the Breeder's Association for its Petaluma meeting is a large one, averaging over sixteen entries to each of the four stakes filled. The list is evidence that there are many horses in training for the slow classes this year and that the faster classes give promise of some excellent contests also, as the 2:15 trot received eleven entries. The 2:13 pace did not fill but has been re-opened and that three year old pacers are scarce is evidenced by this stake receiving but two entries. There are twenty-one horses named for the 2:24 class trot, for which the stake is \$2000, while the \$1500 stake for pacers of the 2:20 class received twenty-three entries. As the Breeders meeting will be the second held on the circuit the fields in both these events will doubtless be large and most interesting contests will be furnished. The 2:15 trot will also be an excellent race, and the person who can pick the winner of it will very likely get good generous odds for all the money he desires to wager on his judgment. The horses named for this race are Ole 2:20, Geo. W. McKinney 2:14½, Potrero 2:21, Zambra 2:16½, Limonero 2:15½, Verona 2:18½, What Is It 2:16½, Louisa Croner no record but said to be very fast, Daisy B. a fast green mare by Waldstein, Lynall 2:16, and Iloilo 2:16½. There has never been a more evenly matched field on past performances, entered in a race in California. The three year old trotters make a good showing as there are eleven entries to this stake, nearly all of which are eligible to the Stanford and Occident stakes, which will give added interest to their race at Petaluma. On the first of next month the starters in the two year old divisions of the Pacific Breeders Futurity will be named and these youngsters will doubtless furnish two good races as the stake is a big one. In addition to the above events the Breeders have opened eight additional purses, which will be found on another page. These will close on Wednesday, July 1st, and should draw large lists, as there are plenty of horses in training to fill all of them. Everything points to the Petaluma meeting being one of the most successful held in years.

THE GREATEST OPPORTUNITY ever offered is the announcement made by auctioneer Wm. G. Layng, proprietor of the Occidental Horse Exchange in this city, who will sell by order of the executors, all the standard bred trotting horses belonging to the estate of the late Henry Pierce. The Santa Rosa Stock Farm has a reputation that extends all over the world and the brood mares, geldings, colts and fillies that will be offered at this sale Tuesday, June 23d, is one of the grandest lot of standard bred horses ever collected on one farm. All the most famous stallions that have made trotting history for California are represented in this sale, and the list of brood mares contains the names of some of the greatest matrons in the world. We ask every reader to look over the quarter page advertisement in this issue and to write at once to Mr. Layng for catalogues. They will be ready on Monday.

THE DEATH RECORD of the automobilists is rolling up so rapidly that the press is making a general onslaught on the whole tribe and in many instances demanding the abolition of the "murderous machines" from the public roads. It is not the machines however that are to blame, but the chaffeurs who run them. In the early days of the bicycle there was the same attack on the two wheeled vehicle, but after the riders began to realize that they would be held responsible for accidents caused by their own carelessness the percentage of people run down by the scorchers was less because there was less scorching. It will be the same with the automobile owners and drivers. All intelligent and thinking people recognize in the motor carriages an invention that is a distinct mark of progress and one that has come to stay, but they also recognize and hold that the public roads are not race tracks and must not be used for racing against time or otherwise, with bicycles, automobiles or horses. The laws governing the speed of vehicles in this city is violated every day by owners of the motor machines who delight to show how fast they can ride, but they are fast learning that these infractions cost money, and the rule is mostly violated by beginners and owners of new machines. Horse owners need have no fear that the automobile will supercede the horse for the present or in the near future. There are ten of the machines seen on the streets of Chicago or New York to one in San Francisco, yet the demand for horses and the prices paid for good ones in those cities is greater than it is here. The BREEDER AND SPORTSMAN'S advice to law abiding horsemen is—Don't demand the suppression of the automobile but insist that the people who ride in them shall obey the laws to the letter that regulates the speed of vehicles.

ENTRIES TO VALLEJO'S RACES will close Monday, June 15th, and the horsemen of California and elsewhere who intend racing on the Pacific Slope this summer should respond as liberally with their entries as they have to the stakes offered by the Breeders Association. Vallejo's meeting will open the circuit, beginning August 13th. The 2:23 class trotters are given a stake of \$1000 and the 2:17 pacers are offered one of the same value. All the other purses are \$300 each. The Vallejo track is now in fine shape and will be in the very best of condition for the meeting. Vallejo is a prosperous town, one of the best in the State, and much money is in circulation there. There is every reason why horsemen should enter liberally at Vallejo this year. The managers of the Vallejo Association, all thoroughly responsible men, were disappointed but not dismayed when the appropriation for the district fair was cut off, and went to work to give a meeting that would be a credit to the town and the track. They selected Mr. Thomas Smith as manager, and his name is a guarantee that everything promised will be carried out. They would have liked to give more large purses, but as they are only willing to promise what they can pay, they have fixed the amount of the purses at the figures given in the advertisement which appears elsewhere. Remember that entries to the Vallejo races close on Monday, June 15th, which is one week from next Monday. Make the entry list a record breaker and sustain an Association that is doing its best to sustain and encourage the breeding, training and racing of harness horses.

ONE OF THE BEST STAKES ever inaugurated is being advertised by our esteemed contemporary, *The Western Horseman* of Indianapolis. \$6000 is guaranteed, and it is for foals of mares bred in 1903. \$4000 is given to trotters and \$2000 to pacers. The astonishing part of the conditions is that it only costs \$8 altogether for entrance and starting fees in this stake. The stake is made possible by the Western Horseman Company, which guarantees \$2000, the Indiana State Board of Agriculture guaranteeing \$1000, H. B. Gentry, the owner of McKinney, guaranteeing another \$1000, S. B. Holt, owner of Rex American, another \$1000, and N. W. Bowen of the Spring Hill Stock Farm another \$1000. The only fee for entering a colt is a \$2 paid in advance subscription to the *Western Horseman*, and a payment each year keeps the colt fully paid up. This is the most liberal stake ever arranged for trotting and pacing colts and is so novel in its way that we give it this notice in our columns and congratulate the enterprising managers of the journal in question and also the enterprising breeders who have made the stake possible. The Hoosiers are certainly all right.

We note that the O'Kane boys have made another move in the enlargement of their business, by incorporating their New York branch with the well-known firm of J. J. Stillings, and situated at 1560 Broadway, New York, where they have an elegantly fitted store on the ground floor, using the three upper floors of their building for manufacturing.

THE PLEASANTON TRACK is breaking all previous records this year. It is now in as fine condition as it has been at any time during the winter and the trainers who are working their horses over it say that as long as it is kept in its present shape sore horses will be few and far between. This journal has always held that all the Pleasanton track needs in summer is sufficient water, and as the new manager, Mr. Geo. A. Kelly, holds the same opinion, he puts the water on, the track responds to the treatment, the horsemen are all happy, and there you are. "What do you mix your paints with?" was asked a noted artist. "Brains," was the reply. Mr. Kelly is working the Pleasanton track with brains and that's the secret of his success.

## Mose Hart Sells a Good One.

About a year ago Mose Hart, the well-known horseman of this city, purchased a pacer called Billy Red from Geo. A. Kelly of Pleasanton. Billy Red was bred by Jos. Fountain of Dayton, Wash., and was brought to this State by Mr. Kelly when he brought Angella here. He is by Glenelg 3183, a son of Baymont, and his dam is Bunnella by Ingraham. Mr. Hart thought he saw a pretty good horse in Billy Red and went to work on him in his quiet way. Last week he worked him out over the Pleasanton track a half in 1:02½, the first quarter being in 32½ and the second in 29½. Mr. J. D. Springer, a wealthy gentleman from Idaho, who has recently taken up his residence at Pleasanton, saw the horse taking his work and next morning asked Mr. Hart to put a price on him. Mose said he thought him worth \$1500 and the price suited Mr. Springer, so Billy Red changed hands there and then. He is one of the most promising pacers that has been seen at the Pleasanton track.

Mr. Hart is now driving at that track (which he says is the best he ever trained on) a six year old gelding by Strathway, sire of Toggles 2:08½, that in six weeks' work has shown so well that a quarter in 34½ seconds was easy for him last Saturday. He is a line trotter and a great prospect.

Hart has recently purchased for Mr. Geo. A. Davis of Pleasanton the mare Dora Doe 2:12½ that was shipped East to the Blue Ribbon sale. As the mare was not consigned in time to be catalogued she was not put up for sale and has been in Doc Tanner's stable ever since. Mr. Davis may bring her back to California and use her as a road mare. The price paid for her was \$1000.

## HOOF BEATS.

The breeding of Dolly Spanker, the dam of George Wilkes, is again under discussion. The *American Horse Breeder* gave the subject a page and a half last week, but left Dolly Spanker's breeding just where it has long been, in complete darkness and doubt. When the dead speak on the subject the breeding of Dolly Spanker may be fully established—not before.—*Western Horseman*.

When Parlin finds the pedigree  
Of Geo. Wilkes' honored mother  
Will he at last be at his ease  
And have no further bother?  
If so let's help him find the mare  
And then with blue bloods rank her  
Then help him turn her 'cross his knee  
And let old Dolly Spank—her.

Dolador 2:20 the bay gelding by Advertiser, now owned by Mr. Edward Aigeltinger of this city, made a good showing in his race at Tanforan last Saturday. He won in straight heats in 2:27 and 2:26 over a track that was several seconds slow, and did not make a skip. Joe Cuicello drove him and thinks Dolador can lower his record several seconds.

A carload of the finest draft horses that have been shipped out of Monterey county for many years was sent from Salinas on Monday by Louis Hestorff, consigned to H. Brandenstein & Co., San Francisco. The animals were all young and ranged in weight from 1600 to 1900 pounds. All of them were purchased within a radius of 30 miles of Salinas. Mr. Hestorff has an order for another consignment, which he expects to ship within a short time.—*Salinas Journal*.

Dan Lieginger and Ben Levy have purchased from A. P. Clayburgh the trotting gelding Cicero by Brentwood and will campaign him through the California circuit this year. Cicero has a world of speed and in Lieginger's hands should prove a money winner.

On May 11th, the mare Fatinitza by Poscora Hayward by Electra (dam of Lou 2:14½) by Newland's Hambletonian, foaled a handsome bay filly by McKinney 2:11½ that her owner, T. F. Ricks of Eureka, has named Tenney Love and is counting on winning the Kentucky Futurity of 1906, as Fatinitza was nominated in that big stake.

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulkeys. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

# JOTTINGS.

TANFORAN, Cal., It was a good day for harness racing on Saturday last, and the occasion furnished an opportunity to show that the trotting and pacing horses are not only admirers in the community, but also in the home to the contrary notwithstanding. About two thousand people, among them many ladies, were in attendance, and all seemed to thoroughly enjoy the day in the sport. The racing was given by the Golden Gate Park Driving Association, the newly organized Tanforan Driving Club having granted that organization the privileges of the track. The day was not the best that could have been selected, as it was Decoration Day and the San Mateo electric line which runs from San Francisco to Tanforan also passes the cemeteries, and the crowds carrying flowers to decorate graves of loved ones pretty well crowded the capacity of the cars. Then, the full power of electric "juice" which has been provided to operate these cars will not be available until the 10th inst., so the time made between the city and the track was slower than it will be after that date, when the running time will be about forty minutes. The track was slow, but safe, and will soon be packed so that fast time can be made over it. It has been cut up for the runners so long that some little time will be required to make it a fast track, but as the number of horses in training there will greatly increase from now on there is every prospect that it will pack and be fast before the end of another week, and future meetings will be held under much more favorable auspices. The results of the contests on Saturday last will be found in another column.

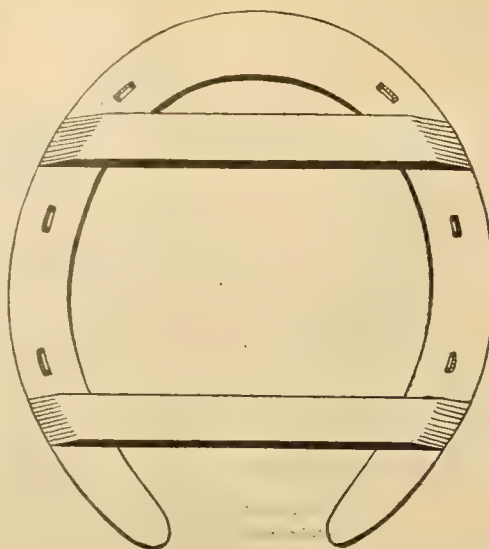

Vice-President A. B. Spreckels, through whose enterprise the new Tanforan Driving Club has been organized and a lease of the Tanforan track secured, took a party of friends to the track that day in a special car. In spite of several stops made necessary by the heavy traffic on the track that day, and the further fact that the electric power was not up to the usual strength, the running time of this car between Second and Market streets, this city, and the track gate was just an hour, so that there is ample justification for the prediction that forty-five minutes or less will be ample for the trip on the regular cars when the road has its plans in complete working order, which will be within the next week.

One of the features of the day's sport on Saturday was the start in the race for horses owned by members of the San Francisco Driving Club, an organization comprising a number of road drivers who live in the Mission district. Nearly every member of this club is an amateur horseman. Few of them have ever driven in any kind of a race except a brush on the road, and when they were told by the starter to score by the pole horse each and every mother's son of them tried his best to obey instructions. The result called forth loud applause, as the eight starters came down to the wire like a platoon of soldiers and were given the word while in perfect alignment and all trotting. It was one of the prettiest sights ever seen on a race track, and showed very plainly what a bunch of drivers can do when all are trying to do as told.

While the new driving club has not thoroughly organized as yet, the adoption of the by-laws and one or two other matters not coming up for final action until the directors meeting to be held during the coming week, there is every reason for the prediction that the organization will be a very popular and successful one. The interest in road driving for pleasure is greatly increasing among gentlemen of wealth and leisure in this city and the Tanforan Driving Association will soon rank with the leading organizations of its kind elsewhere. When the directors learned that Mr. Geo. H. Ketcham intended taking his great champion *Crescens* 2:02½ to Oregon and Washington this summer, they instructed the secretary to open correspondence with him in regard to an exhibition at Tanforan. If these negotiations are consummated the attention of the directors to make the occasion one that will be worthy of the association and the champion trotter that is to furnish the chief attraction. Besides *Crescens*' efforts to lower his record, the association will, if it can secure this great drag card, arrange for other contests between harness horses of great speed and reputation and make the day one of note. There is not a particle of doubt but the seating capacity of the immense grand stand will be taxed to its utmost.

It is the famous Memphis shoe that is heralded as the only thing needed to bring the two minute trotters in a winner against old Father Time.

The California trainers have already tried it and are talking just as loudly in its favor as are the reinmen over at Murray Howe's track at Memphis. The accompanying cut shows how it is made. Bars one-half

inch in width a quarter of an inch thick are welded on the face of the shoe, and a change in the distance between them makes a change in the gait. Several trainers at San Jose have tried the shoe and all report favorably of it. Next week I will have some definite reports to make in regard to it.

## Don't Like the Memphis Shoes.

Murray Howe, whose *nom de plume* is "Yarrum," brought the Memphis shoe into prominence by his articles in the *Horse Review* telling of its good qualities. He gives the following amusing other side in the last issue of that paper:

"Among many funny letters that I have received from different parts of the country in reference to the Memphis shoe is one from a Swedish friend in Topeka, Kan. It is quite evident from the letter which follows that the writer failed to comprehend the original description of the shoes.

'Mister Yarrum:  
'Dear Mister:—I read your story in *Horses Review* about one pair shews to make a horse trot 18 seconds faster in one day. These stories get me some swetty so I go to Blacksmith an he make me shews like you says in paper. Then I putts shews on my filley an by gosh she fall on her hed and dam near kill her, she get up an run way an thro me threw butcher shopp winder. I ben full of glass an splinters an I have my teeth noked out 2. Dam filley she run into peanut stand an put dago man outen bisnes. What in hell you meen write dam fool story in paper anyhow. Yarrum I think your English shoes make pore man of me. Butcher man he wants me pay hem \$45 for winder lite. Dago he wants stab me. You make dam fule outen me an my famly I like to have you here one minit an I make you think American shews bout the warmest thing ever get under your cote tale. You send me \$50 to pay for damage or I wright Mr. Billens that you dam stinker. Dam your English shews Yarrum.

(Signed) 'OLOF LARSON.'

## Vancouver, B. C., Races.

Following are the results of the two days' spring meeting, held at Vancouver, B. C., under the auspices of the Vancouver Jockey Club:

First day, Saturday, May 23—  
2:50 class, trot or pace, best two in three heats—The Prime won in straight heats; best time 2:41. Stormount jr. second, Chief Justice third.

Half-mile dash—Scallawag won, Nevada second, Ravina third; no time.

Three-quarters mile—Ballario won, Knockings second, Bernadillo third; time 1:20.

Handicap, five-eighths mile—Eldred won, Dance Along second, McLean third; time 1:05.

One mile and one-eighth, King Edward handicap—Dance Along won, Ravina second, Quibo third, time 2:09.

Second day, Monday, May 24—  
Four and one-half furlongs—Eldred won, Mafada second, Dr. McLean third, time 1:03.

One mile and one-eighth, King Edward handicap—Dance Along won, Ravina second, Quibo third, time 2:09.

One-half mile, Pony handicap—Bess Trimble won, Sleepy Dan second, Little Maud third, no time.

Seven furlongs, handicap—Scallawag won, Ballario second, Knockings third, no time.

TREASURY DEPT., OFFICE CHINESE INSPECTOR, BROOKLYN, N. Y., Oct. 16, 1902.

W. F. Young, P. O. Box 100, Springfield, Mass.  
Dear Sir: Referring to a former letter, in which I ordered a bottle of Absorbine for use on stiffened ankles, I beg to state that it has proved entirely satisfactory. Yours truly,  
RALPH IZZARD.

Jackson's Napa Soda untangles the feet.

## Golden Gate Park Driving Club.

About two thousand people visited Tanforan track on Saturday last to enjoy the program of harness racing provided by the Golden Gate Park Driving Association. Owing to the fact that there were many counter attractions and that no special trains were run, the attendance was considered large. The track was found to be in fair condition and good judges expressed the opinion that with a few additional days' work with the assistance of forty or fifty horses being speeded over it, the course can be made quite fast.

Three regular events for purses, a club race for a trophy between horses owned by members of the S. F. Driving Club, and a double team race for fun made up the program. The first two races were decided in straight heats, while the third took three heats to decide. The writer watched nearly every race carefully from start to finish and can say that in his opinion all were trying their very best, and the day's sport was a very creditable one for the club.

The race for members of the San Francisco Driving Club had eight starters, and the starts made by these amateur drivers were a lesson to the "professionals" in the other events. R. D. Ledgett as starter handled his fields well, however, in all the events and the starts were fair all through.

The double team race attracted much attention, it being a purely friendly contest between two sea captains whose love for good horses amounts almost to a passion. Capt. Batchelder's pair outclassed that of Capt. Barneson a little, but both gentlemen were probably a little nervous and the dash was more remarkable for the number of breaks than for the time made, which just shaded three minutes. Capt. Batchelder did not pull up at the end of the mile but continued on around the track as his team was trotting squarely. They made this mile in 2:31, a very fair performance for the track.

The officers of the day were as follows: President, Edw. Aigeltinger; Secretary, F. W. Thompson; Judges—T. F. Bannon, G. L. Swett and J. Martin. Timers—H. Vetter and L. E. Clawson; Marshal, J. B. Dalziel; Ass't Marshal, J. Holland.

The summaries of the day's races follow:

First race, purse \$150—  
H. Schottler's King V..... 1 1  
Dr. McLaughlin's A. B. P..... 2 2  
L. Richardson's Lady R. D..... 3 3  
M. M. Donnelly's Chas Newman..... 4 4  
Time, 2:28, 2:35.

Second race, purse \$150—  
E. Aigeltinger's Dolador..... 1 1  
M. M. Donnelly's Young Salisbury..... 2 3  
J. Doran's Della McCarty..... 4 2  
Mr. Clayburgh's Cicero..... 2 4  
Time, 2:27, 2:26.

Third race, purse \$150—  
W. J. Simpson's Teddy..... 1 2 1  
S. Walker's Al Sandy..... 2 1 2  
H. Miller's Lady Falrose..... 3 3 3  
Time, 2:32, 2:36, 2:22.

Fourth race, S. F. Driving Club, trophy—  
H. Schottler's King V..... 1 1  
L. Coffee's Mission Queen..... 2 4  
J. M. Tegue's Mike..... 6 2  
B. Smith's Coolie Black..... 5 3  
J. Tadt's Direct Filis..... 3 6  
Oscar Taylor's Bill Elsworth..... 4 5  
W. O'Kane's Bonnie Boy..... 7 8  
F. Lauterwasser's Ivan..... 8 7  
Time, 2:27, 2:35.

Team race, trophy—  
Capt. N. P. Batchelder's Major and Frank..... 1  
Capt. J. Barneson's Morgan and Alfred..... 2  
Time, 2:58.

## Refused a Big Offer.

This from Cleveland: It is not generally known that Harry Devereux refused an offer of \$54,000 for his great trotting stallion John A. McKerron last summer. It was made by two Cleveland business men, both members of the Gentlemen's Driving Club. A few days ago "Doc" Tanner was in a reminiscent mood, and he told the story of the affair. He said: "I was present when the offer was made to Mr. Devereux. The two men were very anxious to get possession of the stallion, and they kept raising the bid until it had reached \$54,000. It was after banking hours, and they could not get the money until the next morning. They drew up a check for the amount and tendered it to the owner of McKerron. He asked until the next morning to think the matter over. After they had left he turned to me and asked what I would do. Well, I thought it over, and then I said: 'Mr. Devereux, if I was situated as you are, well able to own a fast matinee horse, I wouldn't let McKerron go for any price.' The next day he refused the offer. I guess that he has not had any occasion to regret it either."

## Cured a Bone Spavin of Two Years' Standing and Worked the Horse Right Along.

OTWAY, O., Jan. 20, 1903.  
I used your Gombault's Caustic Balm upon a bone spavin of two years' standing. It has entirely stopped all lameness, and we are working the horse in a lumber wagon every day. I used it last June and July, and worked the horse at farm work through the time of using it.  
C. T. MCGOWAN.

## Notes and News.

There are over 400 horses in training at the Glenville track.

Geo. T. Beckers left Los Angeles June 2d for Salem, Oregon, with Zombro.

Mike Costello has returned from Honolulu and was in Los Angeles last week.

Frank Caton and his son won over \$71,000 racing his stable in Russia last year.

It is said that Mr. C. K. G. Billings will breed Lou Dillon to John A. McKerron 2:05½.

Millard Sanders has worked Robizola a mile in 2:14½ since he reached Cleveland with her.

Josephine Young, dam of Joe Patchen 2:01½, recently foaled a sister to her famous pacing son.

Merry Chimes 2:08½ died recently at Ogden, Utah. He was fifteen years old and took his record in 1894.

C. K. G. Billings will act as judge of the show horses at the opening of the Toledo Driving Club's matinee to-day.

A. G. F. Stice of Brookfield, Mo., has lost by death the promising yearling colt by Sir Charles 2:10½, out of Jessie C. 2:10½.

Dan R. 2:04, that was so successfully campaigned last year by Ed Geers, is now in training at the Indianapolis track.

Five hundred head of young, unbroken mules were recently sold from the Parker ranch in Eastern Oregon at \$65 per head.

The little pacer Prince Direct 2:07 is expected to take a record of 2:04 or better this season. McHenry is giving him much attention.

Merry Monarch, by McKinney 2:11½, is said to be one of the fastest trotters in the west. He is being trained at the Spokane, Wash., track.

S. Christensen's mare Mi Lady by Baron Wilkes-Lady Gay by Mambrino Patchen, is at Pleasanton where she is being bred to Bonnie Direct 2:05½.

Here's a date to remember—June 15th. It falls on Monday and the Valjejo purses close that day. There are two of \$1000 each that you can't afford to miss.

H. K. Devereaux's fast mare Peko 2:11½ by Electioneer has lost her foal by John A. McKerron 2:05½. This is a serious loss not only to Mr. Devereaux, but to the breeding industry.

The fast two year old pacer Rey Del Valle by Ray Direct 2:10, that was purchased by Dave McCleary at the Blue Ribbon sale, will be trained at Charter Oak Park and raced this year.

Calvin Rodriguez has taken his string of trotters and pacers to the Salinas track, where he will get them in shape for the circuit. He has six in all, three of them the get of Dictatus 2:17.

J. H. Brown of Detroit who paid \$3100 for Marengo King, son of McKinney, at the sale of the Santa Rosa Stock Farm horses at Cleveland refused an offer of \$5000 for him a few days afterwards.

Mr. Ira Pierce, went to Baltimore after the Cleveland sale and underwent a severe surgical operation at John Hopkins Hospital. He is greatly improved and getting along well at last accounts.

Mr. H. Arms who shipped a car load of good horses from Los Angeles to Chicago a few weeks ago, writes that he sold them all the day after they reached Chicago, and he is coming back after more.

Frank Nugent, Superintendent of the Brentwood Farm, is looking with admiring eyes these days on a brown colt foaled March 24th, by his mare Dolly half sister to Waldo J. 2:08. The colt is by Welcome 2:10½ and is just about right in every way.

An eastern journal says: It would not be surprising to find John Splan, Ben Kenney, Myron McHenry, Tom Price, Millard Sanders and other Grand Circuit celebrities scoring for the word at some of the early meetings over the Ohio half-mile tracks.

Thos. W. Lawson has purchased another large tract of land near Scituate, Mass., and added it to Dreamworld Farm. This farm extends to the salt water and a feature of the equipment planned is a pier for sea-going yachts as well as much new stabling.

Prince Direct, or Freddie C. as he is best known in California, worked a mile in 2:14½ at Glenville track last week, and all the horsemen there expect he will pace in 2:04 before the season is ended as he is in better shape than ever and has more speed.

Millard Sanders took thirty bales of red oat hay with him from California to be fed to his fast green trotter Robizola. This same quality of hay was fed exclusively by Sanders last season, when he raced Sir Albert S. 2:03½, Anzella 2:06½, and Dolly Dillon 2:07.

James Golden, who is one of the most successful of the eastern trainers, feeds all his horses on California hay. He says it costs more, but the results are very satisfactory, nevertheless, and that it pays.

From an advertisement in the *Turf, Farm and Home*, published at Waterville, Maine, we learn that the stallion Woolwich, son of Woolsey 5337, is making the season of 1903 at the Maine State Fair grounds at \$15. Woolwich is owned by Mr. C. E. Guyer of Los Angeles.

Nannie Etticoat is a wonderful producer of speed. This year her latest representative is called Royal Coat. He is a son of Regal Wilkes, is a trotter, stepped a mile last season as a three year old in 2:13½, and is being pointed for the slow stakes by Clem Beachey.

The executors of the estate of the Hon. Frank Jones of Portsmouth, N. H., are very glad that they did not sell the trotters of the estate for \$20,000, as they said they were willing to do. After all the horses have been sold the sale of the stock will reach very close to \$60,000.

Millard Sanders will very likely remain in Cleveland and open a public training stable. The mare Robizola that he leased and took across the mountains with him to race on the Grand Circuit is attracting considerable attention at Glenville track where Mr. Sanders is working her.

Phoebe Childers 2:10½, formerly owned by Mr. L. E. Clawson of this city, but now the property of Mr. John F. Cockerill of New York, recently foaled a fine brown filly by Crawford Wilkes, son of Red Wilkes. Phoebe will be bred to Direct 2:05½ this year and is now at East View Farm.

Mr. L. L. Huntley, one of our subscribers visiting from Riverbank, Stanislaus county, says there are a number of good stallions standing for service in that section and farmers are taking an increased interest in horse breeding this year. Mr. Huntley has sold his fine black stallion to Mr. Stearns of Oakdale.

The annual meeting of the members of the Pacific Coast Trotting Horse Breeders' Association will be held at the office of the Association, 36 Geary Street, San Francisco, on Monday, June 8, 1903, at 8 o'clock p. m., for the purpose of electing a board of directors for the ensuing year, and the transaction of such other business as may come before the meeting.

Among the converted ones that will be out this year is the mare Ama A. 2:16½ by Dictatus out of the dam of Edna R. 2:11½. She made her record last year as a trotter, but has been switched to the other gait and they say takes to it as naturally as a duck to water. She has been sold recently by her former owner, N. Corvarrubias of Los Angeles, to Mr. S. S. Bailey of Seattle.

At Pleasanton last Saturday Miss Georgia 2:25, the pacing filly by McKinney out of George B. 2:12½ by Nutwood Wilkes that took her record last year as a three year old, worked a very nice mile in 2:10½ and was afterwards driven a half in 1:02. Miss Georgia has shown better than two minutes speed and will be given an opportunity to reduce her record in races on the California tracks this year.

Seventeen carriage horses were shipped last month from New York to England. On their arrival in London they are to be turned over to the Master of the Horse, who manages King Edward's stables. This is the first instance of a European monarch purchasing horses in America. King Edward desires to improve the strain of his stable and these horses are to be used for breeding purposes.

James Sanborn, one of the best known breeders of French coach horses in the country, died recently at his home in Somerville, Mass. Mr. Sanborn was one of the leading business men of Boston and established a big breeding farm in Maine. He spent a large sum in importing coaching stallions and mares from France, and was an advocate of crossing French coach stallions on Maine bred trotting mares.

Dr. S. M. Rohr, a Santa Rosa physician who owns an automobile, devotes two hours each day to a class of horses that are afraid of the machines. At five o'clock each afternoon a crowd of horsemen gather near his residence and the Doctor guides his automobile in and out among them until they become accustomed to the sight and noise, which with the majority of horses requires less than a half hour.

At the sale of young half-bred hackneys from the Shelbourne Farms held two weeks ago in New York by Dr. Seward Webb the average for 92 head was a little over \$100. Many of the horses were only one year old and comparatively few as old as four. Many bargains were picked up, E. E. McCleary, Locust Vale Stock Farm, being the leading purchaser. He took 20 head and got the cream of the offering.

Several horsemen were talking about the Memphis shoe at the Empire track the other day, says *Trotter and Pacer*, when it came out that Thos. Murphy had used exactly the same kind of a shoe six or seven years ago. Mr. Murphy mentioned one horse in particular on which he had used the shoe, Mentmore by Simmicolon, owned by Jos. H. Warren of Long Island. The horse scalped so that nothing could be done with him and finally Murphy studied out the plan to put two bars across the shoe and he went all right. The horse was afterward sold to Harry Dykeman of White Plains. Mr. Murphy also said he had used the shoes to good effect on other horses and had had good results from taking the toe entirely off the shoe back of the first bar.

I. C. Mosier of Los Angeles is going up north with High Ball, Scappoose 2:16½ and Ama A., all pacers, and the trotter Red Skin. The last named trotted a mile in 2:16½ last week and High Ball paced two heats in 2:12 and 2:14. Scappoose worked a mile in 2:11½ last Friday. Mr. Mosier thinks he will be able to get part of the money up north this year and he certainly has a good chance if his horses keep right.

There is much dissatisfaction expressed over the state of things at Spokane, the harness horse owners claiming they are getting the worst of it in the making up of the program. For the eight days' racing there are 22 running events in all but three of which entrance is free, while but one race a day is offered the harness horses and five per cent entrance is demanded in all of them. The track is being prepared especially for the runners and the owners of trotters and pacers think they are being discriminated against.

Whisper, the dam of Zombro 2:11 was bred to McKinney again last year, the first time for several seasons, and her owner Geo. T. Beckers writes from Los Angeles that she foaled a fine filly on June 1st that is a rich brown in color and looks very much like McKinney. We congratulate Mr. Beckers on getting a full sister to his great horse, although we suppose he is a little disappointed at not getting a colt to take Zombro's place when in the natural order of things that horse is retired from old age, which we are glad to say is many years in the future.

The Valjejo Driving Club has arranged a fine program of sports for a carnival to be held on the race track there July 4th. There will be foot racing, bicycle and automobile racing, and five races for harness horses, as follows: Novelty race, open to all, for horses trotting or pacing one mile nearest to three minutes; Free for all, half mile heats, for trotters and pacers; Road race, 2:40 class, for horses owned in Solano county; one mile dash for all grocery wagon horses owned in Valjejo; one mile dash for Valjejo delivery horses except those used in grocery wagons. It is expected a large crowd will be present.

An eastern exchange says: "The new bar-shoe that is creating such a furore among the trainers in the East is a modification of an old design used twenty years ago. It is all right for a badly gaited horse resulting from over-reaching, scalping, etc. The shoe of twenty years ago had only one bar instead of the two in the new invention. The bar made a horse surer footed, gave better control of its legs and increased speed, as well as bringing it down to true gait. The bar prevented the slipping that comes to some horses when used in harness. It was a good thing twenty years ago and should be all right now. The two bars should prove even better than the one."

Dr. Hammond, the chestnut gelding by Charles Derby, dam Bella 2d by Nutwood that took a pacing record of 2:14½ at Columbus, Ohio, last year, has been converted to the trotting gait and is showing well at that way of going. Capt. H. W. Goodall, his owner, of this city, is having Dr. Hammond taken care of at the San Jose track, and twice a week goes down to drive him in his workouts. The Captain is an enthusiastic horseman and finds driving a great pleasure and relaxation from the confinement of office work made necessary by his extensive business affairs in this city. The improvement which the Derby gelding has shown speaks much for the Captain's ability as a reinsman.

Hiram Tozier is a man who has little to say, but I have noticed that when he does talk he says something, and it is worth listening to, says the *Horse Breeder*. Last week in speaking of the self abuse of stallions he said in part: "Now, I have three studs here and not one of them wears a shield. In fact, I don't believe in putting them on to a horse. A good, sensible horse will not injure himself if you let him have his door open, that he may look out and see what is going on. Let him see the horses at work, the grooms at their labors and people that pass the door. It distracts his attention from himself. It is the pernicious solitude to which most stallions are subjected that injures them."

A filly made her first appearance at Mr. Martin Carter's Nutwood Stock Farm last Sunday that is about as blue blooded a trotter as has arrived in California this season. Her sire is the fast young stallion T. C. that took a three year old record of 2:30 and is expected to trot close to 2:12 this year. T. C. is by Nutwood Wilkes 2:16½ out of Zeta Carter by Director, second dam Lida W. 2:18½, dam of Nutwood Wilkes. Ingar the dam of the filly in question is by Director 2:17, and is also the dam of John A. McKerron 2:05½, Nearest 2:22½ and Thursday 2:24½. Ingar's dam is Annie Titus a producing mare by Echo. It will be seen that this filly has two crosses of Director and two of Nutwood, and with one or two exceptions every sire and dam for five crosses in her pedigree is a producer of standard speed.

Palmer L. Clark has this to say in a recent issue of the *Chicago Inter-Ocean*: "While the advent of the plungers on the grand circuit tracks has undoubtedly been profitable to the racing managements through the additional revenue from the privileges, it is, however, very questionable if the trotting turf as a whole has derived any material benefit from these additions to its ranks. On the contrary, the opinion is quite prevalent that it has been decidedly harmful in many ways. First, from the incentive to fraud; secondly, in the inculcation of a feeling among the general public to place the racing of harness horses on the same plane as the running turf, namely, to class it as a part of the gambler's machinery. Such a result is without question the one most to be avoided if the harness horses are to be continued as one of the American gentleman's sport."

## BIG LIST OF ENTRIES.

## Horses Named for Breeders Petaluma Meeting Guarantee its Success.

Ever since advertised by the Pacific Coast Trotting Horse Breeders Association for its Petaluma meeting to be held in August has filled, with two exceptions. A perusal of the entries shows that the fields in all the races are very evenly balanced and the prospects are excellent for very close contests.

The 2:20 stake for trotters of the 2:24 class has 21 entries, the \$1000 2:15 trot has 11, the \$600 three minute trot has 11, and the \$1500 2:20 pace has 22. The average list of entries for the four stakes filled is a little over 16, a splendid showing and one that insures a large field of starters in nearly every event. The list of entries for the stakes closed is as follows:

## NO. 1—2:24 CLASS TROT (THE CALIFORNIA)—\$2000.

Geo W Kingsbury, b g Charles H by Lynmont-Elmorine.

Walnut Grove Stock Farm, blk m The Boquet by Nushagak-Woodflower by Ansel.

C A Irvedson, b s Sutter by Noonday-Eva B by Prompter.

Harry Cowell, ch g Perkins by Henry Nutwood-Matron by Whips.

B F Chaboya, b m Annie C by James Madison-Muriel Wiley by Steinway.

C Whitehead, s g Deputy by Derby Ash-by Priam.

L B Daniels, b g Sprout by Cal Lambert-Dorothy Tennent by Clay.

Mrs Olive Boust, b g Albert X by Albert W.

J D Carr, Larkin W by Boodle Jr-Isabella McCa.

Chas E Clark, b g Rapides by Junio-Maud Whippleton by Whippleton.

B Croner, br s Erosmont by Eros-Francesca by Belmont.

S H Hoy, blk g Ora Belmont by Ora Wilkes-by Belmont 64.

H W Goodall, ch g Dr Hammond by Chas Derby-Bella II by Nutwood.

H A Bell, b g H D B by Arthur Holt-Jennie B by Jerome Eddie.

Tuttle Bros, b h Suomi by Zombro-Belle Medium by Happy Medium.

W W Mendenhall, b m Rosie Woodburn by Easter Wilkes-Lady Beth by Goldaut.

Martin Carter, ch h T C by Nutwood Wilkes-Zeta Carter by Director.

S K Dougherty, br m Sonoma Girl by Lynwood W-Maud Fowler by Anteeo.

John A Cole, b m Rosalind by Stam B-Klickitat Maid by Altamont.

P W Hodges Co, br m Lady Zombro-Lady Woolsey by Woolsey.

Wm G Durfee, b m Idyllwild by McKinney-Amber by Conifer.

## NO. 2—2:15 CLASS TROT—\$1000.

Grace Bros, b g Ole by Silas Skinner-Eveline by Nutwood.

P W Hodges Co, b s Geo W McKinney by McKinney-Lady Washington by Whipple; b s Potrero by Redondo-by Junio.

L J Rose, Jr, b g Zambra by McKinney-by Fairmont.

J H Williams, b s Limonero by Piedmont-Lulaneer by Electioneer.

F Gomet, b m Verona by Nutwood Wilkes-Maggie C by Cal Nutwood.

W W Mendenhall, gr g What Is It by Direct-Lassie Jean by Brigadier.

B Croner, gr m Louisa Croner by Wild Boy-Abbie S.

Walnut Grove Stock Farm, b m Daisy B by Waldstein-Viola by Gen Benton.

Geo W Kingsbury, ch g Lynall by Lynmont-Balance All by Brigadier.

H W Meek, b g Iloilo by Welcome-Rosemary by Nutwood Wilkes.

## NO. 3—THREE-YEAR-OLD TROT—\$600.

Geo W Kingsbury, b g D E Knight by Lynmont-Daisy A by Friday McCracken.

B F Chaboya, b f Ollie C by James Madison-Ituna by Steinway.

J D Carr, Queen Mab by Nutwood Wilkes-Nina B.

P W Hodges Co, b s Owynex by Owyhee-Inex by Sweetstakes.

Martin Carter, b f Little Branch by Nutwood Wilkes-by Long Branch.

Valencia Stock Farm, b s Amado by Direct Heir-La Bella by Sidney.

La Siesta Ranch, br g Search Me by Searchlight-Wanda by Eros.

W G Durfee, b f Zealous by Zombro-Leonor.

C A Durfee, b f Raggy by McKinney-Babe by Ferdinand.

James Sutherland, s g Gold Brick by Chas Derby-Empress by Flaxtail.

F E Ward, b f Freckle Bird by Red Freckle-Bird.

## NO. 4—2:20 CLASS PACE (THE PACIFIC SLOPE)—\$1500

Mrs W B Humfreville, b g Cyclone by Col Benton-Nellie by Jim Mulvanna.

D L Bachant, b m Lady Glenway by Glenway-by Nephew Jr.

C J Snyder, br s Jones A Basler by Robt Basler-Black Diamond by Hanford Medium.

C H Williams, b s Del Oro by Oro Wilkes-Net by Magic.

E D Dudley, b g Allendale by Falrose-Bee by Sterling.

C A Brannin, b m Norice by Chas Derby-Naulahka by Balcan.

Fred Fanning, b g Billy F by Thomas Rysdyk-Mollie by Hercules.

J Forden, s g N L B by Diablo-Alice Bell by Egon.

Jogoboom, br s Hops by Don Marvin-Almonta by Almont.

S K Trefry, b g Tom Crane by Diablo-Mountain Maid by Cresco.

John Offutt, r m Mildred O by Secretary-Vesper Bell by Dawn.

Bob Freeman, br m Bullet by Escort-Untraced.

W P Hammer, drk b m Dot by Falrose-Bessie by Killarrey.

L C Caten, b g Almereno by Iris-Fanny Burns.

H W Goodall, b g Rajah by Chas Derby-Edon by Gen Benton.

L B Daniels, ch g Edwin S by Dr Hicks-by La Harp.

C Whitehead, b m The Mrs by Derby Ash-Spurwick Girl by Hawthorn.

Geo W Kingsbury, b m Sutter Maid by Geo Washington.

James Sutherland, b g Ben F by Bradtmoor-by Steinway.

Martin Carter, br f, Miss Georgie by McKinney-Georgie B by Nutwood Wilkes.

W S Maben, b g Ira by Iris-Athles.

S A Eddy, b g Cuckoo by Strathway-Edith M by Milton R.

Charles Galindo, ch g Rey del Diablo by Diablo-Roseta A.

## Additional Purses.

The following additional purses have been offered by the Breeders Association for its Petaluma meeting:

2:30 Class Trot.....	\$500
2:17 Class Trot.....	500
2:11 Class Trot.....	500
Green Class Pace.....	500
2:17 Class Pace.....	500
2:13 Class Pace.....	500
Free for All Pace.....	600
Three Year Old Pace.....	400

The entries to the above classes close on Wednesday, July 1st. The program will be arranged so that the California Stake \$2000 for 2:24 class trotters will be put far enough away from the 2:30 class trot for the same horse to start in both races and the same thing will be done with the Pacific Slope Stakes \$1500 for 2:20 class pacers and the green class pace.

## Racing at Salt Lake.

[Salt Lake Tribune, May 31.]

One of the largest crowds in many years witnessed the horse races at Calder's park yesterday afternoon. The day was an ideal one and it is estimated that close to 2000 people were in attendance. There was an unusually large number of fashionable vehicles and equipages at the track, so many, in fact, that accommodation could scarcely be found for all of them.

W. S. Brown, Dr. Dan LeMay and George W. Putnam were the judges and gave excellent satisfaction.

The track was in excellent shape, the only fault that could possibly be found being that it was a little dusty, but not enough to cause any trouble. The races were trotted under the rules of the American Trotting Association. No more than five heats were allowed in any race, and if at the end of five heats no horse had won three firsts, the race would be decided on its merits. However, no more than three heats were necessary to decide any of the events. Summary:

First race, special purse for named horses, purse \$150.	
June Wilkes.....	(George Edwards) 1 1 1
Julia A.....	(C. W. Robinson) 2 2 2
George M.....	(A. M. Pendleton) 3 3 3
Time—2:21½, 2:21 1-5, 2:24.	

Second race, special trot and pace for named horses, purse \$150.	
Mary H.....	(Hal Brown) 1 1 1
Chester S.....	(James Hansen) 2 5 2
Raymond S.....	(Waite) 3 2 4
May Thorne.....	(T. G. Wimmer, Jr.) 4 3 3
Lady Smith.....	(George Edwards) 5 4 5
Time—2:24½, 2:25, 2:26.	

Third race, free for all pace, purse \$200.	
Sarah Green.....	(Waite) 1 1 1
Tombstone.....	(George Edwards) 2 2 3
Kangaroo.....	(Tom McCoy) 3 3 3
Belva A.....	(James Hansen) 4 d
Time—2:19¾, 2:19¾, 2:20.	

## HAMLIN STOCK FARM—E. F. GEERS.

The Abbot 2:03¼—Direct Hal 2:04¼.

EAST AURORA, N. Y., Sept. 26, 1900.

James B. Campbell & Co., Chicago, Ill.  
Gentlemen:—I have used your Horse Foot Remedy for several years, and find it to be the best thing I have ever used for horses that have hard, brittle feet that will not grow. I find that when I use it around the coronet, well rubbed in once or twice a day, it grows the foot very fast and makes it tough and elastic.

Yours truly, E. F. GEERS.

W. L. SNOW.

Fanny Dillard 2:06¼.

BUFFALO, N. Y., Oct. 8, 1902.

James B. Campbell & Co., Chicago, Ill.  
Gentlemen:—I take pleasure in recommending your Hoof Ointment. After a thorough trial I am convinced that it is the best of all remedies offered.

Yours truly, W. L. SNOW.

## San Francisco Veterinary College.

Next session will begin June 15, 1903. Write for catalogue giving full particulars. M. L. PANCOAST, Secretary, 510 Golden Gate Ave., San Francisco. E. J. CREELEY, D. V. S., President.

H. Le Baron Smith of this city offers his stallion By Mack for sale. This horse is a very fine individual and is an own brother to Marengo King, sold at the late Blue Ribbon sale for \$3100. See advertisement.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

## Answers to Correspondents.

I. H. M., Independence—We cannot find any stallion registered by that name.

R. H. B., Los Angeles—Neernut started in the 2:17 class at Los Angeles, August 18, 1897. Margaret Worth won the first and third heats, Osito the fifth, and Neernut the second, fourth and sixth heats and the race. The time for the six heats was 2:16½, 2:12½, 2:15, 2:14½ and 2:16½. Antrima, Daisy Wood and Iran Alto were the other starters.

C. S., Oakland—Lottery Ticket's number is 20247. He was bred by David Young of Stockton and is by Dexter Prince, dam Emma Nutwood (dam also of Pilot Prince 2:22½) by Nutwood, second dam Lady Emma by Black Hawk 767, third dam Newby Mare by General Taylor, fourth dam Rosalie (pedigree not traced). His record is 2:21½. He was foaled in 1887.

C. H. B., Honolulu—We cannot answer your question without knowing the conditions of the race. In cup and trophy races it is not usually permissible for a person to start a horse that he does not actually own. From your statement of the case we should think the horse was not properly entered in the race. If you will send us full conditions and all particulars we will be able to render a decision in the matter.

G. H. F., Galt—Please furnish me the following information: 1. Number and pedigree of the stallion Frank Hunter? 2. The proper age to castrate a colt?

Answer—1. Frank Hunter 31,652, bay horse, foaled 1897, by Nuthunter 17301, dam Katherine A. 2:29½ by Red Fern 13393, second dam Fanny Thomas by Gen. Geo. H. Thomas 530, third dam by Idol Star 2326.

2. A colt may be castrated at any age and any month in the year, although it is best done in the spring when green feed is plentiful. Many castrate all their colts as yearlings while others wait until they are two years old. Some who want their horses to have heavier necks and a more masculine appearance wait until they are three years old before castrating.

## Austrian Colts May Race Here.

Americans may have the novel experience of racing against European-bred horses soon. When Captain Henry Fleischmann began to buy American trotters a few years ago for both racing and breeding purposes in Vienna, Austria, he made the remark to the late William B. Fasig and several others who were in the Madison Square Garden office that it would not be many years before Americans would be buying or racing horses bred in Austria.

At least a part of his prediction promises to be fulfilled next season, for it is very probable that some of the three and four year olds that have been bred from American stock and are now in training in Austria will be brought to this country next year and raced in the slow classes.

Mr. Schlessinger of the Vienna firm of Schlessinger & Co., who is now in this country, in speaking on the subject the other day, said there were quite a number of colts and fillies over there that would stand a good chance of winning the money in the 2:30 classes in this country.

These youngsters are the result of the mingling of the blood of the native stock with that of some of the best American trotting stallions and mares. Some of them have shown remarkable speed, and the breeders over there do not believe there is anything in this country that can beat them. Mr. Schlessinger was especially enthusiastic over the get of the stallion Caid 2:07½, which he bought and took to Europe some four or five years ago.

The Spohn Medical Company of Goshen, Indiana, that makes one of the best and most effective disinfectants ever put on the market, had the misfortune to lose its laboratory by fire on the 20th of May, but has a force working day and night to fill orders and does not propose to disappoint any customer if it is possible to avoid it. As soon as the new laboratory is completed the Spohn Company will be better equipped than ever.

The well known amateur driver, capitalist and horse fancier, E. E. Smathers of New York, has purchased Charter Oak Park of Andy Welch of Hartford, and O. B. Jones of Cincinnati, for \$75,000. Mr. Smathers' string of thirteen trotting horses, including Lord Derby, have been at Charter Oak for two weeks, where Lord Derby is being trained for his match with Major Delmar on July 4.

Trainer Millard Sanders stated publicly at the Cleveland sale before the bidding on Lou Dillon began, that if the man who bought her would turn her over to him he would guarantee to break the world's trotting record with her or would charge nothing for training.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

## Hints on Breeding.

Breeding in a broad sense is simply the propagation of a species, but when we look at it from a financial standpoint it immediately resolves itself into a business proposition with all its attendant intricacies, which very few men have made a genuine success of. I allude, of course to the breeding more especially of race horses and trotters. The breeder of beef and mutton is outside the argument.

My last letter expressed my views in regard to the outlook of the horse world, and I believe these views will be shared by a large majority of the well posted, look-ahead, go-ahead horsemen who read them. With these bright prospects before them and the certainty of the class of horse that will be required, it is the duty of the breeder who wishes to succeed to breed the very best possible type of whatever class he may select, and to do this he must—if I may be pardoned for making the assertion—mend his ways in many particulars.

He can make no mistake in going ahead with those methods in which he excels the Englishman—which are many—but he will do well to cast an eye towards the points in which the English breeder surpasses him—which are few, but of fundamental importance.

The greatest mistake the American breeder makes is this: He will breed for speed, at the expense of every other essential, forgetting that without these essentials he cannot get speed that is good for anything. I mean constitution, staying powers, grit, bottom and individuality.

I have seen horses, both trotters and thoroughbreds, with extraordinary fast records, sold in this country for enormous sums of money, that you couldn't give to me if I were a breeder, and I believe—God save the mark—that if a crooked-legged, blind, curbed, spavined, roaring, three-cornered colt came out to-morrow and trotted the mile in two minutes, he would be heralded from one end of the country to the other and men would be tumbling over each other to send their very fastest mares to him at any price his owner chose to ask, in order to breed a trotter which would do the trick in 1:58 or better, and that is where they would get left.

Speed is no use without constitution and bottom.

This is one point in which the English breeder has the advantage over his American cousin.

The growing popularity of the trotter in Europe and his possibilities as a high going, fast fashionable harness horse, to say nothing of the phenomenal success of the American race horse in England is opening the eyes of the Britisher, and now that their unquestionable speed is backed by the undeniable fact that they can go the distance, settles the question that the sound and carefully bred American product is the peer of his English prototype. I mean the thoroughbred.

As an old rider and sportsman I am delighted to see the friendly sporting rivalry which exists between the two countries, but I must say that, although from the fact that there are comparatively so few representative American horses running in England as compared with the vast number of English thoroughbreds pitted against them, the English are at present winning a large majority of the races, still American jockeys are steering them to victory, and I fear, as every Englishman who is unbiased, unprejudiced and fair must fear, that the day is not far distant when the Englishman will have to get up uncommonly early in the morning to prevent the American owners, American horses and American jockeys from taking the pick of the "basket of plums" and annexing the cream of the turf prizes which for scores and scores of years have been sacred to Englishmen alone.

I make this statement principally because I am convinced, after years of experience among horses all over the world, that the equine species, in order to attain its best development and reach the point which we call perfection, requires a warm, dry climate, an atmospheric condition which does not exist in the humid, sea girt island of Great Britain.

Secondly, because I believe that the American breeder is beginning to see that to breed for speed alone will not do; and thirdly, that American methods in training and riding are becoming so potent a factor towards success that it is impossible to close one's eyes to the fact.

There is no earthly doubt that in the American style of riding the weight is more easily carried and more evenly distributed over the great weight supporting pillars of the frame, and while I do not think the American jockey has so good a control of his mount as the Englishman, still this ought to be overcome by proper breaking, making and training of the animal, when to "go straight" should be the great object lesson taught every youngster and instilled into the minds of every stable boy and jockey.

I consider the Americans have now a sufficiently well established type of race horse to require no foreign importations to improve the breed; all that is necessary is the more careful weeding out of consti-

tutional unsoundness, and the most careful selection in mating from among the home products, in order to produce the soundest and finest stamp of thoroughbred the world has seen.

The climate and soil of certain parts of Kentucky and California cannot be beaten, and with this natural advantage added to constitutional soundness, speed and up to date methods, what else can be the result of careful breeding under such exceptional circumstances but the production of a race horse that will beat anything on earth?

I may be called no Englishman, but I am an Englishman all right, all right, from bottom to top, inside and out, upside and down. You can tell me a mile off, and I am proud of it, but I cannot shut my eyes to facts which a blind man could see through a nine-inch brick wall.

The great thing is breeding for speed through constitutional soundness, grit, stamina and individuality. Speed without make, shape, bone, constitution and bottom, is of no more use than a "lick headache."

I would not let a broodmare of mine come within ten miles of a roarer, if he was fast enough to give half a hundred weight to the next fastest horse in the world and beat him to pieces.

It will be found that many race horses of fame which have been imported into this country were parted with for good and sufficient reasons.

I do not blame the English breeder for getting rid of stock, however fast they might be, if there was anything about them that was likely to affect detrimentally the future thoroughbred of the country, but I do blame the Americans for purchasing animals for stud purposes having any defects at all. If it had not been for this the American thoroughbred of to-day might have been as good as or even better than the English. As it is, as far as constitutional and physical soundness goes, he is far behind.

The roarers, ophthalmic subjects, animals without bottom, and consequently horses constitutionally defective, which have been imported, are accountable for this, as well as native bred horses which have been selected for stud purposes simply from the one fact that they have been able to gallop fast. What is speed worth without bottom? And what is bottom without constitutional soundness and vigor?

The same thing may be said of the trotter. He is, as a trotter, unique, in a class by himself unequaled, unparalleled, unapproachable, unbeatable, but even now, with the exception of his unrivaled speed, he is not what he might have been had not this intense desire for speed taken precedence over everything else. The consequence is, there are a great number of unsound horses, a great number of tainted families and an enormous number of poor individuals.

I do not think the trotter has arrived at a true type. Go through any large trotting establishment, breeding or training, and you will find precious few which are like each other in size, shape, make, conformation or contour. They are all shapes and forms, some of them perfect individuals, others anything you like to call them, ewe-necked, flat-sided, long-backed, goose-rumped, hollow-flanked, narrow-chested, crooked-legged, sickle-hocked, blind; and yet they can all trot and many of them very fast indeed. Why is this? Simply because the owners have bred or bought for speed alone, with no thought of careful selection and individuality.

Look at the hackney, look at the show horse, the Clydesdale, the Cleveland. Look at the Pug, the Poodle and the Dachshund among canines, and endless other instances I could mention.

What, think you, has produced this perfect type, so much of a type, indeed, that you can hardly tell "t'other from which?" Why, careful selection and nothing else.

I must say here, however, that in these cases it has been selection for points, shape, make, size, symmetry and contour only, and I wouldn't give ten cents a dozen for the whole lot if I wanted them to work.

They are pleasant to look upon and beautiful to the eye of their admirers, but "git up and gititiveness" doesn't figure on their program, and for hard, rough and tumble work they are useless.

Speed is out of the question, and in the case of the horse their high action stops or else they tumble down and break their knees when they are tired, and that is very soon. They have, however, assumed a type.

The Arab is a perfect type from centuries upon centuries of the most careful breeding.

The English thoroughbred is a beautiful type from the same cause, though in a lesser degree and only a fraction of the time.

In the case of the Arab and thoroughbred, however, particularly the latter, the great element and factor, speed, has had to enter into the calculations, but what have we got as a result? Why the most graceful and beautiful, as well as the fleetest of living creatures.

Why should not a beautiful type of trotter be produced in the same way?

It can be done as easily and far more quickly than has pertained in the case of the thoroughbred, because there are numbers upon numbers of splendid individuals containing all the essentials and also the speed element in a most marked and pronounced degree. It is only because shape, make, individuality and soundness has not entered into the proposition, and so long as these requisites do not enter into the proposition, so long will the trotter be a horse without a type, or at least without a pronounced type.

I consider the American trotter the most extraordinary animal on the face of the earth. He has come so quickly and done so wondrously that one still waits to wonder what he will achieve. Yes, what will he achieve if he is bred for individuality as ardently as he is bred for speed?

It must be plain to the most casual observer that a horse whose make and shape and muscular development, and whose points of leverage and range of action is best adapted for the kind of work for which he is intended, and whose heart, lung room and accessory breathing apparatus are well developed, must be a better animal to breed from than a brute which is a scarecrow, although he might be able to trot a mile in two minutes. I would infinitely prefer to put my good, sound 2:10 mare to one of these sound and perfect individuals, although he could only trot in 2:12, than I would to the two minute wastrel, and I would win out in the end with lots to spare and have a sound, good looking horse that could go the route into the bargain. In fact, nothing would induce me to breed to the former animal.

I sit in my office here in the St. James building, Broadway and Twenty-sixth street, New York, and contemplate the magnificent business blocks in the neighborhood.

I see enormous piles of business houses built of the very finest steel and stone, with due regard to architectural beauty, but I see no waste of room, and I see no weak or defective spot from roof to basement.

The architects have been most careful that the skeleton is such that will support the great weight incumbent upon it. They have been alive to the urgent necessity of light, lofty rooms with plenty of cubic space for breathing, and the most approved hygienic principles have been adopted.

They have built a business block capable of doing business on up-to-date principles. They have built a sound edifice and that's the end of it, one that will carry the weight and stand the racket and strain, the concussion of the machinery and the wear and tear of the rushing crowds year in and year out. Where would the weak skeleton and defective masonry of the carelessly constructed building be under such conditions? Down and out. No, the inspectors of buildings would not have permitted it to have been put up, showing thereby that they have more common sense than some breeders.

If it were possible or practical I should like to see a law passed making it a punishable offense to use any stallion for breeding purposes that was not absolutely sound both physically and constitutionally, the same law holding good in the case of the mare. This, of course, would have to be left in the hands of an honorable, fully qualified and competent board, and would entail considerable trouble and expense; but if such a law were passed, say, in such a magnificent horse-raising country as certain parts of Kentucky and California, and its forms rigidly adhered to and carried out, mark my words, what a stamp of horse of whatever class you chose to cultivate, you would have in twenty years from now! You would have a class of horse that would be a credit to the nation; you would have a class of horse whose very name would be a guarantee of careful breeding, strength, staying powers, nerve, good looks, grit and endurance; a horse with the expression "sound and honest" written on his very face; and further than that, a horse that one gentleman could sell to his neighbor and rest in the feeling of pleasure and satisfaction that he had sold him a good animal.—Capt. A. H. Waddell in *Chicago Horseman*.

### GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and  
positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address: THE LAWRENCE-WILLIAMS COMPANY, Cleveland, O.

## ROD, GUN AND KENNEL.

Conducted by J. N. De WITT.

### A June Day.

What has not dreamed a world of bliss  
On a bright sunny noon like this,  
Combed by his native brook's green maze,  
With comrade of his boyish days,  
While all around them seemed to be  
Just as in joyous infancy?  
What has not loved at such an hour,  
You that heath, in birchen bower,  
Lulled in the poet's dreamy mood,  
Its wild and sunny solitude?  
While o'er the waste of purple ling  
You mark a sultry glimmering;  
Silence herself there seems to sleep,  
Wrapped in a slumber long and deep,  
Where slowly stray those lonely sheep  
Through the tall foxglove's crimson bloom  
And gleaming of the scattered broom.  
Love you not then, to list and hear  
The crackling of the gorse-flowers near,  
Pouring an orange-scented tide  
Of fragrance o'er the desert wide?  
To hear the buzzard's whispering shrill,  
Hovering above you high and still?  
The twittering of the bird that dwells  
Among the heath's delicious bells?  
While round your bed, o'er fern and blade,  
Insects in green and gold arrayed,  
The sun's gay tribes have lightly strayed;  
And sweeter sound their humming wings  
Than the proud minstrel's echoing strings.

—William Howitt.

The poet has o'erlooked the purling stream

So loved and sought by joyous angler,

The beauties of field and bower gleam

Full brighter and pleasing to happy dangler,

Who with pliant rod and willow creel

Is waiting on the music of the reel.

### Coming Events.

#### Rod.

- April 1-Aug. 15—Close season for lobsters and crawfish.  
April 1-Nov. 1—Trout season open.  
April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steel-head in tidewater.  
May 1-Sept. 1—Close season for shrimp.  
June 13—Saturday Contest No. 1. Class series. Stow lake, 2:30 p. m.  
June 14—Sunday Contest No. 1. Class series. Stow lake, 10 a. m.  
July 1-Jan. 1—Open season for black bass.  
Sept. 1-Nov. 1—Close season for crabs.  
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

#### Gun.

- June 7—California Wing Club. Live birds. Ingleside.  
June 7—College City Gun Club. Blue rocks. Berkeley.  
June 14—Golden Gate Gun Club. Blue rocks. Ingleside.  
June 21—Union Gun Club. Blue rocks. Ingleside.  
June 21—College City Gun Club. Special blue rock events. Berkeley.  
June 21—Empire Gun Club. Blue rocks. Alameda Point.  
June 28—Millwood Gun Club. Blue rocks. Mill Station.  
July 1-Feb. 15—Dove season open.  
July 15-Nov. 1—Deer season open.  
Sept. 1-Feb. 15—Open season for mountain quail, grouse and sage hen.  
Oct. 15-Feb. 15—Open season for quail, ducks, etc.  
Oct. 15-Jan. 15—Open season on quail in Marin county.

#### Bench Shows.

- Oct. 6, 7, 8, 9—Danbury Agricultural Society. Danbury, Conn. John W. Bacon, Treasurer.  
Nov. 3, 4, 5, 6—Ladies Kennel Association of America. Madison Square Garden, New York. Mrs. A. G. Evans, Hon. Secretary, Westbury, L. I.

#### Field Trials.

- Aug. 18—Iowa Field Trial Association. 6th annual trials.  
Aug. 18—Nebraska Field Trial Association. O'Neill, Neb. H. H. McCarthy, Secretary.  
Sept. 1, 4—Minnesota-North Dakota Field Trial Association. 4 annual trials. Ironquels, S. D. Dr. W. A. Moore, Secretary-Treasurer, St. Paul, Minn.  
Sept. 8—Manitoba Field Trial Club. 17th annual trials. Carman, Man.  
Oct. 25—Monongahela Field Trial Association. 9th annual trials.  
Nov. 2—Michigan Field Trial Association. Annual trials.  
Nov. 2—Ohio Field Trial Association. 6th annual trials.  
Nov. 9—Missouri Field Trial Association. Annual trials.  
Nov. 9—International Field Trial Association. 15th annual trials.  
Nov. 9—Independent Field Trial Club. 5th annual trials.  
Nov. 11—Western Irish Setter Club. 2d annual trials.  
Nov. 16—North American Field Trial Club. 5th annual trials.  
Nov. 16—Kentucky Field Trial Association. 4th annual trials.  
Nov. 16—Illinois Field Trial Association. 5th annual trials. Robinson, Ill.  
Nov. 23—American Championship Field Trial Association. Annual trials. Robinson, Ill.  
Indiana Field Trial Club. Annual trials. Clay City, Ind., first week in December. J. F. Young, Secretary, Clay City, Ind.

### Something for Nothing

The Polk Miller Dog Remedy, of Richmond, Va., are manufacturers of several of our Remedies, the most popular line of preparations, especially for dogs, on the market today, having received the highest commendations of the leading dog men and kennel owners in this country and Canada. Read their advertisements appearing in the columns of our journal each issue. The firm referred to will mail absolutely free a copy of their celebrated book on Dogs if you send them 5 cents to cover postage. If your dog is sick, write immediately, stamp, and describe the symptoms as accurately as you can. They will cheerfully furnish the best information on request without charge. F. W. Braun & Co., of Los Angeles, Cal., have recently been made distributing agents for Polk's Dog Remedy on the Pacific Coast.

### Bull Terriers.

If one were asked off-hand which is the most generally popular dog the whole country over, no doubt the answer would be governed, to a great extent by one's own particular fancy. Judging, however, from a long experience with shows all over the country, we should give the Bull Terrier as our vote.

It might not be the pure white Bull Terrier that we require for exhibition purposes, but the dog universally known as the Bull Terrier. As a rule when a show is first held in a new town, the most noticeable breed is the business dog of the Bull Terrier persuasion, and his owners are the gentlemen who can tell you most about dogs, or at least they purpose to make you believe so. Because these gentry are called upon to consider their points in regard to their combative abilities is probably the reason they assert so much to the complacent judge. It is for this and other reasons, not altogether inseparable from personal safety, that judging Bull Terriers in a new country is not always a task replete with pleasure. The most difficult part seems to be to instill into these folks the whys and wherefores of the pure white dog, the particular animal being so much, to their mind, prettier as well as serviceable. In support of the latter supposition it must be admitted that most of the best rat killers and fighters are colored dogs.

Probably few people could give a correct answer why the Bull Terrier should be white. There really is none except fashion and better associations, for when the Bull Terrier was taken up by the better sort of people, pure white was preferred. As a rule the Bull Terriers of the day breed true to the white, though cases of a colored mark on the eye or on the ear crop up in every litter. Usually breeders destroy those marked, at birth, unless more than ordinarily good. The question has never been definitely settled where the line should be drawn and it must be said that of late a good deal of leeway has been allowed, and when this is so it is any wonder that the owners of heavily patched dogs wonder where they are at when their dogs are turned down for not being pure white. Still such inconsistencies are the charm of showing dogs.

A lot of interesting matter may be culled here and there from Mr. Lee's new book on Terriers and from which we learn that to the late Mr. James Hinks of Birmingham, a noted dog dealer, who died in 1878, we, in a great measure, owe our modern Bull Terriers. Somehow or other he contrived to get together a strain of white dogs, specimens of which he exhibited with great success at some of the early shows, although the earliest of them did not provide classes for bull terriers.

It was at the commencement of the fifties that James Hinks began to cross the patched, heavy-headed Bull-Terrier, used for fighting, with the English White Terrier, and in due time he produced dogs handsome enough to make a name for themselves, and able to revolutionize the variety. Some of the old "doggy men" said this new breed was soft and could not fight. "Can't they?" said Hinks, when talking to a lot of his London friends at the Holborn Horse Repository dog show in May 1862. "I think they can." "Well," said one of the London school, "let's make a match." Hinks, nothing loth, did make a match, and backed his bitch Puss—that day she had won first prize in her class—for £5 and a case of champagne, against one of the short faced patched dogs similar in weight. The fight came off the same evening at Bill Tupper's well known rendezvous in Long Acre. Puss occupied half-an-hour in killing her opponent, and so little the worse was she for her encounter that she appeared on the bench next morning, a few marks on her cheeks and muzzle being the only signs of the determined combat in which she had been the principal overnight. When accounts of this became bruited abroad, although the story was not generally believed, the popularity of the "long-faced" dog was established. And this is the sort of dog a special committee of club representatives caused the Kennel Club to dishonor by placing him in the "non-sporting section" alongside Pugs, Pomeranians, and Italian Greyhounds! This grotesque decision was perpetrated early in 1902.

Birmingham in 1864 followed the example of the London committee in providing a class for Bull Terriers, and it had an excellent entry of twenty-eight. Here Hinks won first prize with Madman, and second with Puss, positions which the same dogs had occupied at Ashburnham Hall, Chelsea, a few months earlier. However, at the latter place the class had been divided for dogs over 10 lbs. in weight, and for dogs under 10 lbs. in weight, and a somewhat similar arrangement as to size came to be adopted a little later on.

"Thus early we find considerable confusion with regard to these Bull Terriers, solely from the persistence with which their owners stuck to the names of 'Madman' and 'Puss.' Already several hearing both names were shown, winning prizes too, and although they came to be entered in the first volume of the 'Kennel Club Stud Book,' no reliance can be placed upon many of the pedigrees published therein. Mr. Joe Walker showed a Puss in 1864, so did Mr. Hinks, and the Stud Book of 1874 contains no fewer than twelve Bull Terriers called 'Madman,' many of which, I have no doubt, were one and the same animal; and the same volume contains five bitches named 'Puss.'

To separate one from another and to verify all the pedigrees, which, as I have said, in many cases were extremely doubtful, would be impossible at the present time.

The dog Madman (2739), which once belonged to the writer, was of a strain distinct from that found in Birmingham, being by a very good old dog of Mr. Joe Walker's called Crib, from Mr. James Roccoft's Puss. Both these breeders also owned English White Terriers, with which they had, I fancy, at some time or other crossed the Hinks' strain of Bull Terriers, producing a very nice style of dog, not so heavy and massive as that from the Black Country. This dog Madman was a handsome and companionable creature, and as good a swimmer as ever entered the water. Bull Terriers are often good water dogs, and the late Mr. Tom Pickett of Newcastle told me of a Bull Terrier of his, I think it was called Wallace, a prize winner, which won a swimming match in the Tyne."

Still, dealing with the doubt that clings to the early Bull Terriers' pedigrees, to further complicate matters, the name of "Victor" became a fashionable one and, including a "Young Victor," six such appeared in the first Stud Book, and there are a similar number of Rebels. We must, however, presume there was but one real "Madman," and that belonged to Hinks. Dr. Walsh illustrated him in the "Dogs of the British Isles," and he, like all contemporary writers, speaks highly of the sagacity of the Bull Terrier and of his adaptability as a companion. He alludes to rough or wire-haired Bull Terriers, which are, however, of no account, nor ever were; and there is no doubt that the modern strain is in a great measure due to the animals that sprang from the midland counties, and some few that were bred in the big towns of Lancashire.—*American Stock-Keeper.*

### DOINGS IN DOGDOM.

A well bred, broken Pointer dog is offered for sale in the classified ads., page 15. The opportunity is a seasonable one. A new master could become thoroughly acquainted with his dog in time to have him in good shape for the fall shooting.

Mrs. Bradley-Dyne of Saturna P. O., B. C., announces that she has some desirable Irish and Scotch Terrier puppies for sale. Ch. Loyne Rufian and Ch. Fighting Mac are both well-known producing sires, and should influence the fancy in embracing the opportunity of procuring puppies of these sterling good breeds.

We notice a challenge in the current number of *Field and Fancy*—a contest for not less than \$25 over the merits of two wire haired Fox Terriers. Both are and have been ordinary dogs that are now not worth the trouble of a controversy as to merits. We maintain, however, that we were about correct in our criticism of the two, Ch. Humberstone Bristles (Ch. Endcliffe Banker-Limefield Vixen) and Cairnsmuir General (Ch. Go Bang-Cairnsmuir Kismet).

A dog show under P. K. L. auspices will probably be held in this city during the fall or early winter. The show will take place in conjunction with the exhibit of Oakland Poultry Association at the Mechanics Pavilion. This will be the first "feathers" function held in Frisco for ten years. Indications point to a good showing of dogs here. The P. K. L. people will use every endeavor to make the show a strong rival, in number of dogs benched and attendance, to the best bench show we have had here for years past.

Gossip had it that a specialty show would come off here this fall. When the rumors were run down to their sources they failed to yield anything substantial and savored only of individual interests and pointless talk. The idea however is a good one, but we are afraid premature.

Irish Terrier interests on the Coast bid fair to soon come strongly to the front. Mr. William Ollard, a prominent fancier of Tacoma, Wash., has evidently indulged his fancy for the Irishman during a recent trip abroad, for he brought back with him two good ones. The following communication from Mr. Ollard is full of interesting notes on the breed and is ripe with the true fancier's enthusiasm:

"Arrived home some two weeks ago, and in a measure, after being 'on the go' the past twelve months, am glad to be home once more and to be able to settle down again. I thought perhaps you would like something for your paper, so am sending you as much news as may perhaps be worth while to fill up a blank space. I had the misfortune to loose the Irish bitch Nell after all. I never had such a turn as that for a long time. She was, of course, far from perfect as a show bitch, but I know now, since my trip to England, that she was very valuable as a brood bitch, and such a one as she was, in breed and general make-up, were few and far between and were held at a high price in England.

Whilst over there you may be sure I was in close touch with most things doggy; visited the big shows, met a number of well-known dog men, and looked up most of the Irish Terrier kennels, seeing at leisure the champions at home in their more or less natural state. I purchased and safely landed here two Irish Terriers, a dog and a bitch, which I conservatively consider as fine specimens of the modern type as is generally possible to get. Being right on the ground I made the most of the opportunity to pick up something very choice, but it was astonishing, after all, how difficult a matter this proved to be, in a country too where dogs are so common. The fact is everybody knows the value of good stock, and holds on to anything laying claim to decided show points. I found that in England, where prize money and shows are so plentiful, prize-winning stock is a valuable commodity and is accordingly rated at a high valuation. Second-rate stock is easy enough to get, but naturally it doesn't

pay to bring anything but positively A1 dogs into this country, incurring such risks, expense and worry.

Had the usual store of hitches and small troubles on way home, on steamboat and train, and so it was with a sigh of relief when Tacoma came in view I finally deposited my dogs safe at home. I feel they should do some good out here and have some influence in the breed on the Coast, as they can, without doubt, do credit to the most critical dog center on earth.

The bitch Brinscall Doreen is of the Ch. Sternfield Vic train, her mother coming direct from the late Wm. Graham's Kennels (of Irish ambassador fame). Brinscall Doreen possesses a most phenomenal head, long and flat and well chiselled, with the true Irish square foreface, a grand coated one, all perfect fibre. A bitch with a better foreface it is hard to find—something I failed to see all the time I was in England. Power of jaw is a quality so often lacking in the breed and so seldom found at all in the bitches—a strong feature of this bitch—and which is so very necessary to convey a true Irish expression.

The dog Bolton Woods Despot, some ten months ago I purchased from Mr. Samuel Wilson of Bolton Woods Mixer renown (the phenomenal winner of over 2000 firsts and specials). B. W. Despot is a son of the famous B. W. Bandit and grandson of B. W. Mixer. He owns the dam Saskatchewan, the bitch that whelped the Bolton Woods Mixer, thus being inbred to Saskatchewan, hence from point of breeding it is hard to find the equal of this young dog, B. W. Despot.

He himself fully bears out his grand strain, is a worthy descendant, possessing a well knit, racey body, free and easy of movement, an upstanding true pointed dog with a true fibred coat, and a remarkable long, flat, narrow skull, in which are set the smallest and blackest of eyes—a modern type Irishman all through. Both dog and bitch are singularly free from the frequent fault of cheekiness.

There are numbers of old style stud dogs still in use in England, but on inquiry as to their birth, date is sufficient to tell one their chief characteristics. The present vim in Irish Terriers is the racey, wirey, cobby type.

In passing, would say that my visit to the celebrated Bolton Woods Kennels in Yorkshire, was of especial interest, as I had the privilege of viewing leisurely that grand old warrior Bolton Woods Mixer; a dog, who, despite his age, was only last year finally retired from the show bench. On that occasion, in addition to all his class prizes, was awarded the special for best in show. He was looking seemingly as "fit" as ever, and barring accidents will continue to powerfully influence the Irish Terrier breed for some years to come, as he is doing at the present time.

It is needless to say that aside from the fascinations of dogdom, my trip was replete with many other pleasant features. After an absence of thirteen years, a visit to boyhood scenes, to come in contact again with old haunts, hunting up scattered relatives and friends, to renewing old time memories and associations, was of itself something of intense interest, and which well repays one for the distance of travel in getting there.

During my absence in England I was notified of the loss of a favorite Irish Terrier bitch Puget Prude, but afterwards received cablegram stating she was found and all right, which latter greatly pleased me you may be sure. Imagine my surprise and feelings on landing home in Tacoma to hear she had been burned up in a large fire only a week previous.

I thought a great deal of her, being an excellent brood bitch and closely resembling in style and type the bitch Brinscall Doreen, just landed. Of course I had been anticipating all kinds of good results from her and the young dog Bolton Woods Despot. She was registered and had done some little winning."

That doleful song-bird, the mournful dove, is to have better protection hereafter from the rapacity and greed of the hunter, if the Farmers' Club of Pasadena has anything to say in the matter, says the Los Angeles Express. The mourning dove is a benefactor of the human race, inasmuch as it feeds on the seeds of weeds; largely upon foxtail, sorrel weed and other obnoxious growths that have always been the bugbear of the farmer and the gardener.

Resolutions signed by more than 100 residents of Pasadena and vicinity have been presented to the Board of Supervisors by the Pasadena Farmers' Club, asking that the closed season for the mourning dove be changed from July to February, to February 15th to September 1st of each year. The petition calls attention to the good this "harmless, gentle creature" does and goes on to say that the present condition of affairs "is not only unworthy of an enlightened and humane people, but must inevitably result in the rapid and early extermination of this valuable bird in Southern California."

It was resolved, therefore, at the meeting held May 28th, that the Pasadena Farmers' Club should send a petition to the Board of Supervisors asking that body to pass an ordinance offering protection to this bird from February 15th to September 1st, which includes the season of breeding and incubation. The petition, which has not yet been acted upon by the Board, is signed by the president, C. C. Thompson, and the secretary of the club, Joseph Thorndyke. Then follow the names of 100 residents and members living in the vicinity of Pasadena.

### Tennis Again to the Front.

Activity at the Park courts, and the repairs being made at club and private courts indicate that great interest will be taken in the game this spring and summer. The Skinner Co., at 801 Market St., S. F., report lively business on Rackets, Nets and other Tennis Goods.

### Fine Cutlery.

The Skinner Co., at 801 Market St., San Francisco, are doing a lively business with the "Shiletto Cutlery." These goods are made in Pocket Knives, Razors and Scissors, all fully warranted, and are not excelled by any brand.

### AT THE TRAPS.

The local scheduled trap events for to-morrow will be the California Wing Club live bird shoot at Ingleside and the College City Gun Club blue rock shoot on the north Berkeley grounds.

The Empire Gun Club annual holiday tournament last Saturday and Sunday was well attended on both days. The weather conditions could hardly be more favorable for a trap shoot excepting on Sunday afternoon when the wind blew heavily. The working of the Maugatraps were in the main satisfactory, at times however the targets were a bit slow and short thrown. This, however, was for the purpose of giving the amateur a slow, easy target.

On Saturday D. Daniels made the high average, breaking 100 targets out of a possible 105. Fred Feudner, A. J. Webb and C. C. Nauman were close up with 99 birds each.

Webb won the first prize in the merchandise event with a straight of 20, Nauman, E. Klevesahl and Fred Feudner were tie for the first prize in the special event. Nauman won on the tie shoot off.

On Sunday Nauman struck his gait and finished with the high average for the shoot, beating Webb by one bird during the two day's shooting.

The merchandise event drew a big crowd of entries, the prizes were numerous, many ties resulted in the race for the big assortment of articles offered. M. J. Iverson scored 20 straight and won the first prize in the Sunday merchandise race.

The scores for both days were:

Blue rocks, Alameda Point, Saturday, May 30, 1903.

Forty-one enthusiastic shooters participated in the fifth annual tournament of the Fresno Gun Club, held on the 31st inst. At the shooting grounds near the old Pollasky depot the popping of guns and smashing of targets began at 10:30 A. M. and lasted till well along toward sundown. From Hanford and other nearby towns, quite a delegation of sportsmen came and others from more distant points. A number of Southern California shooters stopped over on their way back home from the Ingleside tournament. The club is well pleased with the success of the tournament and the long list of entries—41—larger than that of any previous tournament, shows that the guns throughout the valley appreciate the sport offered at the meeting held by the local club.

The highest score made was 126 out of a possible 135 by Vaughan of Santa Ana, with a per cent of 93.3. Shemwell of Colorado Springs, who has been taking in the spring and early summer tournaments on this coast, made the second highest per cent, 91.1-9, with 123 birds. Fred Stone and Frank Fanning tied for third place with 119 birds, a percentage of 84.

F. Ross, secretary of the Hanford Gun Club, was the winner of the much-sought-for booby prize, a live guinea hen, which was presented in a felicitous manner by the secretary of the local club, Dan Dismukes.

Following are the scores and averages:

	Birds										Total	Avge

was quite thoroughly, so is a competent man to criticize a shoot. He says:

"The chief sources of complaint everyone had in connection with the sliding handicap system and the way the traps were thrown. As for the first it was a matter of fact. I did not see a single redeeming feature in it. The men were handicapped at the end of the line, and the distances ranging from 20 to 14 yards. Instead of working out as expected the system was a handicap for advantage and was the worst kind of a test. As an example of its working, here is a snapshot I started out at 14 yards where I am used to shooting and did fairly well, good enough at any rate to get me back 20 yards with several of the others. I did not do anything at that range, and next to nothing most of the rest. What was the result? Why they began snapping at their birds and missing them intentionally in other ways so as to make a ragged series of traps to be put at 14 yards for the next lot to make a killing. Dr. Barker of San Jose broke 97 out of his first 100, and they put him up to 20 yards. He then went to pieces and missed so many that they arbitrarily set him back again. Others got away with it, and I will admit I was as guilty as any one after I saw the rest were dropping birds intentionally. If men had been handicapped for the shoot it would have been well enough. Any one who knows the blue rock shooters could take the Sacramento, San Francisco and Los Angeles tournaments for a base and figure the respective ability of the men satisfactorily enough.

"On another point we had much fault to find, and that was in the way the birds were thrown. There were five sets of five traps each placed in the old straight line behind raised bulkheads. The wind was in our teeth, and the White Flyers that were trapped are so light a bird that they climbed into the clouds. Such left angles were never thrown before. I do not know as we got any more than our share of them, but the trapping was fierce. Not once during the shoot did the committee test the traps or attempt to remedy them, though they were throwing illegal birds all the time and many complaints were made. Some of the Portland shooters thought they had been given the worst of it and were very sore indeed. They threw the left birds very low and they would scoot over the top of the long bulkhead in a way that made the shooting very uncertain. The right hand birds, on the other hand, went up into the air as if shot out of a gun."

As to the sliding handicap system, the conditions were known to every shooter who entered the tournament. Mr. Hagerman was possibly disgruntled, if quoted properly, that he did not win more money (he took down \$79.95). Putting the cracks back to 20 yards gave some of the other fellows a chance. On his own statement he shows that under the system carried out he shot himself up to the 20 yard line. He claims some experience in trap shooting, consequently he cannot claim he was shooting experimentally. As to dropping for place, we regret to note that there was some indulgence in a practice that is not countenanced by sportsmen at trap shoots. If Mr. Hagerman's published statement above, that he also dropped for place is correct, then his argument is tainted with the faulty coloring that he was sore because he could not beat his competitors either in straight shooting or by indulgence in a practice that is not conducive to the benefit of the sport. Coming, if it does, from one who dropped, good taste at least would sanction silence in this respect. He is quoted as alluding to a comparative handicap which could have been used. Possibly the same results would have ensued and the same "kick" would have arisen under any other handicap, targets or distance. His argument in this respect calls for no other conclusion.

The management did not take into consideration the matter of dropping for place, not having previously had an experience with shooters who would resort to those methods. None regret this particular occurrence more than the gentlemen who conducted the shoot.

The traps were frequently inspected and kept in proper order. The main reason why many targets were not found by the gun was the prevailing wind during the shoot. The weather conditions were not under control of the association. The traps were placed as they always have been, surely Mr. Hagerman does not contend that the five sets of traps should have been re-located. The weather conditions were similar to those which prevailed during the Ocean Park Country Club shoot which Mr. Hagerman managed. Right quartering birds naturally took an up shoot into the wind, whilst the left quartering birds were blown in a down shooting direction, this was not the fault of the trappers nor was it due to a careless working of the traps. The targets used, "White Flyers," are only a trifle lighter than the blue rocks used at Los Angeles and generally in use on the Coast.

The trap and target exceptions mentioned can not be said to be a whit different than is the experience of every shooter who attends a shoot on grounds other than those he is accustomed to.

If any suggestions are offered whereby a shoot under the same auspices and upon the Ingleside grounds can be conducted upon a broader or more equitable basis, we feel safe in saying that their adoption will be cheerfully made.

We give here a list of winning shooters and the amounts won. Some of these shooters did not participate in all of the events. The total entrance for all of the events, ten a day for three days, was \$60.

The Southern California contingent are credited with the following amounts: J. Bradley (2 events) \$8.68, W. E. Hicks \$99.30, C. D. Hagerman \$79.78, C. Julian \$64.60, Gus Knight \$7.25, E. B. Mills \$95.35, W. W. Shonewell, \$107.70, J. E. Vaughn \$97.85—a total of \$600.51, over 15% of the money distributed, and won by eight shooters out of the 53 participating, this does not look like a feast.

Among the other winners were M. Abrahams (Portland) \$39.15, G. H. Anderson \$65.80, Phil B. Bekeart \$19.60, Dr. A. M. Barker \$99.40, F. Buergel \$10, M. Burnell \$46.00, J. Burns \$24.15, "Boy Blue" \$10, G. L. Barham (1 event) \$2.00, Chas. Carr \$53.60,

J. H. Carlisle \$1.90, G. H. Chick \$7.75, C. Cate \$47.75, Ed Donohoe \$18.55, D. Daniels \$79.05, Dr. A. T. Derby \$23.34, H. Davis \$4.25, De Merritt \$2.78, H. R. Eaton (Portland) \$40.30, Englehart \$17.40, M. O. Feudner \$131.96, E. Forster \$29.63, G. Franzen \$39.05, F. Feudner \$38.95, F. Fanning \$26.93, C. S. Fish \$24.10, G. W. Gibson \$94, J. Gibson \$61.10, F. Gibson \$33.03, W. J. Golcher \$54.80, J. George \$11.78, C. A. Haight \$71.85, Dr. Hutton \$9.05, H. A. Hoyt \$14.60, F. Howe (Portland) \$93.94, Holling \$76.55, K. L. Hart \$23.35, C. D. Hoag \$18.90, Holdscow \$17.75, F. A. Hodapp \$8.05, M. J. Iverson \$104.93, G. H. Johnson \$49.10, H. Justus \$31.41, J. O. B. \$7.60, L. Kin-cannon \$37.05, E. Klevesahl \$56.90, R. E. Kerrison \$5.60, J. Karney \$31.25, Dr. McConnell \$30.90, J. B. McCutchan \$74.25, Madison \$10.55, W. E. Murdock \$3.35, Muller \$18.60, Masteron \$8.55, C. C. McMahon \$3.20, Frank Newbert (Sacramento) \$99.35, C. C. Nauman \$132.96, E. J. Payton \$95.95, Porterfield \$6.55, J. Pisani \$9.50, J. Ross \$32.65, R. C. Reed \$43.15, M. A. Robertson \$53.40, M. J. Robertson \$9.08, "Slade" \$2.30, H. T. Smith \$3.40, W. A. Storey (Portland) \$32.81, J. Shiell (Tulare) \$47.90, C. Sylvester \$34.90, "L. C. Smith" \$50.75, W. H. Seaver \$85.60, J. J. Sweeney \$56.45, F. J. Stone (Fresno) \$93.05, A. M. Shields \$63.70, C. M. Slason \$2.80, G. Sylvester \$16.55, G. Stone \$23.60, "U. M. C." \$56.95, W. H. Varlen \$87.70, A. J. Webb \$111.40, C. I. Woods (Tacoma) \$116.45, T. A. Work \$23.70.

From the foregoing it will be seen that the bulk of the money was distributed among visiting shooters, about 90%, which is a complete refutation that the shoot was a frost. It was an open to all shoot and was so arranged that there was a chance for everybody and that 75% of the money was not won by a half dozen shooters. Surely this is encouraging for the shooter at large and an inducement to keep up the enthusiasm for the sport.

A tournament is under way to day and will also be to-morrow, at Athenia, Or., under the auspices of the Athenia Sportsmen's Association. The program will consist of 21 regular events and 1 consolation event, and there is \$155 in added money. The entry fee will be \$1, except in the 21st event, which is a race at 25 singles, unknown angles; the entrance fee for this is fixed at \$2.50.

The high average at the Fresno tournament last Sunday was made by J. Ed. Vaughan of Santa Ana, with an "L. C. Smith" gun. The two longest runs at the Ingleside tournament were also shot with an "L. C. Smith"—Vaughn 72, M. O. Feudner 62 breaks.

A revision of recent trap shooting statistics shows, according to the observation of the compiler, that U. M. C. shells were used by the respective winners of the following events—the live bird championship of Northern California at Sacramento May 15th, by G. W. Gibson of Colusa; the high average at the fifth annual tournament of the Fresno Gun Club on May 31st by J. Ed. Vaughan of Santa Ana; the first and second high averages at Ingleside during the tournament of the San Francisco Trap Shooting Association on May 22d, 23d and 24th. At this shoot out of 93 shooters participating, 71 of them used U. M. C. shells.

Powder statistics show that DuPont smokeless was used by the winners of first, second, third and fourth high average men, C. C. Nauman, J. Ed. Vaughan, F. B. Mills and G. Lovelace, at the recent tournament of the Ocean Park Country Club. Lovelace also won the individual Pacific Coast blue rock championship. In the three man team shoot two shooters on the winning team also shot DuPont.

At the Sacramento tournament, open only to shooters of Northern California, the shoot was conducted by the local distributing agent and the traveling representative of an Eastern smokeless powder company, whose goods it has been claimed were pushed to the exclusion of other brands often called for.

## GOSSIP FOR SPORTSMEN.

William Mittlespaß, a German peddler, was arrested at Bear river, Humboldt county, May 20th, by Deputy State Patrol W. P. Huestis for illegally having deer hides in his possession. On the following day he was taken to Ferndale, where he was arraigned before Justice James Smith. Having been caught in the act, he at once pleaded guilty and was fined twenty-five dollars for the offense, which amount was promptly paid. When apprehended the culprit had but eight hides in his possession, but as he had been in that vicinity for a number of months, Deputy Huestis is of the opinion that he has been in the habit of shipping his hides from Shelter Cove, although there is no evidence to substantiate this view.

Deputy Huestis is resolved to break up this inhuman and illegal traffic in deer hides, and the last arrest is but in line with the course he has pursued ever since he went into office.

The Hunter Arms Co. of Fulton, N. Y., have just issued a new edition of the "L. C. Smith" gun catalog. The booklet is a beautiful example of the printer's art and is elegantly illustrated with cuts made from photographs of the guns and shows them just exactly as they are. The catalog contains, besides a descriptive list of L. C. Smith guns, a lot of information of much value to lovers of the gun. Copies can be procured by addressing Hunter Bros., Fulton, N. Y.

Armed only with an ax, James Carlin, superintendent of Peter Moy's sheep ranch, between Mt. Hamilton and Newman, so states a dispatch from Livermore, fought a huge California lion a few days ago, and were it not for the assistance of three sheep dogs, would have probably been killed in the encounter. Beyond a few slight scratches Carlin was not injured, being protected from the animal's claws by his heavy clothing. As a number of the sheep in his charge had been killed by California lions, Superintendent Carlin set a chain of traps to catch the animals. In making his rounds, Carlin found one of the lions in a trap. He was armed with a Winchester rifle, but the maga-

zine contained no cartridges, so Carlin took a chopping ax and attempted to brain the animal. In trying to dispatch the lion Carlin approached too close and the animal reached out and knocked the ax out of his hands. At this point three shepherd dogs with Carlin closed in on the lion and Carlin, after securing the ax, also joined in the fray. After receiving a number of blows from the lion's paws, Carlin managed to strike the animal a blow on the head that rendered it senseless; and he then killed it.

"Dustproof Harry's" efforts to revolutionize the fish and game protection and propagation in this State bear fruit in many and devious ways—mostly on the entanglement order. This state of affairs of course keeps the "Coast oracle" on the move, looking after the workings of the associations he claims to have organized (at the State's expense) and generally stirring fish and game matters up.

One of the latest phases of the circumlocution protection fad is given in a recent issue of the Los Angeles Times as follows:

"When the game and fish protective associations held their meeting last week and decided upon a restrictive bag limit they little realized what a hornet's nest they were stirring up. Since that time the shooting fraternity has been in a more or less continuous ferment, and petitions of various sorts are flying around thick and fast.

District Attorney J. D. Fredericks yesterday handed down an opinion that effectively knocks out the bag limit so far as counties are concerned. Fredericks says the supervisors have no right to pass any law that limits the bag beyond that fixed by the State and quotes the code to prove it. Only the right to further restrict the seasons of the State is allowed the county boards. Consequently if any such law was passed as that asked on doves and ducks it would not stand the first case."

"As for the deer law, that will doubtless go through. A 'rider' has been tacked on to it at the instance of some game protectionists who are apparently more zealous than reasonable. They want the dove law to be opened September 1, and cite the usual argument about nesting birds, etc. Such a law would simply close Southern California dove shooting, and if that is desired, the best way to do it would be to come out from behind the bush and stop shooting altogether, when the birds are here or not at all. The present law will give only about six weeks of hunting, for after the middle of August the doves begin to clear out. I want to see game protected as much as any one, but there is no use of being foolish about it."

About 60,000 trout fry will be distributed in the streams and small lakes of Oregon, under the supervision of the Oregon Fish and Game Association. The trout are now ready for distribution at the Clackamas hatchery, and the work will be commenced as soon as possible. A meeting of the Board of Directors of the Fish and Game Association was held at Portland recently for the purpose of deciding upon the distribution of the trout. Owing to a number of reasons, chief of which is the lack of a large supply of eggs in the eastern streams from which they are now taken, the Oregon Association had to be contented with 60,000, where in former years they had a quarter of a million. The young trout will be distributed in the streams of Umatilla, Baker, Columbia and Clackamas counties, in the headwaters of the Yaquina, and in the Necanicum. The lake trout will be sent to some of the small lakes around Baker. The lake trout come from Lake Superior, the rainbow variety from Manchester, Ia., and the brook trout from Leadville, Colo. The eggs were sent to the hatchery some time ago, and the trout were subsequently hatched.

Klamath river fishing at and about Klamath Hot Springs has been at its best recently. Al. Cumming has sent down to friends in this city several boxes of splendid trout. The fish were in fine condition and ran from 24 inches down to 6 inches in length. The salmon flies have made their appearance on the river and the fish are feasting upon them. Within a week or so these flies will disappear, and then Shovel creek will be a charmed resort for the angler.

Pieta creek should make it worth while for a trip about this time. The angler can proceed to Hopland, where he can meet Mr. Thos. B. Crawford (by appointment). Crawford will take two or four people to his place about three and a half miles away, where good accommodations over night can be had. In the morning it is but a stone's throw to the creek. The angler will find Pieta creek clear, cold and about low enough now. Near Crawford's place, one can get into the creek and then fish up stream for a while, turning about, or at the start if one so desires, the course is down the beautiful stream, through a gorge the banks of which the angler can not surmount. His course is down stream and in the stream for about three and a half miles until the mouth of the creek is reached at the station, which can be easily reached in time for the afternoon down train between 2 and 3 o'clock, enabling the fisherman to reach the city again in early time.

The wading down stream is not arduous and the fishing good; the trout are of good size and will take any grey fly; the grizzly king and grey hackle seem to be the most effective lures.

James Maynard, Jr., Peter McRae and Edw. Schultz two weeks ago tried Pieta creek and had a day's good fly fishing and a nice lot of excellent fish in their baskets when they returned home.

The many streams of Santa Clara and Santa Cruz counties are now almost at their best for fly fishing and should not be overlooked by the angler. The San Lorenzo and Boulder creek are credited with chances for angling at present that should not be disregarded.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

### The Branding Season Is On.

The spring rodeo is in progress on the cattle ranges in the Livermore Mountains, says the *Livermore Herald*. The cattle men are gathered at present at the Hayes place. Next week they will be on the R. F. Morrow range in the Santa Ysabel Valley. Other prominent cattle men, who have ranges in that section are J. L. Olgier, C. D. Beverson, F. Hubbard, P. Gerber, F. A. Hyde and J. Roggi. The number of small owners is not as great as in former years, but there will be between twenty-five and thirty-five riders congregated during the rodeo, which will last about two weeks.

Feed has been rather poor on the mountain ranges this spring owing to the absence of the usual April and May showers. The cattle have not suffered, but the sparse vegetation seems to contain very little substance, and many of the cattle men, especially in the higher mountain districts, will be compelled to carry their cattle over and very few will be marketed this year.

A curious evolution is taking place on the mountain ranges. Much of the land which in former years was devoted to cattle is now pastured by sheep. It is not because the cattle industry is not profitable but because the sheep business is more so. With wool selling at from 16 to 18 cents a pound and spring lambs selling at \$3 each there are few lines of business showing more profit, notwithstanding the chances taken.

### Liquid Manure.

There is no fertilizer that plants will respond to more speedily than liquid manure. This is especially true in times of drought, as when manure or other fertilizer is applied in dry weather it is not washed down and absorbed by the roots in season to benefit the crop. While it will not probably be found practical to apply this plant food to large fields, garden crops can be treated with it to very good advantage. All kinds of melons, cucumbers, pumpkins, squashes and other vine plants will show their appreciation of the application immediately after being treated. Cabbages, cauliflowers and tomatoes will increase in vigor and improve in fruitfulness by the use of this fertilizer. The method usually followed in making liquid manure is to prepare a leach like the old fashioned ash hopper which was used for making lye for soap. Fill the hopper full of horse manure and pack it down solid. Pour on water until it begins to run out at the bottom of the hopper. Have a bucket to catch the drainings in, and as it fills pour into a barrel for use as wanted. When applying it take a bucketful and a half-pint tin cup and pour a cupful around each plant. The next day go over the ground and break up the crust that will have formed where the liquid is applied. In very dry weather the feeding of the plants with this manure may be done twice a week, and it will be found that they will grow, despite unfavorable conditions.

The calf should be taken away from its mother by the third day, or earlier. The calf should have its mother's milk for about two weeks. The proper amount to feed a calf the first two or three weeks is about five or six quarts per day, and no more can be given without danger of indigestion. As the calf grows older it will take more, but never should have more than eight or nine quarts per day. The milk must be fed always at about blood heat. Cold milk will almost always cause scours if fed to a young calf. When the calf is about three weeks old the milk ration is gradually changed to skimmilk, using about a week to make the change.

### Mules Will Be in Demand.

A message recently published by the press states that the British Government has decided that the American mule is needed to rehabilitate the Transvaal and Orange River Colonies in South Africa. It is stated that the total number of mules required is 60,000 and the price is to be \$166.66 or around £35 sterling per head. This means a total payment of \$10,000,000 for the mules. The animals are to be contracted for in "lots to suit" the requirements of the authorities in South Africa and will be shipped about 1000 at a time from New Orleans after inoculation. It will be recalled that during the Boer war the United Kingdom maintained a large establishment at Lathrop, Mo., where horses and mules were inoculated and it is considered probable that the same premises will be utilized again. It was found that the danger of death during acclimation was greatly lessened when the horses and mules were inoculated before shipment. From the statement of price it would appear that the intention is to purchase good big sturdy mules that will be able to do a lot of work in the subduing of the ground. Agriculturally speaking the British South African Colonies are possessed of great possibilities and with American mules to do the hardest of the work it should not be long before an exportable surplus of grain and meat will be forthcoming. Meantime continued prosperity for the American mule breeder seems clearly in sight.—*Breeders Gazette*.

### Uses for Coal Oil.

Coal oil, which is always at hand when needed, is an invaluable article in the stable, garden and many other places on the farm, but it is of the greatest benefit in the poultry houses. When mixed with lard and applied to fowls afflicted with scaly leg it is a specific and will invariably result in a cure. Sprayed on the roosts, walls and ceilings of the houses and coops, it will destroy the lice and mites that make life miserable for the flock and render them unfit to return a profit to their owners. By adding one part of olive oil to two parts of kerosene and injecting it into the nose and mouth of fowls suffering from cold, a cure will be affected. These and many other uses can be found for diseases of the flock and as the article is cheap it can be used freely. The lower grades, which sell for a lower price and are not satisfactory as an illuminant, will be found fully as good for poultry-yard uses as the refined article.

The difference in the health of hogs pastured on alfalfa and those that have been kept in feed lots and fed grain and dry feeds is well understood by every man in the business and particularly so with regard to young pigs. Sucklings that have alfalfa-fed mothers are far more rugged and healthy than those that trace their ancestral dam to the pigsty. Sows that forage on alfalfa raise lusty, hearty pigs that seldom fall victims to cholera, while the mothers kept on other feeds and not permitted the freedom of the alfalfa fields are generally inclined to become over-heated and sickly. Then too our cool nights prevent that oiliness of fat and flabbiness of flesh so common to hogs in climates where warm nights prevail.

In a recent comparative test between Scotch and American Ayrshires, the Scotch averaged one pound more of milk a day, but the Americans excelled in butter yield, the average being 2.16 pounds daily.

Don't wet the hands while milking if you wished to be classed with cleanly people.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

### Holsteins are Highly Valued.

The prices of Holsteins of the best types are reaching high water mark in the East according to a recent reported auction sale held at Lake Mills near Milwaukee, Wis., where a portion of the McGeech herd was disposed of at auction.

54 females sold for \$12,510, an average of \$231.13 bulls sold for \$2,035, an average of 166.67 head sold for \$14,545, an average of \$217.

One three year old heifer sold for \$1400. There was but a slight demand for the very young bulls and many of the cows were over six years of age and while good animals, as a rule the best herdsmen are averse to paying a long price for cows of that age.

A feature of the sale was the sale for \$900 of a six year old bull, an age at which bulls are usually discarded.

Another largesale of Holsteins will take place in Syracuse on the 4th of this month and on July 15th, some champions of the band will be sold, when it is confidently expected that all auction prices of late years will be eclipsed.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

Soy beans make a good crop for producing hog feed. A very early kind of corn can be planted with soy beans and the hogs turned into pasture when the beans are just ripening their first buds. The early varieties of corn succeed best and with soy beans will help to give an assortment of feed. The greater variety of feeds we have the better, especially for keeping brood sows in good health. Soy beans, cow peas and alfalfa are of great value for this purpose.

### FOR SALE—\$5000

THE GRANDLY BRED STALLION

BY MACK

Sired by McKinney 2:11½, dam By By Nutwood, is offered for sale at the above figure. He is a full brother to Marengo King 2:29½. Address H. LEARON SMITH, 320 Bush St., San Francisco.

### Irrigation and Cultivation.

At the late State Convention of Fruit Growers at Los Angeles J. H. Reed of Riverside read a paper on "Irrigation and Cultivation" of which the following is a part:

As I am taking the subject more directly under the title of irrigation and cultivation, the subject is now generally adopted by our most successful orchardists are so familiar, I will call your attention to but two or three practices which seem to me most important. The first in importance connected with irrigation, in my estimation, is the placing of the irrigating water at once as far from the surface and as near the root bed as possible, by furrows as deep as can be made without disturbing leading roots. Though the marked benefit from this deep furrowing has been demonstrated for several years, the practice has made but slow headway among average orchardists.

You will yet see more furrows three and four inches deep than six and eight inches, as they should be. To secure really deep furrowing requires first, a full appreciation of its importance; next, a suitable tool and persistence in its use. It is difficult to make a uniform six or eight inch furrow with a three shovel furrower, especially if the ground has not been kept thoroughly and well cultivated. It is usually better to take the additional time and use two shovels, and they should be of the best form and in good condition. Too much stress cannot be put on the importance of securing deep furrows at any cost. Where they have been used continuously for a considerable time with suitable application of water, followed by proper cultivation, the so-called irrigating hardpan, so much discussed, has disappeared and there is no longer excuse for that sharp cutting sub-soil implement that has done so much mischief.

Another modern process coming into quite general use, in our valley at least, is covering the irrigating furrows soon after the water is taken off and before the ground is fit for cultivation. With deep furrows this is easily done with any implement that will pull in the shoulders of the furrows, without firming the moist ground. An upright plank with a wide strip of strap-iron in front, at bottom, projecting a little below the wood, with sharp steel spikes thickly set in the wood, extending a couple of inches below the irons, drawn lengthwise of the furrows, serves a good purpose. It covers the bottom of the furrows with fine earth; (it is not necessary to fill the furrows and the steel teeth fines the surface between the furrows enough to stop evaporation which otherwise goes on so rapidly before the ground is fit to cultivate. I dwell upon this simple device because, after several years' use, I deem it really the most important process, next to deep furrowing, connected with irrigation. In our own experience we consider that it makes a saving of from 15 to 20 per cent of the water got into the ground, over the old way of allowing the excessive evaporation to go on till the soil is fit to cultivate. A heavy implement that will firm the ground should not be used.

I should have stated before that the methods of handling the soil I have discussed apply especially to clay, granite and other of the heavier soils. In light, sandy or gravel soils, handling and irrigating are quite different problems, which I cannot now discuss.

After all that has been said and written and especially after the marked results that more than bear out all that its advocates claim, I am quite ashamed to speak of deep general cultivation between irrigations. Besides, to argue it before such an audience as this is like the preacher scolding the absentees of a rainy Sunday morning, over the heads of the faithful few present.

But the immense loss constantly occasioned by the lack of it urges its being practiced in season and out of season. I

cannot enforce the importance of this modern practice better than by an object lesson we now have at Riverside. Our citrus orchards, for the most part, are small and generally managed by the owners. There is one large exception. A dozen years ago a Trust Company developed several thousand acres. A considerable portion of the now bearing orchards on this tract is yet owned and managed by the Company. The ordinary methods of cultivation were followed till something over a year ago, when James Mills, an enterprising orchardist of long experience, was induced to take charge of this department, with large discretionary power. His first and most radical change was to deep tillage. Instead of cultivating three or four inches deep as had been done, he insisted on a depth of from six to eight inches. The result on that great stretch of orchards is simply wonderful.

Of course this marked improvement can not all go to the credit of deep cultivation. It was made possible by deep winter plowing and other important improvements which were introduced.

Without the especially deep, regular, thorough cultivation, all else could not have brought about the radical change now seen in the orchards. It is true that Mr. Mills and other managers of large holdings have the advantage over us, who work only our own small orchards. They can command the tools best adapted to the work and power to handle them. Mr. Mills is now using a simple implement, consisting of a heavy 6 x 6 wooden beam, 8 feet long, to which is attached 15 heavy shanks with narrow shovels, properly hung behind a simple running gear. This is put down from 6 to 8 inches, making a heavy draft for four heavy horses. It is not so easy to accomplish the same kind of work with our lighter teams and lighter implements, but it can be done. It costs more, very considerable more than the old way, but if the additional cost of \$5 to \$10 per acre secures an additional income of from \$25 to \$50 then the additional expense is true economy.

There is one other modern practice which I think is not fully appreciated. The firming the surface, especially of our heavier soils, and keeping it constantly loose by frequent stirring. This is our best means, not only of holding the moisture in the root bed, but of preventing the hardening of the layer immediately above the roots. A simple practice which has come into quite general use in our valley, is to attach a bar of iron, a heavy chain, or piece of hard wood behind the cultivator, properly hung and of sufficient weight to crush the moist clods turned up by the shovels. A slight impact pulverizes the fresh lumps, which a few hours of sun would turn into hard clods. The simple device also levels the surface, reducing evaporation. The frequent use of the file tooth harrow is coming more and more into use to help make and keep the important fine surface blanket of soil.

All this sounds very simple and scarcely worthy of our attention. But the fact is we have come to the point in fruit growing in California where success depends not only on knowing the best methods, but on having all details carried out thoroughly and intelligently. The great need to-day is more intelligent labor in our orchards. The great manufacturer with his perfected automatic machine can use automatic men. There is no automatic labor in the successful orchard. Every orchardist needs to be an expert and have intelligent help. Our schools from the primary to the University have been educating away from the farms till the professions and business offices are crowded with poorly paid young men, while the farm and the orchard must take such material, both for management and details, as can be found, and this is often most crude and inefficient. There are scores of places in our valley to-day waiting for young men properly trained in agriculture, where the compensation would be far above the average earning in our professional and business offices.

### The Government Test.

The official circular of the department of agriculture of the United States government pertaining to its experiments with the butter in last year's national educational tests is at hand, and it is interesting reading.

Among the most interesting points brought out are these:

Our creamery butter, according to these tests, is not heavily laden with moisture though this has been alleged. Indeed the average of the water content was but 11.78. The range was from 7.2 per cent to 17.6. The limit on "renovated" butter is 16 per cent.

Commercial judges are not always able to determine the amount of water butter may contain. Packages marked by the judge "Full of Water" were found to contain but 11 per cent and a little more. Two marked "Worked Too Dry" averaged 12.27 per cent water. These results simply go to prove the impossibility of forming an accurate opinion of the water content of butter alone by the keen observation of a practised eye and to further show, as Professor McKay contends, the value of study of water content of butter and the proper manipulation of it.

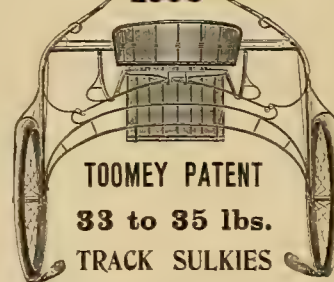

United States butter contains less moisture than Canadian, Danish or Swedish, according to the results of similar experiments conducted in these countries.

When the milk is drawn and immediately cooled to a temperature of about 55 degrees and there held by the aid of ice or cold water, souring may be prevented for a considerable length of time. Some who have experimented with milk say it will remain merchantable as milk for some days if it is thus handled. At all events it will remain in a good condition as long as one is likely to care for it keeping sweet.

## Limonero=3=2:15 3=4.

Reg. No.  
33389

(A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15¼, bred at the Palo Alto Stock Farm, is conceded by all who have seen him to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He has 35 two and three year olds that have never been trained. All of them are handsome, big bays and browns. From their appearance and the predictions of the best judges many of them are sure to be good race horses with every prospect of some star performers. A number of these youngsters are to be seen at the Los Angeles track.

LIMONERO 2:15¼ got his record as a three-year-old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating a field of six of the greatest three-year-olds of that year, including the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity.

LIMONERO 2:15¼ will make the season of 1903 at the

Rockier . . . 2:11	Sonbeam . . . 2:22½		

Will Make the Season of 1903 at

## GREEN MEADOW FARM

Brokenaw Road, 1-4 mile from Santa Clara.

Terms for the Season, \$40. Usual return privileges. Good pasturage at \$4 per month. Best of care taken of mares, but no liability for escape or accidents. Address

**R. I. MOORHEAD,**  
SANTA CLARA, CAL.

# NUSHAGAK

Sire of

**Reg. No. 25939**

Black Horse 15-2½ hands. Foaled 1890.  
BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15¼, Sabina 2:15½, Sabledale (at 2 years) 2:13½, Bullington (at 2 years) 2:20¼, and 36 others in 2:30 list. Dam, Fidelia (trial 2:36 at 2 years), dam of Fidelite 2:28½, dam of Mary Celeste (at 2 years) 2:17¼ by Director, sire of Directum 2:05¼, Direct 2:05¼, Nathan Straus 2:05¼, Direction 2:08¼, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12¼, etc. Third dam by Lancelot, son of McCracken's Blackhawk 767.

NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17½, Majella B (2) 2:29 (trial at 4 years 2:13½), and The Boquet (trial at 3 years) 2:21. His son Aristo (at 3 years) 2:17½ took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stakes.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

**Limited to 40 outside mares, at \$50 the Season,**

with usual return privilege. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed. First-class pasturage for mares, \$3 per month; no barbed wire. Address

## WALNUT GROVE STOCK FARM,

Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morhead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

# Guy McKinney

REGISTERED No. 37625  
Season of 1903 at

## LINDEN, SAN JOAQUIN CO.

Saturdays at Higginbotham's Stables, Stockton.

**FEE \$30 FOR THE SEASON.**

GUY MCKINNEY is a beautiful black, 16 hands high, and weighs 1300 pounds, a model of symmetry, handsome head and neck, short back, the best of legs and feet, good disposition and great intelligence. He is a perfect gaited trotter, and with very little handling showed a 2:30 gait. In his blood lines are represented the greatest strains of the American trotter, and the greatest producers of early and extreme speed. Good pasturage at \$1.50 per month. Every precaution taken to prevent accidents or escapes, but no liability assumed. All bills to be settled before mares are removed. For further particulars address

**D. BRYSON, Linden, Cal.**

# THE STANDARD-BRED TROTTERING STALLION

# BOODLE Jr.

By BOODLE 2:12¼, sire of Ethel Downs 2:10, Thompson 2:14¼, and 4 others in 2:30 and better. He by Stranger, sire of 33 in 2:30.

Dam NINA B by Electoneer, sire of Arlon 2:07¾, Sunol 2:08¼, Palo 2:08¼, and 164 more in 2:30 list.

BOODLE Jr. is one of the best bred, best looking and best stallions on the Pacific Coast. He will make the Season of 1903 at

## J. D. CARR'S GABILAN RANCH, Six Miles East of Salinas

Fee \$25 for the season, payable at end of season, or \$15 for single service, payable at time of service, otherwise will be considered at season rates. Any mare entered for the season and paid for will be granted the usual return privileges if proven to be not in foal provided that next year the owner of mare still owns her and J. D. Carr still owns the horse. Good pasturage at \$3 per month, but no responsibility assumed for accidents. Season open now, and will close August first 1903.

BOODLE Jr. is a sure foal getter, his colts are all uniform, and of good color, and show fine speed and action. He is 16 hands high and weighs 1300 pounds, is of a rich mahogany bay.

Apply to

**J. D. CARR, or JOHN GARSIDE, at Gabilan Ranch.**

# SEYMOUR WILKES

REG. No. 0232.  
Race Record 2:08 1-2

## The Fastest Son of Guy Wilkes

Will make the Season of 1903 at

## Lakeville, Sonoma Co., Cal.

SEYMOUR WILKES earned his record in a hard fought race and was a game race horse. The oldest of his get are six-year-olds, and no horse in California can show a greater proportion of large, handsome, strongly built and well-boned colts. They all look alike and in nearly every instance are square trotters. The only one that has been trained is Joe Eviston (3) 2:22 in 1901.

SEYMOUR WILKES is by Guy Wilkes, his dam Early Bird by Playmail; second dam by Odd Fellow, third dam by a son of Williamson's Belmont, fourth dam by Black Hawk 767. He weighs 1200 pounds, stands 16 hands high and is one of the most symmetrical horses in California. Several of his get are in San Francisco and will be shown to prospective breeders with pleasure.

**Terms for the Season \$30. \$50 TO INSURE.** Mares can be shipped direct to ranch by steamer Gold. Pasturage \$3 per month. For further particulars apply to THOS. ROCHE, Lakeville, Sonoma Co., or J. W. GREGORY, St. George Stables 408 Bush street, San Francisco.

# BALLISTITE

The Standard Dense Powder of the World.

STILL LEADS AT THE TRAPS OR IN THE FIELD.

Ballistite wins from the limit marks in distance handicaps, at either live birds or flying targets, as it always gives the highest velocities with the closest and most even patterns at all ranges. Ballistite is absolutely unvarying in results being waterproof, smokeless, odorless, without residue, pressures lower than black powder, unaffected by age or climatic changes, and never pits, rusts or corrodes the barrels. Ballistite is sold with above guarantee.

Take No One's Word. Try It for Yourself.

**J. H. LAU & CO.** 75 CHAMBERS ST., NEW YORK CITY

# BALLISTITE

The Standard Dense Powder of the World.

## CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES AND DRIES IN quickly and DOES NOT GUM AND FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth--ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed.

It PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS a TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG--A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CURE for THRUSH and SCRATCHES.

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:--Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2½-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gail Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

**JAS. B. CAMPBELL & CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.**

## RIVERSIDE HERD REGISTERED HOLSTEIN FRIESIANS

Comprises the representatives of the best families of this famous breed. The home of ROMEO AAGGIE AOME, who has an official seven-day record of 26 lbs. 11 ozs. butter, FIDESSA, who made in seven days official record over 25 lbs. butter, and many other large producers.

For further particulars and Entry Blanks address

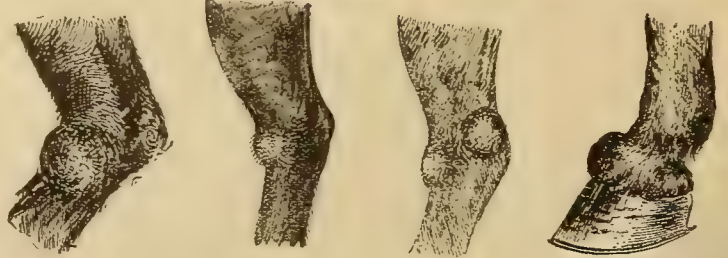

**THOMAS SMITH, Manager, VALLEJO, CAL.**

## "SAVE-THE-HORSE"

TRADE MARK

### SPAVIN CURE

POSITIVELY AND PERMANENTLY CURES

**BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE,  
CURB, SPLINT, CAPPED HOCK, SHOE BOIL, WIND  
(except Low Ringbone)  
PUFF, WEAK AND SPRAINED TENDONS, AND ALL LAMENESS.**

FROM OWNER OF SABLE GREAT (2) 2:22½

RIEGELSVILLE, PA., May 18, 1903

I used "Save-the-Horse" on a very valuable filly that was turned out last spring and while run-  
ning slipped and sprung a spavin. At the suggestion of my veterinarian, I blistered her twice with-  
out any improvement. I then procured "Save-the-Horse" and am able to report an entire cure. The  
filly goes without the slightest lameness, not even a hitch or drag being apparent. I believe your  
great remedy is so valuable that no stable should be without it.

LEE S. CLYMER,

Prop Durham Knitting Mills, also Sunnyside Dairy and Monroe Stock Farms.

MEMPHIS, TENN

Please send us at once six bottles of "Save-the-Horse" for Mr. Ben White, of the Village Stock  
Farm, who recommends it highly.

W. S. BRUCE & CO.,  
Horse Goods Supply House.

WATERBURY, CONN., May 17, 1903.

I have used your "Save-the-Horse" and recommend it, and you may send me six bottles C. O. D.  
I can refer you to Mr. Joslin, of Joslin & Allen, and to A. F. Hinchey, both of Waterbury and friends  
of mine who have used it and who will give you testimonials. I would like to take the agency for  
this section. Please let me hear from you.

H. B. LOUCKS,  
Boarding, Sale and Livery Stable.

CUBA, N. Y.

I had a big four-year-old horse that was very lame from a bad bone spavin. I tried several reme-  
dies without success. I used one bottle of "Save-the-Horse" and worked the horse right along, and  
he is perfectly sound and has been so for some time.

E. BROWN.

"SAVE-THE-HORSE" CURES WITHOUT SCAR, BLEMISH OR LOSS OF HAIR.

"Save-the-Horse" can be applied at any time, anywhere, any place, and in all conditions and  
extremes of weather. And no matter what the age, condition or development of the case or previous  
failures in treating, its concentrated, penetrating, absorbing power is unfailing.

\$5 PER BOTTLE.

Written guarantee with every bottle given under our seal and signature, constructed solely to  
satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest of cases.

If you have a case different than described in our booklet or advertising we will advise you  
frankly as to the possibility of the remedy effecting a cure. Give explicit particulars. Give the  
veterinarian's diagnosis, if he is competent. Inform us fully as to the age, development, location or  
swellings, lameness, action and previous treatment. Copy of booklet and guarantee sent upon appli-  
cation. \$5 a bottle at all druggists and dealers, or sent express prepaid.

## About Veterinary Pixine!!

EMERY, KY., April 9, 1903.

Gentlemen: I feel it my duty to tell you what Veterinary Pixine did for a horse of mine. He  
was cut between the forelegs with a knife three inches deep and two inches long, which every moment  
would gap open. I used several different kinds of remedies without success, even to having some  
stitches taken. Nothing did any good and it kept swelling and became feverish. I almost gave up  
hopes of his getting well. In the columns of the *Ohio Farmer* I observed your ad., and, as it was the  
last chance, I purchased a box at the druggist's and commenced using it as directed, and before the  
box was used up the cut was entirely well. I intend to keep a supply on hand for emergency cases, if  
I have to pay a dollar a box for it. Please accept my thanks for the good I have received from its  
use, and, if you choose, you can use my name and testimony.

W. S. CAMPBELL, Emery, Ky.  
Rural Route No. 2.

## VETERINARY PIXINE

This penetrating, stimulating, soothing, absorbing, antiseptic healing ointment heals from  
beneath the surface by disinfecting the parts, subduing inflammation and stimulating healthy gran-  
ulations, not by drying and scabbing, and stimulates growth of hair, natural color.

Makes quick, clean, healthy cure, heals stinging, burning, chronic collar and saddle galls, hopple  
chafes, abscesses, inflammatory sores and all skin disease. In cases of emergency it is invaluable.  
It penetrates, stimulates, soothes and heals while horse works. Money refunded if it fails.

PRICE—2-oz. Box, 25c.; 8-oz. Box, 50c.; 5-lb. Package, \$4.

At all druggists and dealers or sent prepaid.

San Francisco, Saturday, June 13, 1903.

LOU DILLON is to be especially prepared for an effort against the world's record this fall is the announcement made by her new owner, Mr. C. K. G. Billings of Chicago. If she does not lower the record of Cresceus which now stands at 2:02½, Mr. Billings is confident she can reduce that made by sweet little Alix, which now stands at 2:03½ and is the world's record for mares. It will be a bright feather in the cap of California if Lou Dillon accomplishes the task set for her, as she is distinctly a California production. Her sire Sidney Dillon was bred in this State as were his sire and dam before him. Her dam Lou Milton is also a native of California, being by Milton Medium 4782 out of Fly, a fast road mare also bred here. Lou Dillon has no easy task before her to trot a mile faster than the best ever made by Cresceus or Alix, but there will be several of her admirers here on this Coast who will not be surprised if she does the trick. There is no doubt in Millard Sanders' mind that she can trot in 2:03 if all conditions of track, weather and condition are good, and he knows the little mare better than anybody. Nothing would please us more and nothing would do the breeding interests of the Coast more substantial benefit than for Lou Dillon to secure the world's record. This State has produced many champions; there is no reason why it should not produce many more.

THE SANTA ROSA STOCK FARM SALE is near at hand as it will be held on Tuesday, June 23rd, at the Occidental Horse Exchange in this city. Catalogues have been issued and there has not been a sale in years that has created such a demand for these descriptive pamphlets. Mr. Layng has issued a very complete catalogue with 77 horses enumerated, and there are so many royally bred animals therein that it is impossible to particularize about them in a newspaper article. As Mr. Layng says in his announcement the late Henry Pierce "never spared his money to buy the best. His purse was never closed while there was an opportunity to take from it hundreds—aye, thousands—to purchase the best-bred trotters and broodmares that were for sale. He never purchased an animal whose conformity he did not like, no matter what speed it had shown. As a judge of a horse, he had few if any equals on the Coast, and the collection of splendid trotting stock catalogued herein will attest his rare judgment. He bred horses intelligently, and always with an object in view, and that was, to get the very best. Just when his work in this line was attracting the attention of the horsemen of the United States to his successful efforts, the hand of death was laid upon him." It is unfortunate for California, as a State, that the great breeding stud built up by Henry Pierce is to be dispersed, but it is a fortunate thing for individual breeders who will thus have an opportunity to secure at their own prices their pick of the choice animals that have made the farm one of the most famous in America. If you have not received a catalogue send for one at once.

EVERYTHING POINTS to a highly successful harness meeting at Petaluma in August when the Breeders' Association opens the gates of the track at Kenilworth Park in that city. The entries to the four stakes closed are so numerous that large fields are certain and all the best horses of the respective classes in training in California are among them. On July 4th a large number of additional stakes for this meeting will close. They are fully advertised in our business columns this week and every class is provided for. The Petaluma track is a safe and reasonably fast track at all times, but for the Breeders' meeting it will be put in such condition that it will be the best track the harness horses have raced over for years in California. The entry list for the stakes that close July 1st should be very large.

## The Stanford Stakes.

Evidently this stake for trotting three year olds is maintaining its popularity with the breeders and owners. For the stake to be trotted this year fourth payment has been made on twenty-two colts and fillies which should insure a larger field of starters than ever, as the race comes off within three months and a field of a dozen or more should score for the word.

Third payment has also been made on 52 two year olds that are entered in this stake to be trotted next year when they are three years of age, and for the stake of 1905, entrance for which close on June 1st, there are eighty-three yearlings nominated. The lists of those on which payments have been made in the stakes of 1903 and 1904 are as follows:

## STANFORD STAKE OF 1903—FOURTH PAYMENTS.

Alex Brown, b f by Arthur B-Nosegay.  
J. D. Carr, b f Queen Mab by Nutwood Wilkes-Nina B.  
T. C. Cabney, b c Grecco by McKinney-Alien.  
B. Davis, blk f Dixie S by Zolock-Gypsy.  
C. A. Durfee, blk f Raggy by McKinney-Babe.  
B. Erkenbrecker, b c Electro Mc by McKinney-dam by Electway; blk f California Poppy by McKinney-Galette Wilkes.  
G. W. Ford, ch c by Neernut-Florence C.  
R. P. M. Greeley, ch f Hester Diablo by Diablo-Winnie Wilkes.  
P. W. Hodges, b c Owyne by Owyhee-Inex.  
La Sista Ranch, b c Search Me by Searchlight-Wanda.  
J. B. Richardson, b c Swift B by Stam B-Swift Bird.  
Santa Rosa Stock Farm, b f by Sidney Dillon-Lilly Stanly; ch c by Sidney Dillon-Silver Eye; b f by Sidney Dillon-Pansy; b c by Sidney Dillon-Oakley Russell; b c by L W Russell-Pacita; b f by On Stanley-By Guy.

C. A. Schweizer, ch g Acme by Dexter Wood-Zadie McGregor.  
L. H. Todhunter, b c The Jester by Stam B-The Silver Bell.  
G. W. Kingsbury, b g D E Knight by Lynmont-Daisy A.  
Valencia Stock Farm, blk c Amado by Direct Heir-La Belle.

## STANFORD STAKE OF 1904—THIRD PAYMENTS.

C. F. Bunch, b c Marconi by Boodle-Much Better.  
J. W. Bonney, b c Bonney Boodle by Boodle-Twenty third.  
Alex Brown, ch c by Prince Ansel-Nosegay.  
T. W. Barstow, b f True Heart by Nearest-Camma.  
I. L. Borden, b c Cresco Wilkes by Nutwood Wilkes-Allie Cresco.  
J. D. Carr, ch f Mamie D, by Nutwood Wilkes-Lildine; ch f Mercedes by Dictatus-Nina D.  
W. G. Durfee & Co, blk c Patrician by McKinney-Belle; b c by McKinney-Lenor.  
C. A. Durfee, blk c Almaden by Direct-Rose McKinney; b c Johnny McKenzie by McKinney-Babe.  
G. W. Ford, b c by Neernut-Dewdrop.  
E. A. Gammon, b f Easter Direct by Direct-Cleo G.  
J. W. Gardner, b f by McKinney-Black Swan.  
J. J. Garcia, b c Peter Zenz by Zombro-Rosie O'Grady.  
E. P. Heald, blk c Count Hannibal by McKinney-Daphne.  
J. B. Iverson, ch f Signa by Dictatus-Wilhelmine; b g Signa by Dictatus-Ivoneer.  
Geo. A. Kelly, b c Bonnie McK by McKinney-Bon-saline; b c Bird Man by Antrim-Birdie.  
J. D. Kalar, b f Maggie Glynn by Robin-Lillian Wilkes.  
La Sista Ranch, b m Wanda II by McKinney-Wanda.  
W. S. Mabon, b f Geraldine by Zombro-Gypsy Girl.  
C. J. Morgan, b f Neergard by Neernut-Alcola.  
C. W. Main, b f Lady Luzelle by Zombro-Kate Hamilton.  
W. Mastin, b c Marvin Wilkes by Don Marvin-Nora S.  
J. W. Minturn, b g Ramon by Tiburon-Ramona; b g Strathcara by Strathway-Carma.  
G. Ramage, b f by Welcome-Abyssinia.  
John Rowen, b f Bell by Monochrome-Mission Bell.  
P. E. Smith, b f Daisy Zolock by Zolock-Grace Conifer.  
Thos. Smith, b c by Mambrino Chief Jr.-Honor; b c by McKinney-Daisy S.  
W. L. Spoor, b f Neerst by Neernut-Mabel McKinney.  
Rosedale Stock Farm, b f by St Whips-Fila D.  
Santa Rosa Stock Farm, b c by McKinney-Biscara; b f by On Stanley-Silver Eye; b c by McKinney-Stamboulita; b f by McKinney-By By; b c by McKinney-Carlotta Wilkes; b f by McKinney-By Guy; b c by McKinney-Rose Russell; b f by McKinney-Adioo; b c by Sidney Dillon-Lilly Stanley; b c by Sidney Dillon-Madonna; b c by Sidney Dillon-Ann Trieks; b f by Sidney Dillon-Oakley Russell; b f by L W Russell-Captive; b f by L W Russell-Helen Mc; ch c by L W Russell-Ceta; ch c by L W Russell-Maud.

W. R. Wynn, b f Grace Wilkes by Nutwood Wilkes-Grace Kaiser.

## STANFORD STAKES OF 1905.

The list of entries to this stake was received too late for publication in this issue, but will appear in full next week. Those who made nominations are the following: C. A. Arvedson, T. W. Barstow, Mrs. S. Barstow, J. H. Bohon, I. L. Borden, Alex Brown, J. D. Carr, John A. Cole, S. Comisto, F. Crawford, M. Carter, H. H. Dennison, C. A. Durfee, W. G. Durfee, J. E. Fairchild, G. W. Ford, E. C. Farnum, F. J. Fallman, E. A. Gammon, J. W. Gardner, C. L. Griffith, W. E. Greene, E. P. Heald, S. H. Hoy, J. B. Iverson,

J. A. Jones, G. W. Kingsbury, James Kirkman, J. C. Kirkpatrick, S. W. Lockett, P. W. Lee, P. W. Lawson, W. Masten, A. J. Molera, W. H. Mendenhall, Mrs. John Norton, F. J. O'Brien, Mrs. S. Runyon, Fred Raschen, Rosedale Stock Farm, Ed Sewell, Thomas Smith, J. R. Sawyer, A. Solano, George Trank, L. H. Todhunter, Valencia Stock Farm, Vendome Stock Farm, George L. Warlow, H. C. Westerfeldt, A. G. Wilson, G. Wempe, M. Walsh, I. W. Haslett.

## \$1000 Match at Fresno.

A match for \$1000 was decided at Fresno last Wednesday at a matinee given by the Fresno Driving Club. The race was between the bay pacer George 2:23½ by Loeber, a son of Whippleton, and the chestnut pacer Graceful George 2:23. Secretary A. J. Hudson of the Driving Club estimated that 2000 people were present on the occasion. The Fresno Republican gives the following account of the day's sport:

The great attraction, of course, was the match race for \$1000 a side between E. J. Boust's Graceful George and L. Bachant's George, over which there has been so much talk since the last matinee, when the match was made. As a race, however, the event was marred by the fact that an accident happened to Graceful George in the first heat that handicapped him practically out of the going. The track had been cleared and there was nothing to interfere with the competitors when the bell rang for the first event on the card. The track was fast and in every way there was promise of a great race.

To a good start, the two got away at a steady, even gait that indicated fast time for the heat, when at the first turn, Graceful George was observed to be in trouble. It turned out to be pretty serious, too. In making the turn he broke his hobbles, cutting his right foreleg and twisting the shoes on both hind hoofs. It was necessary to reshoe him and this took some time, of course, so that the second heat had to be somewhat delayed. The new shoes did not help his speed any, to be sure, and though his driver, Mr. Boust, did his best, the accident was too much for Mr. Boust's horse. The remaining two heats were won, like the first, by Mr. Bachant with George. The time in the three heats was: 2:19½, 2:22½ and 2:26½. Secretary Hudson paid the stakes over to Louis Bachant last night.

While this was the main event, both of the other events on the card for the day were interesting. The second event was the race between Oceana Belle by Killarney, driven by J. R. McKay, and Little Willie driven by Al McNeill. Oceana Belle proved herself to be all right. Mr. McKay's skillful driving got all there was out of the mare and she won the event in two straight heats. Time—2:22, 2:30.

The remaining event was between The Gentile, driven by E. C. Buchanan, and Selda, driven by T. E. Stockdale. Selda won in two straight heats. Time—2:37, 2:37½.

The officers of the day were: Presiding judge, T. C. White; associates—M. L. Woy, J. S. Prior; timers—Lee Blasingame, R. B. Parker, Geo. Warlow; clerk of the course, A. J. Hudson.

## Stallion Stake has 93 Entries.

The Special Harness Stallion Stake, inaugurated by the California State Agricultural Society, which is for the get of stallions nominated and which closed last year with 38 stallions named, has not met with the success it deserved when its value is considered. On June 1st entries closed for foals of last year, now yearlings, and but 93 colts and fillies have been named. It will be a valuable stake, however, as it is already worth \$2605 and should easily be worth \$5000 when it is contested for by the three year olds of 1905. The complete list of entries was received too late for publication in this issue but will appear in full next week. Those who have made entries in the stake are: John Arnett, J. H. Bohon, Alex Brown, Mrs. S. V. Barstow, T. W. Barstow, J. T. Byrne, Sam Bemmerly, John A. Cole, L. M. Clark, Cone Ranch Company, W. S. Curtis, S. Comisto, J. D. Carr, Ben Davis, C. A. Durfee, W. G. Durfee, M. E. Delano, E. D. Dudley, J. E. Fairchild, E. C. Farnum, T. J. Fallman, F. N. Frary, George W. Ford, E. A. Gammon, C. L. Griffith, J. W. Gardner, Mrs. B. Griffin, W. S. Harkey, R. Hogaboom, J. W. Haile, S. N. Lockett, W. H. Lumsden, C. T. Laugenour, William Morgan, A. H. Martin, A. J. Molera, J. I. Morehouse, L. A. Morris, W. H. Mendenhall, W. E. Meek, McAleer, D. E. McDougall, F. J. O'Brien, T. A. Perrin, W. Parsons, R. D. Robinson, F. Raschen, Rosedale Stock Farm, John Rowen, F. A. Ramsey, W. L. Spoor, Thomas Smith, M. M. Strong, William Sincock, L. H. Todhunter, C. O. Thorquist, J. C. Kirkpatrick, Vendome Stock Farm, W. W. Vickroy, George L. Warlow, J. C. Woodrow, P. J. Williams, C. H. Williams, J. C. Wallace and W. H. York.

## JOTTINGS.

SUNOL HAS ANOTHER FOAL at Shulthurst Farm, Rochester, New York, and it is to be hoped that Mr. Shults, who has been one of the most liberal as well as one of the most unfortunate of breeders, will be able to raise it to maturity. Sunol has had two foals previous to this one, but both died, and the mare who holds the record of 2:08 1/2 on a kite track for mares hitched to high wheel sulky will not leave a very numerous progeny even with the best of luck hereafter as she is now in her eighteenth year. The foal is by Axworthy 2:15 1/2, a son of the once champion Axtell. The dam of Axworthy is Marguerite (dam also of Darlington 2:16) by Kentucky Prince. Axworthy is owned by Mr. Shults and is one of the most highly thought of young sires in the country. He is eleven years old and entered the Great Table for the first time last year, with nine standard performers to his credit. On breeding alone the foal ought to trot or pace fast, but whether it will or not can only be demonstrated when it is harnessed and worked.

Geo. H. Fox, proprietor of the Mokelumne Stock Farm received a letter the other day which conveyed the joyful news that his mare Silpan, daughter of Silver Bow 2:16 and Kitty Fox by Pancoast, foaled on Saturday, May 30th, a bay filly by the champion Cresceus 2:02 1/2. It is perfectly safe to bet that Mr. Fox hugs the belief that he owns the best bred filly of 1903, and if I owned the youngster I would very likely believe just as he does. The pedigree of Silpan has the names of about as many great broodmares as any filly in the country within five generations, and bred to the champion trotter of the world there is plenty of argument to show that she could not have been mated with any horse that would have made the breeding of the foal any better.

Charlie Durfee is another of the California breeders who is pretty confident that he owns the best bred colt in America. It is now a yearling and is by McKinney out of the great broodmare Elsie by Gen. Benton. We must all acknowledge that for siring extreme speed in quantity McKinney stands as the head as he has no less than 22 that have records of 2:15 or better and he has accomplished this at the age of fifteen years. Old Elsie is the dam of five in the list, has one producing son and two producing daughters. The next dam Elaine 2:20 is the dam of four in the list, and the next dam is old Green Mountain Maid, dam of nine with standard records, four producing sons including Electioneer, while her daughters have produced ten standard performers. A tabulation of the pedigree of Durfee's colt will show about as much high class producing blood as can be found in the veins of any of the yearlings that are owned on this Coast or anywhere else and in addition the youngster is a sure trotter.

Rey Direct is being well patronized in his new home at Mansfield, Ohio, and if he does not prove to be the best producing son of Direct many California horsemen will be disappointed. There has never been a stallion on this coast that sired a more uniform lot of colts, and the way they show speed as soon as harnessed is evidence that he is a speed sire *par excellence*. Among the mares already bred to him at Mansfield, since he reached there are the following: Beulah 2:20 1/2 by Lacrosse, dam by Tremont; Alvina by Tom Corwin and the dam of Carrie H. 2:13 1/2 and others; Lady Herd 2:24 1/2 by Goff's Mohawk, dam by Scott's Hiatoga; Mable J. 2:21 1/2 by Dick H. 2:18, dam by Blue Bull 70; Emma Wilkes 2:12 1/2 by Adrian Wilkes, dam Athletic by Athlete 715; Marcella, a full sister to Marwood 2:30 by Atwood, dam Laura Brander by Glendale; Nina K. 2:21 1/2, and others just as well bred.

Ben Liebes, the big stallion by McKinney 2:11 1/2 out of Belle McGregor by Robert McGregor, second dam Wyoming Belle by Lowe's Pilot, that C. A. Durfee has been training since he was a colt, is now in Ed. Geers' string at Glenville track, Cleveland. Ben Liebes is a big horse and worked a mile in 2:13 1/2 for Durfee as a three year old in 1901. He should get a mark of 2:10 or thereabouts this year if he is at all lucky.

Writing from Memphis "Yarrum" refers to a horse in Ed Geers' string which is doubtless Ben Liebes as I believe he is the only McKinney horse that Geers has in training. Yarrum writes as follows:

Among the horses that have recently benefited by Mr. Lake's shoe is a McKinney trotter in Mr. Geers' stable, that was afflicted with a defect in his front action that caused him to hit one leg just under the knee. As an experiment Mr. Lake's shoe for heel hitters was put on his offending foot with the result that he has never touched his leg or foot since.

Mr. Geers also cured Billy Buck of the same fault and materially improved that horse's gait with a pair of the same style shoes. Many correspondents have asked me to explain the philosophy of the shoe. According to Mr. Lake, and his explanation seems plausible, his shoe reduces concussion, lessens the strain on ankles and tendons, and enables the trainer to regulate a horse's stride and action to a finer degree than he can with any other shoe ever used.

It seems to combine the virtues of the Roberge Center Bearing shoe, the rolling-motion shoe, the square-toed shoe, and the shoe with calks. It enables a horse to break over quickly and at the same time does not allow his foot to slip. At the present writing is looking to me as if fully 90 per cent of the horses in trains can be benefited by some form of this particular horse shoe.

From a letter received last week by James Chesley of this city from her owner, I learn that the mare Brilliantine, known to California race goers of ten years ago as one of the fastest pieces of pacing horseflesh ever seen on our tracks, foaled a dead colt June 2d on the farm of her owner Joseph Kampe, of Newbury, New York, and died a few days later. The colt was by Joe Patchen 2:01 1/2. Mr. Kampe could hardly have been induced to put a price on Brilliantine as she was one of the sweetest dispositioned road drivers anyone ever held the lines over, and he expected a great colt from her mating with the sire of Dan Patch 1:59 1/2. Brilliantine was bred by Sam H. Hoy of Winters, Yolo county, and was by Brilliant out of Smut by Prompter. She took a record of 2:17 1/2 at Chico, August 24, 1893. She was owned for several years by Editor Dinkelspiel of the *Solano Republican*. Brilliantine frequently went to the half mile pole in one minute flat, but she was a difficult mare to rate in a race, and consequently failed to secure a record within ten seconds of her capabilities, could she have been controlled in the first part of the heat. In 1893, she won six straight races. Her record was made that season.

Brilliant, her sire was by Sterling 6223, out of Mischief by Young Tuckaho. The latter a full brother to the great broodmare Fernleaf, dam of five in the list. A trainer who drove Brilliant some, told me that he was one of the fastest horses and at the same time one of the rankest quitters he ever sat behind. His reputation in this respect was doubtless gained because he would do his very best the first half of the mile.

Irv. H. Mulholland, owner of that gamelittle stallion Osito 2:13 1/2, is now the County Treasurer of Inyo county and a regular reader of the BREEDER and SPORTSMAN. Under date of June 1st he writes as follows to a friend in this city:

I notice in the last BREEDER the article by W. W. Mendenhall giving the breeding of Stemwinder and stating the good qualities of Williamson's Belmont blood in trotting pedigrees. I have a filly foal bred as follows: By Hillsdale 2:15, whose third dam was by Williamson's Belmont. The foal's dam is by Osito 2:13 1/2, second dam by Albenton 4023, third dam by Alex Hall, he by Montezuma, a son of Williamson's Belmont, and his dam by Owen Dale, son of Williamson's Belmont; fourth dam by Little Jack by Budd Doble; dam of Little Jack, Lucy Dale by Owen Dale, he by Williamson's Belmont; fifth dam by Emerald, son of Norfolk and Nettie W., the latter by Williamson's Belmont. I owned Alex Hall. He was a blood bay, 16 hands, with the beautiful head and neck of the Belmont family, and without a spot of white. He was never broken to harness but could trot a forty gait under the saddle. This little miss has some great blood in her—Electioneer, Nutwood, McKinney, The Moor, General Benton and Almont, but I esteem her numerous crosses of Belmont as highly as any of them.

The above was not written by Mr. Mulholland for publication but I take the liberty of printing it nevertheless, as the pedigree of his little filly is a most interesting one. I hope she may realize his fondest dreams of speed and producing qualities.

The Columbus races received a big list of entries. In the 2:11 class trot I notice that Julia M. by Zombro, and Black Bart 2:17 1/2 by Robin are among the 19 nominations. In the 2:17 trot there are 22 entries, Prince L. 2:17 1/2 by Escort being among them. The 2:23 trot has no less than 36 horses nominated, the California bred horses Mercury by McKinney and Ellenwood by Wildnut being among them. Of the 23 entries in the 2:19 class pace Captain Derby by Chas. Derby, and Direct L. by Direct are the only California bred horses that are entered. Captain Derby is also named in the 2:24 class pace which has 21 entries. All these purses have a value of \$2000 each.

The entry list received by the Breeders Association for its Petaluma meetings shows that all the California horses will not go to Oregon this year—that is, not until after the August races are over. No less than twenty-two California trotters and pacers have been

entered, however, at the Oregon State Fair meeting which opens September 14th, and our State will be well represented up north this year. California horse owners should consider themselves fortunate to have an opportunity to race for good purses in Oregon, as the action of Governor Pardee has put district fair and harness racing in a deplorable state down here.

Not content with vetoing the appropriation for the district fairs Gov. Pardee seems to be giving the State Agricultural Society no attention whatever as he has failed to fill the vacancies on the Board of Directors and there has not been an official announcement made as yet in regard to the State Fair for this year. Herebefore breeders and exhibitors have received notification much earlier in the year and have begun getting their stock and other exhibits in shape, as it takes time to do these things. But our present Governor seems to be much more interested in "swinging round the circle" than in either the State or district fairs, and things are in a state of "innocuous desuetude," as was once remarked by America's most prominent fisherman.

The newly organized Tanforan Driving Association seems to be meeting with much favor with San Francisco road drivers and admirers of the harness horse, and already has quite a large membership. The rules and by-laws were adopted at a meeting held during the early part of this week and the organization is now well launched on the way to success. As soon as possible regular matinees will be held at the Tanforan track and I believe when the first one is held there will be a big attendance to see how genuine amateur racing is conducted in San Francisco, as there will be no prizes but blue ribbons, no gate charges, and no betting. Such sport will appeal to the best people of this city and the attendance will prove it.

## Trotters and Pacers in Arizona.

A correspondent of the *New York Trotter and Pacer* writes the following interesting gossip from Phoenix, Arizona:

Although not extensive the breeding business here is conducted on an intelligent basis, with the advantage of some of the best bred stock to be found in America.

Mr. J. C. Adams, proprietor of the Adams House at Phoenix, has a small farm on which he is breeding some exceedingly fashionable stock. At the Chicago sale last January he purchased the grandly bred stallion Oh So 2:25 1/2, by Nutwood 2:18 1/2, dam So So 2:17 1/2, by George Wilkes 2:22, to which he will breed his best broodmares this season. He has not very many horses but what there are are exceedingly high class. He owns Lady Rivers, the mother of that wonderful Southern California mare Sweet Marie, whose matinee record, driven by an amateur, is 2:11. She has at her side, foaled within the last month, a very handsome colt which is a full brother of Sweet Marie. He also owns Lenora McKinney, eight years old, who has paced in 2:20 and trotted in better than 2:24, and she is a full sister of Jennie Mack 2:09, and Dr. Book 2:10. She foaled within a month and has a fine colt by On Stanley, with a three year old record of 2:17, a son of Direct 2:05 1/2. He also owns Julia McKinney, sired by Sky Pointer, dam by McKinney, who paced a quarter before she was two years old in 31 seconds, the last eighth in 15 seconds. She has been turned out until within the last two months, and is now four years old. She is 16 1/2 hands high, handsome, and weighs over 1200 pounds. Mr. Adams expects a year from this summer to take her East and race her.

He has quite a number of other standard bred mares, and will breed them all to Oh So, and expects to get some colts that will do to take East and show them what they can raise in Arizona. I believe this is the greatest country to raise trotting horses in that there is in the world—green feed twelve months in the year. Horses never have to be stabled, and a two year old is as fully developed as a three year old would be in the East.

Mr. Adams a few days ago sold to W. C. Green, the millionaire copper king, a two year old stallion by Zombro. His dam is a full sister to Ed. Winship, record 2:15. He is one of the handsomest colts living. Although he is just two years old this month, he is 15 1/2 hands high and weighs 1050 pounds. He also sold a yearling McKinney filly to him, receiving for the two \$3000. Mr. Green in securing these two colts secured two that could get into the show ring in any State in the Union and not be outclassed.

It may interest your Eastern readers to learn of a venture here of Mr. N. W. Hubinger of New Haven, Conn. Mr. Hubinger is a success with trotting and pacing horses, but his greatest success is going to be in a mine which he and some of his friends own in Mexico. They certainly have a good proposition, and if you can cajole Hubinger out of any of the stock it will be a good thing to put in your safe and some day wake up to find that you have made a ten strike, as this mine, in my opinion, will make Mr. Hubinger and all the men interested in it immensely wealthy. It is not in a common class of a prospect hole, but it will be a tremendous mine, and Hubinger will be in a position to buy all the trotting horses he takes a fancy to.

TRAVELER.

## Notes and News.

Vallejo entries close next Monday.

Fresno is in the lead. A match for \$1000 a side was trotted there this week.

Susie J. 2:06½ has entirely recovered from her lameness and is going sound again.

The total amount realized from the Fasig-Tipton Blue Ribbon sale was \$171,000.

Mr. Vance has resigned his position as trainer of J. B. Iverson's trotting horses at Salinas.

Geers' M. & M. candidate, Cole Direct by Direct, trotted in 2:16 before leaving Memphis.

Bell Bird, 1, 2:26½; 2, 2:22, was the fifth foal of Beautiful Bells to die in the last fifteen months.

E. E. Smathers denies that he has purchased Charter Oak Park or that he is contemplating its purchase.

In the Columbus entries to the Grand Circuit meeting the 2:08 class pace received twenty-one nominations.

It is the freely expressed opinion of the Hamlins that Direct Hal 2:04½ will beat the two-minute mark this year.

Ben Kenney has Anzella 2:06½ in his stable. He will start her in a few races and get her ready for the fast wagon events.

The railbirds are saying that Prince Direct 2:07 will be able to trim Direct Hal 2:04½ if they should meet in a race this year.

King V. the horse that won two races at Tanforan on Decoration day and took a record of 2:27 is a full brother to King Cadenza 2:15.

The circuit will open at Vallejo August 13th. Don't forget that entries close on Monday next. There is a good program of races advertised.

R. P. M. Greeley of Oakland claims name of Sukey Mac for his filly by McKinney, dam Winnie Wilkes by Rey Wilkes, foaled May 19, 1903.

Gold Leaf 2:11½, once the champion four year old pacer, is now owned by Fred Beloin, New Britain, Conn., and is in foal to Directly 2:03½.

The trotters to be sold at the Pierce sale will be in this city June 19th, so that prospective buyers may have an opportunity of inspecting them.

A fire at Vallejo race track destroyed several box stalls near the entrance last Monday, but was extinguished before it reached the main line of sheds.

James O'Kane is training four horses at Tanforan. He has Echora Wilkes 2:18½, Al Sandy and a couple of green prospects that will be heard from later on.

Enter your horses at Vallejo. There are two \$1000 purses and the \$300 purses are so arranged that all classes are provided for. Entries close next Monday.

The Petaluma track is said to be in fine shape for training harness horses over at the present time. It will be just about perfect for the Breeders' meeting in August.

A trainload of yearlings was shipped from Rancho del Paso to New York last Tuesday, where they will be sold at auction. There were 200 colts and fillies on the train.

E. R. Lowry has secured the betting privileges of the Detroit Grand Circuit meeting and will put on eight books besides the auctions. He pays \$6600 for the privilege.

June Wilkes, the mare that won the first race at Salt Lake on Decoration day, as published in last week's issue, was bred by W. A. Shippee and is by Dictator Wilkes.

A great many people who have seen her this spring pronounce Imogene 2:11½, Mr. Billings' chestnut daughter of Elyria 2:25½, the handsomest trotting mare in America.

Mendolita, full sister to Idolita 2:09½, has been bred to Direct Hal 2:04½ this year. James Golden, who now owns her, intends training and racing her after she has produced a foal.

The three year old trot which will take place at the Breeder's Petaluma meeting will be one of the most interesting races of the week. There are eleven good three year olds entered.

Leo Bureker of Asti, Sonoma county, owns a very handsome chestnut colt by Kewanna 17149, dam by Atto Rex, and claims the name King Edward for him. The colt is a foal of this year.

Gazelle 2:11½ by Gossiper was bred to Council Chimes 2:07½ last year and was shipped heavy in foal to Indianapolis to be bred to McKinney. She contracted catarrhal fever and lost her foal.

With an average of over sixteen entries for four races the Breeders Association has started out well. The outlook should be encouraging for the other associations that will give harness racing this year.

Endow (2) 2:14½ by Cecilian 2:22, that has never been seen in public since he broke the world's record for two-year-old geldings in 1899, is now in Fred Deviney's stable at the Point Breeze track, Philadelphia.

With Diablo 2:09½ and Zombro 2:11 both at Salem, Oregon, and the twenty two horses that have been entered for the races there by California owners, our State will get quite a lot of advertising up north this year.

The managers of the Kentucky Horse Breeders Association offer \$29,000 in purses for their fixed class events, to be contested at their next annual fall meeting, October 6-17. Eight of these ten races will be best three in five.

It is reported that the well-known horseman, Joe Thayer, Lexington, has refused \$10,000 for his Baron Wilkes stallion, The Bondeman. His dam is the great broodmare Sorrento by Grand Sentinel and is the dam of Jay Hawker 2:14½ and three others.

Joe Cuicello is working the grand looking two year old Cassian by Mendocino at the Tanforan track. Cassian is the property of Mr. James Coffin of this city and is certainly one of the most promising young horses ever bred at Palo Alto farm.

About eighty horses are being worked at the Pleasanton track at the present time and while quarters in 30 seconds are not as numerous as they were before the Eastern shipments were made, there are several horses left that can do the trick and shade it a little.

The great pacer Dan Patch 1:59½ arrived at Cleveland from Minneapolis Monday morning. M. E. McHenry expressed himself as well pleased with the condition of the fast pacer. He is very confident that he will be able to carry off championship honors this year.

The track on which the New Zealand pacer Ribbonwood took his record of 2:09 is a five-furlong affair, and the turns are not thrown up like our American tracks. It is very evident that Ribbonwood is a pretty high class horse, and he would doubtless cut quite a figure in the free-for-all races were he brought to this country.

Millard Sanders worked Lou Dillon three miles at Cleveland one day last week. She worked a mile in 2:10 accompanied by a runner driven by Doc Tanner. She went the mile easy and everyone who saw it was convinced that she could have stepped much faster. Mr. Sanders also worked his green trotter Robizola by Robin a mile in 2:14½, last half in 1:03½.

The value of matinee racing to the trotting horse world is being demonstrated more and more every day. At recent matinees on the speedway crowds witnessed the brushes. It is safe to say that the speedway and matinee racing has done more to educate the public and acquaint it with the trotting horse than all the professional races that were ever held in this vicinity, not excepting the Brighton Beach meeting, that drew thousands to see the great Cresceus-Abbot race.—N. Y. Telegraph.

The City of Toronto is making an interesting departure in horse shows and is holding a novel exhibition in the open air on the afternoon of July 3d. In stead of extending a show over one week it will all be done in one hour. An army of judges will make the awards simultaneously and the judging will not occupy above an hour. Then the whole exhibition will move around the oval and pass in review before his Excellency, the Governor-General of Canada, Lord Minto. It is expected that over 200,000 people will witness this unique horse show.

Experiments to determine the value of clipping work horses have developed some interesting data, in one instance, one horse in each of three pairs was clipped and its mate allowed to shed its own coat when it got around to it. In another trial, one pair was clipped and another doing the same work was made to keep its long hair. Observations were taken at stated periods. Professor Smith, who conducted the experiments, states that the horses which were clipped did their work in much greater comfort than those that were not.

After winning her last race on the Speedway at the matinee of the Road Driver's Association, Alexander Newburger's noted pacing mare Smilax 2:21½, has been temporarily retired, and will be bred to James Butler's famous sire, Direct 2:05½. Nearly everybody who drives on the road in New York knows Smilax. The chestnut daughter of Sidney is now fourteen years old. Mr. Newburger has been driving her ever since she was four years old. Smilax was bred in California by the late Count Valensin and is a daughter of Ivy by Buccaneer. Ivy has produced four with records from 2:15½ to 2:25.

The Wizard, a black four year old colt, in the training stable of Monroe Salisbury, at Empire City Park, resembles his sire Directum 2:05½ to a degree that is almost startling. Not only is his general form strikingly like that of the former champion, but he has the same peculiar head, joined to the neck in the same way, and he goes almost exactly like his sire, with a quick, high, reaching stroke, which gets him over the ground at a great rate. The Wizard is working miles around 2:20 and quarters at a much faster rate. The foregoing from the Trotter and Pacer refers to Judge Greene's colt that Millard Sanders took East last year as a three year old but did not start.

Send for a catalogue of the Pierce sale. It contains the names of many animals that should become famous. There are broodmares there "bred in the purple" and trotting bred youngsters that will, if they get any training, become winners.

J. W. Zibble, the Iowa trainer who wintered at Fresno, Cal., has arrived at Denver with his string of twelve, and will start his racing in that section of the country and then work eastward. He will probably make his first start at that point, as he has made entries in a large number of events at that meeting.

The San Francisco Driving Club has been granted the use of the Tanforan track for the Fourth of July by the Tanforan Driving Association. The San Francisco Driving Club is composed of road drivers who reside in the Mission district. It will hang up a couple of purses for horses owned by members of the Golden Gate Park Driving Club.

Ed Benyon, with the Harkness stable, has arrived at Cleveland from Lexington. His string consists of Feren 2:08½ by Moko, Ozanam 2:08 by Axtell, Walnut Hall 2:09½ by Conductor, Fanco (4) by Moko, Kinley Mac (5) by Allie Wilkes, Belmo (5) by Moko, Ozalma (2) by Moko, Jessie Benyon (2) by Moko, and Luther Whitaker (2) by Moko.

A sale of thirty head of fine looking draft horses, sired by the imported Belgian stallion Franc, will take place at the Occidental Horse Exchange, 246 Third street, next Tuesday evening (under electric light). These animals are well broken and weigh from 1400 to 1900 and their ages range from 4 to 8 years. Mr. Layng has had them consigned to him from the estate of C. G. Day, Woodland.

There are some points which are valuable in horses of every description. The head should be proportionately large and well set on. The lower jaw bones should be sufficiently far apart to enable the head to form an angle with the neck, which gives it free motion and graceful carriage and prevents it bearing too heavily on the hand. The eye should be large, a little prominent, and the eyelids fine and thin. The ear should be small and erect and quick in motion. The lop ear indicates dullness and stubbornness. When too far back there is a disposition to mischief.

Dr. J. C. Hennessy of Reno, Nev., sent to Tennessee for a son of the Hal Pointer family. The selection made was a beautiful golden sorrel by Roy Brown, a son of Roy Wilkes 2:06½, out of Susie Brown 2:20½, the first daughter of Brown Hal to go into the list. On dam's side this colt is a Hal all through, being bred for three generations in the blood of that family, and few better bred ones ever left the country of pacerdom. This colt is a speedy, natural pacer, and in Dr. Hennessy's skillful hands will doubtless prove a coming fortune for the West, while his blood lines will make him invaluable as a sire.—Trotwood.

Airlie W. 37315, sired by Prince Airlie, son of Guy Wilkes, dam Susie Hunter, died June 4th at the home of his owner, R. P. Lathrop of Hollister. Airlie W. was bred to 32 mares this year and Mr. Lathrop had great expectations that he would be a high class sire as he was a very handsome horse with plenty of speed. He took sick Sunday last and died the following Thursday. The trouble was acute inflammation of the bowels. Monbello, the young stallion purchased by Mr. L. M. Ladd of Hollister at the Palo Alto sale last January, had a similar attack but is getting much better. Dictatus Medium was also slightly affected, but is himself again. The disease seems to be epidemic among farm horses also to a certain extent in San Benito county.

The Boston work-horse parade, which was held on Memorial Day, was a decided success in every way. There were over four hundred teams and more than seven hundred horses in line, and they presented a very handsome appearance as they moved along the line of march. The parade was witnessed by a big crowd, that thronged the sidewalks along the route, who showed their keen appreciation of the spectacle by frequent and hearty applause. There were thirty-six classes in all, and four prizes were awarded in each class: \$4 and a blue ribbon to the winner, \$3 and a red ribbon to the second, \$2 and a yellow ribbon to the third and \$1 and a white ribbon to fourth. In one class alone, the truckmen's class, there were 130 horses shown. The most valuable feature of the parade was the certificates given to drivers who, according to a signed statement of the owners, had driven the horses exhibited by them for a year or more before the parade, provided that the horses appeared serviceably sound and in good condition and spirits. These certificates were given independent of the prizes.

The American Horse Breeder says: "Although it was not an ideal day for working out the trotters on Tuesday, May 26th, there was plenty doing up at the Empire City track. Ben Walker was busy with the Salisbury string, and all the rail birds had their watches out in the expectation of catching some fast quarters, but in this they were disappointed, for Ben did not cut any of them loose, at least not at the clip that some of the spectators were anxious to see. He drove Monte Carlo 2:09½ around 2:30, with the last quarter at a 2:10 clip, and then repeated him in 2:23½, stepping the last quarter in 31½ seconds, and just to give the watch holders something to think about came the last eighth at a 2:04 gait. The M. & M. candidate Monroe by Seymour Wilkes, was only given easy work, with the last end of it at a livelier clip, and one eighth of it was reeled off at a 2:08 gait. The fastest work that Ben gave any of the horses was that done by the pacing filly Trilby by Direct 2:05½, and she reeled off a mile in 2:15½, with the last half in 1:05½, and the last quarter in 32 seconds."

### Classification by Amount of Money Won.

Atwood and Atwood offers the following plan of classifying harness racing, which undoubtedly has some merits. In the *Western Horseman* of New York we take the following letter written by Mr. Atwood:

Concerning the present plan of classifying harness racing, based on the presumption that when a horse trots or paces in a given time he has earned a sufficient number of dollars for its owner to warrant compelling it thereafter to start in a faster class or not at all, there is another plan of classifying horses that have not acquired such a record as an opportunity of earning something for the owners, is all right; but in the stern realities of the game too many horses get records and are out-classed before ever earning a dollar, not necessarily on account of lack of speed, stamina or racing ability, but often as the result of an inexorable fate—a collision, loss of shoe or tire, breaking of harness, or some one of the many accidents the happening of which is of daily occurrence during the racing season. The law of "the survival of the fittest" does not apply with full force in harness racing under existing rules—it is often the survival of the luckiest.

How many men have been bankrupted or discouraged and driven out of the business, and to what extent the entire industry, from breeding to training and racing, has been depressed and injured by the application of a rule under which the earning capacity of a horse is as much a matter of chance as of merit, I will not venture to estimate; every horseman of experience knows the injury has been incalculable and that a change is necessary.

Whether the governing associations (the National and American) will make the change, it may be presumed will depend largely upon whether or not a plan is formulated which will meet the requirements of the case, or at least come nearer doing so than that under which we are at present governed. With this view I have no doubt that less criticism and more suggestion would be agreeable to those upon whom the responsibility for the change, if made, will fall, and accordingly make the following suggestion, to wit:

That the allied industries of breeding, training and harness racing would be benefited and promoted by the abandonment of the present system of classifying or handicapping by time records, and in its place and stead adopting a system of classification based on the amount of money, or its equivalent, that horses have or have not won—that is to say, instead of a class for green horses without time records, make a class for horses that have never won money in a race; instead of a 2:30 class, a class for horses that have never won over \$500; and other classes for horses that have not won over \$1000, \$1500, or \$2000, and so on until the amount won properly places the horse in a free-for-all class.

Under such a plan, a horse would never be out-classed, and many a man who now hesitates to pay a good price for a racing "prospect," with the prospect of having the prospects of that "prospect" ruined by some mishap, would hesitate no longer. And many a horse that has been retired on account of having no earning capacity as a race horse under existing conditions, would immediately quadruple in value.

By way of illustration, the writer knows of a trotting horse that, after showing a sensationally fast mile for a green one, was purchased for a large sum; he was trained at considerable expense and started with great expectations. In the first heat of his race he took a record close to 2:10; in the next heat he met with a mishap and was distanced. The only thing he got out of the race was a record that has prevented his earning a dollar since, notwithstanding the fact that he is sound, fast, level-headed, and has in a marked degree the essential qualifications of a race horse. Is it a wonder that the owner and the friends and acquaintances of his owner feel that the "horse business" is too uncertain for men of moderate means and have retired therefrom in disgust? A thing which it is not at all likely they would have done had they been racing under the plan here suggested. How much more interesting to breeders would be the statement of the amounts that had been won by the get of certain stallions than of the number in the comparatively meaningless 2:30 list.

### Dick Benson's Best Job.

In a recent letter to a friend in Cleveland, Ohio, the competent and skilled driver and trainer, Dick Benson, intimated he will take a much needed rest this summer and see the races from the grand stand for the first time in years. The recent sale of the Benson & Christy horses at Cleveland, consisting of The Roman 2:09½, Silk Trader, a most highly thought of three year old Kentucky Futurity candidate, and other stars, is the principal reason that Benson may be out of the sulky in 1903. In the letter Benson said he was looking now for a job like Marcus Daly, the late copper king, gave him in 1898. At that time

Daly had just had a split with the noted Ben Kenney, and saw Benson at Kansas City in person and made a deal for him to go to Butte, Mont., and take charge of the big stable then owned by that far western turfman.

In a few days Benson landed in Butte, and walking into Daly's private office, told the turfman he was ready to go to work. Ed Tipton, then his right-hand man, without Daly's knowledge had engaged a trainer to take Kenney's place, and upon the arrival home of Daly from Kansas City the latter found a new man in charge of the stable, so Benson's services were not needed. Wheeling in his chair, the man who made so much history in Montana said to Benson, "I engaged you at a salary of \$5000 for this season's work and I am to blame for not having a place for you." With this he handed the trainer a check for \$5000, telling him if he ever had need of his services he would call on him. Says Benson, "Right now a job like Daly gave me is the kind I am looking for."

This is the first time this incident was ever related. Benson says he does not think Daly ever told Tipton of the transaction and until the contents of Benson's letter was exposed the fact that he was ever on the payroll of the copper king was never before known, as Daly was in the habit of not letting his right hand know of the workings of his left. Says Benson: "Of course I would have released him under the conditions from the contract and been satisfied with a fair recompense for my trouble and expenses from Kansas City to Butte and return, but Daly's way of doing business was the most liberal of any man I have ever known. His horses never did much good after Kenney quit his services and perhaps I also would have been unfortunate with them, but I don't know but I would have rather worked through a season for such a man than to receive the \$5000 and never turn over my hand in return for the salary."

### Answers to Correspondents.

H. C., Sacramento—Kindly let me know the names of the horses that were entered in the last trotting race in the East with Anzella.

Answer—Anzella's last race in 1902 was trotted October 16th at Lexington. It was in the McDowell, a \$5000 purse for 2:10 class trotters. There were 21 entries as follows: Alfred Star, Willie Herr, John A. McKerron, Miss Sligo, Susie J., Improvidence, Metalas, Willie Glenn, Hawthorne, Chase, Rhythmic, Leola, Dolly Bidwell, Georgeanna, Bonner, Waubun, Colonel Cochran, Anzella, Antezella, Fereno and Ozanam. There were but four starters, and the race was won by Susie J. 2:06½ in straight heats. Anzella was 2-3-2, Fereno 3-2-3 and Antezella 4-4-4 in the summary. The time was 2:10½, 2:09½ and 2:08½.

J. H. D., Isleton—Kindly send me the breeding of a horse named L. A.

Answer—We can find no such horse recorded in any of the books in this office.

H. G. T., Santa Rosa—Can you give the breeding of Bay Rose 9814?

Answer—Bay Rose 2:20½ was by Sultan 1513, son of The Moor. The dam of Bay Rose was Madame Baldwin, dam also of Pasha, sire of Moro 2:25. Pasha also sired the dam of Toggles 2:08½. Madame Baldwin's dam was by Ben Lippincott.

M. L. Los Angeles—Was there a mare named Brica-Brac by Alcazar and did she have a record?

Answer—Yes; she was a gray mare foaled 1889. Her record is 2:18½, made in 1896 at Milwaukee.

### Trying Oil on the Track.

A Providence exchange says: "Horsemen are more than pleased with the results experienced by sprinkling the track at Narragansett Park with oil, and they are united in the hope that the experiment will not prove too expensive to be continued throughout the racing season. During the past week about \$75 worth of oil has been sprinkled on the track, and the results have been eminently satisfactory. Not only does the oil lay the dust, but it preserves a cushion over the bed which makes soft and easy footing for the horses. Another good feature, and one that shows in marked contrast to the water sprinkling, is the fact that on windy days the top layer of the track is not spread all over the town of Cranston. This was evidenced on Saturday, for though a strong breeze prevailed that whirled clouds of dust from highways that were hardly dry, yet the track was undisturbed, not so much as a particle of dust rising from its smooth surface. After sprinkling the track retains this texture for days. It will be appreciated most of all by the drivers, who will find pleasure in missing the usual cloud of dust that prevails, in spite of a continual sprinkling while a race is in progress."

### A \$6000 No-Entry-Fee Futurity.

The most novel, liberal and inviting futurity stake for harness horses ever offered is fully announced in this issue of the BREEDER AND SPORTSMAN. We refer to *The Western Horseman's* \$6000 Indiana Complimentary Stake for foals of mares bred in 1903, offered and fully guaranteed by *The Western Horseman*, Indianapolis, Indiana, and three of Indiana's most prominent, wealthy and enterprising trotting horse breeders, namely: H. B. Gentry, the present owner of McKinney 2:11½; Sterling R. Holt, who recently bought of Mr. Durfee the young stallion Sterling McKinney by McKinney, and Col. N. W. Bowen, who now has William Penn 2:07½ in his stud. Every breeder knows the value of futurity engagements, but the cost of making and keeping nominations good keeps many breeders out. *The Western Horseman* stake conditions overcome this obstacle by practically doing away with this expense. The stake is "wide open" to foals bred anywhere, but nominators must either be subscribers to *The Western Horseman* or become such, and the subscription price to the paper covers all nominations and starting fees to the stake, certainly a liberality which commends itself to every reader. *The Western Horseman* is an up-to-date trotting horse and turf journal, and is fully worth the subscription price to every Pacific Coast horseman and fancier. California and other Western and Northwestern breeders must sell most of their surplus in Eastern markets, and nothing so adds to a promising youngster's value as stake engagements. Indeed, fast youngsters without futurity engagements are not sought after by Eastern buyers, as was fully demonstrated by the case of Mildred S. (2), sold at the recent Cleveland sale. She had no engagements and sold for only \$1050, whereas she would have brought at least \$4000 to \$5000 if she had been staked. *The Western Horseman* stake offers a grand opportunity to California breeders. Carefully read the full announcement on a business page.

### HOOF BEATS.

Directum was bred to 62 mares last year and 52 of them have already produced foals by him.

Fourth payment has been made on 22 colts and fillies in the Stanford Stake to be trotted this year at the State Fair.

The Monk 2:05½ and Louise Jefferson 2:09½ were hitched up together by their owner, Mr. C. K. G. Billings at Cleveland the other day, and they ran away with him. The pole of the wagon struck a post and Mr. Billings was thrown out but unhurt. Neither of the trotters was seriously injured.

A daughter of Electioneer that has produced two in the list, with a filly at foot by Monbells, son of Mendocino and Beautiful Bells, should be worth some money. The mare and filly are sufficient in themselves to start a high-class stock farm with. They will be sold at the Santa Rosa Stock Farm sale at the Occidental Horse Exchange in this city, Tuesday, June 23d.

Stockmen report an increase in the business of supplying Mexico with high grade coach horses. This class of business was formerly severely handicapped by a duty of \$50 per head, but since the abrogation of this restriction the business has increased considerably. Stockmen say that there is a large field in Mexico for this class of animals, and preference is given the American stock.

McKinney mares of good breeding are not picked up every day, but there is one to be sold at the Pierce sale, June 23d, that should be worth paying a good price for. She is called Ada Stanley and is by McKinney out of that good race mare, Lilly Stanley 2:17½. As Lilly Stanley is the dam of Rokeby 2:13½, Rect 2:16½ and On Stanley 2:17½, she is ranked among the greatest broodmares that California has produced.

Among the Santa Rosa Stock Farm horses to be sold at the Occidental Horse Exchange, Tuesday, June 23d, is the great broodmare Elsie by Gen. Benton. Elsie has five in the list, being the dam of Palita 2:16, Rio Alto 2:16½, Mary Osborne 2:28½, Novelist 2:27 and Salvina 2:30. The last named is the sire of Easter 2:12½. Elsie is also the granddam of Dorothea A. 2:29½ and of Kentucky Wilkes Jr. 2:28½. She has a magnificent foal at foot by L. W. Russell, son of the great Stamboul, and has been stunted to him again this year.

News comes from England of the death of the famous trainer of thoroughbreds John Dawson, the last of the four famous brothers of that name. John Dawson got Galopin ready for the Derby he won after having counseled his purchase as a yearling for the moderate sum of 520 guineas. Galopin, as is well known, is the sire of St. Simon, but Prince Batthyany who owned both died when the latter was a two year old. At the sale which followed John Dawson let his brother Matthew buy St. Simon for \$8000 for the Duke of Portland for whom one of John Dawson's sons later trained the Derby winners Ayrshire and Donovan—a wonderful record of success in a very uncertain game.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

### Equine Intelligence.

I do not think that anyone familiar with sporting and shepherd dogs and horses used for special purposes will doubt that their brain is of greater capacity than the ordinary. We know that the shepherd and bird dog will go to work without any training. Their efforts may be misdirected but they show evident sense of something to be done in their particular lines. You can take a yearling thoroughbred off the farm, among the strange sights of the streets and freight yards, load him on the cars and he will not become panic-stricken as a common horse. I am inclined to think that the more concentrated food fed to high class horses and on which they may almost be said to subsist has much to do with their intelligence.

I remember a case of suckling draft filly which had been cut in the wire and was kept in the stable for a couple of months, thoroughly halter-broken and led in and out to water three times a day. In her yearling form she was allowed to remain on a bottom pasture until the grass had been frosted and lost its nutriment. She did not look thin but dull and when placed in the stable she seemed to have forgotten everything. She would not lead, had to be taught over again and was very much slower to learn than the first time. In a few days I took her out and tried to teach her to drive about the yard with the reins. She seemed to be an absolute idiot, unable to assimilate an idea of any kind. I kept her a month, put her in condition and she learned as quickly as any horse of her kind. I have always found that the more above himself you get a young horse the easier it is to teach him. He is more receptive, because more resistant.

Although one prefers to speak of training rather than breaking a horse, I am not sure that the latter term is not the better description so long as it does not apply to his spirit. You break him of all his natural habits, from going where he will to rubbing his head on his knee when it itches; you prevent him defending himself with his heels; you replace his will with yours. Take a driving horse. You may say, in a general way, the less he knows the safer he is. If he is a range horse accustomed to care for himself he will likely take a shadow or rove in the road for a rattlesnake, and avoid anything with even the appearance of a hole. Iron manholes he will frankly jump the first few times; locomotives he fears but little. Before he becomes a perfect driving horse your judgment is his; all he does is to furnish the steerage way. No matter what obstructions he may see he is not to notice them, but to keep going until the indication is given to turn or stop. I say indication advisedly, because a horse properly trained should not need the forceful application of bit or spur, but should work from the indication of the will of his master through rein or leg. This absolute subjection of the horse's thinking powers is a necessity in crowded traffic where so many horses are in use.

Probably the place where a horse has the greatest chance to display his intelligence is in the hunting field, especially when hounds run hard enough to allow a blood horse to extend himself comfortably. Here we often have a chance to judge of a horse's performance practically unaided, and of others with the finest horsemen on their backs and these horsemen riding in many different ways from flying to creeping. There are a few—a very few—men who can make a horse take off exactly where they wish; those men, though they probably have never practiced *haute école*, have the same control of their horse's hindquarters consciously or unconsciously as the masters of that art, and it those men's horses whose performance we must compare with that of those left to pursue their untrammelled way. The latter are almost always in the hands of masters of hounds and hunt servants, very few men being able to leave a horse entirely alone unless much interested in the work of the hounds. You will see many of these horses ridden with a loose rein, negotiating the stiffest of country of themselves, sometimes in a trot, with an accuracy that is seldom equaled by one of the others. They have learned or soon learn where to creep and where to fly. This is no such simple matter except at timber where a horse can see the other side; there may be a ditch to you or from you, or both.

The most transparent newly plashed fence may throw a horse as surely as a steel cable, yet the accuracy with which they perform is not in my opinion equaled by the best ridden horse in the field as a rule and we must remember that they are by no means the highest priced horses in many establishments. A good hunter improves almost as with age until its natural disabilities stop him. He gathers a wonderful store of experience, his mentality increases and he seems to enjoy the sport more and more. One failing it is true he is liable to and that is jumping his fences too close and lying comfortably, for him, on you after he gets down. But all his enjoyment has

been with his master and there is a bond between them more like that of the dog and his master than that of a younger horse whose gratitude is mainly for favors to come. The language of the hunting field is as well understood by him as by you. Your pleasure and labor are together and he gets to understand at last that you get off his back and walk much of the way home after a hard day for his relief.

I am afraid that as long as a horse must have wheels behind and to the side of him it is impossible to develop his intelligence very highly, though I have taught horses not to run into gate posts by driving them against good stout ones and letting them pull to their heart's content. You can easily teach a horse to stop when anything goes wrong with cart or harness by tipping the former over often enough and starting with a loose burr on your wagon. In fact I think all horses for women should be taught this much, but this is a simple matter of habit and can hardly be considered as a development of mind.

There is another great drawback to training horses very highly and that is that it presupposes the same man to use the horse. A high school horse without a high school man on his back is like a locomotive off the rails, impelled the Lord knows where and worse, because a sentient being. I formerly taught my farm horses a lot of things, but I do not any more, only "get up," "back" and "whoa" and to turn round in the stall to have their heads cleaned. What is the use of developing intelligence in an animal that ninety-nine men out of a hundred will clean the dirt off into the manger and not even know that they are doing wrong and who will go and catch a horse in a box stall instead of making him come to them? The Kaffir when shown a wheelbarrel filled with dirt put it on his head and carried it up on the railroad dump.—*L. Ogilvy in Breeders' Gazette.*

### Live Stock at the St. Louis Fair.

The Louisiana Purchase Exposition, in recognition of the magnitude and importance of the live stock industry, and appreciating that St. Louis, the seat of the World's Fair of 1904, is practically the geographical center of the largest improved stock-producing area on the globe, has appropriated a quarter-million dollars to prizes for which the world's stockmen are invited to compete.

This vast sum makes possible a classification much in advance of any heretofore attempted, with prizes on a scale of generosity before unknown in the history of expositions. The largest sum previously offered by a like enterprise was \$142,500 at the Columbian in Chicago in 1893.

In the classification every branch of improved animal industry is to have its proportionate recognition, whether it be Percherons, shorthorns, pigeons or pointers; whether the meek-eyed cows from the Channel Islands or descendants from the American bison that once made populous the plains beyond the Missouri; whether the petite ponies from the Shetland Isles or the robust mule that has in recent years so rapidly advanced in public esteem by his proven usefulness in war no less than in the prosaic paths of peace.

For the accommodation of the array of exhibits which will compete for the prizes offered, the management have allowed thirty acres of the most desirable ground in all the Exposition track of over twelve hundred acres, most of which it overlooks, and upon this hill will erect the requisite buildings, combining the desired modern features of utility and adaptation with harmonious and pleasing architectural effect. The building scheme will comprehend between forty-five and fifty structures, including thirty-three barns to accommodate eighty or ninety horses and cattle each, several others with slightly less capacity, four octagonal barns, 100x100 feet, to accommodate cows to be used in a dairy demonstration, with silos and feed barns, a grand amphitheatre and arena, 250x450 feet, for an exhibit ring, and a building for public sales of live stock and for stockmen's conventions, in which will also be made the exhibits and demonstrations with relation to live stock under the auspices of the Association of American Agricultural Colleges and Experiment Stations.

Aside from those usually shown various classes of horses not previously taken up at expositions, such as those for artillery, cavalry and ambulance use in the military service, fire department, express and ambulance horses for city purposes, will be given the consideration their importance justifies.

Cattle, sheep and swine, as with horses, will be given such a wide range of prizes as to reward generously, independent of the specials given by States and breeders' organizations, the exhibitor, the breeder and the feeder, aggregating offerings so inviting that they must attract the choicest products that pasture and feed-lot, supplemented by human skill, have yet evolved.

One of the most interesting and instructive features planned for the exposition will be a comparative test of breeds of cows with reference especially to their dairy qualities in both butter and cheese production, and incidentally their gains in flesh.

Poultry, pet stock, dogs and the minor animals and fowls are to be recognized more fully than has ever before been done, and every energy will be bent to have at St. Louis in 1904, along with the other magnificent arrays of the world's most interesting and best, the most extensive and instructive presentation of animal exhibits ever assembled.

### Is the "Memphis" Shoe Patentable?

[Buffalo Horse World]

There appears to be some doubt as to whether or not the much talked of "Memphis" shoe is patentable, although it is said that application has been made for a patent on it. It is reported that a New York horseshoer asserts that he made and used shoes with bars across the surface, the same as characterize the shoe now attracting so much attention, several years ago.

The *Horse World* is also in receipt of a letter from J. M. Fullington, a horseshoer of Warsaw, N. Y., in which he refers to the claim that the principle of the "Memphis" shoe is original with Mr. Lake, as follows: "The claim is without foundation of fact. There is not a principle presented but what has been in use for years. We have used the bars set on in all shapes, square, diagonally, etc., for knockers, interferers and other forms of faulty action. The principle is plainly laid down by Professor Roberge in his book. I would consider it a great mistake on the part of the Patent Office to grant a patent which would deprive horseshoers from using a principle which they have long used or forcing them to defend their rights in suits for infringement. I could hardly continue in business if I was restrained from using devices embodying the principles in this shoe, as there is hardly a day but that I am called upon to make use of some of them." To one who has not looked into the matter thoroughly it seems as though Mr. Fullington has right on his side, and if, as seems likely, it can be shown that shoes like the "Memphis" shoes or even shoes embodying the same principles, were made and used before they were introduced to the trainers at Memphis by the English gentleman who has been credited with inventing them, it is hardly likely that a patent can be given on the device that will stand the test of law.

### Make Your Racing Work Pay.

A race horse with a bad foot is a failure. The past season has more fully proven this than any other in the history of racing, both on the track and speedway.

At Lexington, one of the best race horses, in the writer's opinion, failed to win solely because after the hard pounding of the first two heats his feet became so painful from soreness that he scarcely saved his distance.

At Memphis, one of the grandest race horses of the Circuit, whose owner was so confident of winning that he brought him there at large expense for one race only, was absolutely crazy from pain, due to cracked heel, and made a rank failure.

Campbell's remedies would have cured these troubles at small expense. Why not use them and make your racing pay?

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulkeys. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

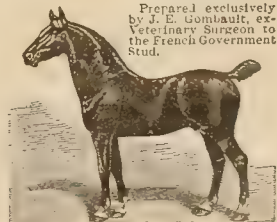

Jackson's Napa Soda does not tangle the feet.

### Horse Owners

Look to your interests and use the safest, speediest and most positive cure for ailments of your horses, for which an external remedy can be used, viz.

### GOMBALT'S CAUSTIC BALSAM

Prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

### SUPERSEDES ALL CAUTERY OR FIRING.

Impossible to produce any scar or bluish. The safest best Blisters ever used. Takes the place of all liniments for mild or severe action. Removes all Bunches or Blemishes from Horses or cattle. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circular, testimonials, etc. Address THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### Rods and Rod Materials.

The bamboo cane used in the manufacture of split cane rods is almost invariably imported from India. Calcutta is the port of shipment and in that city the material is packed, being usually received in a more or less prepared state from the native growers. Inquiries recently instituted by the commercial department of the Board of Trade of the British government has resulted in the collection of interesting information respecting the growth, preparation and shipment of the canes. The following details are from the Reporter on Economic Products to the Government of India.

The bamboos, which are whole canes, or nearly so, are usually received at Calcutta in a prepared state. They are grown chiefly at Midnapore, in several sub-districts, where the methods of preparation differ to some extent. Suitable canes are first selected and cut. The bamboos are then dried in the sun, and if not straight they are made so with the help of fire. In some cases the canes are drawn through a hot iron instrument, which straightens, colors and slightly chars them. In one sub-district the practice is to wrap the bamboo branches in ashes and expose them to the sun for three or four days. Then heat is applied and the canes are drawn through the hole of an iron instrument posted in the earth, or pressed under a mill, which makes them straight. The natives themselves make large quantities of whole cane fishing rods for local use. For this purpose they select the suitable bamboos, straighten and color them by fire and carefully polish the short lengths of cane. Native rods are not exported, but it is recorded that recently a county merchant at a place called Serajgunje, purchased about 1000 bamboo fishing rods from the local manufacturers and sent them to Calcutta. Cane, prepared for sale, is sent very largely to the same place, but to the Midnapore growers its application for the purpose of fishing rod manufacture in America and in England is apparently a matter of no interest.

On arrival at Calcutta the canes, in their smooth, burned, straight state are from 18 to 20 feet in length, and  $\frac{1}{2}$  inch to 2 inches in diameter at the butt end. Before being exported mustard oil and turpentine are applied to prevent the attacks of insects. In addition, tobacco dust mixed with lime is sometimes used. The rods are then packed in bundles 50 to 100 pieces in each, according to thickness. The bundles are packed in gunny cloth for shipment. The season for export is November and December, good roots at other times not being procurable.

There is one firm in Calcutta which specially supplies the American market. The canes it exports are generally 16 to 18 feet in length, and  $\frac{1}{2}$  to 2 inches in diameter at the butt. This firm purchases from a contractor who buys the bamboos, mainly from Midnapore, in the rough, and gets them prepared and straightened in Calcutta. There is no special method of shipment. Linseed oil is applied to the rods, which are then tied up in bundles usually containing 50 pieces. The bundles are packed in gunny cloth and exported to order of merchants in Boston and New York. The average annual export is about 200 bundles of 50 rods each, and it is noticeable that all the chief Calcutta handlers of bamboo concur in the statement that the volume of export is usually of small dimensions.

English manufacturers have devoted much attention to the making of "built up" and "double built" rods, as they call them. The hexagonal strip bamboo rods are of course most familiar to our anglers. A rod that has many friends on both sides of the Atlantic is the octagonal strip bamboo rod. Very often these octagonal split joints are taken to be of solid formation by anglers not given to examining details closely, which is quite natural, so nearly round are the beautifully finished rods. The fact is, that while the tips of the carefully made eight-strip rods are octagonal the natural rounding of each face through the selection of the material from larger round canes adds to the deception, and it is only where the color of the different sections is different that the seams can be seen by the naked eye. The butt joints being larger, the form is more plainly marked.

In constructing the double built nonagonal rods with a steel centre or core there are nineteen pieces or strips, including the steel centre. The eight inside strips are first cemented together upon the steel rod, the outer layer of eight strips is afterwards cemented in place in its proper turn. It will be seen that great skill and care must be required in the perfect shaping, fitting and cementing of these numerous parts.

By this method the increase in strength of these rods over simple hexagonal and octagonal split rods is marked. It is claimed for rods made after this method, that tests have shown that these steel centre rods are stronger than those of any other form of construction, and this can hardly be doubted when the fact is taken into consideration that the natural enamel of both layers of bamboo is religiously preserved.

Several of our local anglers use a split bamboo rod with a steel core for striped bass fishing. These rods have been found equal to any call upon them so far. It is remembered that the striped bass angler on bay waters is liable to hook up with a 100 pound stingray or a big leopard shark, it can readily

be seen what a demand for good and strong qualities in a rod can arise.

Dagama wood is used by many Eastern anglers in the construction of their rods and seems to afford much satisfaction. This wood is not used or known to any great extent by our Coast anglers. It resembles lancewood, but is denser, harder and takes a higher finish. In color it is a trifle darker than lancewood and the grain is almost perfectly straight in tips, the material for which is generally selected with much care. This wood does not set or warp as easily as lancewood, and if reasonable care is taken of the rod whilst not in commission the joints, and particularly the tips, will retain their shape.

The dagama tree is, we believe, a native of Cuba. It comes in spars about 6 feet in length as also does lancewood, which it resembles. The dagama is a tree of from 6 to 12 inches in diameter and the wood is sent to market in lengths of 6 feet, generally sawed lengthwise through the center to show the grain and quality. This wood is easy to work by reason of its straight grain and is a favorite of the salt water fishermen. Six or eight-strip rods of medium weight made of dagama wood and cemented are claimed to be very serviceable rods.

An interesting summary is given in the catalogue of Hardy Bros., the rod makers of Alnwick and London, showing the actual strength of the various forms of fishing rods made in England. The tests were made by W. H. Thorn, C. E., and the results are given here in their order of merit. The double-built cane rod, with steel centre, occupied first place. The construction of this rod is: A steel rod upon which are cemented nine strips of split bamboo; surrounding this are nine other sections of bamboo, the finished article being almost though not quite round. In second place stood the double-built bamboo rods, while third went to the split bamboo rod with steel centre, ordinary split bamboo following in sequence. Then came round greenheart. Sixth on the list was the six-strip greenheart rod. Round lancewood came next, followed by the six-strip hickory rod. This last named rod would probably find little favor among Americans and we fancy there is good reason for this in the fact that our climate is drier than that of the British Isles. It is well known that while hickory is tough and pliable in our damp climates, the long whipstocks used by stage drivers in the dry regions of the Rocky Mountains are given to snapping off like pipestems after comparatively short usage and boiling in oil seems to add but little life to these comparatively expensive but wholly necessary articles.

As some American rod makers give lancewood the preference over greenheart, it is also of interest to note that Mr. Thorn's tests place lancewood in third place to built up greenheart second and solid greenheart first. Again, climatic conditions may account for this.

### County Game Laws---Changes in the Deer Season.

The Board of Supervisors of San Benito County have changed the game laws so as to make the open season for male deer from August 1st to October 1st. This season conforms with the open season in Monterey, Santa Clara and other surrounding counties.

Two new laws governing the killing of game were passed by the Sonoma County Board of Supervisors at their June session, which closed Saturday last. The most important of these is the shortening of the deer season. Under the new ordinance prepared at the instigation of the Board, the open season will only continue six weeks, between July 15th and August 31st. The killing of deer or having deer meat in one's possession at other times will be a misdemeanor and will be followed by arrest and heavy fines.

The second ordinance is embodied in the law which District Attorney Pond presented to the Supervisors on Wednesday, making it a misdemeanor for any one to pursue any animal or bird, or hunt on any public highway in Sonoma County, or to shoot at the same from and upon the highways. The offense is made punishable by a fine not exceeding fifty dollars or by imprisonment in the county jail not exceeding twenty-five days, or by both fine and imprisonment.

From time to time there have been many complaints regarding shooting on the highways. The state law governs the offense of shooting at sign posts, etc., on the public highways of the State.

It was rumored that the Marin county Supervisors, at a meeting this week, would adopt some changes in the game law. The secretary of the Board stated recently that the open season for deer shooting would be cut down six weeks, commencing July 15th and closing September 15th, and that the open season for quail would be curtailed to three months.

### Outing Days Are Here.

Are you ready for a vacation trip? There is lots of joy about getting ready. It will interest you if you are going camping, boating, or both, to visit Skinner's, 801 Market street, San Francisco, and see the greatest display of everything for outdoor sports and recreation ever shown in this country.

One of the newest and most useful novelties of the season is Skinner's Umbrella Tent. Can be put up or taken down in five minutes. Packs into a bundle 36x7 inches, and weighs 15 pounds. Just the thing for mountaineering in vacation.

The Self Basting Broiler is one of the new camp comforts. It sells for 50 cents, and Skinner has it. Don't fail to see it if you are going camping or hunting during vacation.

### AT THE TRAPS.

The Golden Gate Gun Club regular blue rock shoot is the card for Ingleside to-morrow.

The regular club program of events will be shot in the morning, a big merchandise shoot being the feature for the afternoon's divertimento.

The Empire Gun Club members will shoot up the main club monthly events at Alameda Point to-morrow forenoon.

Afterwards a twelve-man team shoot between an Empire Gun Club team and a dozen shooters representing the Millwood Gun Club will take place. The race will be the initial one, the best two out of three for a silver cup. This contest should be a lively shot-gun argument from start to finish.

Fair weather and swift pigeons made the California Wing Club shoot on the Ingleside grounds last Sunday a day appreciated by trap shooters.

In the club race at twelve birds Otto Feudner made the only straight score, for which he took first money \$22.50. Second and third division, \$52.50, was mined by eight guns with eleven birds each—C. C. Nauman, P. J. Walsh, C. A. Haight, W. E. Murdock, Ed Donohoe, W. J. Golcher, G. H. T. Jackson and Dr. E. G. McConnell were in the split up. J. J. Sweeney in shooting up two back scores from the 28 yard mark dropped all of his birds, shooting at 30 yards rise in the club race he was not so lucky.

In the first 12 bird pool Nauman, Feudner and Jackson divided \$55 on clean scores. A second 12 bird pool brought Jackson, Dr. McConnell and Dr. Barker out for the purse, \$45, each killed straight.

A ten bird race, each shooter starting at the 26 yard slat and finishing at 35 yards rise was won by Nauman and P. J. Walsh, each scored straight. Three men in another 10 bird race divided the purse for killing all their birds. Donohoe, McConnell and Walsh won the sixth event at six pigeons. Four straight scores captured the pool in the seventh race. The concluding match at six birds was won by five of the eight entries, each man brought down every bird.

The summary of scores, etc., is as follows:

Club race, 12 pigeons, distance handicap, \$75 added, 5 moneys, high guns—

Feudner.....	31 yds—12222 22222 22—12
Nauman.....	33 "—20221 12212 11—11

Walsh.....	28 "—11110—5

Eighth event, 6 pigeons, \$2.50 entrance, distance handicap, high gun—

Nauman.....	33 yds—12121—6
Donohoe.....	31 "—21211—6
Coleman.....	31 "—21211—6
Walsh.....	28 "—12121—6

A very hot day kept a number of the College City Club members away from the club grounds last Sunday. R. C. Reed was the high gun in nearly every event. He won a club silver bar for a straight run of 15 targets in one event. The other shooters present were Schmidt, Baird, Dr. Hutton, Searles and Juster.

The Red Bluff Gun Club tournament begins to-day and will finish to-morrow. The program embraces four races to-day, after the morning's practice and pool shooting, the first event will start at 1 o'clock P. M., a 20 target race, entrance \$1.25, \$30 purse, class

shooting, 3 moneys. Event 2, 20 targets, entrance \$1.75, \$45-purse, class shooting, 3 moneys. Event 3, merchandise shoot, 15 targets, entrance \$1.25, 6 classes.

For to-morrow seven events are scheduled: Event 1, 20 targets, entrance \$1.25, \$45 purse, class shooting, 3 moneys. Event 2, 20 targets, entrance \$2.50, \$90 purse. Kimball and Upson trophy will be contested for in this event, entrance \$1 extra. Winner will receive one-third of entrance money and two-thirds of next entrance. Event 3, merchandise, 15 targets, entrance \$1.75, 11 classes. Event 4, 20 targets, entrance \$3, \$102 purse, 5 moneys. Event 5, championship of Northern California, 20 targets, entrance \$1. Winner to receive one-third of entrance money, holder of trophy to receive two-thirds of this entrance. Event 4 and 5 will be shot at the same time, entrance separate. Event 6, 20 targets, entrance \$2.25, \$75 purse, 4 moneys. Event 7, six man team shoot, championship of Northern California, 15 targets per man, team entrance \$6, targets extra. Winning team will receive one-third of entrance money and two-thirds of next entrance. Holder of trophy will take two-thirds of this entrance.

Pool shooting will follow the programmed events. Two high average prizes and three consolation prizes are offered, consisting of a leather gun case, 2 dozen quarts of beer, \$5 in gold, 1 case of beer and 10 shoe shines—an engaging variety.

The tournament is open to sportsmen of Northern California only. The Kimball & Upson trophy was won by F. M. Newbert, the blue rock championship was won by F. M. Newbert and the six man team championship for Northern California was won by the Chico Gun Club—all these events came off at Sacramento a month ago.

The Red Bluff program does not state, either that birds are included in the entrance or are extra except in one event, the team match. Nor is it stated whether the money purses are added or only so much guaranteed.

If the shoot is conducted on the proposition of birds extra and only the guaranteed purse amount to be shot for, the shoot should be a profitable one for the club. The largest purse offered in any one race is \$102, for thirty-four entries—not a large number for Red Bluff—will make the purse good, entries over that at \$3 per gun will count up.

The Washington Gun Club members shot a 100-bird race at Sacramento on May 31st. The shoot was a success and a good day's sport was enjoyed. F. M. Newbert won the high average medal with 91 per cent.

Following is a list of the shooters who won club bars: First class—F. M. Newbert, gold bar, 91 per cent; D. E. Newbert, silver bar, 81 per cent; Woods, silver bar, 80 per cent; Stephens, bronze bar, 78 per cent; Upson, silver bar, 80 per cent.

Second class—Blair, bronze bar, 66 per cent; Hagerty, bronze bar, 68 per cent; Rust, gold bar, 76 per cent; Adams, bronze bar, 67 per cent.

Third class—Just, gold bar, 69 per cent; Ruhstaller, gold bar, 77 per cent; Morgan, gold bar, 73 per cent; Welden, bronze bar, 55 per cent; Smith, bronze bar, 55 per cent; Trumpler, gold bar, 66 per cent; Ludden, bronze bar, 56 per cent.

The Woodland Gun Club was organized on 5th inst., and officers were elected as follows: T. B. Gibson, President; W. E. Osborne, Vice-President; Ernest Norton, Manager; J. A. Murray, Treasurer; R. G. Lawson, Secretary; George Jackson, Official Scorer; J. J. Ward, Sergeant-at-Arms. R. G. Lawson, J. J. Ward and J. T. Goodin were appointed a committee on by-laws.

The following is a list of the thirty-three sportsmen who are on the roll of club membership: J. A. Murray, H. P. Eakle, H. McNeill, H. E. Norton, M. C. Keefer, A. B. Rodman, Chris Sieber, E. H. Burnett, Charles Capelle, Glenn Griffin, Hiram Bullard, J. T. Goodin, W. M. Browning, O. H. Whitehouse, James R. Black, I. D. Owens, J. S. Craig, O. Armstrong, B. Rehnke, T. B. Gibson, J. Reith, Jr., R. G. Lawson, J. J. Ward, D. H. Wyckhoff, W. E. Osborne, C. Clanton, Charles Binning, E. E. Gaddis, Walter H. Huston, L. E. Walker, Dr. J. L. Smith, S. H. Campbell, W. Laugenour.

The initial shoot of the club was held at Nelson's Grove, near Woodland, last Sunday. Twenty members participated in the various events.

Following is a list of those who shot and the percentage of each. Taking into consideration the fact that many of the members never shot at blue rocks before some very good scores were made: C. Binning 52.6-7, J. Goodin 48½, R. G. Lawson 64.2-7, J. Ward 37.3-7, W. E. Osborne 66, C. F. Hadsall 32, R. T. Day 48, O. Armstrong 55, E. Griffin 48, E. Norton 60, J. A. Murray 22½, V. Miller 30, H. McNeill 46½, H. P. Eakle 46, W. M. Browning 42½.

It was a very hot day and no doubt was the cause of keeping many members at home. The club will hold the next shoot to-morrow. The club intends securing grounds somewhere nearer the city.

The Capital City Pigeon Club wound up the season at Sacramento last Sunday.

In figuring the high guns for 1903 it was found that Weber and Newbert each killed forty-three birds out of forty-eight shot at. Weber shot well and deserves great credit, for he was handicapped in being compelled to do most of his shooting from the thirty-yard mark. This was also his first year's experience in shooting pigeons, which was the case with Hugh McWilliams, the "man from Scotland," who killed forty. The next highest men were Ruhstaller and Stephens, who each scored thirty-nine.

It was a very pretty race for championship honors between Weber, Newbert and McWilliams. McWilliams fell down badly, however in the last shoot off of a back score, which left the fight between the other two. Weber in his last thirty-six birds lost but two, while Newbert scored all but one, killing his last twenty-four straight.

Next Saturday and Sunday there will be a goodly

crowd from Sacramento that will attend the Red Bluff tournament, given under the auspices of the Red Bluff Gun Club for the shooters of Northern California.

Guaranteed purses will be given in all the moneyed events and the division of prizes and other details will be on the same plan as the Kimball & Upson tournament given in Sacramento last month.

The scores made in the club shoot at 12 pigeons were: Weber 11, Guisto 8, Ruhstaller 10, Adams 9, Stephens 9, Blair 5, Morgan 9, Upson 12, McWilliams 11, Newbert 11.

Back scores in club shoot postponed from last month—Ruhstaller 11, Weber 11, Guisto 8, Stephens 11, McWilliams 11, Upson 9, Newbert 12.

Last Sunday afternoon the members of the Santa Rosa Gun Club had a shoot at blue rocks. The scores made were as follows: J. B. McCutchan, 51 birds out of 65; W. Lowery, 46 birds out of 60; P. F. Fehrman, 55 birds out of 70; R. Slusser, 40 birds out of 55; C. Slusser, 39 birds out of 55; F. W. Hesse, Jr., 37 birds out of 45; A. Brown, 39 birds out of 55; W. Morrow, 35 birds out of 45; W. Jones, 34 birds out of 45; G. Buckmaster, 17 birds out of 25; C. Talmage, 43 birds out of 55. To-morrow, June 14th, will be held the second medal shoot of the season.

## GOSSIP FOR SPORTSMEN.

"A Grizzly's Memory" is the title of a sensationally descriptive story that is tinted with a very pathetic coloring and which appears in the current number of *Outdoor Life*. The tale reads to us merely as an ingenious phase of the camera fiend's many vagaries. The narrative is interesting until near its conclusion, when the proof of the motive is unfolded in a rather awkward attempt to prove that the grizzly has a vivid memory and savagely resents the attempt of the writer of the story to take his picture. The description of this exciting (?) incident in detail reads somewhat clumsily. "Bellowing and roaring like a Titan in torment, Gila (the grizzly) had climbed almost to the top of his cage, and with all the power of his mighty strength was straining at the bars. Several of the latter belayed out a full foot where he had struck when he first sprang at me, and one was torn from its socket."

The italics are ours. Imagine a 2000 pound grizzly (That is the weight claimed. If the animal is not a mythical one—this figure should be cut in two) going that far and stopping.

What prompts us to criticize the Reelfoot romance is the picture of the animal with the caption "As he later appeared in the Chicago Park." Possibly the writer had a picture of the Chicago bear, and mayhap the film was destroyed, and it might follow that a picture of a grizzly in a cage was substituted. As a matter of fact, the picture published is that of our old college chum, "Monarch," as he has daily displayed himself in his quarters in Golden Gate Park for the last ten years. We recognize the old familiar attitude, the long reach for a peanut or other tidbit. The bear in the picture don't look like an enraged animal. The other stuff about the grizzly having been originally captured with a broken hind leg, cured up and finally landed in the Chicago Zoo, was developed probably in a blue room instead of a dark room. The picture of the bear photographing himself is of the pneumatic variety.

Ex-President Grover Cleveland is not only an enthusiastic devotee of the rod but he as well wields a gifted pen when he writes of subjects germane to angling and the pursuit of the gentle art. He is not blind to the recreation and possibilities afforded by salt-water fishing, and the delights of lake fishing from a boat are also not unknown to him. The following from the illustrious angler's pen will be read with interest by the fraternity:

"Those of us who fish in a fair, well-bred and reasonable way, for the purpose of recreation and as a means of increasing the table pleasures of ourselves or our friends, may well regret the apparently unalterable decree which gives to all those who fish, under the spur of any motive—good, bad or indifferent—the name of fishermen. We certainly have nothing in common with those who fish for a livelihood, unless it be a desire to catch fish."

We have, in point of fact, no closer relationship than this with the murderously inclined, whose only motive in fishing is to make large catches, and whose sole pleasure in the pursuit is the gratification of a greedy propensity. Nevertheless, we and those with whom we have so little sympathy, are by a sort of unavoidable law of gravitation classed together in the same fraternity, and called fishermen.

At this season, when the activities of genteel fishing usually begin, it is fitting that a word should be spoken that may not only redound to our comfort and satisfaction, but may guard us against temptations that easily beset even the best of fishermen.

We who claim to represent the highest fishing aspirations are sometimes inclined to complain on days when the fish refuse to bite. There can be no worse exhibition than this of an entire misconception of a wise arrangement for our benefit. We should always remember that we have about us on every side thousands of those who claim membership in the fishing fraternity, because, in a way, they love to fish, when the fish bite—and only then. These are contented only when capture is constant, and their only conception of the pleasure of fishing rests upon uninterrupted slaughter. If we reflect for a moment upon the consequences of turning an army of fishermen like these loose upon fish that would bite every day and every hour, we shall see how nicely the vicissitudes of fishing have been adjusted, and how precisely and usefully the fatal attack of discouraging bad luck selects its victims. If on days when we catch few or no fish we feel symptoms of disappointment, these should immediately give way to satisfaction when we

remember how many spurious and discouraged fishermen are spending their time in hammocks or under trees or on golf fields instead of with fishing outfits, solely on account of just such unfavorable days. We have no assurance that if fish could be easily taken at all times the fishing waters within our reach would not be depopulated—a horrible thing to contemplate. Let it not be said that such considerations as these savor of uncharitableness and selfishness on our part. We are only recognizing the doctrine of the survival of the fittest as applied to fishermen, and claiming that these "fittest" should have the best chance.

Occasionally weak attempts have been made to classify the best of this fraternity under the name of Anglers, or some title of that kind, but such efforts have failed. Even Izaak Walton could not change the current of human thought by calling his immortal book "The Compleat Angler." So it seems, however much those who fish may differ in social standing, in disposition and character, in motive and ambition, and even in mode of operation, all must abide, to the end of the chapter, in the contemplation of the outside world, within the brotherhood called "Fishermen." Happily, however, this grouping of incongruous elements under a common name does not prevent those of us who properly appreciate the importance of upholding the respectability of decent fishing from coming to an agreement concerning certain causes of congratulation and certain rules of conduct.

What has been said naturally leads to the suggestion that consistency requires those of us who are right-minded fishermen to reasonably limit ourselves as to the number of fish we should take on favorable days. On no account should edible fish be caught in such quantities as to be wasted. By restraining ourselves in this matter we discourage in our own natures the growth of greed, we prevent wicked waste, we make it easier for us to bear the fall between what we may determine upon as decent good luck, and bad luck, or no luck, and we make ourselves at all points better men and better fishermen.

We ought not to forget these things as we enter upon the pleasure of our summer's fishing. But in any event let us take with us when we go out good tackle, good bait and plenty of patience. If the wind is in the south or west, so much the better, but let's go, wherever the wind may be. If we catch fish we shall add zest to our recreation. If we catch none we still have the outing and the recreation—more healthful and more enjoyable than can be gained in any other way."

It sometimes happens in the general economy of things that a seeming evil is a blessing in disguise. Nature tries to balance things and generally succeeds very well, but sometimes we do not look at it that way. The potato bug, the chinch bug, and the grasshopper were created, perhaps, to keep the crops from being too large in order that a reasonably high scale of prices may be maintained. In this way some people argue that if it was not for cholera hogs would not be worth a cent a pound. Now comes a story from Montana. For years stockmen there have made a persistent crusade against the friendless coyote and have practically exterminated him in some localities, and much to their sorrow for the country is now swarming with jack rabbits, which are worse than coyotes, in that they destroy the range.—*Santa Rosa Press Democrat*.

Chief Deputy Vogelsang recently received a letter from W. J. Clark, a Deputy Fish Commissioner in Tehama county, requesting that an officer be sent to that part of the State to arrest certain people who were habitually violating the deer law. Clark asserted that the reason why he could not enforce the laws was because he had no blank warrants.

Deputy W. R. Welch was dispatched to Tehama county and began investigations under the guidance of his brother officer. One day Welch accidentally discovered that Clark's son had killed a deer with his father's knowledge and consent.

After frantic remonstrances Clark was induced to ride 37 miles to Red Bluff and plead guilty to violations of the game laws. Justice of the Peace Bransford of Red Bluff fined the offender \$25. Vogelsang then revoked Clark's commission.

Welch is still in Tehama County and writes that he expects to arrest another member of the same household for a similar offense.

C. Davis, a schoolteacher boarding with Clark, was found to have abetted the crime. Davis was given until to-day to appear before the Court, in order that the school session might not be interrupted.

At the recent semi-annual meeting of the Point Reyes Sportsmen's Club the following officers were elected: General J. H. Dickinson President, Fred S. Johnson Vice-President, N. H. Hickman Secretary-Treasurer, N. H. Hickman and G. W. Smith, Directors.

The club membership is limited to thirty, this list is at present lacking two names to be full.

The club members are to be commended for the thoroughly sportsmanlike manner in which they propose to protect and propagate the fish and game in and upon their preserve grounds.

During the open season for deer, it will be allowable for members and guests to run dogs but two days each week, Wednesdays and Saturdays. "Spike" bucks are to be immune hereafter from the hunter's bullet, none but the older deer will be hunted and killed.

Quail will be hunted on the preserve during three days of the week only, the individual bag for the week will be restricted to 25 birds.

Snipe and duck will be hunted and shot under the state law as heretofore.

Coyote hunts will be in vogue from time to time by parties of club members and their guests. These marauders are very plentiful on the "North end," so-called. Wildcats in one section of the preserve will not be disturbed; their tenancy of the thick, rocky ravines will continue so long as they

...the gophers is found to be a fair ...

...the preserve will ... and a plan is on foot to ... re-stocking with as many ... and the mem- ... of maintaining a preserve ... to none on the Coast.

Recent reports come from the Santa Clara county streams, where fly-fishing seems to be about at its best. Many large fish were being taken, they have deserted the deeper holes where heretofore they found ... as the waters get ... to the surface after ... This condition of affairs is especially true of Stevens creek and other streams in the county. It is more than a week ago that it was almost impossible to catch a string of fish below Soda Rock, but now many fishermen are returning with filled baskets.

Charles M. Shelbourn, of San Jose, an enthusiastic angler fished on the Los Gatos creek, between Alma and Wrights, last week. He reports that in all the larger holes the fish have been killed with giant powder. Game Warden Koppel has been investigating the matter, and while he is fully convinced that many fish are being taken illegally, yet no one has been caught in the act, although they have strong suspicions as to who are the guilty parties. The residents of that district are highly incensed at the lawbreakers, and if any one is caught killing fish with giant powder it is not improbable that the culprit will be roughly dealt with.

Favorite reports come from the Pescadero country, Los Animas creek, the Llagas, Austin and Los Gatos creeks.

There is a big run of salmon on in Monterey bay at present. This is rather an early appearance of the fish in the season. Good sport trolling for them, it is reasonable to expect, will prevail during the summer.

### Trout Fishing in Plumas County.

The Big Meadows is a fishing resort dear to the hearts of those anglers who have enjoyed the manifold resources of that—to the devotees of the rod—almost uncharted spot. For those others who have heard from the lips of the lucky ones stories redounding with vivid descriptions of the joyous landing of big gamey rainbow trout, Big Meadows is the Mecca of their dreams. At present a number of local anglers are availing themselves daily of the grand fly-fishing, which seems to be now at its best. Here was a favorite haunt of that genial and staunch angler, the late Horace Smyth. Alex T. Vogelsang, J. B. Finch, Frank La Coste, Jeff Wells, Sam Heller, Dave Sachs, Clarence Ashling, W. W. Richards and his bride, Sam Woods and many other of our local anglers have been fishing there recently. Prof. McMahon and Col. Culver have been religious in their attendance each summer for ten years past. These jolly anglers know the Big Meadows and love its many charms that are prodigal and inviting for both angler and lover of nature.

Two weeks ago Tuesday a quartette composed of Mr. and Mrs. W. W. Richards, S. A. Heller and F. La Coste, took the train from this city for Chico, 161 miles distant, destined for a brief but delightful sojourn at the famous resort in the high Sierra Nevada mountains. From Chico the party journeyed 75 miles by stage. Starting at 4 o'clock in the morning, their destination Pratville, was reached at 7 o'clock in the evening. The trip is a grand one over a picturesque mountain road, the route taking one through the mountain towns of Nimeshew, Powelton, Chapparral, Longville and thence to Pratville the post office station and the destination of the angler. Three relays of horses are made during the ride. On this trip whilst the stage was going over the mountains from Powelton to Pratville the road was covered with snow for a distance of five miles. Richards, Heller and La Coste dug out their fishing boots from the baggage and trudged along in the snow pelting each other from time to time with snowballs—this in California and in June too.

Mr. Richards, writing to a brother sportsman, gives a graphic description of an outing that is to be envied:

"Beckwith, Plumas Co., Saturday, June 6, 1903. Mrs. Richards and I are on our return trip from a week's stay at the 'Big Meadows,' 68 miles by stage from here. This afternoon we go to Boca, 60 miles by train, and fish the Truckee for two days before getting back to San Francisco.

But the Big Meadows beats all the trout dreams I ever had. Our party consisted of my wife and myself, Mr. Sam Heller, of Fly-Casting Club fame, and Mr. Frank Lecoste, another piscatorial expert. The Meadows are a high plateau of the Sierras, surrounded by snow-capped mountains (now), the highest of which is Mt. Lassen, 12,500 feet, and the source of the west branch of the Feather River which, 100 miles below, and above the city of Sacramento, is a big navigable river for steamboats. But those glorious green meadows! About 30 miles in circumference, level as a board and environed by the vast pine forests of the Sierra Nevada Mountains, with 25 miles of most magnificent fishing water to whip and any further objective point within an hour or two's ride from the pretty and comfortable country hotel (the Bannell House). The banks are absolutely free from any trees or brush save a few willows now and then bordering the stream. The view of this beautiful solitary green garden spot from any little hill along the road is truly charming. For I saw once a vast bed of lovely flowers through the main stream and its many branches glide gliding silver threads and at evening are sparkling with myriad drops of crystal as the countless

schools and squadrons of gamey rainbows come up from pebbly bottom or out of equatic grassy retreat to break their fast and sport in the thousand ripples with their royal brethren. This place seems to me to be one of the most beautiful spots on earth for a thoroughbred to look upon, all of us were almost beside ourselves the first evening we rode out to give the prospect a look over. Mrs. R. was inclined to quote poetry, but Sam and I couldn't wait and quickly jumped out of the wagon and then up to our "base-ments" in the stream looking for what "bugs" were on the water. The light caddis was just then coming out of the caseworm shell and we made it a good killer during our days which we spent on the stream from the spot where it enters the hills, although perhaps it's not so good on the open water below. The 'forked tails' were swarming too, and for them we tied on the "blue upright," and it was a killer. We found a number of black ants in the boat we used at the Big Spring, and not having this fly in our books we put on the "black prince," which did the work in great shape. For the first two days the water was high, then the river fell about two feet.

But the entomological world seemed to be abroad in full force and would change on the water a dozen times a day, and kept us busy varying our casts. With critical eye we kept track of the insects, for any glaring change in color would throw a fly out of the game entirely. One afternoon Mr. Keller caught a 1 lb fish with his first cast on an English march brown of which he had only two flies. Mr. La Coste, who was in the boat with him, was given the remaining charmer instantly and a prettier run of sport never fell to the lot of any two gentlemen, for the rise of the 1 lb and 1 lb fish to the little number 12 was incessant for two hours and several 1 lb fish took it as though they were grabbing a bunch of sweet figs. But a basket full was enough for these two real sportsmen and they took their rods apart when the run seemed at its best.

Mrs. R. was high hook on the stream the week of our stay, with a 2 lb Rainbow caught on a No. 1 Wilson spoon, trolling on the way down the stream to the fly-fishing ground. This fish was a strong minded gentleman and didn't like the idea of letting a woman get him on a string, he felt vigorous in his icy home of cold snowwater and he put up a good middleweight fight, and broke water time after time, but the Madam is getting sporty and begins to know her little book, she kept good control of her light six foot steel trolling rod, and spoonin' was no recent novelty in our family either. Finally the Piute Indian who rowed our boat said, "You win, lady," she replied, "Why not?" and called for the curtain. My! but that woman had to put her hat on with a shoe horn for a week. Four other San Francisco sportsmen fished there daily and every evening would bring us all back early with full creels. Smaller fish than 1 lb would all go into the stream again and were told to come back in another class. But every daily catch was full of exciting incidents and critical moments, fish madly breaking water or tearing down through a rush of boiling seething rapids up near the falls. Later on when the stream goes down the larger fish will take the fly, big four and five pounders—last season a ten and an eleven pounder were hooked and landed. At the upper end of the Meadows, where the main stream leaves the mountains, is a most magnificent pool and ripple and it's a sight to behold the great big trout leaping out of the water a half dozen in the air all at once and fairly tumbling over one another. Life is worth living for when one can enjoy it amid such scenes. We left Mr. Heller and his friend there to remain a while and then they were to make the tour of the mountain lakes fly-fishing. The Madam and I will remain at Truckee a few days, but return in July with Walter Mansfield and his wife, and Mr. and Mrs. Everett, and Mr. Johnny Siebe."

### DOINGS IN DOGDOM.

Ch. Woodcote Wonder sired a litter of eleven puppies, whelped May 12th by Newmarket Jean. Mr. Elias Williams has sold the bitch and all of the puppies. He writes us that the litter were all white, save one bitch puppy, which had a small black spot over one eye. The lot are a fine even bunch of youngsters and all getting along nicely.

Mr. Abner V. Crane of Sacramento writes us that he has a nice litter of nine English Setter puppies; three are dogs. They are by Gaily Graham's Jacques (Dorsey-Countess Beatrice) out of his bitch Rose Blade (Toledo Blade-Topsy Riggs).

Entries for the Pacific Coast twenty-first annual Derby will close July 1st. Entry blanks and any information desired concerning the coming Coast trials can be had by addressing Secretary Albert Betz, room 201 Parrott Bldg., San Francisco, Cal.

At the annual election of the California Coursing Board recently, Dr. F. P. Clark of Stockton was re-elected President, Dr. W. J. Hosford was re-elected Vice-President and Peer Tiffany elected Secretary.

Mr. George McEwen Malcolm, the retiring secretary, occupied the responsible position for four years with credit to himself and greatly to the enhancement of the sport on the Coast as well as influencing the leashmen's interests throughout the country.

During Mr. Malcolm's incumbency he has published three volumes, 6, 7 and 8, of The Greyhound Stud Book. These compilations, particularly the last volume, are of inestimable value to the breeder and lover of the Greyhound; they are without exception the most complete and exhaustive results ever submitted on the subject. The last volume contains 100 pages more than the last English Stud Book. Among other matters will be found a detailed and descriptive account of all of the leading stakes run in America. The pedigrees of winners, dividers and runners-up are arranged under sires and dams giving their ages,

registrations and pedigrees. The object in grouping families is to assist the breeder in determining winning lines. Summaries, tables, lists of winning sires, tables of winners, etc., and a plethora of other valuable coursing information go far to make this volume a great aid to breeders of coursing dogs. The arrangement of Mr. Malcolm's publications are a vast improvement on the earlier volumes of the stud book.

So well has the work been done that the compiler has been followed in style by the English officials in the arrangement of their stud book. At the annual meeting of the American coursing board in St. Louis last year, many suggestions made by Mr. Malcolm were accepted by the Board for the betterment of the sport.

Mr. Malcolm proposes to engage in mercantile business in the Orient, whither he goes sometime during this month.

Mr. Tiffany has been the press agent for the Union Coursing Park for sometime past and is well qualified for the varied duties falling to the executive officer of the California Coursing Board.

A. H. Nelson of Tacoma, will probably send Sport's Destiny and one of her puppies Sousa by Tony Boy, to several of the Eastern field trials this fall.

A litter of Pointer puppies out of Nellie Bang by Dr. Daniels is regarded by J. W. Flynn as containing some extra good field trial candidates.

The growing popularity of the white Collie is becoming very noticeable and before long many of their ardent admirers hope to have special classes opened for them, urging as a plea that time was when the now fashionable sable and white first came on the scene they were favored in this manner and have supplanted the tri-color to such an extent that the latter now needs the special class. As the Collie is one of the few breeds in which the color of coat counts for little or nothing, it seems as though there should be less difficulty in breeding a few good ones, but until their supporters can produce one or two fit to hold the pace of the show bench they cannot hope for much progress, for although a real white one (we have never seen her) must be pretty good to look on, he must be able to compare favorably with his colored brethren as a specimen of the breed, then he will be taken up.

### Kennel Registry.

#### WHELPS.

Elias Williams' Bull Terrier bitch Newmarket Jean (Newmarket Duke-Edgewood Jean) whelped May 12, 1903, eleven puppies to Woodlawn Kennels' Ch. Woodcote Wonder (Dulverton-Fan). John Allen's Irish Terrier bitch Lady Power (Wilmount High wayman-Virginia F.) whelped June 8, 1903, eight puppies (3 dogs) to Woodlawn Kennels' Irish (—).

### Coming Events.

#### Rod.

April 1-Aug. 15—Close season for lobsters and crawfish.  
April 1-Nov. 1—Trout season open.  
April 1-Sept. 10. Oct. 15-Feb. 1—Open season for taking steel-head in tidewater.  
May 1-Sept. 1—Close season for shrimp.  
June 13—Saturday Contest No. 1. Class series. Stow lake, 2:30 p. m.  
June 14—Sunday Contest No. 1. Class series. Stow lake, 10 a. m.  
July 1-Jan. 1—Open season for black bass.  
Sept. 1-Nov. 1—Close season for crabs.  
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

#### Gun

June 14—Golden Gate Gun Club. Blue rocks. Ingleside.  
June 21—Union Gun Club. Blue rocks. Ingleside.  
June 21—College City Gun Club. Special blue rock events. Berkeley.  
June 21—Empire Gun Club. Blue rocks. Alameda Point.  
June 28—Millwood Gun Club. Blue rocks. Mill Station.  
July 1-Feb. 15—Dove season open.  
July 5—California Wing Club. Live birds. Ingleside.  
July 5—College City Gun Club. Blue rocks. Berkeley.  
July 15-Nov. 1—Deer season open.  
Sept. 1-Feb. 15—Open season for mountain quail, grouse and age hen.  
Oct. 15-Feb. 15—Open season for quail, ducks, etc.  
Oct. 15-Jan. 15—Open season on quail in Marin county.

#### Bench Shows.

Oct. 6, 7, 8, 9—Danbury Agricultural Society. Danbury, Conn. John W. Bacon, Treasurer.  
Nov. 3, 4, 5, 6—Ladies Kennel Association of America. Madison Square Garden, New York. Mrs. A. G. Evans, Hon. Secretary, Westbury, L. I.

#### Field Trials.

Aug. 18—Iowa Field Trial Association. 8th annual trials.  
Aug. 18—Nebraska Field Trial Association. O'Neil, Neb. H. H. McCarthy, Secretary.  
Sept. 1, 4—Minnesota-North Dakota Field Trial Association. 4 annual trials. Ironquils, S. D. Dr. W. A. Moore, Secretary-Treasurer, St. Paul, Minn.  
Sept. 8—Manitoba Field Trial Club. 17th annual trials. Carman, Man.  
Oct. 26—Monongahela Field Trial Association. 9th annual trials.  
Nov. 2—Michigan Field Trial Association. Annual trials.  
Nov. 2—Ohio Field Trial Association. 6th annual trials.  
Nov. 9—Missouri Field Trial Association. Annual trials.

### Free! Free! Free!!

The Polk Miller Drug Co. of Richmond, Va., whose advertisements of "Sergeant's Dog Remedies" are appearing now in the columns of this journal, desire us to state that they will furnish absolutely free to our readers a revised copy of their book on "Dogs," which accurately and exhaustively treats of the more frequent diseases with which dogs are afflicted. Enclose them 3c in stamps to cover cost of mailing the book. They have recently made F. W. Braun & Co. of Los Angeles, California, distributing agents for their popular line of "Dog Remedies," and extend an invitation to all persons having sick dogs to write them describing symptoms etc. Enclose stamp for reply. No charge will be made for information furnished.

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

The Western Horseman Co., Indianapolis, Indiana

## A Cure for Colic.

There is no breed which "looms larger" in the public eye than the Shropshires, which, thanks mainly to the wise enterprise of their breeders, have spread widely over England in a comparatively short time, and have secured a big slice of the export trade. Yet its history is practically comprised in the last half century. It is generally assumed to have been of mixed origin, the chief ingredient being the old Mor'e Common breed, but other local varieties, such as the Clun Forest, the Longwynd and the Cannock Chase, contributed their share. There was probably also some infusion of Southdown, Leicester and Cotswold blood, while it is also said there was a Merino cross. At any rate some excellent materials went to the making of the breed which has now for many years been permanently established and kept strictly pure.

Therefore, more is needed than mere stimulants; physic is demanded. And what shall the physic be? Shall it be a laxative? No, never. Why? Simply because it does increase activity of the bowels by muscular contraction. Shall it be salts? No, because they increase the secretions of the mucous membranes, and are so far good, but not sufficient to wet up that dry mass.

What then shall it be? Oil, oil, oil every time, sufficient to soften up and emulsify this mass of dry food. "How much?" it may be asked. It is difficult to say. But start with a pint of pure raw linseed oil (never boiled). Give with a round teaspoonful of ginger, and if there is much pain add an ounce of sulphuric ether, or half an ounce of hydrate of chloral dissolved in water and added.

In an hour repeat, and continue to repeat until there is a natural rumbling of the bowels. Also use the syringe by injecting a gallon of warm soapy water up the rectum, and repeat hourly until the pain succumbs or a passage is made. In bad cases wring cloths out of hot water and apply to the abdomen.

In cases where the attack may be due to the consumption of a quantity of soft food, or to drinking much cold water, digestion is in a measure stopped and certain gases are formed by chemical action. Nothing will better neutralize the gas thus generated than half an ounce of carbonate of ammonia dissolved in a pint of water and poured down from a bottle. This will relieve the bloat, and can be repeated hourly. Also, if the pain is severe, give the hydrate of chloral as before recommended with the ginger, and repeat if necessary every half hour until the pain is relieved.

At the May London wool sales fine wools advanced  $5\frac{1}{2}$  to  $7\frac{1}{2}$  per cent, and cross-breds, 10 to 15 per cent. Since May 1st the advance in the United States has been from 5 to  $7\frac{1}{2}$  per cent against an average of  $7\frac{1}{2}$  to 10 per cent in London. As there is a short wool supply in this country, as in every other, and our mill men must buy largely abroad, it is somewhat surprising that domestic wools do not respond to advances in the world's market, and that there is a strong concerted effort among the advance agents of some of the big eastern wool houses to "bear" the market. There is one country whose wool markets seem rarely or never to be materially affected by London sales or quotations and that country is the United States.

## Shropshires.

There is no breed which "looms larger" in the public eye than the Shropshires, which, thanks mainly to the wise enterprise of their breeders, have spread widely over England in a comparatively short time, and have secured a big slice of the export trade. Yet its history is practically comprised in the last half century. It is generally assumed to have been of mixed origin, the chief ingredient being the old Mor'e Common breed, but other local varieties, such as the Clun Forest, the Longwynd and the Cannock Chase, contributed their share. There was probably also some infusion of Southdown, Leicester and Cotswold blood, while it is also said there was a Merino cross. At any rate some excellent materials went to the making of the breed which has now for many years been permanently established and kept strictly pure.

The Shropshire breeders were the first in Great Britain to start a flock book for the registration of pedigree flocks. The prominent feature of a Shropshire is the closely-covered head, the wool coming over the space between and in front of the ears and even down the face. The head is well developed, with muscular neck well set on, and good shoulders; the barrel is deep and symmetrical, placed as squarely as possible on short legs. The skin should be cherry color, the face and legs "a soft black, not sooty or a rusty brown," and free from white spots. Shropshire ewes are prolific and good mothers. Wethers with good farming will come to market at 11 to 14 months old, weighing 20 to 25 lb. per quarter, and in some cases greater weights. The average weight of fleece for a fair flock is 7 lb., but many average  $7\frac{1}{2}$  lb., and greater weights are common for individual sheep. The mutton is of good quality, carrying a large proportion of lean meat.

The American Angora Goat Breeders' Association, with headquarters at Kansas City, reports that the books of the association show 40,000 goats registered for foundation stock, 2000 of which are for the present year, with the inspectors still at work. Sales are strong and the demand vastly exceeding the supply. Reports from all directions indicate a lively awakening to the importance of this prospering industry, which is very flattering to the prophets.

While nearly all admit that it pays to feed liberally, but a small per cent of our dairymen practice full feeding. If they could remember that it takes approximately 60 per cent of all that a cow can eat to maintain her body, more would strive to get a profit from feeding the remaining 40 per cent, as it is in this that all profit lies.

If your hens lay soft-shelled eggs it is because they are too fat or they lack a constant supply of grit.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

# Limonero=3=2:15 3=4. Reg. No. 33389

(A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15½, bred at the Palo Alto Stock Farm, is conceded by all who have seen him to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He has 35 two and three year olds that have never been trained. All of them are handsome, big bays and browns. From their appearance and the predictions of the best judges many of them are sure to be good race horses with every prospect of some star performers. A number of these youngsters are to be seen at the Los Angeles track.

LIMONERO 2:15½ got his record as a three-year-old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating a field of six of the greatest three-year-olds of that year, including the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity.

LIMONERO 2:15½ will make the season of 1903 at the

**AGRICULTURAL PARK, LOS ANGELES.**

Fee \$25, for a Limited Number of Good Mares.

# NUSHAGAK

Sire of

**ARISTO (3) 2:17½** winner of  
Occident  
and Stanford Stakes, 1902

**MAJELLA B. (2) 2:29** Trial (4  
2:13½

**THE BOQUET** Trial (3) 2:21  
in 1902

**Brown Filly** Trial 2:20½ as a  
4-yr-old in 1902

**Reg. No. 25939**

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15½, Sabina 2:15½, Sabledale (at 2 years) 2:18½, Buffington (at 2 years) 2:20½, and 36 others in 2:30 list. Dam, Fidelia (trial 2:35 at 2 years), dam of Fidelite 2:28½, dam of Mary Celeste (at 2 years) 2:17½ by Director, sire of Directum 2:05½, Direct 2:05½, Nathan Straus 2:05½, Direction 2:08½, etc. Second dam by Reavis' Blackbird 2:22, sire of Mamie Griffin 2:12, Vic H. 2:12½, etc. Third dam by Lanet, son of McCracken's Blackhawk 787.

NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17½, Majella B. (2) 2:29 (trial at 4 years 2:13½), and The Boquet (trial at 3 years) 2:21. His son Aristo (at 3 years) 2:17½ took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake. NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

**Limited to 40 outside mares, at \$50 the Season,**

with usual return privilege. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed. First-class pasturage for mares, \$3 per month; no barbed wire. Address

**WALNUT GROVE STOCK FARM,**

Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morshead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

**THE STANDARD-BRED TROTTER STALLION**

**BOODLE Jr.**

By **BOODLE 2:12½**, sire of Ethel Downs 2:10, Thompson 2:14½, and 4 others in 2:30 and better. He by Stranger, sire of 33 in 2:30. Dam **NINA B** by Electioneer, sire of Arlon 2:07½, Sunol 2:08½, Palo 2:08½, and 164 more in 2:30 list.

BOODLE Jr. is one of the best bred, best looking and best stallions on the Pacific Coast. He will make the Season of 1903 at

**J. D. CARR'S GABILAN RANCH, Six Miles East of Salinas**

Fee \$25 for the season, payable at end of season, or \$15 for single service, payable at time of service, otherwise will be considered at season rates. Any mare entered for the season and paid for will be granted the usual return privileges if proven to be not in foal provided that next year the owner of mare still owns her and J. D. Carr still owns the horse. Good pasturage at \$3 per month, but no responsibility assumed for accidents. Season open now and will close August first 1903.

BOODLE Jr. is a sure foal getter, his colts are all uniform, and of good color, and show fine speed and action. He is 16 hands high and weighs 1300 pounds, is of a rich mahogany bay.

Apply to

**J. D. CARR or JOHN GARSIDE, at Gabilan Ranch.**

SONOMA, Cal., May 20, 1903.

MESSRS BAKER & HAMILTON,  
San Francisco, Cal. —

Dear Sirs: In reference to your No. 4 3500-lb. Simplex Turbine Cream Separator, which we purchased of you some time since, and which we are using every day, would state that same runs easily and skims clean and is satisfactory to us in every way.

Yours truly,  
(Signed) STORNETTA BROS.

These parties replaced the Disc Separator with a SIMPLEX SEPARATOR and they, as well as every other user of the SIMPLEX SEPARATORS, are perfectly satisfied.

We do not claim to have furnished all of the Separators in use or to have been doing business in one run so long that we have become rusty, but if you wish the LATEST IMPROVED CREAMERY MACHINERY and MODERN BUSINESS METHODS, give us a call.

Send for New 1903 Creamery Catalogue, just issued, and special Literature on Simplex Separators and Churns.

## CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL FOR BARBED WIRE CUTS, CALES, SCRATCHES, BLOOD POISONED SORES and ABRASIONS OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery as well as a dry sore.

Its use will absolutely prevent BLOOD POISONING. In this respect there is no Gall Cure offered which can justly even claim to be a competitor. We placed it on the market relying wholly on its merit for success, and notwithstanding the fact that comparatively little has been done in the way of advertising the sales of 1900 were 100 per cent greater than the aggregate sales of Gall Cure preceding that year. This increase was entirely due to its MERITS, and from it we feel justified in saying that it is THE GALL CURE OF THE 20TH CENTURY.

It is a quick and sure cure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.

SACRAMENTO, Cal., June 13, 1903.  
BAKER & HAMILTON, San Francisco, Cal.

Gentlemen:—We do not hesitate to say that the SIMPLEX SEPARATOR you placed in our creamery, on trial, has come up to our fullest expectations. We are very much pleased with the results of this machine.

Having the capacity of 3500 lbs. of milk per hour, it is easy and simple to clean, while it skims thoroughly up to its full capacity. We have found no other machine superior to it in any respect, and would be pleased to recommend it to any one desiring an up-to-date Separator.

Yours respectfully,

BARTON-FISHER CREAMERY,  
S. N. NASH, Mgr.

Why spend your time and money with an old style, complicated, hard-to-clean Separator when the most up-to-date Creamery men are securing the above results. Kindly remember that the SIMPLEX SEPARATORS are furnished on trial and we will let YOU decide whether you keep it or send it back.

Send for complete printed and new 1903 Creamery Catalogue

TELEPHONE: Black 586.

Terms—One Year \$3, Six Months \$1.75, Three Months \$1  
STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal.  
Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, June 20, 1903.

**M**OST EXCELLENT APPOINTMENTS have been made by Governor Pardee to fill the vacancies in the State Board of Agriculture. We will give him credit for that. The terms of three directors expired last month, which with the resignation of President A. B. Spreckels, left four places on the board to be filled. The Governor did not seem to be in a hurry to make the new appointments, but now that he has done so the fitness of the appointees cannot be denied. After urging without avail Mr. Spreckels to withdraw his resignation, the Governor was finally compelled to accept it, which he did reluctantly and selected Mr. E. W. Howard of San Mateo county to fill the vacancy. Mr. Howard is largely interested in stock raising and agriculture and a first-class man in every way. Mr. Frank H. Burke, proprietor of the La Siesta Stock Farm at San Jose, and a well-known real estate dealer and man of affairs of San Francisco, was chosen to succeed Director M. D. Chamberlain of Yolo county. Mr. Burke is one of the best known men in the State. He has been a most successful business man, a very successful stock breeder and takes a deep interest in everything that tends to build up this commonwealth. His appointment will be universally endorsed. Ex-Senator William Johnston of Sacramento, who succeeds John Mackay on the Board is another good selection. He is a man of the most sterling worth, one of those farmers, fruit growers and stock breeders whose work and brain have made California what it is to-day. Mr. J. W. Wilson of Sacramento has been chosen to succeed Director J. E. Terry. As was remarked in the presence of the writer by a gentleman who has been one of the chief exhibitors at the State Fair for years: "If we can't get Terry again Wilson will fill his place better than anyone else." Mr. Wilson has been a director heretofore and always used his best efforts and a large part of his valuable time to make the fair successful. The Board of Directors will meet with its new members Monday in all probability, and will immediately select a President and Secretary and begin preparations for the fair of this year. While much time has been lost in getting to work owing to the vacancies in the Board which have now been so happily filled, the new Board has the ability and the push as well as the intent on to make the fair one of the best ever held. It need surprise no one to see the State Fair of 1903 one of the best ever held at the historic old fair grounds at Sacramento.

**T**HE HANDSOME LITTLE MARE, Lou Dillon, bred at the Santa Rosa Stock Farm in this State and sold at the Blue Ribbon sale at Cleveland last month to Mr. C. K. G. Billings of Chicago for \$12,500, has made good the first time out. Mr. Billings started her last Tuesday at the track of the Cleveland Driving Club, against the club record for trotters to wagon, which was 2:06½ made by the California bred stallion John A. McKerron, September 21, 1901. Lou Dillon had never before started in any regular or amateur event, but she reeled off the mile in 2:06½ lowering McKerron's wagon record a half second and the record of the mare Lucille three-quarters of a second. Although Lou Dillon has been carefully prepared during the past winter and spring months to show extreme speed early in the season, her performance must be classed as a truly wonderful one. All her work before she was purchased by Mr. Billings had been taken to a long shaft sulky or cart and she had probably never been hitched to a four wheeled vehicle until she reached Cleveland. A mile in 2:06½ in June is something that no other trotter ever accomplished and shows her to be about the highest class trotter now in training. Millard Sanders has always claimed since he trained Lou Dillon last season that she would hold the world's record for trotting mares if nothing happened her in the way of sickness or accident, and

this performance of hers to wagon this early in the season makes his prediction, look like a certainty. Sidney Dillon is now the sire of two mares with trotting records of 2:07 and 2:06½ and from the reports that reach us of others of his get, his list of 2:10 performers gives every promise of being a large one.

**A** HALF MILE SPEED TRACK is to be constructed in Golden Gate Park by the Commissioners and it is announced that work on the same will be begun very soon. The location of the track is to be near the eastern end of the speedway and it will be shaped after the form of the letter D. The infield is to be leveled and arranged for polo, football, baseball and other sports, and will be a great acquisition to the many excellent features of San Francisco's great pleasure ground. It is proposed to erect a large cooling out shed that will accommodate forty or fifty horses, and to erect a stand for those who desire to witness the speed trials. There is no doubt but the new track will be one of the most popular resorts in the Park when completed. The present speedway, while much used, is not very satisfactory inasmuch as it is possible for spectators to see but a small portion of the track from any given point. The new track will only require half the water and work to keep it in shape and will be much better in every way than the present mile course, which is a straight one, or nearly so. The new track will be very convenient to the electric car lines that run along the south side of the Park.

**A**UTOMOBILES enter into competition with coach horses to a greater extent than with horses used for any other purpose, and it is said that New York has more automobiles in use than any other city in the world. If this is true then the motor wagon has not reduced the value of horses in the least, as will be seen by the following dispatch sent over the wires from New York under date of June 12th: "Probably the highest prices ever paid in this country for coach horses at auction have been realized at the sale here of thirty-four animals which have been used two months in working the coach Pioneer between New York and Ardsley. The total proceeds of the sale were \$24,000. Among the buyers were Harry Payne Whitney, G. G. Haven, Jr., and other well-known whips. The former paid the top price, \$4750, for one pair. Several others were sold singly at \$1000 to \$1800."

**S**EATTLE'S FALL MEETING will open August 8th and continue three weeks. In this issue of the BREEDER AND SPORTSMAN will be found the advertisement of the harness stakes and purses, entries to which will close July 15th. There are two stakes of \$1000 each. These are for 2:17 pacers and 2:20 trotters. There is a \$500 stake for three year old trotters and one of the same value for three year old pacers. The two year olds are given \$300 stakes. All the colt stakes are for colts bred in the district. In addition to these stakes, there are twelve purses of \$500 each arranged to suit all classes. A big list of purses for running events will be offered later. The program will be made up with one harness event and four or more running races each day. Seattle has jumped into the position of one of the best racing towns on the Coast.

## Vallejo Races Fill Well.

Manager Thos. Smith of Vallejo announces that the majority of the purses hung up for the meeting at Vallejo have filled well and that there is every promise of very successful racing at the navy yard town. As will be seen by the following list of the entries received the best horses in California have been entered. Mr. Byron Erkenbrecher of Los Angeles has named the famous matinee mare Sweet Marie by McKinney in one of the purses and as this will be her first appearance in a regular race there will be great curiosity among horsemen to see her and she will be a drawing card for the meeting. The following list received just a few minutes before the BREEDER'S forms were put to press gives the names of the horses entered and whom they are entered by:

## Selma Scribbles.

SELMA, CAL., June 12, 1903.

**EDITOR BREEDER AND SPORTSMAN:**—The breeding of good driving stock in this part of the valley is picking up. There are a number of good horses standing here for public service, and one of the best is Athaneer, a full brother to Athanio 2:10. Athaneer has been bred to about fifty mares this season, including the best in this part of the country and a few from a distance. Among those bred to him are the following: Gyp, dam of Sue 2:12½; Della 2:28 by Little Dan 2:20; Lily E. by Pasha, dam by Mountain Boy—all owned by Mr. Schafer of Fowler, Cal., owner of Athaneer; Maud Whipple, dam of two in list—this mare has a filly by her side that was sired by Athaneer; gray mare by El Capitán, dam Oregon Nell—this mare also has filly by Athaneer. They are both owned by Mr. Joe Weil of Sanger.

C. J. Berry of Klondike fame is taking quite an interest in good horses, and has bred six, including a mare by McKinney. Others are Logamont by Gen. Logan, dam by Altimont, second dam by Bayleaf by Thor. Bayswater, owned by Dr. R. E. Dixon, Hanford; a full sister to Chinwa, owned by Bob White of Easton; a bay mare by Chandler, dam by James Madison, owned by L. L. McKnight of Selma.

The writer has bred three mares as follows: Jaspine Rose (full sister to Jaspine 2:14½) by Iris, dam Jaspine Ayers by Bay Rose; second dam Babe (dam of Jasper Ayers 2:09) by Altimont; third dam by San Francisco Patchen; fourth dam by General Taylor. This mare was bred last year and now has a brown colt by her side that is 20 days old and has all the points of a goer. Visalia Rose (full sister to Visalia 2:12½) by Iris, dam Scratch by Loppy; second dam s. t. b. a thoroughbred. This mare should prove to be a good brood mare, as she is large and well built. Mr. Schafer says she looks very much like Athalie, the great brood mare owned by Geo. L. Warlow of Fresno and the dam of Athaneer.

My other mare I call Fly. She is also by Iris, dam by Roderick Dhu; second dam a thoroughbred mare from the Carr & Haggin ranch. This mare also has a colt by Athaneer that is now a year old and, if it had not been crippled by mules when one day old, it would have been a racer.

Athaneer has served other mares by Athadon, Juio, El Capitán, Strathway and Confidence, making in all about fifty mares.

Mr. Schafer has taken Athaneer to Fresno and turned him over to Mr. Albertson for preparation, with the intention of giving him a record this year. I have heard men that have been over the Grand Circuit say that Athaneer, in their judgment, will make one of the best sires in California.

EMPLASTRUM.

## Good Advice.

A good horse may succeed in beating a slow field when he is not in perfect condition, but he will prove a certain failure when matched against fast horses unless he is in perfect condition.

There is but little chance of success with a horse suffering from fevered, sore and tender feet. During the run of such fever conditions all growth of the foot is stopped, partially, and sometimes wholly. Any growth during such conditions will be weak and brittle, entirely unable to stand track and race work.

The celebrated trainer, Edwin Geers, says: "I have used Campbell's Horse Foot Remedy for several years, and find that it is the best thing I have ever used for horses that have a tendency to sore, hard, dry and brittle feet that will not grow. I find that when I use it around the coronet, well rubbed in once or twice a day, it grows a foot very fast and makes it healthy, tough and elastic."

Henry Gregory died last week at his residence, 251 South Olive street, Los Angeles. In his younger days he was a noted trotting-horse driver, trainer and breeder. He went to Southern California in March, 1873, from Detroit, and while there trained horses for Dr. Wise and later was employed at the Palo Alto farm. Mr. Gregory was born in 1840 in Dutchess county, N. Y., in 1840.

## JOTTINGS.

## BETWEEN SEVENTY AND EIGHTY HORSES

Between seventy and eighty horses are at the present time, training in the shape for the California track. While that number of horses and jockeys training would make the average California track look pretty busy, they do not give the Pleasanton track the appearance of those who are accustomed to seeing the training ground during the winter and early spring when two hundred or more horses are given their daily work. It is a busy place, however, and one soon learns after reaching the track that all the fast trotters and pacers have not been shipped east.

Among the trainers who have horses at Pleasanton are Geo. A. Kelly with 7, S. K. Trefry with a couple, H. Brown of Chico with 6, Barney Simpson who has 8, Mills & Sanders with 7, William Cecil with 10, a larger portion of which belong to the Nutwood Stock Farm; Ben Chaboya with 9, James Thompson with 7, H. Dunlap with 3, Sutherland & Chadbourne with 10, Mose Hart with 3, J. R. Springer with 2 and George Blanchard with 1. Mr. C. L. Griffith, owner of Bonnie Direct, is working a few colts of his own and doing most of the driving himself, and Sam Gamble is looking after the interests of Stam B. There are also several owners who live in the country adjacent to Pleasanton and who visit the track once or twice a week to work their colts, so that the place is not a lonesome one by any means.

Last Saturday was as delightful a day there as this glorious State of sunshine can produce, and there were quite a number of visitors from San Francisco, Oakland and other points. The track, to my mind, was in better shape than it has ever been even during the winter months, and is now probably the best training track in America—bar none. I walked around the first turn and there was not a cuppy place to be seen, and the trainers told me it was the same all the way round. Nearly all the water is put on at night and the track is soaked—not merely sprinkled. Then the harrows and scrapers are put to work early in the morning, and by the time the trainers are out it is as near perfection as a track can be made.

Mr. Frank H. Burke of this city was one of the visitors to Pleasanton track Saturday to see how his horses were doing, and had the pleasure of seeing Henry Sanders drive his three-year-old candidate for several futurities, Search Me, a mile in 2:29, last quarter in 35 seconds. This colt is a big, strong-going, good-gaited trotter, and is considered one of the most promising youngsters in California. His breeding is high class, as he is by Searchlight 2:03½, his dam being the good old race mare Wanda 2:14½, dam of the trotting sensation of last year, The Roman 2:09½. Search Me is a much more rugged and stronger colt than The Roman was at the same age, and is a better prospect. Henry Sanders thinks so much of him that he went to La Siesta a few days ago and offered Mr. Burke \$1000 for him, and when the offer was declined tendered the same amount for a half interest in the colt. Mr. Burke respectfully declined this offer also, and thinks him worth fully as much as his half brother that he sold for \$5000.

Fred Chadbourne is driving a big bay pacing gelding by Directum at the track that, while he wears the hobbles, looks like a good prospect for the slow classes this year. Fred has only had him in charge three or four weeks, but drove him a mile in 2:18 Saturday with the assistance of James Thompson driving Col. Kirkpatrick's runner by imp. Clevedon. The pacer belongs to a Stockton man and Fred has him going good-gaited and very steady. He will be a new one for Directum's list before the summer is ended, and the mark ought to be around 2:12 or better.

That Clevedon runner excites my admiration more and more every time I see him. He has such a nice easy stride, and no educated horse ever had a better head. He seems to understand his business thoroughly. He seems to know what horse he is expected to prompt, and no matter how many other come up and go by them, he hangs on to the horse he starts out with and will stay in the proper place without being by his driver, and can be taken back a little or much as the driver desires.

Bonnie Direct is getting some grand looking colts and it does not look as if anything can stop him from being as great a sire as he is a race horse. Mr. Griffith took to the big paddock just west of the track Saturday morning and showed me Bonnie's colts. The filly and was just about twelve hours

old, having arrived the night before. Its dam is Jennie Mack 2:01 by McKinney 2:11½, and the little miss has the McKinney color—dark brown. She has one white hind ankle and a very little white on the coronet or heel of all her other dainty little feet. She was as sprightly as a cricket and seemingly intent on getting all there was in the maternal font, which seemed a very generous one. The pedigree of this little filly would make a pedigree expert scratch his pate quite a while before he could think of one that was better bred. Bonnie Direct is the sire, one of the greatest of the great Director family, and the dam a 2:10 race performer, that has already produced a four year old with a record of 2:11½, and is sired by the leading sire of 2:15 performers of his age. Then the filly's grandam, Leonor 2:24 by Dashwood, is the dam of four in the list, viz: Jennie Mack 2:09, Dr. Book 2:10, Miss Jessie 2:13½ (dam of Quate (3) 2:18), and Judd 2:24½. The next dam is a producer and there are nothing but producing sires and dams for four generations back, Bonnie Direct himself being the only exception, and he has no colts old enough to start as yet. Jennie Mack is owned by Doctor Book of Los Angeles, and it would doubtless take a pretty good-sized offer to tempt him to part with her and her filly by Mr. Griffith's stallion.

James Thompson came back from the Cleveland sale in good spirits in spite of the fact that the horses he took over did not bring as much as it was expected they would. There is good reason for his exuberance however, as he was accompanied on his trip home by his daughter, who has just graduated as a trained nurse from the celebrated Bellevue hospital in New York. Miss Thompson was the gold medalist of her class, an honor that requires much study and the closest application as well as natural ability to achieve. Mr. Thompson worked Clipper a nice easy mile in 2:12½ on Saturday and Col. Kirkpatrick tells me it is his intention to send this son of Diablo over east again in the fall and start him in the late events for his class. Clipper is as near in perfect condition right now as any horse ever is. He is probably 150 pounds heavier than when he took his record, seems to enjoy his work and paces a fast clip easier than he ever did. He wears the hobbles, but they are very loose and light, and strange to say did not chafe his legs from the first, so he does not go against them very hard.

There are two colts in the Thompson string that attract the eye of everyone who sees them at work. They are both two year olds, bred at Palo Alto. The photos of them on the front page of the BREEDER AND SPORTSMAN this week do not flutter in the least. The Altivo colt is owned by S. Christiansen of this city, is a pacer, and a very fast one. He showed Thompson a half in 1:06 two months ago and is such a natural gaited youngster that great things are expected of him. The other colt is a trotter and is by Monbells out of Elden by Nephew, second dam Eleanor by Electioneer, third dam Sallie Gardner, thoroughbred mare by Vandal. Col. Kirkpatrick who owns him has selected the name Elden-Bells for this handsome youngster and it is not only euphonious but means something—recalling the name of both sire and dam, and suggesting at once the famous Beautiful Bells family. Elden-Bells will be heard from in the future as he is already showing speed.

Geo. A. Kelly, to whose excellent management is due the present fine condition of the Pleasanton track, has a string of seven horses and colts at work. He bred his grandly bred two year old colt Bonnie McK. by McKinney out of Bon Bon 2:14½ to four mares this year. Mr. Kelly proposes to work the colts that result as soon as they are old enough and give them records, thus putting Bonnie McK. in the Great Table at as early an age as possible. This is the sensible plan. Mr. Kelly says he does not want to use the excuse "had no opportunity," which is so often made by stallion owners. His mare Anigito 2:21 by Antrim, foaled a fine black filly by Bonnie Direct 2:05½ last week.

A pacer that attracts much attention at Pleasanton is the handsome bay fellow Billy Red, that Mr. J. D. Springer recently purchased from Mose Hart. Billy Red was worked out Saturday last with his new owner as driver, and the horse not only showed a good clean gait and good manners but speed as well. He is a very likely candidate for a mark down below 2:15.

The Nutwood Stock Farm horses are doing well this year. There will be several new performers from that speed factory this year. Mr. Carter has colts and fillies by nearly every prominent stallion in California on his farm, besides many good ones by his great sire Nutwood Wilkes. Cecil was driving a diminutive little filly Saturday that can score like a runaway locomotive on a down grade. She is by Searchlight 2:03½ out of Zeta Carter by Director, second dam Lida W. the dam of Nutwood Wilkes.

Soon after she was weaned she took the distemper and the next year got a dose of the disease very much like it that was so prevalent in California that season. The result was she did not grow much, but it did not stop her speed as she can simply fly at the pace. Mr. Carter has bred her to Bonnie Direct and will turn her out to grow some. After she raises a colt he will give her a record, and it is an even bet that it will be close to 2:10 the first year she is raced. Mr. Carter tells me that Lida W.'s foal by Stam B. is about as nice a youngster as he has owned.

Sam Gamble is still at Pleasanton with "the great horse" as he delights in calling Stam B. I guess Sam has picked out about as many great broodmares as the next man and he selected them before they had produced, which is pretty good proof of his ability in that line. When over east a few years ago he purchased the mare Simone by Simmons, out of the great broodmare Mi Lady by Baron Wilkes and brought her out here. She is now the property of S. Christiansen who has had her bred to Stam B. If the resultant foal is a great one (and it can hardly help being anything else if it has half a chance) give Sam credit for it, as the mating is on the lines he has talked and written about for many years.

Barney Simpson and "Dad" Trefry were working a couple of Diablos Saturday that look like the real goods and when they get ready to start in the races at the Breeders meeting they should be close to the money.

Ben Chaboya was away on business the day I was at Pleasanton, but the trainers all say he has nine or ten as nice horses as one would want to see. He has a pair of roadsters for sale that are worth more than he asks for them. All of Ben's horses look to be in fine condition.

There has been considerable printed in the papers during the past few weeks anent the ownership of Kinney Lou, the horse that Budd Doble purchased from Douglas Cone of Red Bluff last year. The following from the last issue of the *American Horse Breeder* of Boston bears the looks of genuineness:

Budd Doble was in Boston last week and bought Kinney Lou from Mr. John Shepard, in accordance with an agreement entered into between Mr. Shepard and Mr. Doble at the time of the purchase of the gelding by Mr. Shepard. It was understood at the time that Mr. Shepard purchased Kinney Lou that any time Mr. Doble wanted the gelding at a stipulated figure, which represented a good profit to Mr. Shepard, he could have him. Mr. Shepard said he had faith in the gelding and disliked very much to part with him, and offered Mr. Doble \$500 to let the trade stand as it was, but Mr. Doble was very anxious to have the gelding and the transaction was closed in accordance with the original agreement.

A. Ottinger, the well known railroad ticket broker of this city has made a new purchase. Mr. L. J. Rose of Los Angeles was in town this week and sold Mr. Ottinger his famous trotter Zambra that holds the world's five mile record of 12:24. Zambra was bred by the late A. G. Gurnett of Alameda county and is by McKinney out of Nellie Fairmont by Fairmont. Mr. Ottinger will permit Zambra to keep his engagements at the Breeders meeting and has sent him out to the old veteran Pat Farrell on the Point Lobos road, who will get him ready for the circuit. Mr. Ottinger always drives a good horse and has owned many fast ones. He made more than one successful campaign with the late Tommy Keating as a partner. His reappearance on the California circuit this year as an owner will add life to the races, as Mr. Ottinger always likes to have a bet down when his horse starts. In Zambra he has a good reliable trotter that is faster than his record of 2:16½.

Frank E. Wright of Sacramento went east three weeks ago to look after his horse Kelly Briggs 2:10½ that Farmer Bunch took over there to race. Mr. Wright sends word that he found the son of Bayswater Wilkes in fine shape and ready to start in his class and make a good showing. There is to be a big day of racing at the Indianapolis, Indiana, track on July 4th, and as a good purse is offered there for a 2:10 pace it is probable that Kelly Briggs will make his first start there. If he is good he should make quite a showing as all will concede who saw him force Miss Logan out in 2:06½ at Woodland last year. Mr. Wright will remain east long enough to see his horse race two or three times and will then return.

The owner of the New Zealand pacing champion Ribbonwood 2:09, Mr. D. J. Price, arrived in San Francisco on the last steamer from the Antipodes and has been visiting some of our California stock farms and tracks. He went to Tanforan last Wednesday and says it is a better track than his horse made his record over. All California horsemen know that Tanforan was built for a running track and is not at the

present time what would be called a fast track for either trotters or pacers, although the new Tanforan Driving Association intend making it as good as the best very soon. Mr. Price says the track on which Ribbonwood stepped in 2:09 is a five furlong oval, on which the turns are not thrown up. This makes the record made by the son of Wildwood seem more wonderful than ever. It is to be hoped that Mr. Price can see his way clear to bringing his pacer to this country, and that a match can be taken on with some of our California horses. I don't doubt in the least that a race could be arranged for a big purse in which Clipper 2:06, Miss Logan 2:06½, El Diablo 2:11½, Kelly Briggs 2:10½ and others would be entered against the New Zealand champion. And if the race could be pulled off at Tanforan under the auspices of the new club, the big grand stand would not accommodate half the crowd that would go to witness it.

A Sacramento scribe says that "Gov. Pardee is again in harness and racing hard to catch up with his work." Probably when the Governor has time to reflect he will cut off the appropriation for his own salary on the ground that the State should not pay out any money for harness racing.

A California bred colt has won the German Trotting Derby. The event came off at the Berlin-Westend trotting course on May 21st and was won by Rittersporn, a bay colt bred at Oakwood Park Stock Farm. The colt is now a four year old. He was sired by Chas. Derby 2:20, and his dam is Rubicelle, a daughter of Prince Red. The colt's second dam is Inex by Sweepstakes out of Dolly Bull by Kentucky Bertrand. Inex is the dam of Our Jack 2:13½, Alamo 2:29½, and the three year old colt Owynex, that P. W. Hodges is now training at Santa Ana. Rittersporn won the race, which was for 3200 metres, in 5:28 9-10. This is 18 metres less than 2 miles, the time being at the rate of about 2:42 per mile. The value of the purse was about \$3750. Oakwood Park Farm is to be congratulated on the winning of this event. For years past German horsemen have been heavy purchasers in America, being prominent at all the Eastern sales. They have purchased with a view to entering the horses bought in the leading trotting events at Berlin and Vienna, and for a green Californian to come out and win the German Derby of 1903 against the pick of eligibles, American and European bred, is a distinction that is worthy of note.

#### At Woodland's Fast Track.

[Woodland Mail, June 17.]

There are at present a large number of horses in training at the race track. The track is in good condition and some fast time is being made. The "old leaguers," John A., Penrose, Smuggler, Sutter, Belle Rose, Gertie A. and Lena A., are all working well and are expected to lower their records this year. Among the youngsters there are some very promising ones, and they are all moving nice.

You can drive out to the race track most any morning and witness some good sport.

If they don't happen to be working any horses, hunt up Hi Hogaboom and he is always ready to entertain you with some pleasing reminiscences of past racing days.

Walt Mastin has the largest stable of horses at the track. In his string are John A. 2:12½, Penrose 2:17, Wild Rose, Celmar, Nora S., Marvin Wilkes, Gold Crown and Loreta. Marvin Wilkes is a two year old trotter and will start in the futurity stake at Petaluma during the breeders meeting.

John Norton has Smuggler 2:17½ and Flying Jim, a green colt by Gossiper Jr. Both horses are working well.

E. Donnelly of Colusa has Sutter 2:28, and a youngster called Beckwith Chips.

Det Bigelow, who never says much, but has always got something under wraps, has Gertie A. and El Primo, both very promising young ones by Diablo. Dart, a three year old by Hector, Mono by Falrose, and Lena A., winner of the Occident Stakes in 1898.

Hi Hogaboom, the veteran driver and trainer, has a stable which, if looks count for anything, will certainly get some of the money. They are Hops by Don Marvin, who has already this season worked a mile in 2:15; Perkins, a green trotter, and Bart, a green pacer, have done miles in 2:19½. An unnamed three year old, who has done half the route in 1:10, and a two year old, unnamed, which has done quarters in 39½.

R. H. Nason was not at the track, but we learned that his stable consists of Belle Rose 2:18, and Glenn Rose, Azarine, Roosevelt and Tuberlina, all promising colts, which are working well.

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulkies. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

#### The Great Sale Next Tuesday.

Not for years has there been such a demand for catalogues of a sale as has been created by the announcement of the closing out of the horses owned by the late Henry Pierce, which begins at the Occidental Horse Exchange in this city next Tuesday at 10:30 A. M. Letters have been received at this office from prospective buyers as far away as South Carolina, and this week a telegram came from Arizona asking that catalogues be mailed the sender immediately. There is every indication that a record breaking crowd will crowd Mr. Layng's big pavilion when the first horse is led into the ring and that it will not take long to dispose of the 77 head that comprise this consignment.

Just to help the sale along we suppose, and to show the Sidney Dillons are all that is claimed for them, the mare Lou Dillon took the world's matinee record for mares to wagon last Tuesday trotting the mile at Cleveland in 2:06½ lowering the record of Lucille three quarters of a second. There are a number of the get of Sidney Dillon in this sale.

It would be hard to name a stallion of any prominence as a sire in California whose progeny is not represented in this dispersal of one of the greatest stock farms ever founded. And all are out of good dams, mares that were selected by Mr. Pierce for their individuality, speed and blood lines. Here are a few selected at random from the catalogue:

McMyrtle a bay colt foaled 1902, by McKinney 2:11½, dam Myrtledale by Iran Alto 2:12½, second dam Nettie Nutwood (dam of Hillsdale 2:15) by Nutwood, third dam by Williamson's Belmont.

Athenian, bay mare foaled 1891, by Steinway 2:25½, dam Ida Wood (dam of Owyhee 2:11 and Babe Marion 2:17½) by Simmons, second dam by Mambrino Patchen.

Annie Dillon, chestnut filly foaled 1900, by Sidney Dillon, sire of Lou Dillon 2:06½, Dolly Dillon 2:07, etc., dam Ceta (dam of 1) by Piedmont, second dam Cecil (dam of 2) by Gen'l Benton, third dam Cuba (dam of 1) by Imp. Australian, the great thoroughbred sire.

Matin Bell, brown gelding foaled 1892, by Mendocino, sire of Monte Carlo 2:09½, Idolita 2:09½, etc., dam Ladywell (dam of Local 2:19½ and half sister to Lorita 2:17½, dam of Alta Vela 2:11½, by Electioneer.

Custer, chestnut gelding by Sidney Dillon, dam Maud (dam of 2 in list) by Nutwood, second.

Nordica 2:19, gray mare foaled 1892 by Advertiser 2:15½, dam the great broodmare Sallie Benton by Gen'l Benton, second dam the famous Sontag Mohawk by Mohawk Chief.

Elsie, dam of Palita 2:16, Rio Alto 2:16½, Novelist 2:27, Mary Osborne 2:28½ and Salvina 2:30. Elsie is by Gen'l Benton out Elaine 2:20 (dam of four in the list), by Messenger Duroc, and her grandam is famous Green Mountain Maid, dam of Electioneer. She has a magnificent colt at foot by L. W. Russell, son of Stamboul 2:07½.

Lady Rea, sister to Thomas R. 2:15, being by Iran Alto 2:12½, dam Yedrel by Nutwood.

Al Diablo Mac, a four year old by Diablo 2:09½ out of Hazel Mac by Director.

Menbaylo, a five year old mare by Oro Wilkes 2:11, dam Menlo Belle by Menlo, second dam San Mateo Belle by Speculation.

These are but samples of those to be sold and the rest of the goods will fully come up to the samples. Mr. Pierce devoted much time and study to selecting his mares and mating them, and few achieved the success he did.

To the farmers and breeders, and all who love good horses and are conversant with the times—and see that with the addition of speedways in all the large cities of the United States and the closing out of so many large trotting horse breeding farms there must be an increased demand for fine track and driving horses, this sale offers many golden opportunities which must not be overlooked.

#### L. A. is by Richard's Elector 2:170.

GRAYSON, Cal., June 14, 1906.

EDITOR BREEDER AND SPORTSMAN—I see by the issue of the 13th an inquiry of the breeding of L. A. L. A. is owned by me, and is sired by Richard's Elector, his dam by Butterfield St. Clair; second dam by Williamson's Belmont. L. A. has trotted a mile on the Modesto track in 2:17. He has had very little work and his colts show up remarkably fine.

L. A. RICHARDS.

At the opening of the Cedar Valley Circuit at West Union, Iowa, during the last week in May, Banco, a bay horse by Barondale, won the 2:35 trot and took a record of 2:25½ in the second heat. Owing to heavy rains the track was very slow. Several of the Baronades in Iowa will get records this year and his list will grow fast from now on. He has made a good season at the San Jose track, having had a number of very choicely bred mares.

#### Death of a Pioneer Stock Breeder.

Ross C. Sargent one of California's successful pioneer farmers and stock raisers, died suddenly at his home in Stockton last Monday. The Stockton Mail says:

"The deceased was born in the town of Thornton, Grafton county, New Hampshire, and was in his eighty-third year. He was brought up on his father's farm until the age of seventeen, when he went to Boston and worked at agriculture in that vicinity for two years. After engaging in several other vocations he journeyed to Chicago in 1847, and went into the ice business. Selling out in 1849, he came to California. He located first in El Dorado county and put up a trading post there, making trips to Sacramento now and then and hauling freight. His two brothers, with whom he had crossed the plains, were with him at the post. After the brothers had separated temporarily, R. C. Sargent engaged in cutting hay near Sacramento, with a scythe for which he had paid \$75 in that town. Subsequently he employed one of his brothers and another man at \$10 a day each to do the cutting, while he hauled the hay—which grew wild and could be obtained for nothing—to his home in El Dorado county. Almost immediately afterwards an influx of immigrants came and he sold the hay—eighty tons—at a 12½ cents per pound. The immigration was so great that their trading post grew to be half a mile in length, and there was a continuous stream of wagons from the post to Sacramento, a distance of thirty miles.

Mr. Sargent went into the cattle business in 1850. In 1864, which was considered the driest season ever known to that date in California, the Sargents had to send their cattle to Bouldin Island to save them. In 1862 Mr. Sargent started the work of reclaiming 16,000 acres of overflow land in the vicinity of Sycamore Slough, and it was not until 1891 that the work was completed. In fact, Mr. Sargent was the pioneer in reclamation work in this part of the State.

R. C. Sargent was a remarkable business man and accomplished much during his life. He was a staunch Republican, and for many years took an active part in politics. For four sessions of the Assembly he represented his district, and especially devoted his time to work in committees that had charge of the swamp and overflowed land matters. For years he had been increasing his real estate holdings until he was probably the largest property owner in San Joaquin county. The deceased left an estate worth \$1,000,000."

Mr. Sargent took great interest in standard bred horses and bred quite a number of trotters. He was the breeder of Neernut 2:12½, Fanny Fern (the dam of Balkan 2:15 and Molly Drew 2:27), Ross S. 2:19½ and many other horses with records.

#### On Stanley 2:17 1-2 by Direct 2:05 1-2, dam Lilly Stanley 2:17 1-4.

SAN BERNARDINO, June 16, 1903.

BREEDER AND SPORTSMAN—William Rourke, the breeder of Baby's Gift, her full sister Merry Christmas by Christmas, Hazel Kinney 2:09½ by McKinney, and Wamba out of Baby's Gift, by Zombro, has the good fortune to own a colt from Baby's Gift that is all any horseman could ask for in form and size, and is a full brother to Hazel Kinney. Merry Christmas dropped a splendid colt by Zolock 2:11, he by McKinney.

Either "Mr. Rourke was born under a lucky star, has an extremely large bump of intuition, or else he is a man of rare good judgment regarding the essentials of a stallion," was the remark made by a man who examined On Stanley (2:17½ at three years). The blood lines he represents need not be referred to in detail. Starting as they do with a full brother to the famous Dexter, and leading or keeping abreast of all other families in the production of champion harness horses to date, his masculine neck, strong, good-sized head, with large beautiful clear eyes well in front, with perfect feet and legs, his coat of hair a magnificent wine colored brown, without white, weighing eleven hundred pounds, is only a hint at a description of this horse. The veteran trainer S. E. Kent, who had On Stanley a couple of weeks, pronounced him a trotter from instinct rather than from training, and to prove his theory had one of his men drive On Stanley a mile the day of his sale, the last quarter of which over fifty watches timed at 32½ seconds, a wonderful flight of speed for a horse out of training as fleshy as he was.

The introduction of this horse to our community gives those not wishing to raise pacers a chance to breed to a pure gaited trotter.

ALCANTELLUM.

Hon. Jesse D. Carr of Salinas, celebrated his eighty-ninth birthday on Wednesday of last week. The sterling old pioneer received many congratulations on the occasion.

Jackson's Napa Soda does not tangle the feet.

# Notes and News.

Al Macdonald is training quite a string of trotters at the Meek track, Hayward. Besides Iloilo 2:16½, Hopper 2:17½ and several colts belonging to the Meek estate, he has What Is It 2:16½ that is going like a race horse in his work. The Meek track is in fine shape and all the horses are doing well.

This is the time to buy well bred trotting and pacing horses. California has few stock farms remaining. The prices of good horses increase every day. The sale of the horses owned by the late Henry Pierce will begin Tuesday next at William G. Layng's Occidental Horse Exchange. Sale begins at 10:30 A. M.

Mrs. C. L. Jones of Modesto, Cal., owns a mare by Waldstein 12597, dam the registered mare Rosa by Guy Wilkes, that is a coal black and a handsome good gaited trotter. This mare was bred to Diablo 2:09½ last year and on April 28th foaled a splendid filly. The mare was bred this year to Guy McKinney.

The program of the great Blue Ribbon meeting at Detroit has been issued by Secretary Pettit. The \$5000 Chamber of Commerce pace is down for the opening day, July 20th, and the \$10,000 M. & M. trot will be called the second day. They are five days of racing, with five races each day, and the total amount of the purses is \$44,000.

Leonor, dam of Doctor Book 2:10, and Jenny Mc. 2:09, has been purchased from her California owner by H. B. Gentry, and is now at the Gentry Farm, Bloomington, Ind., where she has following her a horse colt, an own brother to Doctor Book and Jenny Mc. She has, of course, been bred back to McKinney.

Trilby, the little black mare by Direct that Mr. Galleagos of Mission San Jose sent east with the Salisbury string, paced a half in 1:03 at Empire track week before last, with the final quarter in 31 seconds. Ben Walker drove her and afterwards took out the handsome mare by Diablo, owned also by Mr. Galleagos and drove her a half in 1:02½.

L. H. Todhunter of Sacramento has sent two of his best mares all the way to Salem, Oregon, to be bred to Zombro 2:11. They are Italia (dam of S. d. Durfee 2:20) by Sidney, and Silver Bell (dam of Zombowette, trial 2:17 at three years old) by Silver Bow 2:16. Both mares have grand colts at foot by Zombro and Mr. Todhunter wants more of the same sort.

William G. Layng sold last Tuesday evening a consignment of draft horses from Yolo county. They were consigned by various breeders and were all large good-looking horses. The average received for the entire lot was \$175 per head. The highest priced horse was a big bay gelding weighing close to 1500 pounds, five years old and well broken to work anywhere. He brought \$270.

A valuable trotting mare, sister to the pacer Joe Wheeler 2:07½, and owned by Mr. E. J. Boust of Fresno, was severely injured in a collision with an automobile last Wednesday. A tendon of one of her front legs was severed and she can never be used for anything but breeding purposes in all probability. Mr. Boust had refused \$2000 for her a few days previous.

Mr. G. Wempe, well known to California horsemen as the owner of the fast mare Belle W. 2:16 by Director, was united in marriage last Wednesday to Mary Pellerano, an accomplished young lady of San Jose. The happy couple have gone to Europe for their wedding tour, and on their return will take up their residence in this city, where Mr. Wempe is the senior member of the well known firm of Wempe Brothers, box manufacturers.

Woodland will hold an agricultural fair and race meeting notwithstanding the veto of the bill appropriating State aid. Twenty-five prominent farmers and business men held a meeting last week and decided to become responsible for such an enterprise. All the necessary committees were appointed and a canvass for subscriptions commenced. The meeting will probably be held during the week preceding the State Fair. O. A. Lowe is president, G. N. Merrill, vice-president, and C. F. Thomas, secretary.

There will be racing at Tanforan track on Saturday, July 4th, under the joint auspices of the Golden Gate Park and the San Francisco driving clubs. The first-named club will provide two races for purses of \$100 each, divided into three moneys. Each of these races must have five entries. The San Francisco club members will provide three races, and all will make good contests, as the horses will be as closely matched in speed as possible in arranging the races. The Tanforan Driving Association has given the aforesaid clubs the use of the track for this occasion.

Hiram Tozier recently talked as follows in regard to the get of Idolita 2:09½: "The most peculiarly gaited lot you ever saw when first broken. Why, at first they will simply hop about, no gait whatever. I just put on a pair of weighted bell quarter boots with a heavy shoe. In a few trips they get squared away, and then the weight cannot be taken off too quick. They are the poetry of gait and action, and never want to make a break. Idolita is sure to be a great sire, I'll tell you." Tozier has a couple of great two year olds by Idolita. They are so well developed that from appearance one would naturally think them aged horses. Pierpont Morgan, whose dam is Queen Regent 2:29½, by Axtell 2:12, he worked in 2:37½, the last half in 1:15½, quarter in 30½ seconds, and final eighth in even 17 seconds. The Victor, out of a mare by Dexter Prince, he drove an eighth in exactly 17 seconds. He is the property of Daniel Mahaney.

The fastest workout that has been reported at Charter Oak this season occurred last Saturday afternoon, when Mart Demarest stepped the pacer Prince Alert 2:00 an eighth in 14 seconds, without hoppers. More than fifty people witnessed the performance and held their watches on it. When Mart Demarest stepped down from the sulky after the workout he said: "That is the fastest Prince Alert ever went, with or without hoppers, in a race or workout."

Since his arrival at Cleveland, Dan Patch 1:59½ has had a new set of shoes placed on his feet. Each of the four pieces of steel weighs about five ounces, making a little less than a pound and a quarter all around. In addition to this the pacing champion will wear quarter, knee and arm boots when he goes this year against the record. His rigging is limited; in fact, he looks almost undressed as compared with some of the other horses at the Cleveland track.

The State Board of Agriculture will meet on Monday next at Sacramento to elect a President and Secretary and begin arrangements for the fair of 1908. The following gentlemen comprise the board: Grove L. Johnston, C. W. Paine, William Land, Thomas Fox and J. W. Wilson all of Sacramento, Benjamin Rush of Suisun, L. J. Rose of Hueneme, James Whitaker of Galt, F. W. Covey of Palo Alto, Frank H. Burke of Santa Clara, E. W. Howard of San Mateo and William Johnston of Richland.

A cablegram was received by George H. Ketcham from Bristol, England, a few days ago, informing him that the chestnut gelding Ginger Snap, recently purchased by him for Walter Winans, had taken the first prize at England's greatest show event. The horse was purchased by Mr. Ketcham at Detroit, and was sent to England. He was entered in the pace and action trial, one of the highest class show events in England, and won the cup. The prize is awarded to the best horse imported into England during the year.

A California thoroughbred won the Suburban at Sheepshead Bay, New York on Thursday. Africander is the colt that did the trick and he is a three year old, bred at the Rancho del Paso. He is the first three year old to win this classic handicap which is an added honor. Africander is by imported Star Ruby out of Afric Queen by imp. Darebin, second dam Cleo by imp. Ill-Used, third dam Cleopatra by Kentucky, fourth dam imp. Babta by Kingston. The track was a quagmire owing to rains, and the time was 2:10 2-5 for the mile and a quarter. Africander only won by a head from Herbert. He was ridden by Jockey Fuller and carried 110 pounds. The odds against him were 15 to 1.

A Los Angeles exchange says: There has been nothing done as yet regarding the proposed racing matinee scheduled for the Fourth of July by the Los Angeles Driving Club, and it is probable that it will not be given, as many of the members will not be in the city at that time. Another thing that has been against it is the illness of the secretary, Dr. Ralph Hagan, and while he is ably seconded in his work by Mrs. F. E. Chandler, he has not been able to arrange the details of a meeting. If it is possible to bring off a matinee it will be a feature of the Fourth of July festivities, as these meetings are always enjoyed by the public and on holidays are attended by thousands of persons.

The men around "Doc" Tanner's barn were discussing the intelligence of the various horses that they had handled, when the name of John A. McKerron was mentioned. "You fellows can talk all you want to," said the swipec who had been looking after the great stallion, "but there's the boy that knows it all. He has more good sound sense in one minute than any boss that ever stood on four feet. I guess I know, because I have been with him night and day for more than a year. Why, he knows me as well as a child would. He has my footstep down so fine that every time I come within hearing distance of him he begins to call me. Every time a fellow with a camera shows himself McKerron begins to spruce up, so that he will take a good picture. He knows just as well as you or I what is coming. Honestly, I believe that he would walk right out of his stall and strike a pose if we would let him. Yessir, he would tag right along after that photograph fellow until the picture machine was leveled at him, and then he would stick up his ears and hold up his head until the operation was all over. He's the wise one, all right, all right, and don't you ever make no mistakes on that."—Ky. Stock Farm.

Good prices were realized at the Tranter-Kenney sale of trotters and pacers held two weeks ago in Boston. It is said to have been the best combination vendue ever held in "The Hub." Some old celebrities were sold for very small figures, most prominent among them being Ansel, the Electioneer stallion for which Robert Bonner once gave \$20,000. He went for exactly \$35. Clinton B., credited with a mark of 2:08½, made only \$300 and Loma 2:14½, a very well bred Arion mare, went to her breeder, J. Malcolm Forbes, at only \$400, at which figure she must be considered one of the best bargains ever picked up at a sale. Among the best sales were: Frank Bogash 2:03½, \$1650; Claycaps 2:13½, \$800; Hylie Bird 2:15½, \$575; Early Bird 2:10, \$950; Cathal Mor, two years, by Charley Herr 2:07, \$1025; Androsia 2:07, \$3300, top price of the sale; Hallie Direct, two years, by Direct Hal 2:04½, \$900. College Bells, two years, by Chimes, sold for \$1125 and several others of the consignment from Village Farm made from \$460 up to \$850. The old grey gelding Gil Curry 2:09½, now sixteen years old, sold for \$160, and Palon 2:18½ by Palo Alto 2:08½ went for \$60 less. C. X. Larrabee of Montana sold a large lot of geldings mostly in pairs. They brought remunerative prices, some going as high as \$765 the pair and \$315 for singles.

The annual meeting of the Detroit July 20th.

The annual stock farm sale will be held next August.

The horse 2:07, and the Dillon will be started to beat the team record some time this year.

Monroe Salisbury writes from New York that really good horses are scarce and as good as Government bonds.

The Valley track is in fine shape for training horses over, and as its meeting opens the circuit it is "right handy" for everybody.

Billy Andrews lately offered \$12,000 for Audubon Boy. He says the chestnut grandson of Aleyone is the best race horse in sight.

Dotty Dillon 2:07 should be quite an addition to the matinee horses in Pittsburg this year. Almost any old time she can brush a two minute clip.

Monroe Salisbury will move his string of trotters and pacers from New York to Detroit about June 1st. The Grand Circuit opens there July 20th.

Charley Herr 2:07, has his old-time speed and one day recently stepped an eighth in 15½ seconds for his owner, David Cahill, at Charter Oak Park.

About the best investment now-a-days is a well bred young mare that is standard and is sound and handsome. It pays to breed this sort and will for years to come.

The 2:15 trot for the Breeders' meeting has eleven entries and is already causing lots of talk among the horsemen. It will be a great contest from present appearances.

Vallejo, Petaluma, Woodland, Sacramento and Pleasanton is the circuit so far. This provides six weeks of harness racing and Santa Rosa and San Jose may yet get in line.

Jenny Mac 2:09 has a filly foal by Bonnie Direct 2:05½. It arrived on Friday evening, June 12th, and is one of the best looking youngsters that has made its appearance in California this year.

The Pleasanton track is in better shape right now than it was during the winter months. It is without doubt the best winter track in America and bids fair to get the reputation of being the best summer track as well.

At 10:30 A. M. next Tuesday the dispersal sale of the great stock farm founded by the late Henry Pierce will begin at the Occidental Horse Exchange. Some of the best bred horses ever raised in California will be offered.

Horses, like men, are not all as bad as they are painted. There's Mr. Salisbury's pacer Mush, for instance. He is no beauty, but he is not such a mulish looking animal as the artist of the American Horse Breeder pictured him.

See the list of purses advertised by the Pacific Coast Trotting Horse Breeders' Association for its Petaluma meeting. Entries close July 1st. There are races for all classes. It will be the greatest meeting of the year and comes off in August.

The combination sale of trotting bred horses held by William G. Layng of this city at Salinas June 6th was not a success, as prices ruled low. The best figure of the sale was \$200, paid for the mare Salinas Maid 2:30, dam of Diabla 2:15½.

Trainer Hogoboom, who is handling the string of Geo. W. Kingsbury of San Francisco, has moved the horses from the Santa Rosa track to Petaluma, where he will train them until the Breeders' meeting in August, during which several of them will start.

The experiment at Village Farm breeding establishment of mating trotting bred mares with a French coach stallion did not prove a success. We have it upon excellent authority that it resulted in just barely one animal that came up to expectations.—American Horse Breeder.

Good horses are scarce and high in the west, and owners are not anxious to sell. One New York dealer who has buyers in the west lately remarked that it now takes two men a week to buy a carload there, where one man could readily buy four carloads a week a year or two ago.

Jake Bralliar of Visalia has leased the racing qualities of his two year old filly My Way by Stoneway to Geo. W. Kirkham of Exeter, Cal., who is the present owner of Stoneway. Mr. Kirkham will start My Way in the two year old division of the Breeders' Futurity at Petaluma in August.

Anagonda 2:01½ has again changed hands. The New York Trotter and Pacer announced last week that he was sold on Tuesday, June 9th, to C. B. Knox of Johnsown, New York, for \$10,000. This is pretty good proof that the "snake" horse is as good or a better than he was last year.

Entries to Special Harness Stallion Stake.

Acting Secretary H. Lowden of the California State Agricultural Society sends us the following list of entries to the Special Harness Stallion Stake for the get of stallions nominated in 1902. The stake is for foals of 1902, to be trotted in 1905 by then three-year-olds:

John Arnett, ch c C. A. Owens by Sidney Arnett-Topsy; br f Lucy D. by Sidney Arnett-Lulu.

J. H. Bohon, ch c Bolock by Zolock-Boleen.

Alex Brown, br f by Nushagak-Nosegay; br f by Nushagak-Addie W.; br f by Nushagak-Bonnie Derby; b c by Nushagak-Adahalia; b c by Nushagak-Pioche.

Mrs. S. V. Barstow, ch c Victory by Nearest-Princess Airlie.

T. W. Barstow, b f Just It by Nearest-Babe.

J. T. Byrne, b f Nina Davis by Zolock-Rosewood B. Sam Bemmerly, br f by Diablo-Belle Button.

John A. Cole, blk c Prince Valentine by Monbells-Nordica; b f Neer Kinney by Neernut-Leonora McKinney.

L. M. Clark, b c Boul Dexter by Ouboul-Fraulein Dexter.

Cone Ranch Co., b c by Kinney Lou-Kitty Warren.

W. S. Curtis, ch f Fairy Bell by Zolock-Siren.

S. Comisto, b f Alice C. by Monterey-Hazel.

J. D. Carr, b c C. F. Bunch by Boodle-Nina B.

M. Carter, b c by Bonnie Direct by Nutwood Wilkes; b c by Zombro-Lida W.; b f by Mendocino-Mamie R. Ben Davies, b f Delilah by Zolock-Gypsey.

C. A. Durfee, b c Galindo by McKinney-Elsie; b c Covey by Mendocino-Rose McKinney.

W. G. Durfee & Co., b c by McKinney-Belle; b f by McKinney-Leonor.

M. E. Delano, b f by Stam B.-by Albert W.

E. D. Dudley, b f by Bayswater Wilkes-Bee.

J. E. Fairchild, br f Bonnie June by Zolock-Maud.

E. C. Farnum, b c by Diablo-Bessie W.

T. J. Fallman, b c Sir Robert by Nushagak-Hilda Rose.

F. N. Frary, b f by Escort-Ruth.

Geo. W. Ford, b f by Neernut-Alcola; b c by Neernut-Dew Drop.

E. A. Gammon, b c Captain Clark by Stam B.-Cleo G.

C. L. Griffith, b f by Bonnie Direct-Petrina; b c by Bonnie Direct-Alta Nola.

J. W. Gardner, ch c by Nearest-Black Swan.

Mrs. B. Griffin, b c by Bayswater Wilkes-Claribel.

W. S. Harkey, b f Devilletta by Diablo-Clara H.

R. Hogoboom, b c Waldstein McKinney by Washington McKinney-Yolo Belle.

J. W. Halle & Co., b or br c by Demanio-Corolla; b or br c by Demanio-Black Mare.

S. W. Lockett, b c McPatchen by McKinney-Last Chance.

W. H. Lumsden, br f Bonalet by Bonnie Direct-Roblet; br f Bonnie Mac by Bonnis Direct-Myrtle.

C. T. Laugenour, b c Alexander Diablo by Diablo-Alexandra B.

Wm. Morgan, blk c Kaiser by Neernut-Grace McKinney.

A. H. Martin, b c by Nushagak-Boydella.

A. J. Molera, b c by McKinney-Gianetti; b f by McKinney-Dr. Frasse's Sister.

I. Morehouse, b f by Monterey-Magenta.

L. A. Morris, br f Fanny Briggs by Bayswater Wilkes-Algerine.

W. W. Mendenhall, b g Alto Down by Iran Alto-Elsie Downs.

W. E. Meek, br f by Welcome-Rosemary; b f by Wm. Harold-Hybla.

H. W. Meek, br c by Welcome-Edwina; br f by Wm. Harold-Directress.

Owen McAleer, b f Reela Newo by McKinney-Eva Wilkes.

D. E. McDougal, b c by Stam B.-Lillian.

F. J. O'Brien, br f Zwikla by Zombro-Margery Daw.

T. A. Perrin, ch f El Carmel by Monterey-Gussie.

W. Parsons, br f Berta Mc. by McKinney-Alberta.

R. D. Robinson, br g Say When by Sidney Arnett-dam by Dick O'Neil.

F. Raschen, b f by Iran Alto-Bell Bird.

Rosedale Stock Farm, b c by Washington McKinney-Bertha R.; b c by Washington McKinney-Dahlia; b c by Washington McKinney-Darien; br c by Washington McKinney-Jessie Button.

John Rowen, b f by Mendocino-Clarion.

F. A. Ramsay, br c Hylock by Zolock-Hytu.

W. L. Spoor, b or br f by McKinney-Miss Peacock.

Thos. Smith, b f by McKinney-Daisy S.

N. M. Strong, br c Ambush by Zolock-May McKinney.

Wm. Sinnock, blk f by Neernut-Santa.

L. H. Todhunter, br f Zombelle by Zombro-The Silver Bell; b f by Stam B.-Whisper; b f Zomitella by Zombro-Itella.

C. O. Thorndquist, b or br f by McKinney-Miss Peacock.

J. C. Kirkpatrick, b c by McKinney-Flewley Flewley.

Vendome Stock Farm, b f Miss Eva B. by McKinney-Irantilla; b f Still Better by Iran Alto-Much Better.

W. W. Vickroy, b f Diabla by Diablo-brown mare by Button.

Geo. L. Warlow, b f Strathlie by Strathway-Athalie.

A. G. Willson, b g Little Medium by Dictatus Medium-Little One.

J. C. Woodrow, br f Zombelle by Zombro-Noonday Belle.

P. J. Williams, b c Duke of Monterey by Monterey-Kitty Fox; b f Mary Neilson by Monterey-Egyptian Maid; b f Belle Roodall by Monterey-Lo Lo; b c Gold Standard by Monterey-Leap Year.

C. H. Williams, b c Iranwood by Iran Alto-Nettie Nutwood; br c McDirect by McKinney-Twenty-third.

J. C. Wallace, b f Glorietta by Neernut-Tia Juana.

W. H. Young, br f Trixey McKinney by McKinney-Miss Kaiser.

Sober up on Jackson's Napa Soda.

Entries to Stanford Stake of 1905.

The following list of entries to the Stanford Stake of 1905 to be trotted for by then three year olds has been received from Acting Secretary H. Lowden of the California State Agricultural Society:

C. A. Arvedson, b c Rettus by Sutter-Lady Phelps.

J. H. Bohon, ch f Bolock by Zolock-Boellen.

I. L. Borden, blk f Roberta by Robert I -Allie Cresco; ch c Prince Robert by Robert I-Alice Bell.

Mrs. S. V. Barstow, ch c Victory by Nearest-Princess Airlie.

T. W. Barstow, b f Just It by Nearest-Babe.

Alex Brown, br f by Nushagak-Nosegay; br f by Nushagak-Addie W.; b c by Nushagak-Adahalia; b c by Nushagak-Pioche; b f by Prince Ansel-Mamie Martin.

S. Comisto, b f by Monterey-Hazel.

J. D. Carr, b c C. F. Bunch by Boodle-Nina B.

Jno. A. Cole, blk c Prince Valentine by Monbells-Nordica; b f Neer Kinney by Neernut-Leonora McKinney.

F. Crawford, b c Col. Crawford by Falrose-Bessie.

M. Carter, ch f by Nutwood Wilkes-Zeta Carter; b c by Nutwood Wilkes-Inga; b f by Nutwood Wilkes-Bessie C.; b c by T. C.-Lou G.; b c by Zombro-Lida W.; b f by Mendocino-Mamie R.; b c by Bonnie Direct by Nutwood Wilkes.

C. A. Durfee, b c Galindo by McKinney-Elsie; br c Covey by Mendocino-Rose Kinney.

W. G. Durfee & Co., b c by McKinney-Bell; b f by McKinney-Leonor; b f by Coronado-Louise; b f by Coronado-Lola.

H. M. Dennison, b f Lady Lawton by McKinney-Babe.

J. E. Fairchild, br f Bonnie June by Zolock-Maud.

G. W. Ford, b f by Neernut-Alcola; b c by Neernut-Dew Drop.

E. C. Farnum, ch c by Nutwood Wilkes-Flossie; b c by Diablo-Bessie Hock.

F. J. Fallman, b c Sir Robert by Nushagak-Hilda Rose.

E. A. Gammon, b c Capt. Clark by Stam B.-Cleo G.

J. W. Gardner, ch c by Nearest-Black Swan.

C. L. Griffith, b f by Bonnie Direct-Petrina.

W. E. Greene, gr c by Nutwood Wilkes-Little Witch.

E. P. Heald, b c San Juan by Nutwood Wilkes-Princess McKinney.

S. H. Hoy, ch g Ben Hoy, by Capt. Jones-Camilla.

J. B. Iverson, ch g Derby Chief by Chas. Derby-Ruby; b g North Star by Nutwood Wilkes-Ivoneer.

J. A. Jones, b f Alice Jones by Capt. Jones-Amy May.

G. W. Kingsbury, ch f Della K. by Silver Bow-Elma.

Jas. Kirkman, br f Mary Way by Stoneway-Viva.

J. C. Kirkpatrick, b c by McKinney-Flewley Flewley.

S. W. Lockett, b c McPatchen by McKinney-Last Chance.

P. W. Lee, b f Estrella by Grover Clay-Estarte.

P. W. Lawson, ch f News Girl by Gossiper Jr -Maud.

W. Mastin, b f Ardis by Falrose-Nora S.

A. J. Molera, b c by McKinney-Gianetti; b f by McKinney-Dr. Frasse's Sister.

W. W. Mendenhall, b g Altodown by Iran Alto-Elsie Downs.

Mrs. Jno. Norton, b g Tattler by Gossiper Jr.-Cassie.

F. J. O'Brien, br f Zwikla by Zombro-Margery Daw.

Mrs. S. Runyon, b c by Exioneer-Distress.

Fred Raschen, b f by Iran Alto-Bell Bird.

Rosedale Stock Farm, b c by Washington McKinney-Bertha B.; b c by Washington McKinney-Dalia.

Ed Sewell, b f by Geo. W. McKinney-Lulu Mack.

Thos. Smith, b f by McKinney-Daisy S.

J. R. Sawyer, b f Zelma Z. by Zombro-Mary A.

A. Solano, by Pettigru-Organette; by On Stanley-Twiny Stamboul; by Stam B.-Nashawena.

Geo. Trank, br f Lady Byron by Kentucky Baron-Lady Whips.

L. H. Todhunter, br f Zombelle by Zombro-The Silver Bell; b f Zomitella by Zombro-Itella.

Valencia Stock Farm, br f La Belle H. by Derby Heir-La Belle; br c Direct Derby by Derby Heir-Bonnie Direct; ch f Rose Direct by Direct Heir-Rose-drop.

Vendome Stock Farm, b f Miss Eva B. by McKinney-Irantilla; b f Still Better by Iran Alto-Much Better.

Geo. L. Warlow, b f Strathlie by Strathway-Athalie; b c Athasham by Athadon-Cora Wickersham; b f Sextette by Athabolo-Donnatrine.

H. C. Westerfeldt, b f Maud McKinney by Kinney Lou-Maygirl.

A. G. Willson, b g Little Medium by Dictatus Medium-Little One.

G. Wempe, br c by Nutwood Wilkes-Belle W.

M. Walsh, b c Wild Wave by Potrero-Rexy.

I. W. Hazlett, gr f Lady Inaugurita by Zolock-Blue Bird.

News from the North.

[Portland Rural Spirit.]

The citizens of Walla Walla are certainly an enterprising lot of people. They have raised money to buy the land, put up buildings, lay out and grade a mile track and fully complete a well-equipped and up-to-date fair grounds. The site selected is in easy distance of the city, and the work is progressing rapidly on the new track and grounds, which they expect to have completed in ample time to hold a rousing big fair this year.

William Hogoboom is still working over what is left of the old Walla Walla track, but is in hopes of being transferred to the new mile track by the first of July. Billy is doing a good stud season with his Electioneer stallion, Caution, while his old favorite, Lynmont, is not far behind. His young stallion Teddy by Diablo 2:09½, dam El Morine (dam of 4 in the list), is well

liked and should be a great horse, either on the track or in the stud. Glen H. is the colt two years old, by Lynmont out of El Morine, that is a very promising youngster. Kentucky Babe by Kentucky Baron, out of a mare by Antelope, is another good two-year-old. Both of these colts are entered in the Oregon Stake at Salem.

Judge Thomas H. Brents, who is president of the Walla Walla fair association, has three very promising fillies of his own breeding. They are taking their work over the Irvington track in charge of H. B. Rutherford. Belladi, a four-year-old trotter, worked an easy mile over the Irvington track last week in 2:21. She is entered in the big Lewis and Clark Stake at Salem. Miladi B. 2:16½ (pacing) is another four-year-old that is likely to be troublesome in the big pacing stake of \$2000 in which she is entered. Helen Norte (2) 2:26½, winner of the Oregon Stake last year, is working nicely, and will be a contending horse in the three-year-old stakes this year.

The Irvington Park track at Portland is now being sprinkled and kept in first-class condition. This track is one of the best for training and is convenient to all points on the fair circuit. There is plenty of room for a number of horses, and they are coming to stay. All the boys are happy, now that water is put on the track, and they now have a first-class track to train on.

O. K. Bern, an old-time Eastern trainer, has located at Colfax, where he is working a stable of harness horses. Mr. Bern has in his stable the good-looking stallion El Derby, a four-year-old trotter by Charles Derby 2:20, the sire of Don Derby 2:05, Much Better 2:07½, Derby Princess 2:08½, Diablo 2:09½, et al. This fellow has a good way of going and should learn to go fast. Since the value of horses has increased quite an interest is being taken around Colfax in the breeding of the light harness horse, and before many years it will be quite a harness horse center.

N. K. West of LaGrande is one of the many enthusiastic horsemen of Union county. Mr. West will bring out a stable of harness horses this year, including his good stallion, The Commonwealth 2:18½; Taffeta Silk, a green pacer, good enough to enter in the big \$2000 stake at Salem; Satin Royal, a two-year-old, by Bonner N. B. out of Minnie M. (dam of Trumont 2:21½), that is entered in the Oregon Stake of \$1000, and, by the way, is a very promising candidate. The above three will be campaigned this season under the tutorage of John Green, who had out the good McKinney mare Arketa last year. Mr. West is breeding quite a number of good mares to his stallion, The Commonwealth, but will end the season July 1st and place him in actual training. Mr. West is trying the double-bar shoe and finds it works to perfection. Mr. Britt, who has been working the horses this spring, thinks the double-bar shoe is a great improvement over the old style.

Grand Circuit Dates.

- Detroit--July 20 to 25.
- Cleveland--July 27 to 31.
- Buffalo--August 3 to 8.
- Empire City--August 10 to 15.
- Brighton Beach--August 17 to 22.
- Boston--August 24 to 28.
- Providence--August 31 to September 5.
- Hartford--September 7 to 12.
- Syracuse--September 7 to 12.
- Columbus--September 21 to 26.
- Cincinnati--September 28 to October 3.

Horse Owners should Use

COMBAULT'S

# Caustic Balsam

The Great French Veterinary Remedy.

A SAFE, SPEEDY AND POSITIVE CURE.

Prepared exclusively by J. E. Combaull, ex-Veterinary Surgeon to the French Government Stud.

SUPERSEDES ALL CAUTERY OF FIRING

Impossible to produce any scar or blench. The safest best Blisters ever used. Takes the place of all liniments for mild or severe treatment. Removes all Bunches or Demises from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, Etc., is invaluable.

WE GUARANTEE that any bottle of Caustic Balsam will produce more actual results than any other medicine or any liniment or ointment ever used.

Every bottle of Caustic Balsam is warranted to give satisfaction. 1 shilling, 1/60 and 1/30 per bottle. It is sold by all druggists, or we will send it by mail on receipt of the price and directions for its use. Call for it at the nearest Post Office, or by mail. THE LAWRENCE WILKINS CO., Limited, G.B.

# ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

## Red Bluff Tournament.

The 1903 annual blue rock tournament of the Red Bluff Gun Club commenced last Saturday and was finished Sunday on the club grounds near Red Bluff. Twenty-six shooters were in attendance during the first day and forty-six guns participated on the second day.

The first event Saturday afternoon was at 20 inanimate targets, \$1.25 entrance, class shooting, \$30 purse, 3 moneys. The winners were: Burgi, first \$15; Ruhstaller and Garnett, divided second, \$10; Johnson, Humble and Helman third, \$5, \$1.66 to each. There were 22 entries.

Event No. 2, 20 targets, \$1.75 entrance, \$45 purse, 3 moneys, class shooting: Skinner, first, \$25; Humble, second, \$12; Newbert, third, \$8; 19 entries.

Event No. 3, merchandise shoot, 15 targets, \$1.25 entrance, 6 classes: Thomasson, shell case; Helmar, electric exerciser; Montgomery, gun case; Newbert, fishing reel; Skinner, hammock; Bradley, hat; Ruhstaller, ham; Watkins, hunting knife; Lange, dog collar; Winter, box candy; Smith, case soda water. 26 entries.

The first race on Sunday was at 20 targets, \$1.25 entrance, \$45 purse, 3 moneys, class shooting. The winners were: Newbert, first money, \$20; Hazelbush, second money, \$15; Burgi and Payton divided third money, \$10. 40 entries.

Event No. 2, 20 targets, \$2.50 entrance, \$90 purse, 4 moneys, class shooting: Johnson, first, \$40; Gibson, second, \$25; Thomasson, Burgi and DeMerritt, third, \$15; Helman, Richards, Leach and Googenheimer divided fourth, \$10. 37 entries.

Event No. 3, merchandise shoot, 15 targets, \$1.75 entrance, 11 classes: Payton, case shells; Burgi, hunting coat; Gould, 12 bottles whisky; DeMerritt, fishing rod; G. Gibson, case fruit; Montgomery, fishing rod; Humble, hunting shoes; Johnson, whisk broom; Richards, box tea; Leach, hunting coat; Winter, picture; Rambo, elastic exerciser; Walker, driving gloves. 39 entries.

Event No. 4, 20 targets, \$102 purse, 5 moneys: Newbert, first, \$35; Helman, second, \$24; Hazelbush, Stevens, DeMerritt and Payton divided third, \$18; Richards, Joanson, Thomasson, Rose, Gusto, Burgi and Humble divided fourth, \$15; Garretson, Just and Haugh, fifth, \$10. 33 entries.

Event No. 5, championship of Northern California, 20 targets, entrance \$1.00, 26 entries. Won by F. M. Newbert of Sacramento, previous holder of the trophy. Winner received one-third of entrance money on this win and two-thirds of entrance for previous win. Newbert will also receive two-thirds of the next entrance money.

Event No. 6, 20 targets, \$2.25 entrance, \$75 purse, class shooting, 4 moneys: Newbert first money, \$30; Johnson, Stewart and Haugh second, \$20; Thomasson, Garretson and Montgomery, third, \$15; Helman and Payton, fourth, \$10. 35 entries.

Event No. 7, 6 man team shoot for championship of Northern California, 90 targets per team, \$6 entrance per team, targets extra. Winning team to receive one-third of entrance money and two-thirds of next entrance. Previous holders of trophy (Chico Gun Club team) received two-thirds of the entrance money. In this contest there were seven teams entered. The towns represented and the combined scores made at 90 blue rocks to each team, were: Dunsmaur 70, Gridley 70, Cottonwood 66, Marysville 62, Sacramento 62, Chico 59 and Red Bluff 56.

The tie between Dunsmaur and Gridley, was shot off by three men from each team and resulted in a victory for Dunsmaur with 34 hits, out of a possible 45, to 28 for Gridley.

The shoot was open to Northern California trap shooters only. The scores for Sunday were kept down by a strong south wind that blew over the grounds. Seaver, Burgi and Skinner each scored 20 straight on Saturday. Johnson, Thomasson, Humble and Helman broke 15 straight each. On Sunday, Newbert broke two strings of 20, Seaver scored a 20 straight and Payton strung out a 15 straight.

The averages were counted on Sunday's shooting only. F. M. Newbert, who made the highest number consecutive breaks, won a leather gun case. Just, highest number of consecutive misses, a case of beer. Rambo, first consolation prize, \$5. Leach, second consolation prize, a case of beer. D. S. Cone, third consolation prize, ten shins.

W. H. Seaver of San Francisco shot in a number of the events but did not shoot for any of the prizes. His longest run of consecutive breaks was 36 on Saturday and 33 on Sunday. He also made the second high average on a score of 132 out of 160. In pool shooting he made the highest average.

The pump gun squad, composed of Rubstaller, Seaver, Payton, Upson and Newbert, was the high average squad of the tournament.

Mr. Seaver takes great interest in club shoots and is always on hand when it is possible for him to be present. He has never missed a Red Bluff club shoot and is always a most welcome visitor.

The scores in the individual events are the following:

Blue Rocks, Red Bluff, Saturday, June 13th, 1903.

## AT THE TRAPS.

Three regular gun club shoots will keep the local talent busy on blue rocks to-morrow—the Union Gun Club at Ingleside, the College City Gun Club at North Berkeley and the Empire Gun Club at Alameda Point.

The Escalante Gun Club was recently organized with a fair list of members. The new club will shoot at Larkspur station on the North Shore road. Dr. Derby, Dan Ostrander, J. Lieberts, F. Trimes and several other shooters are identified with the new organization.

The club prize to be shot for this season is a beautiful silver objet d'art contributed by a lady devotee of the gun. The trophy is adapted for a combined musical and aquatic enjoyment that will make the contest for it a keen struggle in the club shoots.

The Vallejo Gun Club shoot last Sunday was well attended by club members. Charles Brown was high gun in the club race. The scores in the club match at 25 targets were the following: Brown 19, W. Beveridge 18-14, Chapell 17, Coe 17, Drake 16-16, Fitzgerald 16-15, Dunphy 16, McInery 16, O'Hara 15, Greig 14, Carter 14, Burnett 14, Magistrali 14, Kregelo 13, Turner 13-11, Grimes 12, Wood 12, D. Beveridge 11, Lynch 11, C. Mitchell 9, Hoyt 9, Lynn 7, Brady 7-5, Downing 7, Walsh 7.

The Woodland Gun Club, recently organized, held a shoot on the 14th inst at Watkins Grove near Woodland. There was a very large attendance and some fairly good scores were made. Following is a list of the members who participated and the average made by each: H. Hennigan 21, B. Rehmkne 27, E. Griffin 52, Walt Huston 21, J. Ward 20, C. Hadsall 44, C. Griffin 50, C. Capelle 50, O. Armstrong 50, L. Sieber 46, R. G. Lawson 44, J. L. Smith 50, Wm. Browning 36, W. E. Osborne 56, James Keys 4, Sam Campbell 52, E. Clanton 60, M. Diggs 33, E. Norton 80, J. Allen 35, W. F. Kean 53, J. Baird 73, J. A. Murray 53, P. Lawson 35, Art Gwinn 35, O. H. Whitehouse 40.

The Golden Gate Gun Club regular shoot for June took place at Ingleside last Sunday. In the club race fifteen shooters started. The added money, \$50, was divided by ten shooters. The race was under a distance handicap and the purse split into seven moneys for high guns. Otto Feudner made the best score in the race, 24 out of 25. Nauman, Sweeney and McConnell followed with 23 breaks. The twenty-two and twenty men were also in the money. Holling took first money in the second event at 20 targets, the balance of the purse was divided by those who had 17 breaks each.

The third race at 20 targets, reverse system, was won by Feudner (17). Sweeney, Nauman and Holling (15 each). In the re-entry race, which was substituted for a contemplated merchandise shoot, Nauman, Iverson, Holling and Feudner made the winning scores, 19 breaks each.

Silver bars were won by Feudner, Nauman, Sweeney and McConnell.

A big merchandise shoot under the auspices of the club is scheduled for August 2nd. The principal

prizes will be four shotguns—a Parker, L. C. Smith, Remington and another make will be awarded the high guns in four different classes: expert, first, second and third. Besides the regular events last Sunday a number of special pool and practice races were shot. The same distance handicaps were used in all the regular events.

The scores of the main events were the following:  
Club race, 25 targets, 50 cents entrance, distance handicap, \$50 added, 7 moneys—

Feudner	16 yds	10111111111111111111-34
Nauman	18 "	11111101011111111111-34

Justins	11011111111111111111-15

The Watsonville Gun Club held its regular semi-monthly shoot last Sunday. Carr won the first medal, Overhulser second and Richardson third. The following are the scores: Carr 16, Overhulser 15, Paltmag 11, Matthews 11, Peterson 8, Alford 9, Brewington 11, Redman 8, Richardson 14, Cupid 8, Herd 8, Albright 14, Jessen 13, Bixby 5, Winkle 16.

Arrangements are being made to hold a big two-days blue rock shoot on the grounds of the Los Angeles Gun Club near Sherman. The date is not definitely settled, but in all probability it will be on or about July 4th and 5th, and there will be the usual sweepstakes events, supplemented by a series of trophy contests, the latter to be shot for by members of the club.

Charles Van Valkenburg, Sam Smith, Will Wright and O. O. Orr, acting as a committee on reorganization, have outlined a scheme whereby the old club will be revived, and it is believed that early next week there will be a meeting called by them, at which time there will be a discussion of the situation, a constitution and by-laws drafted, officers elected and a new lease of life taken, says *The Times*. The club members have been joining in other club shoots lately to the detriment of their own club, and this action is necessary to get the organization into working order. The grounds near Sherman will be cleared off and put into condition for the tournaments to be given later.

It has been decided to make the initiation fee \$5 and it is thought there will be no difficulty experienced in securing twenty-five members at once, and within a short time the roster should be at least seventy-five. Believing that professionalism did more to kill off the old club than anything else, the new club will be carried on differently. It will be strictly an amateur club and the trophy contests will be for members only, but to offset this any Southern Californian, whether a member of any other club or not, can join the Los Angeles club. There is absolutely no connection between the club and any of the sporting goods houses of this city, and it is intended to run all shoots so that the shooter will "pay the freight." The price of birds will not be arbitrary, but will be regulated by the condition of the club's treasury, being so fixed as to keep a surplus of \$75 in the strong box at the plant near Sherman. There is nearly half a mile of fencing, a house, trap boxes and gun racks, together with pulling gear and other paraphernalia, and it will cost the new organization about \$150 to take this over.

James Matfield, the Los Angeles crack trap shot recently returned home after an extended trip over Europe. Among other places he visited he naturally took a "look in" at some of the noted trap grounds "across the water." He says, concerning one noted resort for shotgun experts:

"I struck Monte Carlo when they were shooting off the Grand Prix, and must say it is the hardest game I ever saw. They shoot live birds and all use hammer guns. The birds are evidently selected, and I never saw such a lot of screamers in my life. As soon as the trap is uncovered the bird dives out like a shot, and unless he is nailed with the center of the charge at once he is out of bounds. All the birds are dark blue; they certainly are 'birds,' with no mistake. The

newspapers roasted them some, saying it was the poorest lot of pigeons they ever had, but if that is true I don't want to see any good ones. I was going to shoot, but didn't want any of their game. Why, the poorest pigeon I saw was better than the best we had out here. They trim the tail feathers to make them go faster, though I couldn't see any need of that. I only saw one hammerless gun at Monte Carlo for some reason the shooters all use hammer guns.

NOTE: Event 1—Distance Casting, feet. Event 2—Accuracy percentage. Event 3—Delicacy, (a) accuracy percentage, (b) delicacy percentage; (c) net percentage. Event 4—Lure casting, percentage.

The fractions in lure casting are 15ths.

### GOSSIP FOR SPORTSMEN.

The largest bass ever hooked in the Kennebec River north of Augusta, in which waters bass are numerous and grow to great size, was taken recently at Skowhegan by Fred Niblen of New York, and weighed 74 pounds.

Salt water angling in Southern California is improving daily. A Los Angeles exchange has the following concerning the fishermen who in following their chosen sport set out a free lunch for the fish.

"There will be a big exodus of the regular fishermen to the beaches to-morrow afternoon and evening. Those who only go there occasionally to fish will wait until Sunday morning, but the regular always packs up his tackle and hies himself to his favorite beach Saturday night, so that he may be on the ground at daylight. Reports from all the beaches are to the effect that fishing is good, and that it is only necessary to drop a line into the water with almost any old kind of a hook on the end, and the result will be to catch all kinds of fish. Under these conditions all that remains is to decide on the beach, go there and return Sunday night with fish enough to stock the market for a week.

Playa del Rey is attracting a great deal of attention lately on account of the excellent surf fishing to be had there. This point and Terminal Island appear to be leading in this variety of fish, while there are other kinds to be had at both places. Ocean Park and the long wharf at Santa Monica are favorite places for a number of regulars who are after bass and yellowfins. Long Beach has not yet come to the front this season, but croakers and smelt are to be had in plenty.

Redondo is having a run of mackerel that is unprecedented in the history of that port. Catches of from fifty to seventy-five during a few hours in the morning are not uncommon. They are hard, of splendid size, and in an ideal condition for salting down. Halibut also are biting there, and with herring, croakers and smelt there is plenty of sport to be had at Redondo. There is only one drawback to fishing at Redondo and that is the unloading of boats at the wharves. Many fishermen prefer the dropline fishing and seat themselves on the tracks where the cars are standing. As a usual thing, just about the time one gets nicely fixed and finds a spot where the fish are biting he is ousted because the men at work want to move a car a few feet, and to do this run the car up and down the wharf, to the disgust of the aforesaid fisherman. Redondo is the best beach on this coast for fishing, and it would be appreciated by fishermen if there could be a way arranged so that Sundays, at least, as little shifting of cars as possible would be done."

An Avalon special of the 11th inst. says the slaughter of yellow tail during the preceding week has been on a scale unprecedented in the history of this famed fishing region. The deeds of ruthless "game hogs" of a few years ago, who slayed enormous quantities of wild duck and other fowl until stopped by law, have lately been eclipsed by "fish hogs."

Many stanch friends of Catalina have started the cry for a halt, lest the schools of gamy yellow tail be made so scarce as to permanently injure the resort. For several days there had been nearly a ton of yellow tail brought from the deep daily and hung up on racks only to later be taken out and dumped as refuse into the channel outside the bay.

Just two anglers on the 10th inst. brought in forty yellow tail, which represented at least 800 pounds of good edible food, which was killed to go to waste.

While American rod makers have met the fancy for light weight fly-rods, they have not gone to extremes in this respect, and generally satisfy their customers with rods weighing four to five ounces, while three and one-half ounces is as low as most of them care to go with rods they guarantee. Foster Bros., English rod makers, however, claim they make the lightest

and strongest rods of all. These are their eight-foot fly rods which weigh three ounces. The butt joint is Jeronica cane, the grip is cork, and the tip is greenheart. Snake rings are used, and the rod is steel ribbed. Our lightest rods are made of split bamboo, and generally in three joints, whereas this English rod is made in two. Very light reels seem to be much liked in Great Britain in combination with these featherweight dry fly-casting rods, and for such purposes the Meisselbach skeleton reels have made many friends on the other side of the Atlantic.

According to the annual report of the Chamber of Commerce, at Etienne, France, in 1902 there was submitted to the Proof house 103,172 gun, rifle, pistol and revolver barrels in an unfinished state. This shows an increase of 26,210 over 1901, but these barrels were from manufacturers who supply the trade, and not from government factories or from contractors. It is also stated that the government work on military arms is so far advanced that many of its employees have been discharged. It is interesting to note that nearly 300 cannon were submitted for proof, and that they are to be used for firing bombs into storm clouds believed to contain hail, which is very disastrous in some portions of France, where grapes and other fruit are grown very extensively.

Mr. Frank Low, a well known San Jose angler, reports that the trout are taking the fly splendidly at Webber lake.

Salmon trolling off Santa Cruz and Capitola has been excellent the past week.

### Los Angeles County Game Laws Revised.

After juggling with the state game laws for several days the Board of Supervisors of Los Angeles county has decided to leave the dove season just as it was when they started to fix it, but they have lengthened the deer season two weeks. As the ordinance now stands, open season for doves is August and September; for deer July 15 to September 1. This is the result of a long squabble before the Board of Supervisors between the ranchers, who wanted to protect the doves, and the sportsmen, who wanted to kill them.

### An American Judge in England.

Mr. G. M. Carnochan judged smooth Fox Terriers at the fifteenth annual show of the Fylde Fox Terrier Club, Blackpool, England, on May 6th and 7th. This, to the American fancy, is undoubtedly a pleasing and encouraging divergence from the usual routine.

Mr. Carnochan gives in the *Kennel Gazette* his impressions and goes over his classes in the report given below. In mentioning two of the first requisites a dog should have, absolutely level teeth and a good hard coat, to avoid being pegged back heavily, the judge has evidently become more versed in Fox Terrier requisites than when he judged at San Francisco last year. Endcliffe Resist, at that time put down lacking and poor in coat and sadly wanting "dining room furniture" in his upper jaw, was given second limit and reserve winners to Rowton Berom. Wandee Revelry (formerly Saltscar Revelry) was first novice and puppies and second open. Champion Niola Daddy had to be content with third in open. Resist was peddled to everybody on the Coast by his then custodian. Mr. Thomas, we believe, disposed of him during his recent visit here. The judge made a hit with Lustre, a dog that is spoken highly of by the English press, but he somewhat dims that decision by a leaning to Dusky Brigand. We cannot understand why an English handler or owner would take a dog out of the ring prior to the awards being made. This happened during the judging of one of the classes. The bitch, Cymro Queen, had been given a reserve in one class and had another win coming, but when the judge looked for her she was gone.

The judge's report follows and is interesting in many respects:

"I have been asked by the Editor of the *Kennel Gazette* to make a report on the classes that I judged at the Fylde Fox Terrier Club Show at Blackpool.

Before going into a criticism of the various dogs, I wish to thank the exhibitors for the courtesy shown me, and also all those who have made my visit to England such a delightful one. I wish also to thank the sporting press for the gentle manner with which they have criticised my awards. One of them gave in its editorial columns what might be taken as an interview with me, but, of course, this was unauthorized by me and without my knowledge.

As possibly my methods are a little different from those of the English judges, let me say that when judging I insist upon the following—that there shall be no fighting among the dogs in the ring, and that the exhibitor shall receive no outside assistance, such as whistling or trying to attract the dog's attention from the ring-side. For the dogs themselves my first two requisites must be absolutely level teeth and a good hard coat, even in smooths, where, as a rule, there is greater laxity in texture of coat than in the wires. I always peg back a dog heavily for failure in either of these points, as I consider them the first requisites of a Fox Terrier—namely, punishing power and resistance to the weather. As for size, I think that there should be a larger amount of discrimination used than at present. A good big one should not be put back for a fair little one, nor vice versa, if it happens that the judge is either an advocate of the large or the small Fox Terrier. In my own case at Blackpool I found that all the good smooth dogs were big ones. I therefore had to make all my prize winners the larger animals, and so go on record as liking

a big dog. To my mind however, a Fox Terrier should weigh between 17 and 19 pounds when fit. It will be noticed, no doubt, that I only give one v h c, one h c, and one c. The indiscriminate use of the various commended cards seems to me to be foolish and confusing. Who cares to have one's dog one of ten v h c's, or one of seven h c's? If we only have one such award when one's dog gets h c, it means that he is seventh where four prizes have been given, and the award shows clearly the relative value of the dog, as compared with the number of entries in the class. The large number of entries in each class rather bothered me, but I had no trouble in making Duke-don the winner in open dogs. He has improved wonderfully since I saw him last year. Bar a "Donington" expression which he is growing as he gets older, I can see very little to find fault with. Second to Lustre, a most taking terrier, but, as yet, undeveloped. What I would call a "sloppy" one, hence his hock action is not all to be desired. My only fear is eventually he will be too big, but as one can only judge as one sees them on the day, and not indulge in prophecies as to what any puppy may become, which to my mind so many judges are prone to do, I clearly made him second over Holmbury Royal, third, on account of that indefinable thing called quality. The latter is my idea of a workman terrier, and the right size. He has two very plain faults—too much curl to his tail and low-set ears, but this is all one can say against him, and I consider them minor faults.

Doncaster Dominie might have been one peg higher had he shown himself better, but he seemed listless. He is a nice sized Terrier, whose main fault is being rather coarse all over. Haddon Minstrel, v h c, too fat and looked bad in shoulders, probably owing to condition. Sandown Eclipse, u c, whose main fault is so apparent that when you think of the dog you can only remember his enormous ears. Lastly, Leander c. I am told that I sent Leander out without a card. On the contrary, I gave him c, this meaning that he was seventh in a class of 13. I am possibly more a believer in head qualities than most of the English judges, and Leander's head, eyes and expression are, to my mind, so foreign, that only his beautiful body qualities kept him in the prize list.

I have no doubt that I sent out without a card several meritorious Terriers, but the class was such a good one that it was only how the fault that each dog had affected the judge that made this difference in the prize list.

In limit the new faces were D'Orsay's Double, third, who, though not the best in shoulders is beautiful of quality. Penalty, 4th, on the big side, a bit slack in hindquarters but splendid head and front, and Chasely. Patch, h c, a beautiful bodied Terrier but not the best in expression.

The graduate class showed an entry of 19, and for the first time I saw Retall, one of the best young dogs I have ever seen. Wonderful head, ears, neck and body; in fact, I could hardly fault him anywhere. At first I thought that he might not be straight in front, but on watching him I saw him standing absolutely true, and I therefore put him at the top of this class. The other new ones were Sir Francis, reserve, not a showy Terrier at all, whose merits require careful examination but who will do better at later shows. At present he is rather immature, and as he does not get his ears up very well looks a trifle broad across the forehead.

In maiden I gave Durbar v h c. He is not a good one, and I confess to having made a mistake when I gave him later first in the Produce Stakes.

Dusky Brigand made his appearance in puppies and received third prize. Bar a largish ear, which I think he will hold in better shape later, he is a very sweet puppy, and I shall not be at all surprised to see him placed over Lustre at later shows, as he is a much better size.

The open bitch class was without a doubt the best I have ever seen. Of course it settled down to a duel between Sandown Violet and Duchess of Durham. The white bitch, however, beats or equals the other one everywhere except possibly in hindquarters, but the latter's fault, namely, a very full eye, makes her deficient in what a challenge cup winner must have—terrier character. In addition, to my mind, she is almost too small. Penance, third, I liked better each time I saw her. She is not, however, a good shower, and it requires time and patience to get her to do justice to herself. Cymro Queen, reserve, a nice bitch, but shown entirely out of form; in fact, so much so, that her thigh bones protruded above the level of her back, making her bad in hindquarters. In the next class she was shown at the commencement of the judging. When I came to look for her to give her third prize, I found that her handler had taken her from the ring without my permission, so I was compelled to omit her from the prize list and to mark her as taken from the ring before prizes awarded. The other awards in the open class were Doncaster Dauphine, v h c, who would have been higher but for a very soft coat; Grove Fly, h c, not a good shower nor very nice in hindquarters, and Alkinscoat Bluebell and Lovaine, both c, as I confess I could not make one better than the other.

In limit, Dark Ruby received second. There is little to choose between her and Double Duchess, to whom I gave third in graduate. They are both lovely bitches, with a future before them.

In the graduate class another sterling terrier appeared in Ridgewood Rumour. It was very close between Rumour and Penance, and had the former been in good coat I should, I think, put her over the latter.

In undergraduate bitches a new face in Morecambe Mischief, to whom I was attracted at once, but as her teeth were not level I could not put her in the prize money. Maiden, second to Avon Mirth, a coarse-headed one, but lovely in body, third to Cantata, full of quality, but rather light. This class was not very strong.

In closing, I wish again to thank the exhibitors for their cordial support, and to assure them that I consider it the greatest honor to have judged such wonderful classes."

## Championships.

The American Kennel Club has just published its annual yearbook, giving the names of the winners of the various classes at the adoption of the following schedule:

After August 1, 1903, the schedule of the values of Winners' classes be that at shows giving at least \$200 prize money the rating shall be one point. At shows giving at least \$250 the rating shall be two points. At shows giving at least \$300 the rating shall be three points. At shows giving at least \$400 the rating shall be four points. That specialty classes be given to their own breeds, the rating shall be four points. That upon the Pacific Coast one-half of the amount shall substitute the amount of money. That the opening of Winners' classes at all shows shall be a matter entirely within the discretion of the Bench Show Committee of the Association of breeders, to the rules governing Winners' classes."

The new rating has kicked up a jolly rumpus in the East. The general impression seems to be that small show-giving clubs will receive a decided setback. As it is upon our Coast shows is easily discernible. It has been the exception here when the local show offered enough prize money to rate one point under the present rating.

The sentiment of the S. F. K. C. management is against the offering of cash prizes at the next show. For our smaller A. K. C. shows there is no chance whatever for exhibitors to win championship points with their dogs.

Whatever merits the new rule may have as regards the competition for championships among Eastern exhibitors one thing is certain and that is that Coast A. K. C. shows have received a body blow in this respect.

The situation is discussed by a fancier in *The Stock-Keeper* who seems to have covered the subject matter in a concise manner. He says:

"It would certainly seem fair to stop the big shows from holding small side shows under the same rating that they get at their big annual events, but why seek to throw out the poor little clubs that cannot afford to give more than one small show a year? Comparatively speaking, these small clubs are doing more good for the fancy in general than any of the big clubs, not excepting the American Kennel Club itself that makes a very poor return for the enormous income it derives from the small clubs and the small exhibitors. These small clubs are not money making schemes, but are formed by a few genuine fanciers for the purpose of encouraging the breeding and exhibiting the dogs. They can't offer big prizes owing to the limited receipts they can expect from the 'gate,' and their entry fees are seldom more than sufficient to pay the actual cost of running the show. That the small show is popular with the true fancier has been clearly proven by the good support they get from exhibitors and the general excellence of the dogs shown."

"If it could be shown that the small clubs were responsible for the making of inferior champions there might be some excuse for the attack made on them, but such is not the case, as anyone may see by looking up the records of all champions that have qualified under the present rule, how many are there that have not won at a three point show or better. It is the judges, not the small shows, that make the champions."

## DOINGS IN DOGDOM.

The American Kennel Club Stud Book Volume 19, for the year 1902, can be procured by addressing the secretary, Mr. A. P. Vredenburg, 55 Liberty Street, New York.

The book contains over 6000 pedigrees, being registrations from No. 64,654 to No. 70,972 inclusive and contains 1370 pages of information of inestimable value to the fancier and breeder.

Thomas Lynam is enthusiastic over a fine litter of Irish Terrier puppies whelped March 7th. They are out of Chas. K. Harley's Virginia F. by Mrs. W. B. Hooper's Galtee More, both sire and dam have been shown here and have won repeatedly.

Mr. Lynam states that he will probably sell several of the puppies—seven of them are dogs—to a trainer who will man a miniature battle-ship with a crew of trained dogs. If fighting qualities are desirable he will not go amiss in enlisting the "Micks" among his crew.

Prior to his advent at Wandee Kennels the Fox Terrier Ch. True will be in the stud during the present month at George Raper's kennels, Gomersal, near Leeds, England.

Richmond Sea Breeze, winner of four firsts at Blackburn and two more at Olney prior to coming over, was shown at the recent Ladies' Kennel Association show, Hampstead, L. I. where there was benches in the tented show 640 dogs. Mrs. Mayhew, who judged placed her first in puppy and novice. A report of the show states: "In bitches the California owned Wandee Sea Breeze, an importation now on the way to the Coast, had it all her own way in puppies and novices. A nice, smart bitch that can do with a little shaping up." English *Stock-Keeper* says she is "a rare stamp of puppy, and one that is sure to go on improving with age."

Mr. Wm. Ollard of Tacoma announces his Irish Terrier Bolton Woods Despot in the stud. Brinscall Doreen, a bitch imported by him, was served last by D. spot. Mr. Ollard is sanguine that the offspring is now available for Coast fanciers to secure breeding and a type of the Irishman as good as procured anywhere. Despot's registered No. 74098.

Mr. W. C. Ralston recently purchased of Mr. W. T. Payne, the well known Cocker fancier of Kingston, Pa., the good black and white Cocker bitch Paprika. She is well spoken of by Eastern doggy writers and was the winner of second novice New York and first novice, limit and reserve winners at Coshocton this year. She should count materially as a brood bitch in the Delverton Kennels. Paprika is in whelp to Ch. Romany Rye, a breeding that will easily commend itself to the fancy.

There is a vacancy in the Pacific Advisory Board, and Messrs. Norman and Harley have been named a committee to report upon eligibles for the Board next meeting. Mr. T. J. A. Tiedeman, who had been elected a member, could not devote the time necessary to serve.

The disqualification of the Collie bitch Dixon Moll, first puppies and reserve winners, Oakland, has been removed by the A. K. C., it having been shown that the entry blank was made out in good faith and was correct, despite an apparent technical error in giving the name of the dam.

Secretary Albert Betz of the Pacific Coast Field Trials Club states that the Derby entry this year promises to be the record entry for that important stake. Sportsmen will bear in mind that the entries close on July 1st.

The Bakersfield grounds are well stocked with birds and they will be patrolled from August until the trials in January next. A large additional tract of favorable country has been acquired adjacent to the trial grounds. The birds have increased and are getting along nicely. The patrolman is thoroughly familiar with the whole tract and knows where each one of numerous beves are located. These birds are looked after and fed and every care will be taken to have the grounds in a condition better than has prevailed at any previous trials.

We had occasion recently to request of Manager R. M. Dodge, Stockdale Kennels, Bakersfield, the pedigree of his well-known Pointer bitch Stella. In sending the information he also penned some interesting data that will be appreciated by sportsmen and which is the following:

"Your favor received, in which you ask for Cuba of Kenwood's pedigree. I will enclose it in this and will only go back three generations." In Stella's pedigree I do not care to go back any further than I know personally, although the stock was in our family for over thirty years, before Stella was whelped, or before February 5, 1886. My father took great pride in his Pointers and kept them pure, breeding only to the best individuals. I am speaking of Stella's sire; her dam was the best bred bitch my father could get at that time, and he would not have bred to her if she had not been good in the field. I don't believe the dogs of to-day are any better if as good as they were in the good old days of my boyhood. I have known my father and his friends to hunt from day to day, all through the hunting season, visiting each other and having a good time generally, winding up at the end of the season by the losing side giving a big dinner. The birds were counted out, after every hunt, and no bird was allowed that was shot on the ground or in a tree, and if two were killed at one shot only one was allowed. Those who had the best dogs naturally had the best chance to win, and there was great rivalry over their dogs, as well as their horses, and our old darkey cooks used to vie with each other to see who could get up the best dinners. If you have ever eaten a meal gotten up by the old time darkey cook you can imagine what those dinners were. Those good old days are gone never to return.

Looking back, and recalling the dogs of that time, makes the dogs of to-day look very insignificant. I don't think the field trials are encouraging the right kind of dog. Too much is given to speed, now anyone knows that no animal can keep up extreme speed, day in and day out. Endurance was one of the most important requirements in the old time bird dog. Brains to take them to the likely places first, and the dog that had the most speed, brains being equal, was the one most wanted. Of course, nose being the all essential. I think our field trial judges, with very few exceptions, expect too much of a Derby dog; they have to be as well broken as an old dog. During my Eastern trip I ran some of our dogs in eight trials, and I had a good chance to observe the judges. I always had a saddle horse and did my best to keep tab on the dogs at work. I could mention several dogs that were not taken into the second series, that I was convinced had more brains and nose than any dog in the stake, and they also had very good speed, style and range. I have seen others placed without even finding a bird to flush, speed and style did it. Of all the judges I ran under Messrs. Wallace, Bell and Dr. Rogers came nearest to filling the bill.

Could write more on this subject, but I suppose you read so much of this kind of talk that you will find nothing new in it. Now is the time to call attention to the near approach of the closing of Derby entries, and urge all who have a pup to enter him. Quail are hatching splendidly down here and I look for a big increase. Our bird grounds are good but could be made better with very little expense. We have a pretty good lot of youngsters that we expect to enter, and like everyone else, hope to have a winner in the lot. I expect to have a fine lot of trained dogs for sale this winter, a number of them are very promising. I am happy to say that distemper has not paid us a visit for two years. All our dogs are in fine condition."

## SALES.

Delverton Cocker Kennels sold the red Cocker dog puppy, Delverton Demi A. K. C. S. B. 7285 (Ch Hampton Promise-Floradora), to Mr. Clement Tobin, San Francisco, June 18th.

Delverton Cocker Kennels purchased from Mr. W. T. Payne the black and white Cocker bitch Paprika.

## VISITS.

Wm. Ollard's (Tacoma) Irish Terrier bitch Brinscall Doreen (—) to same owner's Bolton Woods Despot (Bolton Woods Bandit-Saskatchewan) June 10, 1903.

## Fish Lines.

Reports from the Truckee are that the river is still rather high. Last year from the 15th of April to May 1st 2000 pounds of trout were shipped from Boca. During the recent full moon the fishing has not been very good. The river is full of fish; hundreds of gamey rainbow can be seen jumping on the surface of the water. Bait fishing is far better than some reports state, and should be better in a week. Fly fishing ought to improve daily, particularly during the coming week.

Striped bass fishermen are having good fishing in San Antonio creek. The anglers who resort regularly to that water have been having good luck for some time past and have landed a number of nice fish. On Wednesday Mr. Carroll landed a 24-pound bass in the straits; he also brought in a 10-pounder. The straits fishing, however, has not been overly prolific in results.

Over near San Pablo the bay is full of bass, particularly near Tule Island. To get the best results across the bay the water must be clear and no wind blowing.

Sam A. Wells a prominent local angler returned from the Big Meadows a week ago. During his visit at that famous trout fishing resort he had a narrow escape from being killed by a bolt of lightning. In referring to the thrilling adventure he stated that he was en route, with rod and reel, to Reservoir Spring, when a thunder-storm came up suddenly, and to avoid getting a soaking he ran for the shelter of a large pine. The rain fell in torrents and the bombardment overhead was something terrific.

"I was under cover possibly for twenty minutes, when the tree—the trunk of which I was leaning against—was struck by forked lightning and I was felled to the ground. I lay prostrate and unconscious for at least twenty minutes before I recovered my equilibrium, but I could not budge an inch for several minutes after the shock, which temporarily paralyzed me. After an hour or so I regained the use of my limbs and managed to reach the hotel. On examination it was found that I had been struck just back of the ear, my hair was singed and the marks on my back and nether limbs will attest the close call I had."

Wells was confined to his bed, after arriving home, for several days but is now all right again. A letter received from him while he was enjoying the fly-fishing at the meadows is full of interesting bits for the angler and is as follows:

"It has been impossible to ship fish from here on account of the weather being so warm, so I thought it best not to experiment. I have not shipped any fish to any one from here."

I shipped one box from Verdi the day I left there for the Big Meadows and did not have time to clean them, so I paid a party to attend to same for me and when I arrived here I found that it had not been done and the fish were spoiled. Jack, the fishing in this country is the finest I have ever had and fish are numerous. You can find them in the puddles along the road. You very seldom hook a fish less than three-quarters of a pound and you consider them small, and they run up to four or five pounders, and all are taken on a fly. The bait and spoon fisherman stand no chance here. By the way, the killing flies here now are the forked tails of different varieties, black ant, march brown, gray hackles, yellow body, but in a week it is liable to change. If you advise any flies suggest as many different varieties of forked tails as can be got. There must be 50 different varieties of this fly on the river. The black ant is the best fly at present on the Big Spring and Reservoir Spring. The march brown is good on the river. I used this fly last night after dinner and hooked and landed three fish in fifteen minutes that weighed five pounds. The following anglers are here now: Clarence Ashlin, Dave Sachs, Prof. McMahon, Col. Culver, Sam Heller and a few others unknown to us. Ashlin, Sachs and myself fished the Big Spring Tuesday and brought back 65 pounds of fish, taken on a fly exclusively, so you can appreciate what it is. The 65 pounds consisted of 79 fish, see the average weight? Don't advise bait fishermen to come here."

## Get Out and Take a Rest.

If you are "all tired out" from hard work indoors a trip to any trout stream will do you good. The gentle exercise, change of air and the country "grub" all bring you to realize you are still living. Skinner, at 801 Market street, S. F. can furnish you the proper tackle and camp outfit, and will tell you where to go and how to get there. Make the catches as reasonable as you can, Skinner goes fishing himself. If your rod or tackle needs looking after, take it to Skinner's.

Skinner, the sporting goods man at 801 Market street, San Francisco, is displaying the finest assortment of razors, strops and general cutlery ever shown in this country.

## Coming Events.

## Rod.

April 1-Aug. 15—Close season for lobsters and crawfish.  
April 1-Nov. 1—Trout season open.  
April 1-Sept. 10. Oct. 16-Feb. 1—Open season for taking steelhead in tidewater.  
May 1-Sept. 1—Close season for shrimp.  
July 1-Jan. 1—Open season for black bass.  
Sept. 1-Nov. 1—Close season for crabs.  
Nov. 15-Sept. 10—Season open for taking salmon above tide water.

## Dog Owners! Read This!

We are carrying in the advertising columns of this journal an advertisement of "Sergeant's Dog Remedies," a popular line of preparations for which F. W. Braun & Co. of Los Angeles, California, have been made distributing agents on the Pacific Coast. The goods have few equals and no superiors on the market today having received the highest endorsements of the leading dog men and kennel owners of this country and Canada.

They are manufactured by Polk Miller Drug Co. of Richmond, Va., who invite all persons having sick dogs to write (enclosing stamp) describing symptoms, and they will cheerfully furnish the best possible advice without any charge whatever. A revised copy of their book on "Dogs" sent free on receipt of 3c in stamps to cover postage.

## The Value of a Cow.

Dairying is not a science; it is an occupation. There is much science mixed up with the business aspect of dairying, but there are many things which science does not reveal. Prof. F. G. Short, in *The Dairyman*, makes some observations on this head:

"There are many things connected with the dairy that cannot be brought down to exact figures, and one of them is the exact or approximate value of a cow. What is a cow worth, is a never-ending question because of the unknown qualities which enter into her make-up. In the first place, the cow is a machine, and as such she always has a certain value. Her foundation price may be anywhere from \$25 to \$50, according to her weight and the price of old cow for canning or bologna. The question is as to how much value must be added to the above to obtain her actual value. It is safe to assume that the yearly net profit enters into this question. If the cow returns to her owner a net profit of \$10 over and above all expenses, the cow is worth to him \$10 over her value as a beef producing animal. So if we want to put the above in a formula, we can say that the average cow is worth her beef value plus her yearly net profit, or she is worth her own live weight, plus her owner's ability as a dairyman as shown in net profits. The best Jersey or Holstein that ever lived would be worth but their live weight in the hands of some men, while a scrub would be worth twice the value of the pure bred dairy cow if it was in the hands of a skilled feeder and dairyman.

So it seems to be a question of what is the cow value of a dairyman as well as the cash value of a cow."

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

## Why Sows Kill Pigs.

Prof. J. J. Ferguson says that while it is generally supposed that anything is good enough for a hog, it is true that brood sows do not ordinarily receive proper rations for the healthy development of young pigs. High feeding is as injurious in its effects as scanty rations. This is especially true where large amounts of corn are fed exclusively. A wiser ration for brood sows includes a liberal allowance of bran, shorts and other nitrogenous food, rich in elements for growth of bone and muscle. What is wanted in brood sows is not a fat condition, but a medium condition of good, firm flesh, with muscle well developed. The cannibalistic tendencies of so many brood sows are directly due to feeding on rich carbohydrate foods, which induce a feverish condition of the system.

## SADDLE HORSE WANTED.

I WANT A FIRST CLASS SADDLE HORSE. 1 bay or chestnut. Must be of good size and able to carry heavy man. Will pay good price for a good horse. Address A. B. C., care of BREEDER AND SPORTSMAN.

IN THE SUPERIOR COURT OF THE CITY  
and County of San Francisco, State of California

In the Matter of the Application of,  
JOSEPH ALBERT CRACKBON,

for Change of Name

The petition of Joseph Albert Crackbon, respectfully shows:

That he is over the age of twenty-one years; that he was born in the City of Sacramento, State of California, and has ever since resided in the State of California, and does now reside at the City and County of San Francisco, State of California

The petitioner's father is dead, but petitioner's mother, Ada B. Crackbon, is alive and resides at Sacramento, and petitioner's other near relatives are Mrs. Emma Pierce and Mrs. M. W. Wilder both residing at Sacramento, California, and L. S. Crackbon, petitioner's brother, residing at San Francisco, California

That petitioner desires to change his name to Joseph Albert Whitney, the name Whitney being petitioner's grandmother's maiden name

That the reasons your petitioner desires to change his name are: that the name Crackbon is made the subject of ridicule and punning to such an extent as to render the lives of petitioner and his children extremely disagreeable and unpleasant.

WHEREFORE, petitioner prays that this Court make an order fixing the time and place of hearing this petition and directing publication thereof, and that upon the hearing of said petition, this Court make an order changing petitioner's name from Joseph Albert Crackbon to Joseph Albert Whitney.

Dated June 13 1903

JOSEPH ALBERT CRACKBON,

Petitioner.

WM. H. CHAPMAN, Attorney for Petitioner.

Upon reading the foregoing petition it is hereby ORDERED, that Monday, the 13th day of July, A. D. 1903, at 10 o'clock in the forenoon, be and the same is hereby appointed as the time, and that the Court Room of Department No. two, of the said Superior Court at the City Hall, in the City and County of San Francisco, State of California, be and is hereby appointed as the place for hearing the application contained in said petition.

AND IT IS FURTHER ORDERED, that publication of said petition be made once a week for four successive weeks in some newspaper, printed in this City and County.

Dated June 17, 1903

FRANK J. MURASKY,

Judge of the Superior Court.

Endorsed: Filed June 17, 1903

ALBERT B. MAHONY, Clerk

By JOSEPH RIORDAN, Deputy Clerk.

In Addition to the Harness Events Liberal Purses will be given for Runners.

## CONDITIONS.

Entrance fees five per cent of Stake or Purse (and five per cent additional from money-winners), payable July 15th, when horse must be named.

Money divided fifty, twenty-five, fifteen and ten per cent of Stake or Purse.

Horses not winning a heat in four shall not start in fifth heat, except in a field of eight or more starters, and then it must win a heat in five or go to the barn. Horses so ruled out shall have a right to a share of the Stake according to their rank at the close of the last heat.

Right to transfer or substitute entry in any of the above Stakes open to August 1st to horses eligible July 15th.

The Association reserves the right to declare off and return payments in any Stake or Purse that does not fill satisfactorily to the Association. Right reserved to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided seventy per cent to first, and thirty per cent to second horse. A horse distancing the field shall be entitled to first and fourth money only, and in no other case will a horse be entitled to more than one money.

Other than specified, rules of the National Trotting Association, of which this Association is a member, to govern, except hobbles are not barred on pacers three years old and upwards.

In addition to the above Special Purses will be offered for Overnight Closing Harness Events.

Any information pertaining to the meeting will be gladly furnished by the Secretary upon application.

Address all communications and inquiries to

A. T. VAN DE VANTER, Secretary and General Manager,

KING COUNTY FAIR ASSOCIATION, 7 SULLIVAN BUILDING, SEATTLE, WASH.

## Dairy Notes.

It is a fact that milk always bears the marks of the cow that produces it. In form, in color, in texture and in the quality of her udder. It is a fact that the best milk is the milk that is produced by a cow that is healthy and that is free from all weeds and diseases. It is a fact that the best milk is the milk that is produced by a cow that is healthy and that is free from all weeds and diseases.

way more butter can be made and yet the skim milk be used to the best advantage. Where buttermaking is made a part of the farm work, and five or more cows are kept, it will nearly always pay to own and use the separator.—*Dairy and Creamery.*

## The Dipping Tank.

A few years ago and the dipping tank was only referred to as a convenient means of doctoring animals for mange, itch, scab and infectious skin diseases. The use of the tank and the dips for these ailments led to discoveries of advantage in other directions. The eradication of lice was one of the important things gained by the dipping process, which soon appealed to stock owners to dip their animals twice a year, spring and fall, to kill the lice and put the skin in a good healthy condition, says Nebraska Farmer.

The dipping tank will soon be an indispensable fixture in every neighborhood, and on all large stock-growing farms. The dipping of cattle and horses is of such advantage in keeping the skin clean and healthy that the improvement in growth and gain in flesh will many times repay the expense of dipping. The hog yard without the dipping tank is not up to modern methods of growing swine. The hogs, shoats and little pigs are all dipped on the well-regulated hog farm, as often as deemed necessary to keep them free from lice. It is argued by good hog raisers that the herd should be put through the dip at least four times from early spring to late in the autumn season. The dip left in the tank after giving the hogs their bath is valuable used in sprinkling about the yards, and having a little lime added makes a most excellent whitewash for the hog sheds and houses. Its disinfectant properties makes it worth more for this purpose alone than its original cost as a dip.

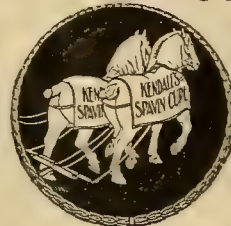

The best bred and highest priced herds of cattle and hogs in the country are being dipped as a sanitary measure of general value to the health of the animals. The experience of the ranchmen who have been dipping their cattle, as a means of protection against itch for the past three or four years, is that the general advantage to the animal, independent of disease, is such that great gains are made over those not treated to the dip. The expense is light and the advantages to be gained are many, consequently the dipping tank has come to stay.

In making a special report on the conditions in the Philippines Governor Taft says: "The most serious feature of the situation is the loss of cattle from rinderpest. It is not feasible to bring cattle into the islands without making sure that they will not catch the rinderpest after coming here and die from the disease. The fields of the island are affected with rinderpest, so that cattle from other islands brought here are almost sure to have the disease. It is necessary, therefore, that all cattle brought here shall be immediately immunized, having a serum injected into their veins which will render them immune for three or four months and at

the same time by being inoculated with rinderpest virus, which renders them immune at least for five years and probably longer. We have made a contract for ten thousand carabaos in the island after the permanent immunization. These are to be brought from China. Our insular purchasing agent, together with a cattle expert of the agricultural bureau, is now visiting the various ports of the Orient with a view to making further contracts."

The bitter taint of ordinary weeds can be removed from cream by mixing it with two or more parts of water at any temperature above seventy degrees F. and then running it through a separator. No means have been found by which the bitter weed taste can be removed wholly from milk. The acrid compound in weeds which gives milk a bitter taste is held very largely, if not entirely, in the milk serum. The more completely the serum is separated from the fat the less is the degree of bitterness in the cream. A wild onion flavor is not removed from cream by mixing it with water and then running it through the separator. Saltpeter dissolved in the water thus used is of no value. No method has been found by which onion flavor can be removed from either milk or cream.

## NOTHING SO GOOD

has ever been presented to the public and which has been of such wondrous merit as

**Kendall's Spavin Cure.**

It is the old reliable remedy for Spavins, Ringbones, Splints, Curbs and all forms of Lameness. It cures without a blister because it does not blister. Price \$1.00 for \$5.00. Seed Farm of Note.

The largest seed farm in the world is located at Santa Clara, Cal., says Hamilton Wright in *Tick's*. It covers more than 4000 acres of land and yields an average profit of \$400 000 per annum. During the busiest season 800 men are employed upon the great plantation, though the climate of that section of California permits growing at all seasons of the year. When the last crop has been gathered it is time for sowing the next, and when that is done comes the cultivation of the biennials. Some of the largest seed farms have harvesters adapted to their peculiar crops, while in others the greater part of the work is done by hand. One hundred school children picked seeds on a big farm near San Jose, Cal., during the last sweet pea season. It was a holiday time for them, and after hours the camping grounds where they made their headquarters presented the appearance of a picnic ground. To raise the variety of flower seeds grown on the big farms in California requires moist ground and a warm sun; poppies grow wild in great profusion and consequently require less care than those flowers which only reach their greatest development by cultivation. However, the life of the seed farmer though arduous, is very profitable, and the great seed ranches in Central California now supply the United States with more than four-fifths of all the varieties of the seeds of which they make a specialty.

The question is often asked why so many manufacturers prefer to buy wool in the grease rather than in the scoured state. It is claimed by those who advocate purchasing scoured wool that a great saving might be effected that would benefit both grower and manufacturer. By the establishing of scouring plants in the wool growing districts the reduction in bulk would lead to a great saving in transportation charges. The cost of scouring is so small that it would not increase the price of wool to the buyer and the saving in freight would be so great that the wool would actually cost the manufacturer less.

than if shipped in the grease. Theoretically this appears correct, but as the railroads classify scoured wools under a higher tariff it costs quite as much as if shipped in the grease. Again it is claimed that all uncertainty as to the amount of shrinkage is removed, so that when calculating the cost of manufacturing there will not have to be any allowance made for shrinkage when scoured wool is purchased. The shrinkage between wool in the grease and scoured is an uncertain factor and the same lot of wool will shrink unevenly under different conditions. A great many manufacturers look with suspicion on scoured wool in the market, as the best quality of wool may be so injured in the scouring that an inferior cloth will be produced. For this reason nearly all manufacturers prefer to do their own scouring, as they can then decide which are the best cleansing agents to use and have the conditions as nearly uniform as possible.

A New York dairyman who desired to assure his patrons that the milk from his works was all right recently invited them to a luncheon among the cows. The guests found a table garnished with flowers and groaning with an abundant luncheon in the drive the whole length of the barn. The cows were in the stalls on both sides so close that the banqueters could reach them from their seats at the festal board. Every part of the stable was as clean as a kitchen. Milking was in progress and milk was served nearly ice cold only five minutes from the udder.

A scheme is on foot to take beef cattle from the breeding grounds of Mexico, carry them by ship to Cuba to be fattened, then ship them by water again to New York city for slaughter. Mexico can not fatten cattle well, Cuba can and water transportation is available and cheap. The Cudahys are said to be among those promoting the scheme.

A cement floor is the most sanitary for a cow stable, and when put down it should be left rough under the float to prevent the cows from slipping.

# BALLISTITE

The Standard Dense Powder of the World.

STILL LEADS AT THE TRAPS OR IN THE FIELD.

Ballistite wins from the limit marks in distance handicaps, at either live birds or flying targets, as it always gives the highest velocities with the closest and most even patterns at all ranges. Ballistite is absolutely unvarying in results being waterproof, smokeless, odorless, without residue, pressures lower than black powder, unaffected by age or climatic changes, and never pits, rusts or corrodes the barrels. Ballistite is sold with above guarantee.

Take No One's Word. Try It for Yourself.

# BALLISTITE

The Standard Dense Powder of the World.

## CAMPBELL'S HORSE FOOT REMEDY IS THE BEST REMEDY

EVER USED ON HORSES' FEET.

IT PENETRATES AND DRIES IN quickly and DOES NOT GUM AND FILL UP THE PORES like tar and oil compounds. It is the GREATEST REMEDY ever used to remove SORENESS and FEVER from the foot, and makes it possible to get good services out of a horse working on hard and hot pavements.

It gives natural nourishment to the foot and incites a rapid, healthy growth--ALL DRYNESS AND BRITTLENESS quickly disappears.

QUARTER CRACKS and SAND CRACKS are rapidly grown out when directions given in our booklet are followed.

It is a SURE CURE for CORNS, CONTRACTED FEET and NAIL WOUNDS if directions are followed. IT PREVENTS SOUND FEET FROM BECOMING UNSOUND and GROWS A TOUGH, STRONG, ELASTIC WALL and HEALTHY FROG--A FOOT WHICH WILL STAND WORK on race courses.

Many of the best owners and trainers state that for track work nothing equals it. In many cases horses have reduced their records several seconds, due to its use.

It is a CURE FOR THERUSH and SCRATCHES.

We Guarantee That It Will Do What We Claim and Will Refund Money if It Fails.

PRICES:--Quarts, \$1.00; Half-Gallon, \$1.75; Gallon, \$3.00; 2 1/2-Gallon, \$5.50; Five-Gallon, \$10.00.

Books giving full directions for its use and much valuable information as to shoeing are supplied free.

Don't fail to read "ad." giving information concerning Campbell's Iodoform Gail Cure in next issue of this paper. It is the best and because of its merits is rapidly displacing all others.

JAS. B. CAMPBELL &amp; CO., Manufacturers, 412 W. Madison St., CHICAGO, ILL.

**In Addition to the Harness Events Liberal Purses will be given for Runners.**

#### CONDITIONS.

Entrance fees five per cent of Stake or Purse (and five per cent additional from money-winners), payable July 15th, when horse must be named.

Money divided fifty, twenty-five, fifteen and ten per cent of Stake or Purse.  
Horses not winning a heat in four shall not start in fifth heat, except in a field of eight or more starters, and then it must win a heat in five or go to the barn. Horses so ruled out shall have a right to a share of the Stake according to their rank at the close of the last heat.

Right to transfer or substitute entry in any of the above Stakes open to August 1st to horses eligible July 15th.

The Association reserves the right to declare off and return payments in any Stake or Purse that does not fill satisfactorily to the Association. Right reserved to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, to be divided seventy per cent to first, and thirty per cent to second horse. A horse distancing the field shall be entitled to first and fourth money only, and in no other case will a horse be entitled to more than one money.  
Other than specified, rules of the National Trotting Association, of which this Association is a member, to which except hobbies are not barred on pacers three years old and upwards.

In addition to the above Special Purses will be offered for Overnight Closing Harness Events.

Any information pertaining to the meeting will be gladly furnished by the Secretary upon application.

Address all communications and inquiries to

Entry must plainly state name, color, sex and breeding of both sire and dam, with owners signature and address.

Two horses may be entered from the same stable in the same class and held but for one entry fee. No conditional entries will be considered.

Drivers must have colors and not fail to mention them when making entries.

Declaration of intention to withdraw a horse must be made by 7:00 P. M. on the day preceding race. The Association reserves the right to use its discretion as to unfavorable weather conditions.

Entry fees to accompany nominations and to be made payable to A. T. Van de Vanter, Secretary and General Manager King County Fair Association.

Applications for stabling must be made to the Secretary, stating the number of horses to arrive. In case of any subsequent change in the movements of the stable, or any part thereof, a prompt notice is earnestly requested. Horses should be shipped in care of King County Fair Association, Seattle.

Arrangements will then be made for their unloading at the race track.

Ample notice of the dates upon which these stakes and purses are to be decided will be given.

**A. T. VAN DE VANTER, Secretary and General Manager**

KING COUNTY FAIR ASSOCIATION, 7 SULLIVAN BUILDING, SEATTLE WASH.

# THE WEEKLY BREEDER AND SPORTSMAN

F. W. KELLEY, PROPRIETOR.

Turf and Sporting Authority of the Pacific Coast.

—OFFICE—

36 GEARY STREET, SAN FRANCISCO.

P. O. BOX 2300.

TELEPHONE: Black 586.

Terms—One Year \$3, Six Months \$1.75, Three Months \$1  
STRICTLY IN ADVANCE.

Money should be sent by postal order, draft or by registered letter addressed to F. W. KELLEY, 36 Geary St., San Francisco, Cal.  
Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

San Francisco, Saturday, June 27, 1903.

THE BREEDERS MEETING at Petaluma is certain to be one of the best given by the association for years. Not only is there more interest manifested in harness racing than for some time on this Coast, but the fact that the place selected for the meeting this year is central and convenient and the track one of the best and fastest in California, together with the splendid big entry list secured for the early closing stakes has turned the eyes of all those who enjoy harness racing to the big meeting at Petaluma in August. Entries for eight additional purses will close on Wednesday next. For the 2:30, 2:17 and 2:11 trotters there are purses of \$500. The green class, 2:17 and 2:13 pacers are offered purses of \$500 each. There is \$600 for free for all pacers and \$400 for three year old pacers. These races should all fill. Enter in them. If they fill you have a chance to win. If they do not it will not cost you anything. Entries close next Wednesday.

SEATTLE is undoubtedly one of the best racing towns on the Pacific Coast. The track there is an excellent one for harness horses and there seems to be more money in circulation and a larger attendance whenever a race meeting is held there than can be secured by any other northern point. The big meeting to open there August 8th promises to eclipse all former efforts of the King County Fair Association and the eighteen harness events, with purses from \$500 to \$1000 should attract entries from every stable that races up north this year. Secretary and Manager A. T. Van de Vanter is perhaps the most popular man with horsemen that is in charge of a racing plant on the coast and the horsemen who race their strings over the Seattle track all speak in the highest terms of the treatment received at his hands and express a determination to go again. More money can be placed on a trotter or pacer at Seattle than can be wagered in any other town on the coast. It has jumped into the position of a racing centre and horsemen who desire to take part in the game where it is at its best should not fail to enter their horses in the Seattle races. Entries close on Wednesday, July 15th, for the fall meeting. See the advertisement in this paper to-day.

## Answers to Correspondents.

V. H., Merrillville, Cal.—Is there a horse known as Ned Forrest 2:25½, by Reavis Blackbird? If so, give breeding of dam. Also give breeding of dam of Monroe Chief 2:18½.

Ans.—Ned Forrest's record was 2:25½ instead of 2:24½. His dam was by a horse called John Morgan, and his granddam by a horse called Glencoe. This was the breeding given by the late Mr. Reavis, who bred him. Monroe Chief's dam was Madam Powell by Bay Chief, son of Mambrino Chief 11, second dam by Toronto, son of St. Lawrence, third dam by a Whip horse.

H. C. Myers, Vallejo—In the list of entries in the 2:23 class at Vallejo is the bay mare Sweet Marie. Has she not a matinee record of 2:12, and does it not bar her in the 2:23 class? Horsemen here claim it is against her whether there was money or no money hung up to be raced for, but I think if there was no money or prize to be won that it is not a record and she is entitled to start. What are the rules of the N. T. Association in regard to records made in matinee racing?

Sweet Marie, we understand, trotted a mile at Los Angeles in 2:11½ in a matinee race of the Los Angeles Driving Club, which does not give her a record. Section 2 of Rule 44 of the National Trotting Association reads as follows:

"Records cannot be made or bars incurred in trials of speed where there is no pool selling, bookmaking or other public betting on the event, no money competed for, no entrance charged or collected from competing horses, no admission fee charged to the gate or grand stand, and no privileges of any kind sold. Such performances shall not be considered public races. All rules of this association in so far as they conflict with this rule are hereby repealed."

## Woodland Echoes.

WOODLAND, June 22, 1903.

BREEDER AND SPORTSMAN—A few words as to how the horses are doing here at Yolo's county seat. The track is in good condition at present and the boys are contemplating an afternoon of matinee racing for Saturday afternoon of this week.

In looking over the different stables I will begin with the string of C. B. Bigelow. He has Mono by Falrose, that is the property of C. Wright of Davis. Mono has been worked but a short time and has stepped a mile in 2:20. Gerta A. by Diablo, dam by Sidney, is working miles in 2:15. El Primero by Diablo, dam Lucy B. 2:17½ by Alexander Button, has shown a good turn of speed. These horses are all the property of Mr. Bigelow. Dart by Hector, dam by Killarney, a three year old pacer, has stepped a mile in 2:20, last half in 1:07, last quarter in 30½ seconds. He is owned by Mr. Eugene Lindley of Dixon. Lena A. 2:21½ by Lynmont, that won the Occident Stake in 1899, is now owned by J. Gibbon. She is working miles in 2:20 or better pacing. Next is a full brother to the pacer Bennett that is showing remarkable speed. Det is just beginning to handle a two year old by Diablo, dam Lucy B.

W. Mastin has a string of nine. John A. 2:12½ is working very nicely. Celmar by Falrose is a full sister in blood to the pacer Don 2:10, whose death was a loss to the turf. Penrose by Falrose, dam Miss Murry is working well and Mastin expects great things of him this year. Nora S. by Sable Wilkes, dam Grace by Nutwood, is another good prospect. She is the dam of Marvin Wilkes, a two year old trotter by Don Marvin, that is about as handsome a colt as one would wish to see. He worked a mile very handily in 2:38 for Mr. Mastin recently. Gold Crown, a three year old by Falrose, has shown 2:10 speed. Carrie Nation by Falrose, dam by Director, is a very good prospect. Mamie H., full sister to Penrose, and owned by Mr. Hines of San Francisco, is a fine looker. Wildrose by Falrose, a promising pacer, stepped a very fast mile the other day. He was driven by Mr. White, who is well pleased with him and thinks his driver will be riding in front this year.

R. H. Nason the veteran driver, has Bellrose by Falrose, dam Pet, that he worked a mile very handily last Saturday in 2:15. The next best in this string is Glenrose that paced a mile in 2:26. Sappy, a three year old, is a very good looker and a great prospect. A brown mare by Tuberosa, dam Lena Holly is showing 2:16 speed and is expected to be very fast. The fifth is a big brown mare called Azarine by Kentucky Baron, dam Mischief that has never been hitched to a bike but pulled a cart in 2:40. These are a lot of promising green horses and are for sale.

Mr. Peter Fitzgerald can be seen most every evening driving a fine looking filly by his stallion Mickey Free.

Hi Hogoboom has five in his string at present. Hops a very fast pacer by Don Marvin has shown a mile in 2:15. He is the property of C. Merkely. Perkins, a trotter by Henry Nutwood, has stepped a mile in 2:17½ and is owned by H. Cowell. Joe Harvey is a three year old pacer by Gossiper that has shown miles in 2:19. A three year old pacer by Diawood that stepped a half in 1:10 recently is owned by D. McDougal. Hi expects great things of a two year old trotter by Dagan that he calls Red Hot.

P. Fryatt owns a very fine three year old filly by Falrose that has shown 2:15 speed.

A. B. Rodman has Cavalier by McKinney, dam Advocatrix by Attorney that is developing into a grand colt. He also has Culprit by McKinney, dam Patty Washington. Both colts are doing well. Cal Brown by Gold Rose, dam Advocatrix has shown miles in 2:30. Bill Buffalo, that worked a mile in 2:19 last year is doing well.

John Norton is working Smuggler and he is moving along well. Johnny sent him a mile in 2:21 in a recent workout. Fly Jim, a three year old colt by his young stallion Gossiper Jr. is a fine looking horse and quite promising. Lady Clevedale by Our Jack 2:13½ is a great prospect. She is owned by William Irvine of Sacramento.

E. Donnelly of Colusa has Sutter 2:28 by Noonday that worked a mile last year in 2:18, and a youngster called Backwith Chips by Dexter Prince that stepped to the half in 1:08. They are owned by C. A. Arvedson of Colusa.

Yours, D. O'KEEFE.

## Thirteen Years of Success.

Mr. A. L. Harris of Superior, La. writes: "I have used Quinn's Ointment for the past thirteen years and it is the best medicine I have ever got hold of. I have cured greased heel with two applications and also had remarkable success on fresh cuts." For curbs, splints, spavins, windpuffs and all bunches use Quinn's Ointment. Sold with an absolute guarantee to give satisfaction or money refunded. Price One Dollar delivered. Address W. B. Eddy & Co., Whitehall, N. Y., if you cannot obtain from druggist.

In hot weather there is no drink like Jackson's Napa Soda—plain or in a lemonade.

## The Denver Meeting.

There was a great crowd, the largest in the history of Denver racing, when the gates opened at Overland Park last Saturday for the big spring meeting. Benjamin Benjamin was the presiding judge, assisted by E. K. Fullerton and Maj. J. J. B. DuBois. O. P. Updegraff was the starting judge. The timers were George Alden, H. S. Brown and J. W. Weaver.

There were nine starters in the first race, the 2:32 pace, but one was distanced in the first heat and four in the next, the remaining four getting money as follows: Raven Dixon first, Amble W. second, Billy Carew third and Miss Fair Sex fourth.

The second race was for 2:20 class trotters and was won by Viometta, a daughter of Superior, who took a record of 2:14½ in the second heat. Mar Boy by Delmar won the first heat in 2:15½ but stopped badly after that.

There were four running races including the Colorado Derby at a mile and an eighth. This was won by The Major, son of Midlothian. The summary of the harness races are as follows:

Pacing, 2:32 class, purse \$500.  
Raven Dixon, b g by George Dixon..... (Johnson) 2 2 1 1 1  
Amble W., b m by Alta Boy..... (Robinson) 1 1 4 2 4  
Billy Carew, Miss Fair Sex, Pay Day, Lady M., Blast, Lady Jane and Mabel D. also started.

Time—2:16½, 2:15½, 2:23, 2:20½, 2:20½.

Trotting, 2:20 class, purse \$500.  
Viometta, c m by Superior..... (Raybould) 2 1 1 1 1  
Mar Boy, b g by Delmar..... (Clark) 1 2 5 5 5  
Kirkwood, Jr., H. H. H., Faustello and O. K. W. also started.

Time—2:15½, 2:14½, 2:16½, 2:17½.

## SECOND DAY—MONDAY.

The California bred horses carried off the honors in the two harness races, the pacer Darkway by Steinway taking the 2:20 pace after six hotly contested heats and getting a record of 2:13½ in the third heat. Rey Del Diablo was distanced in the second heat of this race.

In the three year old trot the colt Swift B. by Stam B. out of Swiftbird by Waldstein won as he pleased in straight heats. The summaries are as follows:

2:20 pace, best three in five, purse \$1000.  
Darkway, b h by Steinway..... 4 4 1 2 1 1  
Hello Girl, br m..... 1 5 6 1 4 3  
Laura Spuhr, ch m..... 2 1 4 5 5 2  
Russell S., Bonnie Treasure, Young Hal, Arrowpen, Christobel and Rey del Diablo also started.

Time—2:13½, 2:13, 2:13½, 2:17½, 2:14½.

Three year old trot, mile heats, best in three, purse \$500.  
Swift B., b c by Stam B..... 1 1  
Goldress, Rex Colorado, Christola Wilkes, Queen Caffery and Estelle Hunter also started.

Time—2:25½, 2:24½.

## Driving as a Fine Art.

Ever since the chariot-racing days of the ancients the skilful and fearless driving of spirited horses has been looked upon as an accomplishment giving pleasure to the performer and exciting the admiration of the beholder. Really skilful drivers are the exception in country or city. Even on the many farms where a number of horses are kept and more or less colts raised for use and sale it is seldom that those employed to drive and handle the horses are skilled in the art of getting the best performance and appearance out of the animals in their charge. Inferior driving rapidly deteriorates the value and appearance of a horse; and a colt reared and trained with shiftless, inadaptable methods will never attain anything like the inherent natural value that would have been possible with correct training and skilful driving.

All horsemen, and observant people generally, are familiar with examples showing the influence of the driver upon the horse. Fine, showy, high-stepping animals, fit to grace the finest turnout, have very soon become lawless drones, and in fact very like "plugs," simply by a change in ownership and drivers.

The best drivers are those that require prompt and strict obedience from the horses under their care while in harness and stable, and who never permit them to form awkward and unseemly habits. It is not necessary to be cruel or especially savage to accomplish right performance in a horse. The prevalent custom so common among drivers of constantly tapping, jerking or threatening, to keep horses up to their work, frets and wears them frequently more than the work they do, since it keeps them irritated, and in the end produces an ill-mannered and disagreeable animal.

The skilled, intelligent driver will seldom strike or punish his horses; but when it is necessary, he will use a first class whiplash or strap that will produce a decided tingle and will be held in remembrance by the horse without doing him injury. It is much more humane, as well as effective, to treat the horse inclined to laziness and lawlessness to a few moments of sharp, tingling punishment a few times a year or month, as the case demands, rather than to a daily and hourly rain of ineffective blows and cruel mouth-jerking of the bit.

Briefly, the requirements of good driving are courage, firmness, confidence and self-control in the driver, combined with strong, well adapted harness and tackle, thus enabling the driver to be always master of the situation. Right driving insures safety and good appearance, whether before the farmer's market wagon or the fancy city turnout.—B. F. W.

**Racing at Honolulu.**

---

It is a well-known fact that the famous champion pacer, Star Pointer, was, during his racing days, hampered by weak feet. Mr. James Murphy, who owned him at that time, says: 'Campbell's Horse Foot Remedy is the best thing for horses' feet I ever saw. I would not be without it on my horses' feet and if all owners would insist on its use, horses with bad feet would be the

On a hot day drink Jackson's Napa Soda lemonade and be refreshed.

## State Fair Matters.

[Sacramento Union, June 25.]

The Directors of the State Agricultural Society met at the Agricultural Pavilion yesterday, with Grove L. Johnson presiding and the following Directors present: Benjamin Rush, William Land, E. W. Howard, J. W. Wilson, William Johnston, Frank Burke, C. W. Paine, Frank Covey, James Whittaker and Thomas Fox.

Director C. W. Paine placed the name of Benjamin Rush in nomination for the position of President and he was unanimously elected. In returning thanks for the honor conferred upon him President Rush's speech in point of brevity is well worthy publication. He said: "Gentlemen, I thank you for this honor, but fortunately for you I cannot make a speech. We will now select a Vice-President."

E. W. Howard was selected to fill this office and the new board gave their attention to Messrs. Lindley and Drescher, representing the North Side Improvement Club and the Chamber of Commerce of Sacramento, who appeared before the board for the purpose of pledging the support of their respective organizations to aid the society in obtaining new grounds and reducing the heavy debts that incumbered it. Their report was received.

On motion of Director Johnson the board went into executive session for the purpose of selecting a Secretary, but as soon as the representatives of the press were excluded Director Land made a motion that the election of a Secretary be laid over until the next meeting of the board, and it was so ordered. One of the members of the board stated that in all probability no Secretary would not be selected until next spring, as the funds were short and a new man assuming office now would be of little benefit in conducting the coming fair. This means that Harry Lowden will continue to act as Secretary of the association.

It was agreed to open the fair on the 31st of August and continue it for two weeks. J. W. Wilson was selected as Superintendent of the racetrack and Grove L. Johnson as Superintendent of the Pavilion.

The following committees were appointed by President Rush:

Harness Speed—F. W. Covey, C. W. Paine and F. H. Burke.

Running Speed—J. W. Wilson, Thomas Fox and F. H. Burke.

Agricultural Products in Pavilion—William Johnston, Charles Paine and William Land.

Live Stock and Poultry—F. H. Burke, E. W. Howard and J. Whittaker.

Horses of All Kinds—William Johnston, Charles Paine and J. Whittaker.

Finance—William Land, William Johnston and Thomas Fox.

Printing—Grove L. Johnson, Charles Paine and J. W. Wilson.

Library—Charles Paine, Frank Covey and William Johnston.

Legal—Grove L. Johnson, Thomas Fox and J. W. Wilson.

Track Site—Charles Paine, J. W. Wilson and Thomas Fox.

Executive—Grove L. Johnson, E. W. Howard and J. W. Wilson.

Director Land then introduced a long list of improvements in conducting the financial end of the fair that he claimed would result in a saving of some \$6000, and the majority of them were adopted. Among other things on the list it was agreed to limit the number of employees at the park to twenty.

Exhibitors of livestock are to pay for their own feed, instead of having it furnished by the society, as heretofore. This item alone would result in a saving of \$2000. This feature met with the hearty co-operation of Director Burke, who said that he had been an exhibitor for twenty-two consecutive years and had always been scandalized by the trouble over feed. Personally he would always prefer to buy his own feed or bring it with him from his home establishment.

It was decided to place the price of single tickets for men at \$1 and for ladies at 50 cents. These tickets to admit to the grand stand as well as the grounds. Family tickets for the entire fair, admitting a man, his wife and minor children to be sold for \$7.50.

The cleaning of the grounds, repairs and etc., to be made preliminary to the opening of the fair will be let out by contract instead of being done by day labor, as heretofore, and the contract to be let to the lowest bidder.

None but the directors and their friends will be allowed to lunch at the table in the Directors' stand and all of the employees who have heretofore enjoyed free meals there at the expense of the State will have to purchase their meals in the lower cabin.

It was decided that the decorations in the Pavilion should be put up this year at an expense not to exceed \$200. In speaking of this subject Director Land said: "I have noticed that for the last few years the same old rags of decoration have been strung throughout the building, and I now think that we should make a change. I am in favor of using flags and streamers of national colors," and it was so agreed.

The subject of advertising for the sale of the pool selling privileges provoked a hot discussion. A Director desired that it be specified in the advertisement that bids under the sum of \$20,000 would not be in any way considered.

Director Johnson said that if such a clause was put in no one would make any bids for the privilege of selling pools. Director Land declared that the books made \$35,000 over and above their expenses last year, and he said that if his information on the matter was true, they could well afford to pay \$20,000 or more for the privilege.

President Rush, to end the discussion, proposed that it be the sense of the meeting that that be the lowest sum accepted, and that the Secretary be empowered to put an advertisement in all the San Francisco papers and the local press calling for bids, which were to be opened August 15th.

The Secretary was also empowered to write to Leroy

Anderson, and if possible secure his services as judge of the cattle exhibits.

At this point Director Fox precipitated a lively financial debate, that at times became warm and personal, by inquiring as to the source from which the money was to come in order to run the fair. He said that many of the men who had worked at the last fair had not as yet been paid, and he moved that the board deed the park property over to the State, and in this way receive the sum of \$45,000 which would be paid over by the State for the property.

Director Johnson was opposed to this plan, and said that it was simple suicide to deed over to the State a piece of property that was worth at least \$100,000 for the small sum of \$45,000. He said that the society owed \$80,000, and even if they received the \$45,000 they would still be deeply in debt, and would have willed away their only security that would enable them to get out of debt.

President Rush objected to the discussion of the subject any farther, as he stated that it was getting too hot, so on motion of Director Paine the matter was postponed until the next meeting of the board, which will be held July 11th.

## Racing at Petaluma.

There was a match race at Kenilworth Park, Petaluma a week ago last Sunday between John Lawler's horse Jim Chase and Kittie D. a mare belonging to Mr. Hoffman of this city. The race was for \$50 a side. Kittie D. won in straight heats in 2:30½, 2:28 and 2:30½.

Mr. Lawlor was not convinced that Kittie D. has more speed than his horse however and a second race between the two has been arranged for July 4th at the same track. Several other races have been put on the program as follows:

First race, purse \$100—Match race between Hoffman's Kittie D., entered by Walter Lord and John Lawler's Jim Chase. Heats, three in five.

Second race—Match race for purse of \$50, between Jack Grimes' Dr. Mac and Cyrus' Lillie S.

Third race—Fourth of July Stakes. Mile heats two in three. Buggy race between Kendall's Little Jake; Russ' Vaseline; Lawer's Lottie Derby and Stillwell's McKinney mare.

Fourth race—\$25 per corner, mile heats, three in five, between Baily's Frank (Sonoma), Grimes' Lena Holly, George Smith's Let Him Be, McGovern's Dan Frasier, J. Zazi's Edenvale.

Fifth race—Quarter mile dash for saddle horses, purse \$10.

There will be a steer race at 1 o'clock sharp on the track and there will be broncho "busting" between heats of the races.

J. B. Hinkle will be the presiding judge.

## Spreckels Yearlings Leave for Chicago.

Superintendent George Berry, of the Napa Stock Farm of Mr. A. B. Spreckels, left Napa yesterday in charge of 27 thoroughbred yearlings, which are to be sold at the Daxter Park Horse Exchange, Chicago, July 10th. There have been many consignments of yearlings sold from this well-known breeding farm, but a better looking or more highly developed lot of colts was never raised there than this consignment of 27. The complete list with their breeding is as follows:

Bor br c by St. Andrew-Candid.  
Bk f by Ravelston-Yarranabee.  
Bf by Brutus-Piquante.  
Bf by The Judge-Vielleicht.  
Bf by Puryear D.—Hazel Mc.  
Ch c by The Judge-Maya II.  
B f by Libertine-Carration II.  
Ch f by Crighton-Fatima II.

B f by Ravelston-Floriana.  
B c by Puryear D.—Break o' Day.  
B c by Puryear D.—Sevens.  
B c by Crighton-Sweet Cakes.

## What is Cresceus Worth?

TOLEDO, O., June 6—There was a report last winter that \$100,000 had been refused for the champion stallion Cresceus. Around innumerable stoves the question of his commercial value was discussed without a verdict. Then the local assessor took a hand in the game and when he got the returns he found the Ketcham horses valued at \$750. This Ketcham declined to swear to. Then the assessor put in his own valuation for the four horses at the modest figure of \$20,000. This did not meet Mr. Ketcham's idea and he has appealed. The ultimate result will be watched with interest.

## Redfield's Breeding Theory.

Casper L. Redfield of Chicago, who has attracted the attention of breeders of trotting horses all over the world by his theories in regard to speed transmission, has written the following article to the *Western Horseman*, which puts in a concise form the main points of his ideas:

"I have not been engaged so much in giving advice how to breed the trotter as I have been in pointing out the lines which have been most successful. My advice has been indirect rather than direct. Put into direct words it is: 'Breed more strictly to those lines which in the past have been most successful in producing speed.'"

My "fine theorizing" consists in examining the pedigrees of those horses which have exhibited the greatest speed, and in pointing out wherein these pedigrees differ from the pedigrees of less speedy horses of the same breed. One of the things found in these pedigrees is that the best progenitors are sons of comparatively old horses. When we find a great progenitor who was the son of a comparatively young sire, we find that this progenitor was worked at the trot or pace much more than ordinary horses are worked. Having found that these things run uniformly through all 2:10 trotters, I say:

First, other things being equal, the older a horse is the better he is for breeding purposes. Second, other things being equal, the more severely and continuously a horse has been trained the better he is for breeding purposes. These two things are the principal elements of the theory and are in reality nothing more nor less than a statement of what I found in investigating the pedigrees of 2:10 trotters.

There are other ways of demonstrating a theory of breeding than by doing the actual breeding. One of these is from a known performance of a horse, predicting in advance just what his pedigree, when examined, will show in regard to age and training in ancestors. Another is, from the known history of a horse, predicting in advance what the Year Book will show with regard to his progeny in the second and third generations. For example, how many persons know that the progeny of the daughters of George Wilkes contain a greater percentage of fast stallions than do the progeny from the daughters of some other horse, as Electioneer? Being told that such is the fact, what breeder can tell why George Wilkes and Electioneer differ in this respect? Without knowing what the records would show, my theory told me that the daughters of George Wilkes should be more successful with their sons and less successful with their daughters than were the daughters of Electioneer. Upon tabulating the trotters and pacers produced by the daughters of George Wilkes, I found that 55 per cent were stallions and 45 per cent were mares and geldings. Upon doing the same for the daughters of Electioneer, I found that 40 per cent were stallions and 60 per cent were mares and geldings. My theory also told me that what was true of the daughters of George Wilkes would be reversed when it came to some sons a part of whose history I knew. Upon examining the produce of Onward I found that 45 per cent were stallions and 55 per cent were mares and geldings, and we have this result in spite of the fact that very few of his sons were gelded.

In the same way I have examined the progeny of other horses whose history and pedigree I knew, and in each case the Year Book has confirmed what my theory told me should be the case. If my theory will enable me to reach down to the third generation and determine such an abstract thing as the sex of the majority of the performers produced, is it not probable that I am coming pretty near to a fundamental truth?

## Corrections in Vallejo Entry List.

Just a few minutes before the forms of the BREEDER AND SPORTSMAN went to press last week, a list of the entries received for the Vallejo meeting reached this office and in the hurry to get it inserted a few errors and omissions were made. Manager Thomas Smith has sent us the following corrections to be made in the list as printed last week.

In the 2:25 pace, Wm. McDonald's entry was called the Young mare. The mare's name is Swanhilda.

In the 2:23 trot the name of L. K. Richard's black gelding Oro Belmont by Oro Wilkes was omitted.

H. W. Goodall's entries were also omitted. They were Dr. Hammond in the 2:23 trot, and Rajah in the 2:17 pace.

The Kenney Bicycle Co., 531 Valencia St., is doing a big business in the McMurray Carts and Sulkeys. You not only save money by purchasing a McMurray but get the most durable, best made, and easiest running cart or sulky in the market. Investigation will convince a Missourian.

Jackson's Napa Soda does not tangle th

## Notes and News.

A pair of matched roadsters is wanted. See advertisement.

An advertiser offers four McKinney fillies for sale, in our business columns.

Bids for the privileges of the Vallejo meeting are advertised for in this issue.

Mr. Ira Pierce returned from the East last week looking greatly improved in health.

Monroe, the big gelding by Seymour Wilkes, has been declared out of the M. & M. stake at Detroit.

J. W. Gardner, who bred Coney 2:02 and McZeus 2:13 has been dangerously ill during the past week at Los Angeles.

Robert I. 2:10 worked a mile in 2:13 at Los Angeles recently and is giving every evidence of being a faster horse than he was last year.

Walter Maben is working a full brother to Flying Jib 2:04 at the Los Angeles track. This horse is a trotter and is owned by Dan Kevane.

There will be harness racing at Tanforan Park, and also at the tracks at Vallejo, Petaluma and perhaps Pleasanton next Saturday, which is Independence Day.

A. W. Bruner of Los Angeles will soon leave for the East with El Diablo 2:11, a green pacer called John I. and Billy Green a trotter by McKinney that has no record.

John Donahue has a stable of ten horses headed by Zolock 2:10 at the Los Angeles track. A green mare by Zolock that is in the string is said to be a very fast one.

There are two pacers that bear the pretty name of Miss Georgie, and both have beaten 2:12 in their work this year. One is at Pleasanton and the other at Cleveland.

They are saying over east that Reybel the three year old filly by Rey Direct 2:10 is the very fastest thing ever bred in California, and they expect a mile in two minutes is within her reach.

The bay stallion, Electwood 2:29, by Electioneer 125, dam Amrah, by Nutwood, died last week at Wheaton, Ill. Electwood sired Charley Stiles 2:15, Louis E. 2:17, and five others in the list.

A dispatch from Minneapolis dated June 25th, states that Mr. Savage had that day refused an offer of \$92,000 for his stallions Dan Patch 1:59 and Directum 2:05. The offer was made by W. W. Gentry.

Entries for eight additional purses for the Breeders meeting at Petaluma will close July 1st, which is Wednesday next. The meeting will be held during the last week in August. Don't forget the date of closing—July 1st.

The aggregate of the sales at William G. Layng's Occidental Horse Exchange on Tuesday last, when the horses belonging to the Estate of Henry Pierce were sold, was a little over \$12,000. The horses catalogued brought \$10,000.

W. H. Graham of Reedley, Cal., has selected the peculiar name Tennobika for a fine bay filly by Athabla that his mare Lectic by Eclectic foaled June 7th this year. The filly is entered in the \$6000 Breeders Futurity for foals of 1903.

Six purses of \$500, one of \$600 and one of \$400 will close for entries on Wednesday next, July 1st. They are offered by the Breeders Association for their big meeting to take place at Petaluma in August. Don't let Wednesday next pass without making entries.

The \$10,000 match race between Lord Derby 2:05 and Major Delmar 2:05, which was to have been brought off at the Empire City track July 4, has been declared off. Lord Derby has gone lame in his training at Hartford, Conn., but is expected to recover in a short time.

There is another McKinney in the 2:15 list. Prof. E. P. Heald's good stallion Tom Smith won his race, the 2:14 trot, at Denver last Thursday and lowered his former record of 2:16 to 2:14 in the final heat. Tom Smith was a long shot in the betting, the favorite being a mare called Gold Dust Maid that had shown 2:12 in her work.

Dan Leiginger has a string of a half dozen trotters and pacers that he is getting ready for the Breeders meeting. The trotter Cicero that he recently purchased has shown lots of improvement in his hands and is said to prove a reliable horse. He has a fine mare by McKinney out of Nelly McManus that is owned by Thos. J. Kelly of this city. She will be given a record this year and should get a mark close to 2:20. She was bred recently to the handsome little Dan I. Direct 2:12. Others in Leiginger's string are a filly by Philosopher, a very promising mare by Cicero, and a three year old filly by Geo. Washington a sister to Lady Rowena 2:18.

Winsford Stratton, the bay pacer by Saraway (the latter own brother to Chas. Derby 2:20) won the 2:08 pace at Denver last Tuesday and reduced his record to 2:07. Dr. Boucher's horse Harry Logan was in the race and went to the half in 1:02, forcing Stratton to step the mile in 2:07 as stated. In the final heat, however, Harry Logan was distanced.

A match race for \$1000 has been made by A. Ottinger and B. Croner of this city to come off on the 4th of July. Mr. Ottinger names his horse Zambra 2:16, holder of the world's five mile trotting record, and Mr. Croner names Banker's Daughter 2:13, the fast pacing mare by Arthur Wilkes. The match is made to be held over the Pleasanton track.

Well-bred trotting horses have odd careers sometimes. A son of Mambrino King was once disposed of at auction in New York for \$35. He was bid off by a milkman who put him to work on the route in front of the milk wagon. Later he was put to heavier hauling and on a wager pulled fifteen barrels of apples up a steep hill. Still later he showed speed, was given some training and for another bet trotted a mile in 2:19.

According to the Sanger, Fresno county, *Herald*, the average cost of oiling the roads in that section has been \$200 per mile. There are nearly twenty miles of oiled road in the district, and another ten-mile section is to be oiled within the next few weeks. If the road is properly graded and oiled at the right time it forms a hard roadbed which is dustless in summer and sheds the water perfectly in winter. The Sanger roads are in that condition.

Katrinka G. is showing well in her work for Roy Miller. This mare last season was second to Dulce Cor each heat at Pimlico track in 2:16, 2:16, and three days later chased the daughter of Baron Wilkes out over the same track in 2:13, 2:13, 2:13. At Readville, Mass., September 13th, she was second to Maxine three heats in 2:12, 2:11, 2:12. Katrinka G. was bred at Oakwood Park Stock Farm and is a full sister to Chas. Derby 2:20, Klatawah 2:05 and others.

"Constant Reader," who dates his letters from the "watermelon section," writes that in his opinion the positions of Directors of the State Agricultural Society have not been impartially distributed in Sacramento, inasmuch as William Land of the Western Hotel and J. W. Wilson of the Golden Eagle are both given positions while mine host "Jo" Bowers of the Capital is not. Our correspondent suggests that "Jo" be slated to fill the next vacancy on the Board so that there will be a fair field and no favor when the rush for hotel accommodations for fair week begins.

For the first time in the history of the Grand Circuit Detroit and Cleveland make every open event a two-in-three race. At Cleveland all the twenty-five races, including the stake races already closed, are on the two-in-three plan. At Detroit all races are two-in-three, except the M. and M. and the Chamber of Commerce. Detroit offers \$44,000 and Cleveland \$35,000 in purses. Both meetings are scheduled to cover five days, and while the classes are not uniform the program is so arranged at both Detroit and Cleveland that a horse may start twice the same week.

The second sale of horses belonging to the estate of Henry Pierce will take place at the Occidental Horse Exchange on Wednesday, July 22d. At this sale the horses to be offered will average much higher class than those disposed of last Tuesday. Among those to be sold is the stallion Sidney Dillon, sire of Dolly Dillon 2:07 and the phenomenal Lou Dillon 2:06, champion record of a mare to wagon. Many of the farm's great broodmares will also be sold, among them Biscari, dam of four in the list, by Director, By By by Nutwood and many others. Wm. G. Layng of the Occidental Horse Exchange will have the catalogues out in a few days and in our issue next week a list of the choice animals to be sold will be printed. This sale, it is said, will be of the very best animals on the Pierce farms.

P. H. Quinn of Santa Rosa, who has been on a visit recently to his old home at Eureka, Humboldt county, tells us that he saw two very promising pacers while there, both green as gourds, one four and the other five years olds. They are both by Wayland W. 2:12. The four year old is a gelding and has worked a quarter in 35 seconds. His dam is the chestnut mare Belle 2:11 by Melbourne King 1902, a son of Mambrino King. James Sullivan campaigned this mare on the California circuit in 1896 and gave her her record at Los Angeles. She was very fast. The other green pacer that Mr. Quinn saw at Eureka is a mare and is out of the dam of Fitz Aymon 2:20. Fitz Aymon's dam was Topsey by Whippleton, grandam Mollie by Ethan Allen 2093. Mr. Quinn says she worked a mile in 2:35 five weeks after she was broken. Wayland W., for his opportunities, is getting a great deal of speed.

"There are plenty of trotters and pacers that are unsound, and, judging from the number of unsound thoroughbreds one can find, there will continue to be such for many years yet, but the reason for this is not that the leading breeders overlook soundness when selecting their sires. The principal reason why trotters and pacers of unsound conformation are plentiful," remarks "Raymond" in *The Horse World*, "is that there are many men who breed on a small scale without giving any thought to the principles of breeding, other than to mate, with what appears to them to be a desirable sire, any mare they may happen to own. These men, scattered throughout the country, usually patronize a trotting or pacing stallion and it is to their failure to study the laws of inheritance and to recognize the part played by selection that much of the unsoundness found among trotters and pacers having speed enough to justify training is due."

Mr. R. P. Lathrop of Hollister has purchased the stallion Mestoe 31873, to take the place of Airline W. that died June 4th. Mestoe was bred at San Mateo Stock Farm by the late William Corbitt and was foaled in 1894. He is by Sable Wilkes 2:18, son of Guy Wilkes, and his dam is the standard and registered mare Jane E. (dam of Puritan 2:29), by Millman's Bellfounder that sired nine trotters and the dams of fourteen in the list. Mestoe is jet black, finely proportioned, a beautiful horse standing 16.1 and weighing 1250 pounds. He can trot a 2:20 clip although never worked. He has proved himself a good sire, as his colts are uniform in size and color and such as have been worked are turning out well. Smoker, a green colt by this horse owned by Blessing Bros. of Hollister, can trot down in the twenties, and Ed. Wright's Black Diamond with two months' work could be in the list. Mestoe was much admired in Watsonville, where he was owned by G. F. Rogers, and has left some very promising colts there. With Mestoe and Dictatus Medium Mr. Lathrop has two good stallions that will improve the stock of Hollister and surrounding country. Little Medium, a yearling by the last named horse, is working quarters now at a 2:50 gait.

The scarcity of sensational trotting material on the market this season in Kentucky is a matter of general comment, as not even in the boom times of a decade ago were trotters so high as now, and a real good horse, stallion, mare, colt, gelding or filly will absolutely bring more money to-day than ever before in the history of the light harness horse. The sale firms of the country have particularly drawn attention to this fact, as they unanimously report a famine in the high class trotting market. There is little doubt that a greater number of good trotting bred mares will be mated with good trotting stallions this year than at any time since the disastrous slump in prices of trotting stock a few years ago. The earning capacity of good trotters and pacers, too, was never so great as at present. Managers of trotting tracks are offering rich purses all along the line. This with the \$10,000 Futurities offered for three year olds will have a tendency, remarks the *Horse Dealer*, to maintain prices of first class animals for several years to come, and probably increase them. Those who are just entering the trotting breeding business should adopt the motto, "Breed in producing lines," and the best of producing lines at that.

Blanch Walsh, the actress, who has been one of New York's greatest successes during the past two seasons, has become enamored of Charter Oak Park and runs up from New York to visit it whenever she gets an opportunity. Miss Walsh is quite a horsewoman herself and has recently, it is announced, purchased that well-known horse, The Dutchman. Miss Walsh's first drive on the track was taken during a recent visit made to the track in company of Mrs. Frank Walker, the wife of the well-known starter. Both ladies were the guests of E. E. Smathers. Miss Walsh was shown Mr. Smathers' great string of horses and admired them greatly. With Ida Haywood she fell in love. On the invitation of Mr. Smathers, Miss Walsh drove Ida Haywood around the track, the owner accompanying her behind another of his horses. Both horses struck off at a lively gait as soon as given the word, and a little rivalry sprung up between Miss Walsh and Mr. Smathers which caused the affair to soon closely resemble a race. Andy Welch timed them as they went around, and at the quarter he gave an exclamation. "In 30," he said, "Look at that woman drive!" The half was done in 1:03.

### Races at Tanforan July 4th.

The program for the joint meeting of the San Francisco and Golden Gate Park Driving Clubs which is to be held at Tanforan Park on Independence Day was arranged at a meeting of the joint committee representing the two clubs held last Tuesday evening. As arranged there will be five races as follows:

Green class, San Francisco Driving Club—S. Watson's Bessy W., A. Benson's Star Banner, E. Buck's Zula Lass, L. Ferrai's Louey S.

2:25 class, Golden Gate Park Driving Association—A. J. Jacobs' Mack, Captain Betchelder's Trifle, D. Leiginger's Cicero, H. Schottler's King V., M. M. Donnelly's Young Salisbury, J. Doran's Della McCarthy.

2:40 class, Golden Gate Park Club—J. de la Montanya's Ivy, Sam Hable's Little Egypt, J. Holland's Sea Breeze, Dr. A. McLaughlin's A. B. P., Captain Barneson's Sid.

Free for all, San Francisco Club—S. Watson's Al Sandy, B. Smith's Echora Wilkes, G. Martin's Teddy, D. Leiginger's Velma.

2:30 class, San Francisco Club—B. Green's Doc, J. McTigue's Mike, H. Schottler's King V., A. Woolf's Lawrence W., B. Levy's Cicero, L. Coffey's Mission Queen.

No admission fee will be charged and a band of music will be in attendance. All races will be mile heats, best two in three. The officials for the day will be: Starter, A. J. Martin; judges, J. Winrow, J. Coons and W. J. Simpson; timers, F. Vetter and J. O. Chesley; marshal, Dr. I. B. Dalziel; assistant marshal, W. Higginbottom; secretary, F. W. Thompson; assistant secretary, T. Douglass.

### East View Farm.

Direct 2:05½. Directum Kelly (4) 2:08. Spohn Medical Co. New York, July 28, 1901. Gentlemen:—We have used Spohn's Distemper Compound for five years, because it CURES, and prevents attacks in case of exposure. I believe in the humanitarian idea to handle our dumb but faithful friend, the horse, and Spohn's Cure is our best help to save them from suffering. East View Farm. J. SCOTT McCox, Trainer.

## Breeding Methods at Fault.

An Eastern breeder whose ideas on blood lines have shown themselves to be correct writes me, says Henry Ten Eyck White, in the Chicago *Tribune*, commenting on an article that appeared not long ago in this column, and adds:

"I do not care to breed horses, but cannot buy what I want, as the men who have great broodmares have inferior stallions, and vice versa. I believe that the better bred a horse is the better chance he has to sire a winner. I believe the best bred horse is the one that beats all the others. The breeding of the harness horse is still so young that no one may say this or that is the greatest family. There is no 'greatest' family. I believe in breeding to Futurity winners, and that colt speed is the only sort that is reasonably certain to breed on. I know that the produce of a fast colt trotter will show quality as early or earlier than its progenitor. This is law in breeding. I had the honor to be the late Mr. Speier's adviser in the selection and breeding of his horses during the last few years of his life. I advised the buying of the stallion Directum and of Janie T., Mary Celeste and his other fast fillies. Were I a man of ample wealth to indulge my views I would have only mares of proved great producing quality or fillies that could trot in 2:15 at three years for my broodmares."

This is certainly sound doctrine as to breeding, and what is said as to one man owning a lot of good broodmares and a poor stallion while another has a great stallion and a lot of mares in no sense suitable for his mate is true enough. But it was a sentence in the closing paragraph of the letter that most attracted me. "How often," says my correspondent, "we see the blood of Harold and Pilot Jr. combined in the top notch trotter and pacer. I do not believe it an accident. In my opinion the trotter will ultimately go about as fast as the pacer. My reason is this: Mare trotters have beaten mare pacers. Then why may not the stallion trotters beat the stallion pacers? Heretofore stallion trotters have been popular in the stud, while pacing stallions, so far as breeding purposes were concerned, were a drug on the market. The result has been that stallion pacers have not had anything like the same handicap in the way of stud duties to keep them from attaining their best possible record that has been put on the trotter that is a stallion. I have discovered that a horse cannot do two things at once and do either of them extra well."

For some time it has been my intention to present in concrete form the accomplishments of the Pilot Jr. family in the female line. They have done wonders both in speed production and in giving to the world a lot of stallions and mares that have bred on with unequalled potency.

It is true that Pilot Jr. mares have done the most to keep green the memory of their sire, and the story of their deeds, even in tabular form, is an interesting one. Without attempting to go into detail regarding what the blood has achieved—that were worthy a volume—it may be said that the first horse to trot in 2:10 was from a Pilot Jr. mare, as was the first stallion to trot in 2:20. The first mare to trot in 2:10 had for her dam a daughter of Pilot Jr., and this mare, Maud S., ultimately held the world's trotting record. The horse with the fastest combined trotting and pacing records—2:10 and 2:06½—is from a Pilot Jr. mare, and so was the first trotter by a strictly thoroughbred stallion that beat 2:25. Scotland was the horse and he was by Bonnie Scotland and out of Waterwitch by Pilot Jr. This mare also produced Mambrino Gift, the first 2:20 trotting stallion.

The fact that the Pilot Jr. mares, in a day when the breeding of the American trotter was in its infancy, threw speed of a high order when mated with stallions of widely differing blood lines is proof positive of the superlative excellence of the strain. Waterwitch for instance, foaled Scotland 2:22½, by the thoroughbred Bonnie Scotland; by Mambrino Pilot she reproduced Mambrino Gift, champion trotting stallion of his day, and then by Belmont had such foals as Viking, Warder, Waterloo and Wavelet, all 2:30 or better trotters to high wheels, while two of them are in the 2:20 list.

Midnight, bred to Dictator, produced Jay Eye See, the first 2:10 trotter. Mated with Electioneer the produce was Electricity 2:17½, and her mating with Harold gave the world Neotide 2:20½. Miss Russell, in addition to Maud S., champion of her day, produced Nutwood, leading sire of 2:30 trotters, and as further showing the tendency of the Pilot Jr. blood to breed on most strongly in the female line, it may be noted that while the daughters of Nutwood are at the top in the production of trotting speed, his sons have not amounted to much as speed getters.

While it is possible to show in a limited space what the daughters of Pilot Jr. accomplished in the way of producing speed, and as the dams of sons that sired speed and daughters that produced it, the

whole story of their wonderful influence in putting the trotter of to-day where he is can be appreciated only by an exhaustive research of turf chronicles as shown by the Year Books.

Pilot Jr. himself sired eighty trotters that beat 2:30, most of them performing in the '60's and early '70's, but they were among the best on the turf in those days, as all who saw them perform will attest. Pilot Temple, John Morgan, Dixie and Tackey won a lot of races and were good over a distance of ground as well as at mile heats, while the fastest of the family, Queen of the West, owned by Henry Graves of Chicago, was admittedly the brushiest trotter of her day, although, owing to unsteadiness, her best record was 2:26½.

Tattler, who came later, sired such well-known ones in their time as Rumor, Indianapolis and Voltaire, and the pacer Gossip 2:18. This latter sired the pacer Gossip Jr. 2:13½, one of the best race horse pacers of that period, while Voltaire was the sire of the pacer Bessemer, who had the four year old record for stallions at that way of going, and in turn gave the turf Be Sure 2:06½.

Of the work done by the daughters of Pilot Jr. only the result of one generation may here be given. Seventeen mares by the old horse gave the turf thirty-seven trotters and three pacers, and their trotters included three world's champions—Maud S., Jay Eye See and Mambrino Gift—a wonderful showing in itself. In tabulated form their record is as follows: The first column gives the name of the mare, the second the number of performers produced by her, the third the number sired by her sons, and fourth the performers produced by her daughters.

Name.	Perfs.	Sons sired.	Daus prod.

## Beau Ormonde's Fast Mile.

A mile in one minute and thirty-eight seconds is pretty fast time for a thoroughbred race horse in a race, but it was made by Beau Ormonde at Worth a few days before the close of the spring meeting, says *Coach and Saddle*. And the "official time" was verified by the watches of a number of horsemen, which does not always happen. So great is the liking for fast time that now the horse is heralded as a world-beater, which he is not. Beau Ormonde carried 85 pounds, beating Huzzah with 83 by a whisker, and the fleet Golden Rule, with 100 up, by an open length. The course was in perfect condition, brought about through the efforts of Lyman Davis, an expert in track manipulation. The time was within a fifth of a second of the record made by Brigadier at Sheephead Bay, and equals the time accredited to Orimar at Washington Park. While Beau Ormonde is not a world-beater, he is certainly a good race horse, and in this son of Ormonde the "horse of the century" has at least one excellent representative. The horse that cost W. O'B. MacDonough \$150,000 has been a great disappointment as a sire, his usefulness having been impaired when it was found that he had been sold to the American and was to be shipped to California. Beau Ormonde was considered the better of his get, and his worth was attributed more to the sterling qualities of his dam, Miss Brummel, than to his sire. At the dispersal sale of the MacDonough racing string in San Francisco last January Beau Ormonde was purchased by E. L. Kripp and placed in charge of Trainer Forbes. The horse was considered a fair sort of a selling-plater when Forbes took him. The first thing the trainer did was to put more flesh on the animal's frame and to build up his muscles. Before leaving California the animal was ready to go three-quarters of a mile and win. The process of physical development was continued after reaching Worth. He won his first race at three-quarters and might have won the Flying Handicap at the same distance but for a bit of ill luck. Thereafter he won at six and a half furlongs and then at seven furlongs, the longest distance Forbes had asked him to go until the mile in which he ran so fast and fought out such a game finish to victory. Forbes deserves credit for the development of the horse, and expects to rake in many of the plums that are to be offered at the coming meetings.

"Columbus" of the *Western Horseman* says: "A road driver that is afraid of paying a good price for a good horse will never ride in front until he is carried there in a hearse."

## Cleveland Track Notes.

[American Sportsman, June 11.]

Wm. Hendrickson worked the trotter Clay S. 2:13½ by Grover Clay several miles, one in 2:19.

J. M. Nelson worked China Maid several miles around 2:20 and let her brush fast in the last quarter. He also worked several colts slow miles.

The fastest mile that H. K. Devereux has allowed John A. McKerron to step since his return from Lexington was a mile in 2:27. He has had several slow miles and will gradually be prepared for his engagements.

M. E. McHenry gave Dan Patch several slow miles. He did not let him step fast, only giving him good stiff jog work. Lew Banta, Mr. McHenry's assistant, let the pacer Joe Grattan by Grattan 2:13 step a mile in 2:16.

"Doc" Tanner let The Monk 2:05½ step a mile in 2:12½ on Wednesday morning and the easy way he did it showed that he was in the best of form. He also worked Imogene 2:11½ a mile in 2:17½ and several others of the Billings horses slow miles.

Ed Behyon gave the Walnut Hall horses their fastest work on Wednesday since coming to the track. He worked Walnut Hall 2:09½ a mile in 2:22½, Fereno 2:07½ a mile in 2:30 and Ozanam 2:08 a mile in 2:22 flat. He is going slow with them as he will not start until the Empire City meeting.

Not long since, S. E. Kent of Los Angeles, Cal., arrived at the Glenville track with the five year old bay stallion Bonnie Russell by Conifer, son of Lord Russell, dam Bonnie Ella by Bonnie McGregor 2:13½.

He is a handsome stallion and is said to be very fast. He was worked a part of last season, and last fall trotted a full mile over the Los Angeles track in 2:14½. At least Mr. Kent has thought him good enough to enter in the rich M. & M., and believes that if he becomes acclimated in time he will be able to give a good account of himself at the Detroit meeting. He was named in the Detroit race by Emma Isabelle Howard of Los Angeles, Cal. There seems to be a story that goes with the horse, and while he is entered he may not start in the race.

It seems that Emma Isabelle Howard is the divorced wife of W. W. Howard. It is said that the husband was granted a divorce only a short time ago. That at the time the decree of divorce was granted Bonnie Russell was at one of the California tracks. It is charged that Emma Isabelle Howard secretly caused him to be taken from his stall and kept him under cover until he arrived at the Glenville track. That the horse was not shipped directly here, but was under cover in Michigan until he arrived here. It now develops that Louisa B. Howard of New York, the mother of W. W. Howard, claims to own the stallion. She affirms that she bought the horse on the recommendation of her son and other parties, and that she is the sole owner of the stallion and warns any person from buying him. Louisa B. Howard expects to assert her claim at the proper time, and her representatives are not sure that they will permit the horse to race.

At the Kingston, New York, half mile track, the Secretary gelding Frank won the free for all pace on June 13th, taking three straight heats. The best time was 2:14½ and Frank won as he pleased.

Jackson's Napa Soda is sold in every city, town and hamlet in the State.

WILL NOT SCAR OR BLEMISH.

### GOMBAULT'S CAUSTIC BALSAM

Is the safest and most effective lotion or blister for ailments of

#### HORSES and CATTLE

and supersedes all cautery or firing. It is prepared exclusively by J. E. Gombault, ex-Veterinary Surgeon to the French Government Stud.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

## ROD, GUN AND KENNEL.

Conducted by J. X. De WITT.

### The Pines.

Whispering, murmuring;  
Swaying by the balmy breeze  
As the cool, the spicy trees  
Count their crooning lullabies,  
And breathe their incense laden sighs  
Upward into summer skies.

Secret, mysterious;  
Verities prophets of the wood,  
Whispering, or good;  
Faintly, priestly, pointed pines,  
Grim guardians of the forest shrines,  
Wave their arms in mystic signs.

Drowsy, languorous;  
The pungent pine groves, soft  
Carpeted, sing far aloft  
Their low voiced invitations free,  
To come and dream. Bid all care flee,  
For only joy beneath the pines may be.

### Catching Striped Bass with Decoys.

John Fatjo, the genial proprietor of that favorite resort of striped bass fishermen, the Lake Merritt boat house, relates the following story about an angling genius; a new recruit enrolled on the roster of the Ancient Order of Waltonians, with whom he recently became acquainted.

The genius is a retired business man of this city, and after more than forty years of strict devotion to private and official business, suddenly concluded that he knew when he had enough of what the world calls riches and decided that he would devote the remainder of his days to indulgence in ease and comfort, and for occupation and recreation would devote much time to angling, which was a very commendable idea of course.

He had never cast a fly or dropped a line into the water in all his life, but the feeling permeated his bones that the peaceful pursuits of the angler would round up happily the days that were left over from application to busy life.

"I noticed the old gentleman several times about the lake," said Fatjo, "and he always seemed to be intensely interested in the fishermen here and there."

"I want to learn the art of angling from the bottom up," said he to me one morning when he came to the boathouse, "and I wish to place myself in your hands as a pupil. I will furnish everything necessary, pay for your boat and your own time. I feel as if I must learn to fish. Are you busy to-day?"

"Well, no, if you wish to go fishing. Where would you like to go, at the floodgates, troll around the lake, or anchor in Archer's hole and try our luck? When do you want to start out?"

"We'll go now, if you please, so just get your boat and some bait ready. I've brought everything else along in my carriage."

"And so he had, he went outside and shortly returned with a wholesale assortment of tackle and fishermen's sundries, enough to stock a small store. We were soon away from the float, and tried various places and styles of fishing with the result that I hooked and landed two nice bass, a four and an eight pound fish. The old gentleman was elated and eager to learn the game. Just before we came in, at his suggestion we tried the water near the floodgates, using a live bait and a bob. While we were watching our floats, waiting for a strike, my friend said with an accent of inspiration:

"You shoot ducks a good deal and you use decoys don't you?"

"Yes; couldn't do much without 'em."

"I have been thinking, if decoys attract ducks, why can't small live fish, the kind the bass feed upon, be made to attract the big fish?"

"Why not, sure enough? The idea is new to me, I think it is worth trying."

Nothing further was said on the subject and shortly afterward we returned to the boat house and put up. My pupil went away happy, remarking as he left that he would "be round again in a day or two."

In a few days, he was on deck again and was eager for another fishing trip. When placing our things in the boat, I noticed quite a large bundle nicely wrapped up, which might have been a life preserver or a lunch for ten people. My curiosity was aroused, but I said nothing awaiting developments.

At his suggestion we anchored in Archer's hole, then my friend dropped his hand on the mysterious bundle, and with a comical semi-tragic air said: "Now I will show you the great persuader or piscatorial annihilator; in other words, my fish decoy."

A glass jar nearly a foot long about six inches in diameter, a lid perforated with air holes, and a handle with a long stout line attached was triumphantly held up to view. Its success, judging from my friend's manner seemed a foregone conclusion. I was seated at the half hidden smile of satisfaction beaming on his face. Ten small smelt and shiners were in the jar full of water and he lowered it gently to the side of the boat near the stern. Our rods were soon rigged up, hooks baited with a live smelt

and we dropped our lines down in the water close to the glass jar and great expectations followed them.

"Had any bites?" he whispered after a half hour's patient waiting for things to get settled and for the fish to come round."

"No, have you?"

"Nary a nibble."

"A silence and hopeful watchfulness held sway for nearly an hour more. Then both of us began to hitch about uneasily on our seats, but nothing was said. Another half hour went by in uninterrupted silence, the old gent was too full of hopes and fears to indulge in talk. Not an indication of a fish within a mile of us. My companion's uneasiness culminated in laying hold of the line of the great persuader."

"What are you going to do?"

"Pull it up!"

"What for? You haven't half tried it. Wait a spell longer. Give the bass time to come round."

But he wouldn't wait, and kept on hauling the jar up until it was near the surface, when he suddenly stopped, leaned toward me, and hoarsely whispered through his teeth:

"Its name's too big. Its a — fizzle!"

Just then, while I was choking with laughter and he limp with chagrin, the jar lopped to the surface, and then I noticed as the lively little fish swam around the jar in a circle; on one side of it they appeared naturally, like small fish, but on the opposite side, in effect they were magnified into huge fishy monstrosities. That settled the cat-hop in the jar device for a fish decoy. The wary bass must have feared to tackle the little fellows in their double capacity of dainty food and ferocious feeders. I haven't seen the old man since; when he wants to take some more lessons I will turn him over to Jim Pariser or 'Doc' Watt."

### Telescopic Sights.

Telescopic sights are not so popular as they rightly deserve to be, because of the simple fact that their precise functions are not, as a rule, well understood by riflemen. As a recent writer in the *London Field* has aptly suggested, the difficulty chiefly arises from the different purposes served by telescopes, according to the class of rifles on which they are used; and the mistakes which have arisen can be traced to the practice of arguing by analogy, leading to assumptions that the conditions which apply to one kind of work are common to all. The shooter who has a telescope on a .22 rim-fire weapon finds certain improvements in accuracy and alignment which he assumes will be proportionately reproduced, not only when firing at deer-stalking distances, but also at 1000 yds. on the range. The need for sharpshooting in military operations has afforded a useful fillip in the development of telescopes having the necessary mechanical soundness for standing the wear and tear due to the recoil.

If we start with the humblest instance of all, viz., a shooter who uses a .22 calibre rifle for rabbits, not because he finds rim-fire ammunition as good as the more expensive varieties, but because of the reduced noise, we find that the function of the telescope works in the direction of increasing accuracy of alignment and pull off. This is effected because of the optical advantages that arise when the sighting device and the object aimed at are both in one focus. An additional but more gradually operating cause of accurate alignment with telescopes is that the apparent movement of the rifle due to the natural motions of the body is increased in proportion to the magnifying power, and the shooter has therefore an extra inducement to control unsteadiness that would be barely apparent with ordinary sights. It is astonishing how quickly the muscles and nerves learn to obey the teachings of the brain, for at the end of a very few days the movements are reduced, so as to seem about the same as those which are experienced with ordinary sights. At the short distance at which sporting telescopes are used they are clearly not of much service for finding game. Admittedly, they enable one to pick out the details of an animal's anatomy, so that the shooter is more clearly assured that he is aiming at the center of an animal's head when he has the cross-hairs nicely placed thereon than he would be were he aiming over the ordinary foresight, or even through a hollow bead. This facility for picking out the details of a small animal is most marked when the destined quarry is partially obscured by intermediate foliage or vegetation.

In the case of deer-stalking, very much the same kind of influences are at work to increase the effectiveness of the shooting, though in this instance mention must necessarily be made of the great value of a telescope for correcting those defects of vision which would make ordinary sight difficult to use, even with the aid of spectacles. In deer stalking, however, especially at the longer distance, the power of picking out one's beast is a material advantage, because it may frequently happen that only so much of the body is visible as will lend itself to telescopic sighting when ordinary sights would be at a disadvantage. Doubtless the modern telescope is seen to its greatest advantage when applied to deer-stalking rifles, because the cost of this kind of shooting, and the high quality of the weapon used, enable the finest glasses to be chosen, the cost of which is not disproportionate to

the benefits gained. It is almost impossible to get a really high class telescope with properly achromatized lenses for less than \$35 or \$40 before fitting. The subsequent adjustment of the telescope to the rifle, so that the hairs shall be in strict agreement with the barrels is by no means a cheap piece of work. In fact, while on this subject, it would be well to point out that the efficiency of many telescope rifles is sadly marred by the impossibility of correcting various little defects of adjustment which are liable to develop in use. In all these rifles used for short-range work the adjustments for range should be effected by the raising of the cross-hairs within the telescope, the flatness of trajectory over sporting distances enabling a very moderate elevation of the hairs to do all that is necessary to correct the effect of the bullet's fall. It would seem reasonable to expect that the two hairs should be separately mounted, so that a so-called wind allowance could be effected by the separate movement of the vertical hair. Of course, it would be immaterial whether the cross-hairs are independently mounted, the one with vertical and the other with horizontal power of adjustment, or whether the disk carrying the two hairs be movable bodily in the two directions. In either case it would be possible, with a fixed mounting between telescope and barrel, for the sportsman to insure that the bullets are flying truly.

In summarizing the effects of telescopes when used for sporting purposes, it will be seen that their function is almost exclusively limited to improving the accuracy of alignment. With telescopic sights fitted to target rifles for shooting at long ranges this advantage no longer exists. With a well-adjusted pair of match sights the shooter can hold on to his pull so that the amount of error is little more than 3 inches at 1000 yards. A telescope may do better in theory, but in practice it can not, and, if it could, the advantage would be immaterial. The difficulties of giving absolute adjustment in degrees, of maintaining the axis of the lenses in conformity with the markings on the scale, and of protecting the elevation of the glass from disturbance by the recoil, prove that match sights are more perfect as aligning instruments than the best telescopic sights that have ever been made—this, of course, applying only to shooting at long ranges. There is another source of wrong alignment with telescopes, which is known as parallax error, viz., that due to variable position of the eye in reference to the eyepiece, a fault that may be in excess when there is a large field of view. That this error may be a serious one can be demonstrated by any one who will fix a telescopic sight on a tripod. It will be seen that the position of the cross-hairs in relation to the background varies according to whether the eye is looking through the center of the eyepiece, or from a point near the edges of it. When the various errors and losses of adjustment of even the best telescopes are borne in mind, it will be seen that they have points of inferiority when compared with match sights, which are solidly fitted to the rifle, and whose adjustments remain intact after years of use.

The question then arising is as to the use of telescopic sights at all when they are shown to be incapable of improving on match sights as instruments of precise alignment. The answer to this query is that, while the ordinary aperture back sight and hollow bead foresight can be perfectly held on a black bullseye on a white ground, the strain on the eye is too great to allow for using them against obscure backgrounds, where the point to aim at is hardly distinguishable from its surroundings. For military purposes it is necessary to be able to aim a rifle at some particular portion of a piece of country where the distinguishing marks are few. In the case of men, for instance, who may be only occasionally in evidence when viewed through a glass, it is extremely difficult to find with the naked eye the precise spot at which to aim, and even more difficult to get satisfactory alignment thereon. With the telescope, however, the finding and shooting are both effected while the rifle is at the shoulder, and, however small the actual mark fired at may be, the alignment is perfect by comparison with the errors that must occur in range estimation and deflection due to wind. At the ordinary long-range target the match sights must remain pre-eminent, but if the target is distinguishable with the bare eye the telescope can still afford very nearly as perfect alignment as though the target were of regulation pattern. There can never be any likelihood of picking off small marks at long ranges. All that can be expected is that the bullets shall be scattered around a spot known to be occupied, the actual hitting and moral effect to be left to the law of average working in combination with rapid fire. It is in this light alone that the use of telescopes for range should be regarded.

The voracity of striped bass was illustrated one morning last week. Al Wilson and "Old Man" Carroll were trolling for bass in the "straits" over near Tiburon. Carroll hooked onto a 24 pounder, when he gaffed the fish, the fishermen were surprised to see the tail and an inch or two of a smaller fish protruding from the mouth of the big bass. Upon examination it was found that the bass had gorged itself with a shad weighing a pound and a half. Notwithstanding the handicap of the shad in his gullet and mouth the bass had also swallowed about one-third of a No. 7 Wilson spoon and was well hooked upon it.

### Hammocks and Lawn Tents.

Minas Prietas hammocks can not be excelled. They are a hand-made Central American product, woven from a light, tough and strong grass fibre and dyed in bright colors with mineral dyes. They are lasting and comfortable; one can roll them up into a small compass the same way as is done with a silk India shawl. Skinner, the Sporting Goods man, 801 Market Street, has just received a new consignment.

Lawn Umbrellas for outing, camping, prospectors, invalids, for the summer cottage, etc. 8-foot spread, comfortable for two people. Light weight, very strong, variegated or solid colors, put up in five minutes. Just see Skinner about 'em. You'll sure want one when you see it.

Jackson's Napa Soda untangles the feet.

### Java a Sportsman's Paradise.

It has been customary for sportsmen in search of big game to try either Africa or India, but on arriving at the happy hunting ground they have been forced to spend months in the interior, beyond the pale of all civilization.

On a small island in the Malay Archipelago, commonly called Java, or the "Pearl of the East," one may hunt anything, from tiger to quail or snipe, and as the island is only 660 miles long and 135 miles wide, the comforts of life are always at hand. Game abounds in all parts of the island, from the tiger and rhinoceros in the swamps and jungles to wild bulls and roebuck on the mountain sides.

Java might well be called a freak of nature, owing its existence to a series of internal eruptions. A chain of volcanoes extends through the center of the island from one end to the other. These slope gradually to the sea, forming table-lands, deep gorges and vast swamps. The climate varies from hot to cold as one ascends the mountains. The scenery is unusually fine and from April to October there is perpetual sunshine.

The best way to reach the island of Java is by way of a Dutch steamer from Amsterdam, which goes directly to Batavia and takes about three weeks. This gives one a chance to pick up a little Dutch and Malay, the two chief languages in use on the island.

Batavia, the capital, is one of the most beautiful cities in the world, with its wide and well built streets, shaded by magnificent palms and fragrant magnolia trees. On arriving there, if one is in search of tigers, a trip to the north is made, after securing horses and natives, to the little kingdom of Bantam. The journey is easily done in two days, and the country is well worth seeing. Nowhere on the face of the earth can one find such beauty of foliage, in size of leaf and flower, such brilliancy in color or such variety and symmetry in size and species as one sees in the plains and forests of Java. One passes through forests of teak and mahogany trees; of sandalwood, with its delicious scent; one sees ferns the size of gigantic trees, palms in dozens of varieties, camphor trees, fancy woods, both rare and valuable, and flowering shrubs of all colors meet the eye on every hand.

Making headquarters at the town of Bantam, one can get plenty of game within a radius of fifty miles, but here one does not hunt tigers with elephants, as in India, and everything depends on the marksmanship of the hunter. The man who is not an expert shot will have his fill of excitement the first day.

If, on the other hand, rhinoceroses are looked for, a journey southward from Batavia towards the interior, is made, and on reaching some of the numerous villages the man on the lookout for game will doubtless hear of a farmer whose plantation is being ruined by the ravages of these animals, and he will be welcomed with open arms. For the Javanese are kind-hearted and most hospitable, and one is seldom obliged to camp in the bush for more than a few days at a time. The owner of the plantation will summon his neighbors and arrange for a grand hunt.

The plan of attack consists in surrounding the place with men armed with short spears, when the circle is complete the guest, who is often the only man of the party with a gun, is given the honor of killing the beasts. This is a most dangerous and difficult thing to do, for the hide of the rhinoceros is practically bullet-proof, the one vulnerable point being just behind the ear. Should the first shot fail to kill, a scene of wild excitement follows, and woe betide the native who comes in contact with that one short horn.

In the mountainous regions of the island are found herds of stags, wild bulls and boars, roebucks, wolves and panthers. In the lowlands and swamps great crocodiles, measuring from twenty to thirty feet, are to be found. But he who aspires to shoot these reptiles must be a sharpshooter indeed, for they are always ravenous, and have more than once found a well fed hunter most appetizing.

Of feathered game there is plenty—peacocks, ducks, quail, wildcocks, geese, snipe and woodcock, in fact every kind of bird worth shooting and eating.

All this is to be found on a small island about the size of the state of Wisconsin. The people themselves are interesting, and their customs and characters are worth study. Their houses, that is of the middle classes, are made of bamboo and roofed with palm thatch. Their chief attraction is the invariable large veranda, covered with beautiful climbing plants.

The culinary arrangements of the house are simple. At daylight a breakfast of coffee and rice is served. At ten o'clock there is a dinner of fish, fowl and vegetables, with plenty of red pepper, rice and curry, ending as a rule, with a lavish display of fruits of all kinds. Supper is a substantial meal, consisting of salted ducks' eggs, white grubs and a species of worm found in the trees; rice and curry again, to which are added several highly seasoned preparations called sambols.

The flag of the Netherlands floats over the island, and it is the one pearl of great price in the Dutch colonial crown.

The owner of a desirable St. Bernard dog, for which suitable quarters are not available, desires a purchaser by announcement in the classified "ads" on page 15.

### Something for Nothing

The Polk Miller Drug Co., of Richmond, Va., are manufacturers of Sergeant's Dog Remedies, the most popular line of preparations, intended for dogs, on the market today, having received the highest endorsements of the leading dog men and kennel owners in this country and Canada. Read their advertisements appearing in the columns of our journal each issue. The firm referred to will mail you absolutely free, a copy of their celebrated book on Dogs if you will forward 3 cents to cover postage. If your dog is sick, write them, enclosing stamp, and describe the symptoms as accurately as you can. They will cheerfully furnish the best information on the subject without charge. F. W. Braun & Co., of Los Angeles, California, have recently been made distributing agents for Sergeant's Dog Remedies on the Pacific Coast.

### Pneumonia.

Pneumonia is an inflammation of the soft tissue of the lungs. The surface of the body, becoming chilled, forces the blood to the internal organs; they become congested and inflammation follows congestion. The reason the lungs first feel the effects of a chilling of the surface is that they are soft, spongy, delicate organs, with a large blood capacity and as soon as the blood leaves the skin, superficial muscles and extremities, it accumulates in the lungs, because it is the easiest place in which to accumulate. Of course, if the blood does not remain long in the lungs, if circulation is soon equalized and the blood properly redistributed to all parts of the body, no harm is done; but if it remains in the lungs any length of time there is a watery exudate from the blood that works its way into the little air cells, completely filling them, so that they cannot receive their proper supply of oxygen, and the disturbance and distress of the entire system is very marked.

The congestion of the lungs runs through three stages. In the first stage the exudate into the air cells takes place. During this stage, if the ear be placed to the chest, a crackling sound will be heard every time the animal draws its breath. This is caused by the bursting of the little bubbles of exudate in the air cells that have not as yet become fully hardened or completely filled the air passages. This noise is something like that made by walking on crusted snow with a clean boot.

In the second stage the lung is more or less solidified and if the chest be percussed (tapped) with the fingers, a flat, dead sound is given forth. If in the course of a few days to a week or more the respiratory sounds gradually become from day to day more natural, the animal will recover. The crepitant sound heard in the first stage will again return, but it will be more moist and bubbling and not as cracking as before. The animal may be considered on the road to recovery as soon as it is heard. Convalescence is a very slow process and there is always danger of a setback.

If the crepitant sound does not re-occur in the second state, the disease runs into the third stage. The lung now either becomes completely solidified and presents under a post mortem the appearance of a piece of liver, or the lung tissue breaks down, pus is formed and can be heard in the form of coarse, bubbling sounds as it breaks into the air cells, particularly after coughing. The breath is fetid, and in this condition death in most cases is only a matter of a few days.

Causes: As a rule pneumonia is a result of exposure. It generally follows a chill with accompanying shivering and pain. Animals that are in a debilitated and in a low state of health, particularly animals recovering from distemper, are most susceptible to pneumonia.

Symptoms: The animal affected does not lie down, but assumes a sitting position with the forelegs well apart so as to expand the chest as much as possible. The temperature goes to 104 degrees and higher and there is a rapid pulse. In most cases there is a cough. When human beings are afflicted with this disease there is coughed up a rusty, slightly discolored, bloody mucus that is positive evidence of the disease. Dogs cannot relieve themselves by coughing so easily, but if they do cough up mucus such as previously described it is a clear symptom. The nose is hot and dry, and the membranes of the eye are a dark red, showing the blood is not being properly oxygenated. The dog will not eat but is very thirsty. Prostration and weakness are very marked and the breathing becomes faster and faster. If the dog is forced to lie down from weakness it keeps its head extended or tries to support it on some object. As the disease advances, the expression grows most pitiful and anxious. The eyes are sunken, the nostrils dilate, the cough which at the beginning of the disease is husky, becomes soft and loose; the breathing is quick and short and the breath has a sickish odor, that toward the termination of the fatal attack becomes fetid.

Treatment: Careful nursing and attention to hygienic conditions will do more to carry a dog safely through an attack of pneumonia than all the medicine in the druggists' shops and all of the prescriptions that books are burdened with and doctors write.

In the beginning of the attack, when the blood has left the skin and extremities and is loaded upon the lungs and internal organs, the first object is to get the blood properly distributed and relieve the internal congestion. In order to accomplish this the best treatment is to give a stimulant such as whisky and water. This will increase the heart action, thereby forcing the blood through the body with increased energy. Hand-rubbing the body and extremities mechanically forces the blood into the superficial tissues. Blanketing will aid in retaining the bodily heat and heat enlarges and relaxes the blood vessels so that it is easier for the blood to pass through them. This treatment, if promptly resorted to, will ward off or effectively break up and dispel many attacks of pneumonia. If it does not relieve the animal, place the patient in a room that is clean and comfortable, with an even temperature of about sixty degrees and an unfailing supply of fresh air. Blisters and hot applications that are generally recommended do more harm than good, but chest jackets are useful in all diseases of the lung. The chest jacket may be made of two or three layers of flannel blanketing, with an interquilting or padding of wool. It should be shaped so as to extend well upon the chest and well back to the loins. Holes should be cut, through which the front legs may be passed, so that the jacket may be fitted closely and neatly to the parts that need protecting. It can be sewed in position or tied up over the back with strings. Care should be taken that the blanket in no way interferes with the animal's breathing and that it is left loose enough to be comfortable,

its object being to act as an easy, comfortable protector from all variations of temperature.

The food during the first stages and while there is much fever must be light and sloppy. Mutton broths, with well-boiled rice or oatmeal or some of the prepared foods, will prove satisfactory. Give the patient all the cold water it will drink.

If the fever is very high give from two to five grains of quinine, three times a day for two or three days, but do not continue it after the fever is reduced. Egg-nogg or beef tea made up with brandy and fed every two or three hours is very good, and if the patient will eat solid food, raw, lean beef, chopped fine, raw eggs and gelatine may be given.

If there is a bad cough and considerable pain a Dover's powder can be given, as it will afford relief and favor the action of the kidneys. The dose is five to twenty grains, depending upon the age and size of the subject.

When the disease reaches its limit, which will be in about ten days, and the lungs begin to clear up and convalescence is evident, tonics are indicated, such as codliver oil in tablespoonful doses three or four times a day, or the elixir of Calisaya bark, iron and strychnine, a tablespoonful before feeding. During convalescence feed the patient anything it will eat of a nourishing nature.

Great care must be taken not to expose the patient to the open air before recovery is complete, and there is always danger of a setback. Until the animal is fully restored to health it should be taken out only on warm, pleasant days.—*Field and Fancy.*

### Large Dogs.

The size of dogs appears to have a peculiar interest for certain individuals who are continually writing us for information as to which is the biggest dog in the world and which is the most diminutive. The answers to such questions can only be approximate, for a favorite dog can be made to measure or weigh almost anything—according to the discretion and imagination of its owner. Not long ago we were told of a St. Bernard which weighed 17 stones of 14-pound weight. It need scarcely be said that this is as much an exaggeration as were the stories we were told in our youth of Hounds as big as donkeys and "Mastives" a yard in height. There is no doubt that, taken all around, modern dog breeding has increased size and weight immensely. The noble St. Bernard Barry, whose name is so historical, was nothing approaching the weight and size of the best of his race at the present day, and this variety is the biggest of all dogs and the heaviest.

Two or three years ago in Sydney, N. S. W., a specimen appeared which was, it is said, measured to be 36½ inches high at the shoulders. This must be a record so far, but as it weighed less than 180 pounds, there have been and still are far heavier dogs. For instance, the famous Sir Bedevere, which sold for more money in hard cash than any other dog (£1300), stood 33½ inches at the shoulders and weighed 212 pounds. Plinlimmon was another big good dog. It was said that when in America Lord Brassey weighed 234 pounds; he was quite twenty pounds below this before he crossed the Atlantic. Messrs. Inman and Walsley have had and still have some enormous St. Bernards, their Parsifal and Ben Alder being doubtless as tall and heavy as any that we have known. Either of them stood 34½ inches at the shoulders, and in show condition weighed 215 pounds.

By far the heaviest Mastiff we ever heard of was British Lion, a son of the at one time better known Lion, the property of Mr. Dickinson; it weighed 196 pounds. The tallest dog we have seen was a Tibetan Sheep dog which belonged to Wilson, the well known dealer in Oxford street, and afterward went to Lord Rothschild, and eventually to the Paris Zoological Gardens. This dog stood 36 inches at the shoulders, fairly measured, but being rather light in make, did not weigh proportionately. There have been several Irish Wolfhounds from 33 inches to 34 inches, and a few Great Danes have approached the same heights, but in no case have either equaled the St. Bernard in dimensions.

### AT THE TRAPS.

There was a large attendance at the third regular shoot of the Woodland Gun Club, held last Sunday. Arrangements have been made whereby the race track, where the club shot Sunday, will be the permanent shooting ground.

Owing to the fact that a strong wind was blowing there were no big scores made. Louis Walker had the highest average, with 74. In one match of ten targets he broke 10 straight.

Following is a list of the members who shot and their averages:

O. Armstrong 32 J. E. Baird 56 W. M. Browning 52 C. Clanton 43 I. J. R. T. Day 45 5-7, M. M. Diggs 38, H. P. Eakle Jr. 66½, G. Griffin 48 4-7, J. T. Goodin 51 3-7, E. G. Griffin 53½, C. F. Haadsall 55, W. H. Huston 46½, George Jackson 66½, M. Keefer 13½, R. G. Lawson 47 1-7, J. A. Murray 41 3-7, H. McNeil 57 1-7, E. H. Norton 66, I. D. Owen 43½, B. Rhemke 46½, W. E. Osborne 42, L. Sieber 61½, Dr. J. D. Smith 57½, J. J. Ward 22, L. E. Walker 74, O. H. Whitehouse 26½.

A Red Bluff correspondent sent us the following statistics for publication:

At the Northern California inanimate target tournament, held at Red Bluff, on the 13th and 14th inst., Winchester goods carried off the honors. Of the 57 shooters who entered in this tournament, 51 used Winchester Leader shells and 16 Winchester "pump" guns. The longest straight run on the first day of the tournament was made by W. H. Seaver, 36 breaks. Mr. Seaver also made the longest straight run on the second day of the shoot, 33 breaks. He used a Winchester "pump" gun and Winchester Leader shells. Mr. F. M. Newbert, using a Winchester "pump" gun and Winchester Leader shells, captured the Northern California championship cup.

also made the highest general average of the tournament, 133 out of a possible 150.

Mr. Saver made the second highest average, 133 out of 150. The "pump" gun squad, composed of Messrs. Robinson, Saver, Peyton, Upson and Newberry, were the high average squad of the tournament. The men in this squad shot Winchester "pump" guns and Winchester Leader shells.

The six man team championship cup was won by the Dunsmuir team, composed of Messrs. Deyo, Peyton, Rose, Hellman, Walker and Leach. Three of the six men of this team shot Winchester "pump" guns and five of the six Winchester Leader shells.

Of the 36 merchandise prizes shot for during the tournament, 29 were captured by shooters using Winchester Leader shells.

The Union Gun Club blue rock shoot last Sunday was very well attended. D. Daniels was high score in the club race at 25 targets. C. Sylvester was second. M. J. Iverson, "Slade," E. Klevesahl, E. Donohoe, F. Herring and C. A. Muller third. A. Westphal, E. A. Taylor, P. Finnochio, G. Sylvester, C. S. Fish and W. Janssen fourth high guns.

The scores were: H. Hoyt 20, D. Daniels 22, G. Sylvester 16, B. Patrick 13, J. Burns 11, M. J. Iverson 18, P. Hausen 10, C. S. Fish 16, W. J. Cooley 15, S. Leary 11, L. Kincannon 14, C. Sylvester 19, O. Fisher 12, "Slade" 18, W. Janssen 17, F. J. Lewis 13, E. Klevesahl 18, J. H. Clark 9, F. Walpert 13, F. Herring 18, W. Hansen 17, W. S. Robertson 14, A. Westphal 16, E. A. Taylor 16, C. A. Muller 18, Mitchell 15, Shurtleff 7, H. Klevesahl 14, J. Pasani 18, Finnochio 16, Barber 8, Wollam 15, T. Walsh 9, Bell 7, Dr. Hansen 10, Nickels 12, Schnipper 10, Unfred 10, Angonnet 6, Mouze 5, Donohoe 18.

In the medal shoot, target handicap, C. A. Muller won first medal for the month, and F. Herring won the second medal after the shoot-off of a tie with C. S. Fish, C. Sylvester, O. Fischer and H. Klevesahl. The score in the medal shoot were: Hoyt 26 birds, broke 14, Daniels 26-22, Patrick 30-14, Hanson 30-11, W. J. Cooley 28-16, S. Leary 30-16, Kincannon 30-22, C. Sylvester 27-17, O. Fisher 30-17, F. Walpert 30-23, J. Burns 30-21, G. Sylvester 28-23, F. Herring 28-17, M. J. Iverson 28-21, Fish 28-17, E. Klevesahl 28-23, W. Janssen 28-18, J. Pisan 28-21, Finnochio 28-20, H. Klevesahl 20-17, C. A. Muller 28-25, Dr. Hansen 30-13, T. Lewis 30-25, Clark 30-15, Bell 30-11, Nickels 30-15, Tom Walsh 30-16, George Barber 30-13.

It is announced that the sportsmen of Oakland and Alameda have arranged a fine blue rock program to be held at San Leandro on Sunday, July 5th, in conjunction with a grand barbecue. The first event will consist of a fifteen-bird race, open to all. The second will be a fifteen-bird race, and the third will be a handicap race, from twenty to twenty-five birds, high guns. Winners will have a choice of prizes in order of score; ties to be decided by lot.

To reach the trap-shooting grounds take broad-gauge train and transfer to electric cars at twenty-third avenue, or take the narrow-gauge Oakland train and transfer to electric cars at Thirteenth and Webster streets.

The Millwood Gun Club members will shoot at inanimate targets to-morrow on the Mill Valley grounds.

The Union Gun Club will hold a live bird shoot at Ingleside to-morrow. Three events are programmed under distance handicaps. The first event will be at 6 birds, \$2.50 entrance, \$5 added, 3 moneys, high guns. Event No. 2, 12 birds, \$5 entrance, \$10 added, 1 money for every three entries. Third event, 6 birds, \$2.50 entrance, class shooting, 2 moneys, 60 and 40 per cent. Birds will be \$3 per dozen.

The California Wing Club live bird shoot for July will take place on July 26th instead of July 1st. Many of the club members and live bird shooters will be away during the holidays, hence the postponement.

### Marin County Game Laws.

The Marin County Game Protective Association have issued a handy folder which gives an abstract of the state laws and Marin county ordinances relating to the preservation of fish and game in the county.

The officers of the association are: Wm. Barr, President; B. W. Studley, Vice-President; W. E. Robertson, Secretary; A. J. Young, Treasurer and E. B. Martinelli, Attorney.

The association announces that it desires the co-operation of sportsmen and others interested in the protection of the fish and game of the county, in assisting the Game Warden and his deputies in the detection and prosecution of violations of the fish and game laws. The expense of mail, telephone or telegraphic communication to the association, or any of its officers in San Rafael, giving information or particulars in regard to the illegal taking or killing of fish or game, will be borne by the association. It is promised that all offenders will be promptly and vigorously prosecuted.

The abstract referred to above is the following:

Deer season for Marin county for male deer opens July 15th; closes September 15th. Killing of does and spotted fawns illegal at all times; no person to kill more than three deer in any one season. Sale of deer not prohibited.

Doves—Season opens August 1st; closes February 15th, no person to kill or have in his possession more than 50 doves on any one day.

Quail—Season for Marin county opens October 15th; closes January 15th. Trapping and sale of quail pro-

hibited; no person to kill or have in his possession more than 25 quail on any one day.

Ducks—Season opens October 15th; closes February 15th. No person to kill or have in his possession more than 50 ducks on any one day. Shooting of ducks between one-half hour after sundown and one-half hour before sunrise of following morning, prohibited.

Larks and Birds—Killing of meadow larks and song birds prohibited. Meadow larks, however, may be killed when destroying berries, fruits or crops, by owners or tenants of premises.

Robins—Killing of robins prohibited at all times.

Squirrels—Killing of tree squirrels from February 1st to August 1st, prohibited.

Trout—Season opens April 1st; closes November 1st; must be caught with hook and line only.

Steelheads must not be caught between February 1st and April 1st; must not be caught between September 10th and October 16th; must not be caught above tide water between November 1st and April 1st of following year.

Steelheads may be caught in tide water between April 1st and September 10th and between October 16th and February 1st of following year.

Bass—Catching of striped bass less than three pounds in weight prohibited.

Black bass may be caught between July 1st and January 1st.

Spearing of any kind of trout, steelheads or salmon prohibited.

Shooting—Shooting on county roads of Marin county or in cemeteries prohibited.

Dogs—Permitting dogs to hunt, track, trail or pursue deer during close season for deer is a misdemeanor.

### Proposed Changes in Santa Clara County Game Laws.

The Santa Clara Fish and Game Protective Association will submit to the county supervisors the following ordinances for adoption in that county. The proposed ordinances will shorten the season on deer and doves and make a close season on rabbits.

It is conjectured by a number of prominent sportsmen that the proposed laws will be adopted, they are as follows:

Deer—Section 1. Every person within the bounds of Santa Clara county, who, between the 1st day of October and the 15th day of July of the following year, hunts, pursues, takes, kills or destroys or has in his possession, whether taken or killed in said county or shipped into the county from any State, Territory or foreign country, any male deer or deer meat, is guilty of a misdemeanor, and every person found guilty of the violation of this ordinance must be fined in the sum not less than twenty-five dollars nor more than five hundred dollars or be imprisoned in the County Jail of this county not less than twenty-five days nor more than one hundred and fifty days or by both such fine and imprisonment.

Section 2. This ordinance shall take effect and be in force from and after fifteen days after its passage and approval.

Rabbits and Doves—Section 1. Every person within the bounds of Santa Clara county, who, between the fifteenth day of February and the fifteenth day of October of any one year, hunts, pursues, takes, kills or destroys, or has in his possession, whether taken or killed in said county or shipped into the county from any State, Territory or foreign country, any doves, bush rabbits, brush rabbits or cottontail rabbits, is guilty of a misdemeanor, and every person found guilty of the violation of this ordinance must be fined in the sum not less than twenty-five dollars nor more than five hundred dollars, or be imprisoned in the county jail of this county not less than twenty-five days nor more than one hundred and fifty days, or by both such fine and imprisonment.

Sec. 2. This ordinance shall take effect and be in force from and after fifteen days after its passage and approval.

Whatever action is taken there can be no difference in the dove season, which opens the 1st of July, as it is understood that an ordinance has to be passed fifteen days before it can go into effect. If this be the case, the dove season will open July 1st, but such an ordinance affecting the deer law could be adopted in time to lengthen the closed season, for open season on deer does not begin until July 15th.

### Big Basin Notes.

The Big Basin Park Commissioners have reached a conclusion that will be a sore disappointment to many who had hoped to be able to camp in the Big Basin during the present summer. "No camping for this year" is the decision. The reason assigned is danger from fire. There is much underbrush, many tanbark oaks that have been stripped and are inflammable and fallen trees that are as dry as tinder. The public will be allowed to go into the park under the supervision of the guardian, J. H. W. Pilkington, who has been appointed to care for the trees. The fishermen will be permitted to cast lines in the trout pools of the east and west forks of Waddell creek, but tents are shut out until suitable places for camping can be selected and prepared for use in such manner as to do away with danger to the great forest of sempervirens.

The Sempervirens Club has been denied permission to pitch its tents in the Big Basin. The Commissioners, with Governor Pardee, will go into the Big Basin on July 3 and will encamp there for a few days while they determine what is to be done. W. H. Mills was authorized by the commission to have a survey made for a carriage road from the old Sempervirens camp to what is known as the Governor's camp, on Waddell Creek. It is ascertained that this road can be con-

structed at a cost of about \$1800. It will be 9900 feet long. The greatest grade will be 4 per cent.

This will connect up the part of the Big Basin that has become known to tourists. A trail has been made through the forest to the west fork of Waddell creek.

There are many wildcats and California lions in the park. Hunters will be employed to exterminate them. Visitors will not be permitted to carry firearms into the Big Basin. Next year the Basin will be open to the public for camping.

### Save the Birds.

Last Saturday evening a meeting of the Ladies' Song Bird and Forest Protective Association was held at the Ocean House, Santa Cruz. Mrs. Josephine Clifford McCrackin presided. A letter was read from Wm. Dutcher, chairman of the American Ornithological Society, urging that the association be made a State organization. He also requested that articles of Mrs. McCrackin, which have appeared in the *Sentinel*, be sent him. Mrs. McCrackin was instructed to write a series of articles for the BREEDER AND SPORTSMAN. L. Coates, a prominent orchardist, wrote a letter of encouragement, which was read.

Mrs. McCrackin is widely known both as an interesting writer and an enthusiastic champion for the song bird and insectivorous birds. Her articles on this particular subject are founded upon observation and experience in the ways of the feathered creatures of the field, orchard and wildwood, a love of Nature, and an inspiration in the furtherance and success of a movement founded upon humane impulses as well as having the greatest elements of commercial value to the farmer, rancher, orchardist, vinyardist and the citizen at large.

### Fish Lines.

The Fly-Casters will convene at the lakeside in Golden Gate Park this afternoon and to-morrow morning.

Open season for black bass commences next Wednesday, July 1st.

Hon. Henry M. Keller resigned as a member of the State Board of Fish Commissioners several weeks ago. Rumor has it that the Governor's appointee to the vacant place on the board will be a gentleman from Southern California.

The salmon run at Capitola still continues. The fish are not running in any very large numbers as yet; they, however, are coming in steadily. There have been some large catches during the week, but most of the fish have been small, averaging from five to ten pounds apiece. George Mitchell of San Jose made the largest catch of last week by securing twenty. George Christiansen of East San Jose made a catch of nine.

Chief Deputy Charles Vogelsang of the Fish Commission recently held a conference with the officials of the Sacramento Gas Company and the Board of State Prison Directors relative to the construction of a fishway at the big dam across the American River at Folsom. Residents above the dam have complained that they could get no fish, and the meeting was called for the purpose of devising some scheme by which this difficulty might be obviated. It was decided that a fishway 320 feet in length should be built in the solid stone. The improvement will consist of a series of pools cut in the rock in the general shape of the letter V. Salmon, striped bass and shad may thus ascend to the waters above the dam, and the fish-hungry people can angle nearer home.

The Fish Commissioners have arranged for the annual distribution of rainbow, cutthroat and Eastern brook trout fry in the streams and fresh water bodies of the State. In the four hatcheries at Tahoe, Sisson, Verdi and Wawona there are 5,000,000 young trout, and next week the work of distributing them from Siskiyou on the north to the extreme southern end of the State will begin. Already a large list of applications for the fry has been received. This year the Commission will place in some of the large lakes and reservoirs a number of sunfish, a fish first brought here several years ago and planted in the ponds at Sisson. They multiply rapidly and are an excellent pan fish, averaging in weight about three to the pound. They are gamey and will take either fly or bait.

### DOINGS IN DOGDOM.

Woodlawn Kennels' Bull Terrier bitch Newmarket Queen whelped last week a litter of nine puppies (7 dogs) to Ch. Woodcote Wonder. The pups are all white in color and in good condition. Several of them have been placed with a foster mother in the kennels.

Wonder seems to be prepotent and vigorous despite his age of nearly 10 years. Newmarket Jean II. whelped a litter of eleven puppies it will be remembered several weeks ago. The bitch and litter were sold to the owner of Jean's sister.

Phil Fay's Bull Terrier bitch Woodcote Princess was served last week by A. Joseph's Bloomsbury Baron.

Old English Sheepdogs are rather quiet just now, and the incipient boom given them in the spring does not appear to be having a very lasting effect, says *American Stock-keeper*. One very prominent exhibitor's dogs, or most of them, will be on sale before long. While things are so quiet in the East, Californians, thanks to Mr. Stewart, are likely to see a lot of good specimens of the breed, the latest of which come over this month—Country Swell and Rattling Boy.

## THE FARM.

### To Keep the Flies Off.

There are very few little things that make more trouble for the dairyman during the summer season than the fly. This little creature doubtless has a valuable mission as a scavenger; but to all appearances he devotes an undue proportion of his time, by way of recreation or amusement, to the annoyance of all other creatures.

No animal seems to enjoy his presence, but on the other hand is sorely vexed by his oft repeated calls and his persistent attentions. A successful fly repellent would be hailed by every one as a boon for the dairy and a corresponding blessing to the dairyman.

Several remedies have been tried in order to give some protection to cattle, but only two have given results that would justify their use. One is a mixture of creoline or crude carbolic acid, four parts; fish oil, two parts; kerosene, ninety-four parts. When this preparation is thoroughly mixed and applied by means of a brush or spray to the back and sides, it affords considerable protection for several days. Another preparation used last year and which was found to be very effective consists of pulverized resin, two parts; soap shavings, one part; water, one-half part; fish oil, one part; oil of tar, one part; kerosene, one part; water, three parts. Place the resin, fish oil, soap and one-half part of water in a pan and boil until resin and soap are dissolved; then add the remainder of the ingredients and boil for fifteen minutes. Apply lightly to head, back and sides by means of a brush. This mixture has the disadvantage of being rather sticky and should not be used on work horses or animals that are being used. Care should be used in heating these mixtures in order that they may not take fire.

### Feeding Young Lambs.

We would begin feeding lambs as soon as they can be induced to eat the food given. This may be a mixture of wheat, bran, buckwheat middlings or oatmeal, with cotton seed or flax seed meal in the proportion of two parts of each of the first mentioned, and one part of the meals mentioned, between which there is no choice. A good plan is to have a shallow square box large enough to hold all the lambs, and six inches deep—if there are only a few lambs to feed, says *Farmers' Guide*, but if more have shallow, flat troughs four inches wide and two deep. In these scatter thinly the meal and set the troughs in a shed or yard into which the ewes cannot go. This is easily arranged by having a yard or shed separated from the general yard by fence, open at the bottom only ten inches, so that the lambs will creep through to get the feed, but the ewes cannot. Feed twice a day. Scatter the meal thinly over the bottom of the feeding boxes or troughs, so that the lambs may merely nibble slowly; a small quantity—one ounce each—will be enough at first, given twice a day. As the lambs grow the feed may be slowly increased until in a month each may get half a pint daily of the mixed food. To help still further, give each of the ewes half a pint daily of the same mixed feed with the best clover hay, and a pound or so of sliced sugar beets, but in place of these, which are the best for the ewes, if they are not in hand, give sliced turnips. Give water fresh from a well twice a day. Give salt, lightly sprinkled on the feed every day. If you wish to get some lambs of unusual weight and condition teach them to drink fresh cow's milk three times a day.

Do not let other farm duties interfere with the care and milking of the cows.

### The Angora is Getting There.

None of our domestic animals have made such rapid progress into general favor so soon after it has been introduced into the country as has the Angora goat. Only half a century ago, the first Angora was landed in this country as a curiosity, and it has been only within a few years that they have attracted any attention, first for their hair and pelts, and very recently for their meats. They have increased very rapidly in the last few years, and there are now probably between 500,000 and 1,000,000 scattered through the states, Texas having the greatest number.

There was a great prejudice against the meat of the Angora, and while large amount of it was sent to market during the last year or two, it had to be sold as mutton, but soon it was discovered that it was a superior quality of mutton, and now it has come into such high favor that it can be sold for just what it is—Angora meat. The demand for it has grown to such an extent that there will soon be completed a large packing plant in Kansas City for the exclusive use of handling the Angora goats. The plant will be equipped with a tanning outfit, and the skins will be made into robes, mats, etc., the demand for which is large and constantly growing, and which now cannot be supplied.

As the Angora goat can be raised so cheaply, and will live on most anything, is very hardy and is very prolific, we may now see the Angora industry come rapidly to the front, and it bids fair to be one of the most prosperous businesses in which any one can engage.—*American Angora and Stockman*.

Give the boy a calf, teach him to feed it, care for it, shelter it and let him feel when it becomes profitable that he is earning what he receives.

Strike!—if they don't give you Jackson's Napa Soda when you ask for it.

### WANTED.

A PAIR OF 1050 OR 1100 POUND, 15.3 HANDS, well matched Roadsters; solid color, full manes and tails. DR. P. VILLIOTTE, Vet., Lamenasa and Foot Specialist, 321 Grant Avenue, San Francisco.

613 MARKET STREET

IN THE SUPERIOR COURT OF THE CITY and county of San Francisco, State of California

In the Matter of the Application of JOSEPH ALBERT CRACKBON, for Change of Name.

The petition of Joseph Albert Crackbon, respectfully shows:

That he is over the age of twenty-one years; that he was born in the City of Sacramento, State of California, and has ever since resided in the State of California, and does now reside at the City and County of San Francisco, State of California.

The petitioner's father is dead, but petitioner's mother, Ada B. Crackbon, is alive and resides at Sacramento, and petitioner's other near relatives are Mrs. Emma Pierce and Mrs. M. W. Wilder, both residing at Sacramento, California, and L. S. Crackbon, petitioner's brother, residing at San Francisco, California.

That petitioner desires to change his name to Joseph Albert Whitney, the name Whitney being petitioner's grandmother's maiden name.

That the reasons your petitioner desires to change his name are: that the name Crackbon is made the subject of ridicule and punning to such an extent as to render the lives of petitioner and his children extremely disagreeable and unpleasant.

WHEREFORE, petitioner prays that this Court make an order fixing the time and place of hearing this petition and directing publication thereof, and that upon the hearing of said petition, this Court make an order changing petitioner's name from Joseph Albert Crackbon to Joseph Albert Whitney.

Dated June 12, 1903

JOSEPH ALBERT CRACKBON, Petitioner.

WM. H. CHAPMAN, Attorney for Petitioner.

Upon reading the foregoing petition, it is hereby ORDERED, that Monday, the 13th day of July, A. D. 1903, at 10 o'clock in the forenoon, be and the same is hereby appointed as the time, and that the Court-Room of Department No. two, of the said Superior Court at the City Hall, in the City and County of San Francisco, State of California, be and is hereby appointed as the place for hearing the application contained in said petition.

AND IT IS FURTHER ORDERED, that publication of said petition be made once a week for four successive weeks in some newspaper, printed in this City and County.

Dated June 17, 1903.

FRANK J. MURASIN, Judge of the Superior Court.

Endorsed: Filed June 17, 1903

ALBERT B. MAHONY, C. L.

By JOSEPH RIORDAN, Deputy.

## Prevention of Hog Cholera.

The following regulations have been issued by the Department of Agriculture at Washington, D. C., for the prevention of hog cholera:

"First—Swine that are not affected with hog cholera and have not been in contact with a diseased animal, and have not been in sties, pens or other premises where they may have been exposed to the contagion of the disease, may be shipped without restriction, other than may be imposed by the authorities of the state or territory to which destined.

"Second—No swine so affected or exposed shall be offered for transportation or transported out of any state, territory, or the District of Columbia, or from or into any public stockyards, except as herein provided. It is required of all persons intending to ship swine to ascertain that the animals are not affected with and have not been exposed to the contagion of either of said diseases before offering them for shipment.

"Third—Public stockyards shall be considered as infected, and no swine shall be shipped therefrom for feeding or stocking purposes. No affected swine shall be

allowed to be shipped out of the stock yards, but shall be slaughtered subject to condemnation on post-mortem inspection; and all animals in a certain lot or shipment shall be considered as affected when one or more of them show evidence of the disease. Swine that are not affected and have been merely exposed by being in the yards may be shipped for immediate slaughter. Where, however, a part of the yards is set apart for the reception of uninfected shipments of swine and is kept free of infection, swine may be shipped from such part without restriction. Should such part be contaminated by the introduction of affected animals, said animals shall be immediately removed therefrom, and the chutes, alleys and pens used by them thoroughly cleaned and disinfected.

"Fourth—Cars and other vehicles that have contained affected or exposed swine shall be cleaned and disinfected as soon as possible after unloading. Cars shall not be removed before the inspector has had time to ascertain the condition of the animals and to give notice that the cars must be cleaned and disinfected.

"Fifth—Cleaning and disinfection shall be done by first removing all litter and manure, and then saturating the interior

surfaces of the cars, and the woodwork, flooring and ground of the chutes, alleys and pens with a 5 per cent solution of crude carbolic acid in water, with sufficient lime to show where it has been applied.

"Sixth—Violation of this order is punishable by a fine of not less than one hundred dollars nor more than one thousand dollars, or by imprisonment not exceeding one year, or by both fine and imprisonment."

When cows chew everything they can get it is an indication of some element lacking in their food. They may want salt or lime. A spoonful or two of bone meal in their ration daily will cure the latter.

The value of nearly all crops is much increased when cut and fed, rather than pastured. However, the green pasture is enjoyed much more by the cow, and should have it at the proper season.

The average price of foreign butter in the London market last year was 23 cents—20 cents for Russian and 24½ for Danish. American butter brought 20½ cents. Hence we don't ship there.

It has been definitely ascertained that it is not the legumes that gather nitrogen from the atmosphere, but little bacteria that do the gathering and store it in nodules which they form on the roots of clover, alfalfa, cow-peas, etc. If the soil contains none of these bacteria, these plants which are supposed to enrich it, then the tendency of leguminous crops is like that of other crops, to exhaust the soil. The Department of Agriculture has devised a substance containing these bacteria and put up in cake like compressed yeast. One of these dissolved in a bucket of water and mixed with earth, and the earth thus inoculated sown broadcast over the field supplies the defect. These legumes form the host and the bacteria secures the nitrogen. This is one of the many achievements of modern science as applied to farming.

However much a cow's udder may become distended, it is seldom she should be milked before calving.

Ten drops of laudanum in the milk fed to calves, will usually cure the scours.

Jackson's Napa Soda cleanses the stomach and renders the eye clear.

# "SAVE-THE-HORSE"

—TRADE MARK—

## .....SPAVIN CURE.....

Horse 13 Years Old With Spavin 7 or 8 Years Old Made Sound  
4 Bottles CURES 5 Cases.

### Received by Registered Mail.

NORTH CHICAGO, ILL., May 11, 1903.

Enclosed find \$5 for one more bottle of "Save-the-Horse." I have used four bottles and cured five cases with your remedy. I bought a colt the other day with two soft curbs which I hope to remove with this bottle.

WILLIAM C. ANDERSON, D. V. S.,  
Office—Goss House, North Chicago, Ill.

On receipt of the above we wrote and asked Mr. Anderson if he would kindly favor us with a detailed report of each case.

No stronger facts can be contributed to advance this humane cause than letters like the following.

Note the usual method of terrific torture resorted to now eliminated by treatment with "Save-the-Horse."

NORTH CHICAGO, ILL., May 18, 1903.

Troy Chemical Co., Troy, N. Y.

Gentlemen:—Here is a report of the five cases that I have treated with your "Save-the-Horse" spavin cure.

The first was Chester Chief, thirteen years old, bred and raised by George Hagen of Waukegan. When three years old he was broke and driven for two years by John Swanbrough. Late in the season of the second year he developed a large bone spavin on his left leg, and he was put into the hands of one of the foremost veterinarians in the country. He fired and blistered him. Instead of benefitting the horse, he became so very lame that driving him was out of the question. Hagen became disgusted and sold him. The purchaser put him into my hands, and I tried — — —. I put it on good and plenty and let it remain all night, and in the morning a good big hole was bored out in the spavin. I healed the sore, but the horse was still dead lame. I then mixed equal parts of crystal iodine, corrosive sublimate, quicksilver and lard and applied a little every day for five days. It gave the horse great pain, and the entire leg swelled badly. The whole spavin cracked around and looked

as though it would drop out, but it did not. I healed the place up and sent the horse home as lame as ever. There was nothing more done until about five months ago. I then took charge of him again and began using your preparation, "Save-the-Horse." Four weeks' treatment seemed to make him a great deal lamer; bunch became very tender and sore, and remained so for about a week, then he began to get better. I kept right on treating him, and to-day he goes perfectly sound and can trot in thirty, which is as fast as he ever could trot.

The other four—one was a bog spavin and thoroughpin combined. The horse is a four-year-old, a Clyde, and the formation was about a year old and yielded to two months' treatment, when the entire bunch and lameness disappeared.

The others were ringbones on the hind feet. They were not large, but colts were dead lame. Lameness disappeared in about twenty days in each case, but it took me nearly three months to get the bunches down. They were large, heavy colts, a cross between the Hambletonian and Clyde. I used four bottles to effect these five cures.

W. C. ANDERSON, D. V. S.

P. S.—I have been treating spavins for forty years, and "Save-the-Horse" is head and shoulders above anything I have ever tried.

I cured up a case of grease heel of three years' standing with your Veterinary Pixine. I tried to cure this case a year ago, but could do nothing with it. The legs were badly swollen and cracked, a nasty, gummy pusoozing out, legs wet all the time. I told Dr. Colwell I intended to cure it, and he asked if I were going crazy. He said there was not a man living who was able to heal up those legs. I showed him the horse last week, and he examined him and pronounced him sound. He said, "You have discovered the right thing." I took a flannel rag about four feet long and saturated the middle of it with nitric acid, took hold of each end of it and sawed it right into these cracks. Then I went ahead with Veterinary Pixine, according to your directions, and in two months and a half I had the horse well. I burned it several times more by touching bad places with a feather dipped in nitric acid. He is a draught horse, and was owned by Judge Upton of Waukegan. He sold him five months ago for \$30, but to-day he could not be bought for \$150.

## "SAVE-THE-HORSE" CURES WITHOUT SCAR, BLEMISH OR LOSS OF HAIR.

"Save-the-Horse" can be applied at any time, anywhere, any place, and in all conditions and extremes of weather. Horses may be worked as usual with shin or ankle boots, as no harm can possibly result from scalding or destruction of hair.

**\$5.00 PER BOTTLE.**

Written guarantee with every bottle given under our seal and signature, constructed solely to satisfy and protect you fully. Need of second bottle is almost improbable, except in rarest of cases. Copy of booklet and guarantee sent upon application.

### POSITIVELY AND PERMANENTLY CURES

Bone and Bog Spavin, Thoroughpin, Ringbone (except low ringbone), Curb, Splint, Capped Hock, Windpuff, Shoe Boil, Weak and Sprained Tendons and all lameness.

If you have a case different than described in our booklet or advertising we will advise you frankly as to the possibility of the remedy effecting a cure. Give explicit particulars. Give the veterinarian's diagnosis, if he is competent. Inform us fully as to the age, development, location and swellings, lameness, action and previous treatment.

TROY CHEMICAL CO., Manufacturers, TROY, N. Y.

D. E. NEWELL, Pacific Coast Agent, 519 MISSION ST., SAN FRANCISCO, CAL.

### Warring with Weeds.

There is no royal road to weedless farming. Following are some of the means of keeping weeds in check as summarized from Bailey's "Principles of Vegetable Gardening":

Practice rotation; keep ahead of the weeds. Certain weeds follow certain crops. When these weeds become serious change the crop.

Change the method of tillage. If a weed persists, try deeper or shallower plowing, or a different kind of harrow or cultivator, or till at different times and seasons.

Harrow the land frequently when it is in fallow or is waiting for a crop. Harrow it, if possible, after seeding and before the plants are high enough to be broken by the implement. Potatoes, corn and other things can be harrowed after they are several inches high; and sometimes the land may be harrowed before the plants are up.

Practice frequent tillage with light surface-working tools throughout the season. This is hard on weeds and does the crop good.

Pull or hoe out stray weeds that escape the wheel tools.

Clean the land as soon as the crop is harvested; and if the land lies open in the fall, till it occasionally. Many persons keep their premises scrupulously clean in the early season but let them run wild late in the fall, and thus is the land seeded for the following year.

Use clean seed, particularly of crops that are sown broadcast, and which, therefore, do not admit tillage.

Do not let the weeds go to seed on the manure piles, in the fence corners, and along the highway.

Avoid coarse and raw stable manure, particularly if it is suspected of harboring bad company. Commercial fertilizers may be used for a time on foul land.

Sheep and pigs sometimes can be employed to clean the weeds from foul and fallow land. Land infested with Jerusalem artichokes is readily cleaned if hogs are turned in.

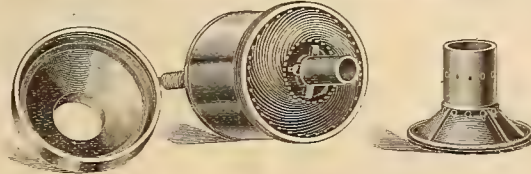

Induce your neighbor to keep his land as clean as you keep yours.

Rank pigweeds and their like are a compliment to a man's soil. Land that will not grow weeds will not grow crops, for crops are only those particular kinds of weeds a man wants to raise. Weeds have taught us the lesson of good tillage. There is no indication that they intend to remit their efforts in our behalf.

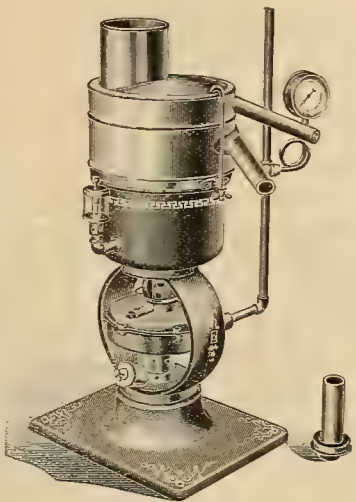

Separator milk will grow good calves, but sometimes they will not fatten on it. A little flour or some other starchy food added will make them fat.

The Continental Creamery Company of Topeka, Kansas, has contracted to furnish the United States Navy 400,000 pounds of butter at 28 cents a pound. It is to be packed in tins of three pounds each, hermetically sealed and wrapped in blue paper, packed in iron-bound boxes, in sawdust. The contract amounts to \$112,000.

Where difficulty is found in feeding skimmed milk to calves, the trouble often results from letting the milk stand too long before it is fed—it becomes sour or stale.

### AND STILL ANOTHER.

SACRAMENTO, Cal., June 13, 1903.  
BAKER & HAMILTON, San Francisco, Cal.

Gentlemen:—We do not hesitate to say that the SIMPLEX SEPARATOR you placed in our creamery, on trial, has come up to our fullest expectations. We are very much pleased with the results of this machine.

Having the capacity of 3500 lbs. of milk per hour, it is easy and simple to clean, while it skims thoroughly up to its full capacity. We have found no other machine superior to it in any respect, and would be pleased to recommend it to any one desiring an up-to-date Separator.

Yours respectfully,  
BARTON-FISHER CREAMERY,  
S. N. NASH, Mgr.

Why spend your time and money with an old style, complicated, hard-to-clean Separator when the most up-to-date Creamery men are securing the above results. Kindly remember that the SIMPLEX SEPARATORS are furnished on trial, and we will let YOU decide whether you keep it or send it back.

Send for complete printed and new 1903 Creamery Catalogue.

Manager, **WALTER SEALY.**

## NUSHAGAK

**Reg. No. 25939**

Black Horse 15-2½ hands. Foaled 1890.

BRED BY WM. CORBETT.

Sire, Sable Wilkes 2:18, sire of Oro Wilkes 2:11, Sable Francis 2:15½, Sabina 2:15½, Sabledale 2:18, dam of Fiducia 2:20, dam of Mary Celeste (at 3 years) 2:17½ by Director, sire of Directum 2:24, Direct 2:26½, Nathan Straus 2:03½, Direction 2:04, etc. Second dam by Reavis' Blackbird 2:23, sire of Mamie Griffin 2:12, Vic H 2:13½, etc. Third dam by Lancet, son of McCracken's Blackhawk 7:07.

NUSHAGAK has only got eighteen or twenty foals older than yearlings; of that number only three have ever had a full season's training, namely, Aristo (3) 2:17½, Majella B. (2) 2:29 (trial at 4 years) 2:13½, and The Boquet (trial at 3 years) 2:21. His son Aristo (at 3 years) 2:17½ took sick with distemper the latter part of July and from the seventh day of August until the twenty-ninth had practically no work, yet he easily beat the best field of colts that ever started in the Occident Stake.

NUSHAGAK will make the Season of 1903 at Walnut Grove Stock Farm, commencing February 15th and ending July 1st.

Limited to 40 outside mares, at \$50 the Season,

with usual return privilege. Money due at time of service or upon removal of mare. Every care taken to prevent accidents or escapes, but no liability assumed. First-class pasturage for mares, \$3 per month; no barbed wire. Address

**WALNUT GROVE STOCK FARM,**  
Walnut Grove, Cal.

Mares can be shipped direct to Walnut Grove by Southern Pacific, or California Transportation Company's steamers, from San Francisco or Sacramento. Mares from a distance can be shipped in care of Morshead's Stable in San Francisco or Wm. Irvine's Stable in Sacramento, and will be reshipped to Walnut Grove.

**Pedigrees Tabulated** and type written ready for framing  
Write for prices. **BREEDER AND SPORTSMAN,** 36 Geary street, San Francisco, Cal.

## SIDNEY DILLON 23157

Sire of DOLLY DILLON 2:07 (the Fastest Mare of 1901),  
B. S. DILLON 2:25 and CAPTIVITY 2:28 1-2.

**Santa Rosa Stock Farm**  
SANTA ROSA, CAL.

SIDNEY DILLON was sired by Sidney 2:19½; dam Venus (dam of Adonis 2:11½, Leah 2:24½, Cupid 2:18 (sire of Venus II. 2:11½), Psyche 2:16½ and Lottie Parks 2:16½, and she was also dam of Juno, the dam of Mercury 2:21 and Ida 2:30) by Venture 2:27½, sire of dam of Directum 2:05½; second dam s. t. b. by Algerine, son of Whipple's Hambletonian. SIDNEY DILLON is a model of symmetry and imparts his grand individuality, inherent speed and excellent disposition to all his progeny. Best of care given mares, but no responsibility for accidents or escapes. Usual return privileges if horse is still in my possession. For pasturage and other information regarding shipment of mares address

**FRANK TURNER,**  
Supt Santa Rosa Stock Farm,  
SANTA ROSA, CAL.

Or Ira Pierce,  
728 Montgomery St., S. F.

**CURBS, SPLINTS, SPAVINS, WINDPUFFS,**  
—and all enlargements, absolutely removed by—

## QUINN'S OINTMENT.

It has the unqualified endorsement of our leading horsemen and veterinarians.

Mr. C. E. DINEHART, Cashier State Bank, Clayton, Minn., says:  
"One bottle cured a very bad case of blood spavin on a mare for which I have since been offered \$800. I would not be without it if it cost \$5.00 a bottle."  
We have hundreds of such testimonials.

Price \$1.00 per package. Ask your Druggist for it. If he does not keep it, we will send prepaid on receipt of price.  
Address **W. E. EDDY & CO., Whitehall, N. Y.**

## MANHATTAN STOCK FOOD.

**RED BALL BRAND.**

Positively Cures Colic, Scouring and Indigestion.

**C. P. KERTELL, Manager.**

Awarded Gold Medal  
At California State Fair 1892.  
Every horse owner who values his stock should constantly have a supply of it on hand. It improves and keeps stock in the pink of condition.  
**Manhattan Food Co**  
1253 Folsom St., San Francisco.  
Ask your grocers or dealers for it.

## Limonero=3=2:15 3=4.

(A Great Sire of Beauty and Early Speed.)

LIMONERO 2:15½, bred at the Palo Alto Stock Farm, is conceded by all who have seen him to be one of the best stallions standing for service in California. He is a magnificent dark bay horse, with no marks, and in breeding, class and individuality ranks with any of them. He has 35 two and three year olds that have never been trained. All of them are handsome, big bays and browns. From their appearance and the predictions of the best judges many of them are sure to be good race horses with every prospect of some star performers. A number of these youngsters are to be seen at the Los Angeles track.

LIMONERO 2:15½ got his record as a three-year-old in the fourth heat of a six-heat race for a \$5000 purse which he won at Lexington, beating a field of six of the greatest three-year-olds of that year, including the great Expressive, B. B. P., Baron Dillon, Axinite and Futurity.

LIMONERO 2:15½ will make the season of 1903 at the

**AGRICULTURAL PARK, LOS ANGELES.**

Fee \$25, for a Limited Number of Good Mares.

Excellent pasturage and the best of care taken of mares at reasonable rates, but no responsibility assumed for accidents or escapes. Mares should be shipped to University Station, Los Angeles Co., Cal., in caré of

**HARRISON G. ARMS.**

Owner.

**J. H. WILLIAMS,**

University Station, Los Angeles, Cal.

THE CHAMPION SIRE OF EARLY AND EXTREME SPEED.

## NUTWOOD WILKES.

He is the only Stallion that ever produced two three-year-olds in one season with records of 2:12 and 2:12½ respectively. Who Is It, ex-champion 100-year-old gelding of the world, reduced his record to 2:10¾. John A. Moerron 2: 5¼ (1 1¼ as a three-year-old) is the fastest trotter of all the famous tribes George Wilkes.

NUTWOOD WILKES will make the Season of 1903 at the

## CAMPBELL'S EMOLLIO IODOFORM GALL CURE

For GALL BACKS and SHOULDERS, CRUPPER  
SORES and SADDLE GALLS there is none  
superior.

The horse CAN BE WORKED AS USUAL  
For BARBED WIRE CUTS, CALES, SCRATCHES,  
BLOOD POISONED SORES and ABRASIONS  
OF THE SKIN it has no equal.

It is very adhesive and easily applied to a watery  
as well as a dry sore.  
Its use will absolutely prevent BLOOD POISON-  
ING. In this respect there is no Gall Cure offered  
which can justly even claim to be a competitor.  
We placed it on the market relying wholly on its  
merit for success, and notwithstanding the fact that  
comparatively little has been done in the way of  
advertising the sales of 1900 were 100 per cent greater  
than the aggregate sales of Gall Cure preceding  
that year. This increase was entirely due to its  
MERITS, and from it we feel justified in saying that  
IT IS THE GALL CURE OF THE 20TH CENTURY.  
It is a quick and sure cure for those troublesome  
skin cracks under the fetlock which injure and often  
lay up race horses.

All Trainers Should Have It in Their Stables

PRICE:—3 OZ. BOX, 25c.; 1 LB. BOX, \$1.00.

Read our "ad." on Campbell's Horse Foot Remedy in next issue of this paper.
